Project 86-D-122, structural upgrade of existing plutonium facilities, Rocky Flats Plant, Golden, Colorado, $2,420,000, for a total project authorization of $5,420,000.

Project 86-D-123, environmental hazards elimination, various locations, $15,000,000, for a total project authorization of $23,700,000.

Project 86-D-124, safeguards and site security upgrading, Phase II, Mound Plant, Miamisburg, Ohio, $1,880,000, for a total project authorization of $4,880,000.

Project 86-D-125, safeguards and site security upgrade, Phase II, Pantex Plant, Amarillo, Texas, $8,410,000, for a total project authorization of $9,910,000.

Project 86-D-130, tritium loading facility replacement, Savannah River Plant, Aiken, South Carolina, $29,700,000, for a total project authorization of $34,700,000.

Project 85-D-102, nuclear weapons research, development, and testing facilities revitalization, Phase I, various locations, $14,085,000, for a total project authorization of $114,885,000.

Project 85-D-103, safeguards and security enhancements, Lawrence Livermore National Laboratory and Sandia National Laboratories, Livermore, California, $6,500,000, for a total project authorization of $27,600,000.

Project 85-D-105, combined device assembly facility, Nevada Test Site, Las Vegas, Nevada, $7,400,000, for a total project authorization of $22,000,000.

Project 85-D-106, hardened engineering test building, Lawrence Livermore National Laboratory, Livermore, California, $330,000, for a total project authorization of $3,030,000.

Project 85-D-112, enriched uranium recovery improvements, Y-12 Plant, Oak Ridge, Tennessee, $19,000,000, for a total project authorization of $38,800,000.

Project 85-D-113, power plant and steam distribution system, Pantex Plant, Amarillo, Texas, $1,790,000, for a total project authorization of $24,790,000.

Project 85-D-115, renovate plutonium building utility systems, Rocky Flats Plant, Golden, Colorado, $13,440,000, for a total project authorization of $34,040,000.

Project 85-D-121, air and water pollution control facilities, Y-12 Plant, Oak Ridge, Tennessee, $9,160,000, for a total project authorization of $28,160,000.

Project 85-D-125, tactical bomb production facilities, various locations, $12,800,000, for a total project authorization of $28,800,000.

Project 84-D-102, radiation-hardened integrated circuit laboratory, Sandia National Laboratories, Albuquerque, New Mexico, $3,000,000, for a total project authorization of $40,500,000.

Project 84-D-107, nuclear testing facilities revitalization, various locations, $13,300,000, for a total project authorization of $79,240,000.

Project 84-D-112, Trident II warhead production facilities, various locations, $14,500,000, for a total project authorization of $155,200,000.

Project 84-D-124, environmental improvements, Y-12 Plant, Oak Ridge, Tennessee, $9,280,000, for a total authorization of $38,280,000.

Project 84-D-211, safeguards and site security upgrading, Y-12 Plant, Oak Ridge, Tennessee, $27,220,000, for a total project authorization of $40,220,000.

Project 82-D-107, utilities and equipment restoration, replacement, and upgrade, Phase III, various locations, $97,904,000, for a total project authorization of $838,304,000.

Project 82-D-144, simulation technology laboratory, Sandia National Laboratories, Albuquerque, New Mexico, $6,000,000, for a total project authorization of $40,000,000.

(2) For materials production:

Project 87-D-146, general plant projects, various locations, $31,980,000.

Project 87-D-149, reduced chemical discharges to process sewers, Richland, Washington, $3,150,000.

Project 87-D-150, radioactive liquid effluent treatment facility, partial design only, Richland, Washington, $4,000,000.

Project 87-D-152, environmental protection plantwide, Savannah River, South Carolina, $1,500,000.

Project 87-D-159, environmental, health, and safety improvements, Phase I, Feed Materials Production Center, Fernald, Ohio, $10,000,000.

Project 86-D-149, productivity retention program, Phase I and II, various locations, $42,625,000, for a total project authorization of $66,825,000.

Project 86-D-150, in-core neutron monitoring system, N reactor, Richland, Washington, $2,760,000, for a total project authorization of $7,220,000.

Project 86-D-151, PUREX electrical system upgrade, Richland, Washington, $2,480,000, for a total project authorization of $4,980,000.

Project 86-D-152, reactor electrical distribution system, Savannah River, South Carolina, $5,410,000, for a total project authorization of $7,410,000.

Project 86-D-153, additional line III furnace, Savannah River, South Carolina, $7,605,000, for a total project authorization of $9,105,000.

Project 86-D-154, effluent treatment facility, Savannah River, South Carolina, $15,650,000, for a total project authorization of $18,150,000.

Project 86-D-156, plantwide safeguards systems, Savannah River, South Carolina, $8,550,000, for a total project authorization of $11,550,000.

Project 85-D-139, fuel processing restoration, Idaho Fuels Processing Facility, Idaho National Engineering Laboratory, Idaho, $32,430,000, for a total project authorization of $54,430,000.

Project 85-D-140, productivity and radiological improvements, Feed Materials Production Center, Fernald, Ohio, $21,000,000, for a total project authorization of $39,000,000.

Project 85-D-145, fuel production facility, Savannah River, South Carolina, $27,500,000, for a total project authorization of $53,300,000.

Project 84-D-134, safeguards and security improvements, plantwide, Savannah River, South Carolina, $7,515,000, for a total project authorization of $34,415,000.

Project 84-D-135, process facility modifications, Richland, Washington, $24,475,000, for a total project authorization of $56,975,000.

Project 84-D-136, enriched uranium conversion facility modifications, Y-12 Plant, Oak Ridge, Tennessee, $1,000,000, for a total project authorization of $20,600,000.

Project 82-D-124, restoration of production capabilities, Phases II, III, IV, and V, various locations, $3,511,000, for a total project authorization of $352,045,000.

(3) For defense waste and byproducts management:

Project 87-D-171, general plant projects, interim waste operations and long-term waste management technology, various locations, $24,535,000.

Project 87-D-172, WESF K-3 filter upgrade, Richland, Washington, $500,000.

Project 87-D-173, 242-A evaporator crystallizer upgrade, Richland, Washington, $2,800,000.

Project 87-D-174, 241-AQ tank farm, Richland, Washington, $2,100,000.

Project 87-D-175, steam system rehabilitation, Phase I, Richland, Washington, $900,000.

Project 87-D-177, test reactor area liquid radioactive waste cleanup system, Phase III, Idaho National Engineering Laboratory, Idaho, $700,000.

Project 87-D-180, burial ground expansion, Savannah River, South Carolina, $2,000,000.

Project 87-D-181, diversion box and pump pit containment buildings, Savannah River, South Carolina, $960,000.

Project 86-D-172, B-plant F-filter, Richland, Washington, $2,949,000, for a total project authorization of $3,949,000.

Project 86-D-174, low-level waste processing and shipping system, Feed Materials Production Center, Fernald, Ohio, $8,072,000, for a total authorization of $10,572,000.

Project 86-D-175, Idaho National Engineering Laboratory security upgrade, Idaho National Engineering Laboratory, Idaho, $5,258,000, for a total project authorization of $7,258,000.

Project 85-D-158, central warehouse upgrade, Richland, Washington, $1,044,000, for a total project authorization of $6,744,000.

Project 85-D-159, new waste transfer facilities, Savannah River, South Carolina, $4,118,000, for a total project authorization of $24,118,000.

Project 85-D-160, test reactor area security system upgrade, Idaho National Engineering Laboratory, Idaho, $2,703,000, for a total project authorization of $6,953,000.

Project 81-T-105, defense waste processing facility, Savannah River, South Carolina, $123,967,000, for a total project authorization of $721,467,000.

(4) For naval reactors development:

Project 87-N-101, general plant projects, various locations, $4,800,000.

Project 87-N-102, Kesselring site facilities upgrade, Knolls Atomic Power Laboratory, West Milton, New York, $5,000,000.

Project 87-N-103, computation laboratory addition, Bettis Atomic Power Laboratory, West Mifflin, Pennsylvania, $2,300,000.

(5) For verification and control technology:

Project 85-D-171, Space Science Laboratory, Los Alamos, New Mexico, $2,000,000, for a total project authorization of $7,500,000.

(6) For capital equipment not related to construction:

(A) For weapons activities, $278,000,000.

(B) For the defense inertial confinement fusion program, $9,000,000.

(C) For materials production, $107,200,000.

(D) For defense waste and byproducts management, $35,505,000.

(E) For verification and control technology, $4,200,000.

(F) For nuclear safeguards and security, $4,800,000.

(G) For naval reactors development, $49,200,000.

(b) REDUCTION IN AMOUNT FOR PRIOR PROJECT.—The amount previously authorized for Project 84-D-113, Antisubmarine Warfare/Standoff Weapon Warhead production facilities, various locations, is hereby reduced by $5,000,0000, for a total project authorization of $5,000,000. Not more than $5,000,000 of the funds authorized for such project in fiscal year 1986 may be obligated or expended for such project.

SEC. 3113. AUTHORIZATION FOR STRATEGIC DEFENSE INITIATIVE ACTIVITIES

Of the amounts authorized to be appropriated in sections 3111 and 3112, $317,000,000 is authorized for programs, projects, and activities of the Department of Energy relating to the Strategic Defense Initiative.

PART B—RECURRING GENERAL PROVISIONS

SEC. 3121. REPROGRAMMING

(a) NOTICE TO CONGRESS.—(1) Except as otherwise provided in this title—

(1) no amount appropriated pursuant to this title may be used for any program in excess of 105 percent of the amount authorized for that program by this title or $10,000,000 more than the amount authorized for that program by this title, whichever is the lesser, and

(2) no amount appropriated pursuant to this title may be used for any program which has not been presented to, or requested of, the Congress,

unless a period of 30 calendar days (not including any day on which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after receipt by the Committees on Armed Services and Appropriations of the Senate and House of Representatives of notice from the Secretary of Energy (hereinafter in this part referred to as the "Secretary") containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action, or unless each such committee before the expiration of such period has transmitted to the Secretary written notice to the effect that such committee has no objection to the proposed action.

(b) LIMITATION ON AMOUNT OBLIGATED.—In no event may the total amount of funds obligated pursuant to this title exceed the total amount authorized to be appropriated by this title.

SEC. 3122. LIMITS ON GENERAL PLANT PROJECTS

(a) IN GENERAL.—The Secretary may carry out any construction project under the general plant projects provisions authorized by this title if the total estimated cost of the project does not exceed $1,200,000.

(b) REPORT TO CONGRESS.—If, at any time during the construction of any general plant project authorized by this title, the estimated cost of the project is revised because of unforeseen cost variations and the revised cost of the project exceeds $1,200,000, the Secretary shall immediately furnish to the appropriate committees of Congress a complete report explaining the reasons for the cost variation.

SEC. 3123. LIMITS ON CONSTRUCTION PROJECTS

(a) IN GENERAL.—Whenever the current estimated cost of a construction project which is authorized by section 3112 of this title, or which is in support of national security programs of the Department of Energy and was authorized by any previous Act, exceeds by more than 25 percent the higher of—

(1) the amount authorized for the project; or

(2) the amount of the total estimated cost for the project as shown in the most recent budget justification data submitted to Congress,

construction may not be started or additional obligations incurred in connection with the project above the total estimated cost, as the case may be, unless a period of 30 calendar days (not including any day on which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after receipt by the Committees on Armed Services and Appropriations of the Senate and House of Representatives of notice from the Secretary of Energy containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action, or unless each such committee before the expiration of such period has transmitted to the Secretary written notice to the effect that such committee has no objection to the proposed action.

(b) EXCEPTION.—Subsection (a) shall not apply to any construction project which has a current estimated cost of less than $5,000,000.

SEC. 3124. FUND TRANSFER AUTHORITY

To the extent specified in appropriation Acts, funds appropriated pursuant to this title may be transferred to other agencies of the Government for the performance of the work for which the funds were appropriated. Funds so transferred may be merged with the appropriations of the agency to which the funds are transferred.

SEC. 3125. AUTHORITY FOR CONSTRUCTION DESIGN

(a) IN GENERAL.—(1) Within the amounts authorized by this title for plant engineering and design, the Secretary may carry out advance planning and construction designs (including architectural and engineering services) in connection with any proposed construction project if the total estimated cost for such planning and design does not exceed $2,000,000.

(2) In any case in which the total estimated cost for such planning and design exceeds $300,000, the Secretary shall notify the Committees on Armed Services and Appropriations of the Senate and House of Representatives in writing of the details of such project at least 30 days before any funds are obligated for design services for such project.

(b) SPECIFIC AUTHORITY REQUIRED.—In any case in which the total estimated cost for advance planning and construction design in connection with any construction project exceeds $2,000,000, funds for such design must be specifically authorized by law.

SEC. 3126. AUTHORITY FOR EMERGENCY CONSTRUCTION DESIGN

In addition to the advance planning and construction design authorized by section 3112, the Secretary may perform planning and design utilizing available funds for any Department of Energy defense activity construction project whenever the Secretary determines that the design must proceed expeditiously in order to meet the needs of national defense or to protect property or human life.

SEC. 3127. FUNDS AVAILABLE FOR ALL NATIONAL SECURITY PROGRAMS OF THE DEPARTMENT OF ENERGY

Subject to the provisions of appropriation Acts, amounts appropriated pursuant to this title for management and support activities and for general plant projects are available for use, when necessary, in connection with all national security programs of the Department of Energy.

SEC. 3128. ADJUSTMENTS FOR PAY INCREASES

Appropriations authorized by this title for salary, pay, retirement, or other benefits for Federal employees may be increased by such amounts as may be necessary for increases in such benefits authorized by law.

SEC. 3129. AVAILABILITY OF FUNDS

When so specified in an appropriation Act, amounts appropriated for "Operating Expenses" or for "Plant and Capital Equipment" may remain available until expended.

PART C—MISCELLANEOUS PROVISIONS

SEC. 3131. PROTECTION OF SENSITIVE TECHNICAL INFORMATION

(a) PROPERTY RIGHTS IN INVENTIONS AND DISCOVERIES.—Whenever any contractor makes an invention or discovery to which the title vests in the Department of Energy pursuant to exercise of section 202(a) (ii) or (iv) of title 35, United States Code, or pursuant to section 152 of the Atomic Energy Act of 1954 (42 U.S.C. 2182) or section 9 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5908) in the course of or under any Government contract or subcontract of the Naval Nuclear Propulsion Program or the nuclear weapons programs or other atomic energy defense activities of the Department of Energy and the contractor requests waiver of any or all of the Government's property rights, the Secretary of Energy may decide to waive the Government's rights and assign the rights in such invention or discovery. Such decision shall be made within a reasonable time (which shall usually be six months from the date of the request by the contractor for assignment of such rights).

(b) MATTERS TO BE CONSIDERED.—In making a decision under this section, the Secretary shall consider, in addition to the applicable policies of section 152 of the Atomic Energy Act of 1954 (42 U.S.C. 2182) or subsections (c) and (d) of section 9 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5908)—

(1) whether national security will be compromised;

(2) whether sensitive technical information (whether classified or unclassified) under the Naval Nuclear Propulsion Program or the nuclear weapons programs or other atomic energy defense activities of the Department of Energy for which dissemination is controlled under Federal statutes and regulations will be released to unauthorized persons;

(3) whether an organizational conflict of interest contemplated by Federal statutes and regulations will result; and

(4) whether failure to assert such a claim will adversely affect the operation of the Naval Nuclear Propulsion Program or the nuclear weapons programs or other atomic energy defense activities of the Department of Energy.

SEC. 3132. RESTRICTION ON USE OF FUNDS TO PAY PENALTIES UNDER ENVIRONMENTAL LAWS

(a) RESTRICTION.—Funds appropriated to the Department of Energy for the Naval Nuclear Propulsion Program or the nuclear weapons programs or other atomic energy defense activities of the Department of Energy may not be used to pay a penalty, fine, or forfeiture in regard to a defense activity or facility of the Department of Energy due to a failure to comply with any environmental requirement.

(b) EXCEPTION.—Subsection (a) shall not apply with respect to an environmental requirement if—

(1) the President fails to request funds for compliance with the environmental requirement; or

(2) the Congress has appropriated funds for such purpose (and such funds have not been sequestered, deferred, or rescinded) and the Secretary of Energy fails to use the funds for such purpose.

SEC. 3133. COMMUNITY ASSISTANCE PAYMENTS

Section 1532 of the Department of Energy National Security and Military Applications of Nuclear Energy Authorization Act of 1986 (title XV of Public Law 99-145; 99 Stat. 773) is amended by adding at the end the following new subsection:

"(d) RULE OF CONSTRUCTION.—The authority of the Secretary of Energy under subsection (a) to provide a final financial settlement with Anderson County and Roane County, Tennessee, and with the City of Oak Ridge, Tennessee, and terminate all annual assistance payments made to those entities pursuant to section 91 of the Atomic Energy Community Act of 1955 (42 U.S.C. 2391) does not affect any other right, function, or duty of the Secretary with respect to such Act (42 U.S.C. 2301), and the Secretary shall consider the purposes of such Act a continuing atomic energy defense function of the Department of Energy.".

SEC. 3134. AUTHORITY FOR DEPARTMENT OF ENERGY CONTRACTOR EMPLOYEES TO CARRY FIREARMS BEYOND BOUNDARIES OF A DOE FACILITY

Section 161 k. of the Atomic Energy Act of 1954 is amended—

(1) by inserting "and subcontractors (at any tier)" in the second sentence after "employees of its contractors";

(2) by striking out "owned by the United States and" in the second sentence and inserting in lieu thereof "under the jurisdiction of the United States";

(3) by inserting "or being transported to or from such facilities" in the second sentence after "contracted to the United States";

(4) by inserting after the third sentence the following new sentence: "An employee of a contractor or subcontractor authorized to carry firearms under this subsection may make such arrests only when the individual

to be arrested is within, or in direct flight from, the area of such offense."; and

(5) by striking out the semicolon at the end and inserting in lieu thereof the following: ". The Secretary, with the approval of the Attorney General, shall issue guidelines to implement this subsection;".

SEC. 3135. REPORT ON CONTAINMENT FACILITIES

The Secretary of Energy shall submit to the Committees on Armed Services of the Senate and House of Representatives a report on the costs and effects on safety that would result from constructing containment facilities for nuclear reactors of the Department of Energy compared with the costs and effects on safety involved in constructing a new production reactor. Such report shall be submitted not later than March 15, 1987.

SEC. 3136. STUDY OF PRODUCTION REACTOR SAFETY

(a) REQUIREMENT FOR INDEPENDENT STUDY.—(1) The Secretary of Energy shall request the National Academy of Sciences and the National Academy of Engineering—

(A) to make an independent assessment of the safety of continuing operations of the "N" Production Reactor, located near Richland, Washington, including any technical and safety issues raised by the nuclear reactor accident at Chernobyl in the Soviet Union; and

(B) to provide a report on such assessment, together with findings and recommendations, concurrently to Congress and the Secretary not later than March 1, 1987.

(2) The assessment should—

(A) be made by distinguished scientists and engineers drawn from the councils of the National Academy of Sciences, the National Academy of Engineering, and the National Institute of Medicine chosen with regard for their special competence and expertise; and

(B) be conducted in a manner that would allow for appropriate public participation in the review process consistent with statutory requirements to prevent the unauthorized disclosure of classified information.

(b) REVIEW AND COMMENT BY SECRETARY.—The Secretary shall review the findings and recommendations contained in the report under subsection (a) and shall separately provide to Congress a report containing—

(1) the Secretary's comments on such findings and recommendations; and

(2) a description (including cost assessments) of plans of the Secretary to correct any technical problems described in the report or to carry out recommendations set forth in the report.

SEC. 3137. IMPLEMENTATION OF THE RECOMMENDATIONS OF THE PRESIDENT'S BLUE RIBBON TASK GROUP ON NUCLEAR WEAPONS PROGRAM MANAGEMENT

(a) ESTABLISHMENT OF COUNCIL.—(1) Chapter 7 of title 10, United States Code, is amended by adding at the end the following new section:

"§ 179. Nuclear Weapons Council

"(a) There is a Joint Nuclear Weapons Council (hereinafter in this section referred to as the 'Council') composed of three members as follows:

"(1) The Director of Defense Research and Engineering.

"(2) The Vice Chairman of the Joint Chiefs of Staff.

"(3) One senior representative of the Department of Energy appointed by the Secretary of Energy.

"(b)(1) Except as provided in paragraph (2), the Chairman of the Council shall be the member appointed under subsection (a)(1).

"(2) A meeting of the Council shall be chaired by the representative appointed under subsection (a)(3) whenever the matter under consideration is within the primary responsibility or concern of the Department of Energy, as determined by majority vote of the Council.

"(c)(1) The Secretary of Defense and the Secretary of Energy shall enter into an agreement with the Council to furnish necessary staff and administrative services to the Council.

"(2) The Assistant to the Secretary of Defense for Atomic Energy shall be the Staff Director of the Council.

"(d) The Council shall be responsible for the following matters:

"(1) Preparing the annual Nuclear Weapons Stockpile Memorandum.

"(2) Developing nuclear weapons stockpiles options and the costs of such options.

"(3) Coordinating programming and budget matters pertaining to nuclear weapons programs between the Department of Defense and the Department of Energy.

"(4) Identifying various options for cost-effective schedules for nuclear weapons production.

"(5) Considering safety, security, and control issues for existing weapons and for proposed new weapon program starts.

"(6) Ensuring that adequate consideration is given to design, performance, and cost tradeoffs for all proposed new nuclear weapons programs.

"(7) Providing broad guidance regarding priorities for research on nuclear weapons.

"(8) Preparing comments on annual proposals for budget levels for research on nuclear weapons and transmitting those comments to the Secretary of Defense and the Secretary of Energy before the preparation of the annual budget requests by the Secretaries of those departments.

"(9) Providing—

"(A) broad guidance regarding priorities for research on improved conventional weapons, and

"(B) comments on annual proposals for budget levels for research on improved conventional weapons, and transmitting such guidance and comments to the Secretary of Defense before the preparation of the annual budget request of the Department of Defense.

"(e) The Council shall submit to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives a report on the actions that have been taken by the Department of Defense and the Department of Energy to implement the recommendations of the President's Blue Ribbon Task Group on Nuclear Weapons Program Management. The Council shall include in such report its recommendation on the role and composition of the staff on the Council. The Council shall submit such report to the Committees not later than March 1, 1987.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"179. Nuclear Weapons Council.".

(b) CHAIRMAN OF JCS TO SERVE ON COUNCIL IF THERE IS NO VICE CHAIRMAN OF JCS.—If on the date of the enactment of this section the position of Vice Chairman of the Joint Chiefs of Staff, or comparable position, has not been established by law, the Chairman of the Joint Chiefs of Staff shall be a member of the Nuclear Weapons Council established by section 179 of title 10, United States Code, as added by subsection (a). If the position of Vice Chairman of the Joint Chiefs of Staff (or comparable position) is established by law after the date of the enactment of this section, the Chairman of the Joint Chiefs of Staff shall remain a member of such Council only until an individual has been appointed Vice Chairman of the Joint Chiefs of Staff.

(c) REPEAL.—Section 27 of the Atomic Energy Act of 1954 (42 U.S.C. 2037) is repealed.

SEC. 3138. EXTENSION OF DATE FOR CERTAIN CONTRACT AUTHORITY

(a) EXTENSION.—Section 94 of the Atomic Energy Community Act of 1955 (42 U.S.C. 2394) is amended by striking out "June 30, 1986" and "June 30, 1987" and inserting in lieu thereof "June 30, 1996" in both places.

(b) BUDGET ACT CONTRACT LIMITATION.—(1) Such section is further amended by adding at the end the following new sentence: "The authority to enter into a contract under the preceding sentence with the Los Alamos School Board and with the county of Los Alamos, New Mexico, shall be effective with respect to a period before July 1, 1996, only to the extent or in such amounts as are provided in appropriation Acts.".

(2) The amendment made by paragraph (1) shall not apply with respect to a contract with the county of Los Alamos, New Mexico, to the extent that it covers the period before July 1, 1987.

TITLE II—NATIONAL DEFENSE STOCKPILE

SEC. 3201. EXTENSION OF PROHIBITION ON REDUCTIONS IN STOCKPILE GOALS

Section 1612(a)(1) of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 776), is amended by striking out "October 1, 1986" and inserting in lieu thereof "October 1, 1987".

SEC. 3202. DESIGNATION OF NATIONAL DEFENSE STOCKPILE MANAGER

(a) DESIGNATION OF SINGLE STOCKPILE MANAGER.—The Strategic and Critical Materials Stockpiling Act is amended by inserting after section 6 the following new section:

"NATIONAL DEFENSE STOCKPILE MANAGER

"SEC. 6A. (a) The President shall designate a single Federal official to perform the functions of the President under this Act. The official designated shall be an officer who holds a civilian position to which the person was appointed by the President, by and with the advice and consent of the Senate.

"(b) The officer designated by the President under this section shall be known for purposes of his functions under this Act as the 'National Defense Stockpile Manager'.".

(b) DEADLINE FOR DESIGNATION.—The President shall designate an official as the National Defense Stockpile Manager, as required by section 6A of the Strategic and Critical Materials Stock Piling Act (as added by subsection (a)), not later than February 15, 1987.

SEC. 3203. EXTENSION OF USES OF STOCKPILE TRANSACTION FUND AND CODIFICATION OF REVOLVING FUND PROVISIONS

(a) IN GENERAL.—Section 9(b) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C 98h(b)) is amended—

(1) by striking out the second sentence of paragraph (1); and

(2) by striking out paragraphs (2) and (3) and inserting in lieu thereof the following:

"(2) Subject to section 5(a)(1), moneys covered into the fund under paragraph (1) are hereby made available (subject to such limitations as may be provided in appropriation Acts) for the following purposes:

"(A) The acquisition of strategic and critical materials under section 6(a)(1).

"(B) Transportation, storage, and other incidental expenses related to such acquisition.

"(C) Development of current specifications of stockpile materials and the upgrading of existing stockpile materials to meet current specifications (including transportation, when economical, related to such upgrading).

"(D) Testing and quality studies of stockpile materials.

"(E) Studying future material and mobilization requirements for the stockpile.

"(F) Other reasonable requirements for management of the stockpile.

"(3) Moneys in the fund shall remain available until expended.".

(b) CONFORMING AMENDMENT.—Section 110 of Public Law 97-377 (96 Stat. 1911) is amended by striking out "Notwithstanding" and all that follows through "That during" and inserting in lieu thereof "During".

(c) APPLICABILITY OF AMENDMENTS.—The amendments made by subsection (a) apply with respect to funds covered into the National Defense Stockpile Fund before, on, or after the date of the enactment of this Act.

SEC. 3204. AUTHORIZED DISPOSALS FROM NATIONAL DEFENSE STOCKPILE

(a) IN GENERAL.—(1) The President is authorized to dispose of the following quantities of materials that are currently held in the National Defense Stockpile (established by section 3 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98b)) and that are hereby determined to be excess to the current requirements of the stockpile:

Antimony	1,500 short tons
Diamonds, Industrial Stone.	1,125,000 carats
Iodine	800,000 pounds
Mercury	3,700 flasks
Mica, Muscovite Film	3,000 pounds
Mica, Muscovite Splittings.	262,000 pounds
Silicon Carbide	7,600 short tons
Silver (Coinage Program Only).	3,000,000 troy ounces
Tannin, Chestnut	1,000 long tons
Tannin, Quebracho	4,000 long tons
Thorium Nitrate	10,000 pounds
Tin	4,000 metric tons
Tungsten	1,900,000 pounds of tungsten metal equivalent

(2) Authority provided by paragraph (1) is in addition to any other authority provided by law to dispose of materials from the National Defense Stockpile.

(b) SPECIAL DISPOSAL AUTHORITY.—During fiscal year 1987, the President may contract to carry out authorized disposals of materials from the National Defense Stockpile without regard to the limitation in section 5(b)(2) of the Strategic and Critical Materials Stock Piling Act, but only to the extent that the total amount received (or to be received) from such disposals does not exceed the amount obligated from the National Defense Stockpile Transaction Fund during such fiscal year for purposes authorized under section 9(b)(2) of such Act (as amended by section 3203).

SEC. 3205. CONVERSION OF CHROMIUM AND MANGANESE ORE TO HIGH CARBON FERROCHROMIUM AND HIGH CARBON FERROMANGANESE

(a) REQUIRED UPGRADING.—During each of fiscal years 1987 through 1993, the President shall—

(1) obtain bids from domestic producers of high carbon ferrochromium and of high carbon ferromanganese; and

(2) award contracts for the conversion of chromium and manganese ores held in the National Defense Stockpile into high carbon ferrochromium and high carbon ferromanganese, respectively.

(b) QUANTITIES TO BE UPGRADED.—(1) Contracts awarded under subsection (a) shall provide for the addition of not less than 53,500 short tons of high carbon ferrochromium and not less than 67,500 short tons of high carbon ferromanganese to the National Defense Stockpile during each of the fiscal years covered by subsection (a).

(2) If, during any fiscal year referred to in subsection (a), the minimum quantity of high carbon ferrochromium or high carbon ferromanganese to be added to the National Defense Stockpile, as required by paragraph (1), is not met, the quantity of such material to be added to the stockpile in the next fiscal year shall be increased by the quantity of the deficiency.

(c) SEVEN-YEAR MINIMUM QUANTITIES.—The total quantities of high carbon ferrochromium and high carbon ferromanganese to be added to the National Defense Stockpile over the seven fiscal years referred to in subsection (a) shall be as follows:

(1) High carbon ferrochromium, 374,000 short tons.

(2) High carbon ferromanganese, 472,000 short tons.

(d) DEFINITION.—In this section, the term "National Defense Stockpile" means the stockpile provided for in section 4 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98c).

SEC. 3206. REPORT ON WAR EMERGENCY SITUATIONS AND MOBILIZATION REQUIREMENTS

(a) REQUIREMENT.—The Secretary of Defense shall submit to Congress a report describing war emergency situations that would necessitate total mobilization of the economy of the United States for a conventional global war of a duration of at least three years. With respect to each such war emergency situation, the Secretary shall include estimates of—

(1) the length and intensity of the assumed emergency;

(2) the military force structure to be mobilized; and

(3) the defense expenditures required during each such war emergency situation.

(b) STOCKPILE PLANNING.—The Secretary shall indicate in the report which of the war emergency situations described in the report should serve as the basis for planning for and management of the National Defense Stockpile.

(c) DEADLINE FOR REPORT.—The report under subsection (a) shall be submitted not later than January 31, 1987.

SEC. 3207. MISCELLANEOUS TECHNICAL AMENDMENTS

(a) TECHNICAL AMENDMENTS.—(1) Section 4(a) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98c(a)) is amended—

(A) by striking out "on the day before the date of the date of the enactment of the Strategic and Critical Materials Stock Piling Revision Act of 1979" in paragraphs (1) and (3) and inserting in lieu thereof "on July 29, 1979", and

(B) by striking out "on or after the date of the enactment of the Strategic and Critical Materials Stock Piling Revision Act of 1979" in paragraph (2) and inserting in lieu thereof "after July 29, 1979".

(2) Section 5(b) of such Act (50 U.S.C. 98d(b)) is amended by striking out "(4)" and inserting in lieu thereof "(3), (4),".

(3) Section 11(b) of such Act (50 U.S.C. 98h-2) is amended by striking out "each year" and all that follows through "the next fiscal year" and inserting in lieu thereof "each year, at the time that the Budget is submitted to Congress pursuant to section 1105 of title 31, United States Code, for the next fiscal year,".

(b) CLARIFYING AMENDMENT.—Section 6(a)(3) of such Act (50 U.S.C. 98e(a)(3)) is amended by striking out "the form most" and inserting in lieu thereof "a form more".

TITLE III—CIVIL DEFENSE

SEC. 3301. AUTHORIZATION OF APPROPRIATIONS FOR CIVIL DEFENSE FUNCTIONS

There is hereby authorized to be appropriated for fiscal year 1987 the sum of $120,565,000 to carry out the provisions of the Federal Civil Defense Act of 1950 (50 U.S.C. App. 2251 et seq.).

DIVISION D—CHILD NUTRITION PROGRAMS

SEC. 4001. SHORT TITLE; TABLE OF CONTENTS

(a) SHORT TITLE.—This division may be cited as the "Child Nutrition Amendments of 1986".

(b) TABLE OF CONTENTS FOR DIVISION.—The table of contents for this division is as follows:

Sec. 4001. Short title; table of contents.

TITLE I—REAUTHORIZATION OF CHILD NUTRITION PROGRAMS

Sec. 4101. Summer Food Service Program for children.
Sec. 4102. Commodity Distribution Program.
Sec. 4103. State administrative expenses.
Sec. 4104. Special supplemental food program for women, infants, and children.
Sec. 4105. Nutrition Education and Training Program.

TITLE II—SCHOOL LUNCH AND BREAKFAST PROGRAMS

Sec. 4201. Basis of commodity assistance.
Sec. 4202. Inclusion of whole milk as a school lunch beverage.
Sec. 4203. Automatic eligibility for certain programs.
Sec. 4204. Limitation on meal contracting.
Sec. 4205. Change in tuition limitation for private schools.
Sec. 4206. Use of school lunch facilities for elderly programs.
Sec. 4207. Pilot projects for administration of child nutrition programs by contract or direct disbursement.
Sec. 4208. Department of Defense Overseas Dependents' Schools.
Sec. 4209. Restoration of certain kindergartens to the special milk program.
Sec. 4210. Improvement of breakfast program meal pattern.
Sec. 4211. Extension of offer versus serve provision to the school breakfast program.
Sec. 4212. Staffing standards.

TITLE III—SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN

Sec. 4301. Costs for Nutrition Services and Administration.
Sec. 4302. State eligibility for WIC funds.
Sec. 4303. Participation report.
Sec. 4304. Plan of operation and administration.
Sec. 4305. Public comment.
Sec. 4306. Availability of program benefits.
Sec. 4307. Repayment of certain benefits by recipients.
Sec. 4308. Priority funds for WIC migrant programs.
Sec. 4309. Improving State agency administrative systems.
Sec. 4310. Paperwork reduction.
Sec. 4311. Allocation standards.
Sec. 4312. Advance payments.

Sec. 4313. Availability of funds.
TITLE IV—OTHER NUTRITION PROGRAMS
Sec. 4401. Hearings on Federal audit actions under the Child Care Food Program.
Sec. 4402. Basis for nutrition education grants.
Sec. 4403. Extension of alternative means of assistance.
Sec. 4404. National Donated Commodity Processing Programs.
TITLE V—TECHNICAL CORRECTIONS
Sec. 4501. Obsolete provisions.
Sec. 4502. Obsolete references to Health, Education, and Welfare.
Sec. 4503. Conforming amendments.

TITLE I—REAUTHORIZATION OF CHILD NUTRITION PROGRAMS

SEC. 4101. SUMMER FOOD SERVICE PROGRAM FOR CHILDREN

Section 13(p) of the National School Lunch Act (42 U.S.C. 1761(p)) is amended by striking out "1984" and inserting in lieu thereof "1989".

SEC. 4102. COMMODITY DISTRIBUTION PROGRAM

Section 14(a) of the National School Lunch Act (42 U.S.C. 1762a(a)) is amended by striking out "1984" and inserting in lieu thereof "1989".

SEC. 4103. STATE ADMINISTRATIVE EXPENSES

Section 7(i) of the Child Nutrition Act of 1966 (42 U.S.C. 1776(i)) is amended by striking out "1984" and inserting in lieu thereof "1989".

SEC. 4104. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN

Section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1786) is amended—

(1) in subsection (c)(2), by striking out "Subject to" and all that follows through "1984" and inserting in lieu thereof "Subject to amounts appropriated to carry out this section under subsection (g)";

(2) in subsection (g)—

(A) by designating the first and second sentences as paragraphs (1) and (3), respectively; and

(B) by amending paragraph (1) (as so designated) to read as follows:

"(1) There are authorized to be appropriated to carry out this section $1,570,000,000 for the fiscal year ending September 30, 1986, such sums as may be necessary for each of the fiscal years ending September 30, 1987, and September 30, 1988, and $1,782,000,000 for the fiscal year ending September 30, 1989."; and

(3) in subsection (h)(2), by striking out "1984" and inserting in lieu thereof "1989".

SEC. 4105. NUTRITION EDUCATION AND TRAINING PROGRAM

The first sentence of section 19(j)(2) of the Child Nutrition Act of 1966 (42 U.S.C. 1788(j)(2)) is amended by striking out "1984" and inserting in lieu thereof "1989".

TITLE II—SCHOOL LUNCH AND BREAKFAST PROGRAMS

SEC. 4201. BASIS OF COMMODITY ASSISTANCE

Section 6(b) of the National School Lunch Act (42 U.S.C. 1755(b)) is amended—

(1) in the first sentence, by striking out "May 15" and inserting in lieu thereof "June 1"; and

(2) in the second sentence, by striking out "June 15" and inserting in lieu thereof "July 1".

SEC. 4202. INCLUSION OF WHOLE MILK AS A SCHOOL LUNCH BEVERAGE

Effective July 1, 1986, section 9(a) of the National School Lunch Act (42 U.S.C. 1758(a)) is amended—

(1) by designating the first, second, and third sentences as paragraphs (1), (3), and (4), respectively; and

(2) by inserting after paragraph (1) (as so designated) the following new paragraph:

"(2) In addition to such other forms of milk as the Secretary may determine, the lunches shall offer whole milk as a beverage.".

SEC. 4203. AUTOMATIC ELIGIBILITY FOR CERTAIN PROGRAMS

Effective July 1, 1986, section 9(b) of the National School Lunch Act (42 U.S.C. 1758(b)) is amended by adding at the end thereof the following new paragraph:

"(6)(A) A child shall be considered automatically eligible for a free lunch and breakfast under this Act and the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.), respectively, without further application or eligibility determination, if the child is a member of—

"(i) a household receiving assistance under the food stamp program authorized under the Food Stamp Act of 1977 (7 U.S.C. 2011 et seq.); or

"(ii) an AFDC assistance unit (under the aid to families with dependent children program authorized under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.)), in a State where the standard of eligibility for the assistance does not exceed 130 percent of the poverty line (as defined in section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2))).

"(B) Proof of receipt of food stamps or aid to families with dependent children shall be sufficient to satisfy any verification requirement imposed under paragraph (2)(C).".

SEC. 4204. LIMITATION ON MEAL CONTRACTING

Effective July 1, 1986, section 9 of the National School Lunch Act (42 U.S.C. 1758) is amended by adding at the end thereof the following new subsection:

"(e) A school or school food authority participating in a program under this Act may not contract with a food service company to provide a la carte food service unless the company agrees to offer free, reduced-price, and full-price reimbursable meals to all eligible children.".

SEC. 4205. CHANGE IN TUITION LIMITATION FOR PRIVATE SCHOOLS

(a) SCHOOL LUNCH PROGRAMS.—Section 12(d)(5) of the National School Lunch Act (42 U.S.C. 1760(d)(5)) is amended—

(1) in clause (A) of the first sentence, by striking out "$1,500" and inserting in lieu thereof "$2,000"; and

(2) by adding at the end thereof the following new sentence: "On July 1, 1988, and each July 1 thereafter, the Secretary shall adjust the tuition limitation amount prescribed in clause (A) of the first sentence of this paragraph to reflect changes in the Consumer Price Index for All Urban Consumers during the most recent 12-month period for which the data is available.".

(b) SCHOOL BREAKFAST PROGRAMS.—Section 15(c) of the Child Nutrition Act of 1966 (42 U.S.C. 1784(c)) is amended—

(1) in clause (A) of the first sentence, by striking out "$1,500" and inserting in lieu thereof "$2,000"; and

(2) by adding at the end thereof the following new sentence: "On July 1, 1988, and each July 1 thereafter, the Secretary shall adjust the tuition limitation amount prescribed in clause (A) of the first sentence of this paragraph to reflect changes in the Consumer Price Index for All Urban Consumers during the most recent 12-month period for which the data is available.".

(c) APPLICATION.—(1) The amendments made by subsections (a)(1) and (b)(1) shall apply for the fiscal year beginning on October 1, 1986, and each school year thereafter.

(2) The amendments made by subsections (a)(2) and (b)(2) shall apply for the school year beginning on July 1, 1988, and each school year thereafter.

SEC. 4206. USE OF SCHOOL LUNCH FACILITIES FOR ELDERLY PROGRAMS

Section 12 of the National School Lunch Act (42 U.S.C. 1760) is amended by adding at the end thereof the following new subsection:

"(i) Facilities, equipment, and personnel provided to a school food authority for a program authorized under this Act or the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.) may be used, as determined by a local educational agency, to support a nonprofit nutrition program for the elderly, including a program funded under the Older Americans Act of 1965 (42 U.S.C. 3001 et seq.).".

SEC. 4207. PILOT PROJECTS FOR ADMINISTRATION OF CHILD NUTRITION PROGRAMS BY CONTRACT OR DIRECT DISBURSEMENT

(a) PILOT PROJECTS.—Section 20 of the National School Lunch Act (42 U.S.C. 1769) is amended by striking out subsection (d) and inserting in lieu thereof the following new subsection:

"(d) The Secretary may conduct pilot projects in not more than three States in which the Secretary is currently administering programs to evaluate the effects of the Secretary contracting with private profit and nonprofit organizations to act as a State agency under this Act and the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.) for schools, institutions, or service institutions referred to in section 10 of this Act and section 5 of the Child Nutrition Act of 1966 (42 U.S.C. 1774).".

(b) CONFORMING AMENDMENT.—The first sentence of section 20(c) of the National School Lunch Act is amended by striking out "except for the pilot projects conducted under subsection (d) of this section,".

SEC. 4208. DEPARTMENT OF DEFENSE OVERSEAS DEPENDENTS' SCHOOLS

(a) SCHOOL LUNCHES.—Section 22(d) of the National School Lunch Act (42 U.S.C. 1769b(d)) (as added by section 1408(a) of the Education Amendments of 1978 (92 Stat. 2368)) is amended by striking out "and for" and all that follows through "reduced-price lunch".

(b) SCHOOL BREAKFASTS.—Section 20(d) of the Child Nutrition Act of 1966 (42 U.S.C. 1789) is amended by striking out "and for" and all that follows through "reduced-price breakfast".

SEC. 4209. RESTORATION OF CERTAIN KINDERGARTENS TO THE SPECIAL MILK PROGRAM

Effective October 1, 1986, section 3(a) of the Child Nutrition Act of 1966 (42 U.S.C. 1772(a)) is amended—

(1) in the first sentence—

(A) by inserting "(1)" after the subsection designation;

(B) by redesignating clauses (1) and (2) as subparagraphs (A) and (B), respectively; and

(C) in subparagraph (A) (as so redesignated), by inserting "except as provided in paragraph (2)," after "and under,";

(2) by designating the second through eighth sentences as paragraphs (3) through (9), respectively; and

(3) by inserting after paragraph (1) (as so designated) the following new paragraph:

"(2) The limitation imposed under paragraph (1)(A) for participation of nonprofit schools in the special milk program shall not apply to split-session kindergarten pro-

grams conducted in schools in which children do not have access to the meal service program operating in schools the children attend as authorized under this Act or the National School Lunch Act (42 U.S.C. 1751 et seq.).".

SEC. 4210. IMPROVEMENT OF BREAKFAST PROGRAM MEAL PATTERN

(a) ADDITIONAL ASSISTANCE.—Effective October 1, 1986, section 4(b) of the Child Nutrition Act of 1966 (42 U.S.C. 1773(b)) is amended by adding at the end thereof the following new paragraphs:

"(3) The Secretary shall increase by 3 cents the annually adjusted payment for each breakfast served under this Act and section 17 of the National School Lunch Act (42 U.S.C. 1766). These funds shall be used to assist States, to the extent feasible, in improving the nutritional quality of the breakfasts.

"(4) Notwithstanding any other provision of law, whenever stocks of agricultural commodities are acquired by the Secretary or the Commodity Credit Corporation and are not likely to be sold by the Secretary or the Commodity Credit Corporation or otherwise used in programs of commodity sale or distribution, the Secretary shall make such commodities available to school food authorities and eligible institutions serving breakfasts under this Act in a quantity equal in value to not less than 3 cents for each breakfast served under this Act and section 17 of the National School Lunch Act.

"(5) Expenditures of funds from State and local sources for the maintenance of the breakfast program shall not be diminished as a result of funds or commodities received under paragraph (3) or (4).".

(b) NUTRITION REQUIREMENTS.—(1) The Secretary of Agriculture shall review and revise the nutrition requirements for meals served under the breakfast program authorized under the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.) and section 17 of the National School Lunch Act (42 U.S.C. 1766) to improve the nutritional quality of the meals, taking into consideration both the findings of the National Evaluation of School Nutrition Programs and the need to provide increased flexibility in meal planning to local food authorities.

(2) Not later than 180 days after the date of enactment of this Act, the Secretary of Agriculture shall promulgate regulations to implement the revisions.

SEC. 4211. EXTENSION OF OFFER VERSUS SERVE PROVISION TO THE SCHOOL BREAKFAST PROGRAM

Section 4(e) of the Child Nutrition Act of 1966 (42 U.S.C. 1773(e)) is amended—

(1) by inserting "(1)" after the subsection designation; and

(2) by adding at the end thereof the following new paragraph:

"(2) At the option of a local school food authority, a student in a school under the authority that participates in the school breakfast program under this Act may be allowed to refuse not more than one item of a breakfast that the student does not intend to consume. A refusal of an offered food item shall not affect the full charge to the student for a breakfast meeting the requirements of this section or the amount of payments made under this Act to a school for the breakfast.".

SEC. 4212. STAFFING STANDARDS

Section 7 of the Child Nutrition Act of 1966 (42 U.S.C. 1776) (as amended by section 103) is further amended—

(1) by striking out subsection (b); and

(2) by redesignating subsections (c) through (i) as subsections (b) through (h), respectively.

TITLE III—SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN

SEC. 4301. COSTS FOR NUTRITION SERVICES AND ADMINISTRATION

(a) DEFINITIONS.—Section 17(b) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(b)) is amended—

(1) by striking out paragraph (1);

(2) by redesignating paragraphs (2), (3), and (4) as paragraphs (1), (2), and (3), respectively; and

(3) by inserting after paragraph (3) (as so redesignated) the following new paragraph:

"(4) 'Costs for nutrition services and administration' means costs that shall include, but not be limited to, costs for certification of eligibility of persons for participation in the program (including centrifuges, measuring boards, spectrophotometers, and scales used for the certification), food delivery, monitoring, nutrition education, outreach, startup costs, and general administration applicable to implementation of the program under this section, such as the cost of staff, transportation, insurance, developing and printing food instruments, and administration of State and local agency offices.".

(b) CONFORMING AMENDMENTS.—Section 17 of such Act is amended—

(1) by striking out "administrative funds" each place it appears in subsections (f)(11), (h)(2), (h)(3), and (h)(4) and inserting in lieu thereof "funds for nutrition services and administration"; and

(2) by striking out "administrative costs" each place it appears in subsection (h) and inserting in lieu thereof "costs for nutrition services and administration".

SEC. 4302. STATE ELIGIBILITY FOR WIC FUNDS

(a) ELIGIBILITY.—Section 17(c) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(c)) is amended by adding at the end thereof the following new paragraph:

"(4) A State shall be ineligible to participate in programs authorized under this section if the Secretary determines that State or local sales taxes are collected within the State on purchases of food made to carry out this section.".

(b) APPLICATION.—The amendment made by subsection (a) shall apply to a State beginning with the fiscal year that commences after the end of the first regular session of the State legislature following the date of the enactment of this Act.

SEC. 4303. PARTICIPATION REPORT

(a) BIENNIAL REPORT.—Section 17(d) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(d)) is amended by adding at the end thereof the following new paragraph:

"(4) The Secretary shall report biennially to Congress on—

"(A) the income and nutritional risk characteristics of participants in the program;

"(B) participation in the program by members of families of migrant farmworkers; and

"(C) such other matters relating to participation in the program as the Secretary considers appropriate.".

(b) USE OF EVALUATION FUNDS FOR REPORT.—Section 17(g)(3) of such Act (as amended by section 104(2)(A)) is further amended by inserting "preparing the report required under subsection (d)(4)," after "health benefits,".

SEC. 4304. PLAN OF OPERATION AND ADMINISTRATION

(a) PLAN.—Paragraph (1) of section 17(f) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(f)(1)) is amended to read as follows:

"(1)(A) Each State agency shall submit annually to the Secretary, by a date specified by the Secretary, a plan of operation and administration for a fiscal year.

"(B) To be eligible to receive funds under this section for a fiscal year, a State agency must receive the approval of the Secretary for the plan submitted for the fiscal year.

"(C) The plan shall include—

"(i) a description of the food delivery system of the State agency and the method of enabling participants to receive supplemental foods under the program, to be administered in accordance with standards developed by the Secretary;

"(ii) a description of the financial management system of the State agency;

"(iii) a plan to coordinate operations under the program with special counseling services, such as the expanded food and nutrition education program, immunization programs, prenatal care, well-child care, family planning, alcohol and drug abuse counseling, child abuse counseling, and with the aid to families with dependent children, food stamp, and maternal and child health care programs;

"(iv) a plan to provide program benefits under this section to, and to meet the special nutrition education needs of, eligible migrants and Indians;

"(v) a plan to expend funds to carry out the program during the relevant fiscal year;

"(vi) a plan to provide program benefits under this section to unserved and underserved areas in the State, if sufficient funds are available to carry out this clause;

"(vii) a plan to provide program benefits under this section to eligible persons most in need of the benefits and to enroll eligible women in the early months of pregnancy, to the maximum extent practicable; and

"(viii) such other information as the Secretary may require.

"(D) The Secretary may permit a State agency to submit only those parts of a plan that differ from plans submitted for previous fiscal years.

"(E) The Secretary may not approve any plan that permits a person to participate simultaneously in both the program authorized under this section and the commodity supplemental food program authorized under sections 4 and 5 of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c note).".

(b) APPLICATION.—The amendment made by subsection (a) shall apply to a plan submitted by a State agency under section 17(f)(1) of the Child Nutrition Act of 1966 for the fiscal year ending September 30, 1987, and each fiscal year thereafter.

SEC. 4305. PUBLIC COMMENT

Paragraph (2) of section 17(f) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(f)(2)) is amended to read as follows:

"(2) A State agency shall establish a procedure under which members of the general public are provided an opportunity to comment on the development of the State agency plan.".

SEC. 4306. AVAILABILITY OF PROGRAM BENEFITS

Paragraph (8) of section 17(f) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(f)(8)) is amended to read as follows:

"(8)(A) The State agency shall, in cooperation with participating local agencies, publicly announce and distribute information

on the availability of program benefits (including the eligibility criteria for participation and the location of local agencies operating the program) to offices and organizations that deal with significant numbers of potentially eligible persons (including health and medical organizations, hospitals and clinics, welfare and unemployment offices, social service agencies, farmworker organizations, Indian tribal organizations, and religious and community organizations in low income areas).

"(B) The information shall be publicly announced by the State agency and by local agencies at least annually.

"(C) The State agency and local agencies shall distribute the information in a manner designed to provide the information to potentially eligible persons who are most in need of the benefits, including pregnant women in the early months of pregnancy.".

SEC. 4307. REPAYMENT OF CERTAIN BENEFITS BY RECIPIENTS

Effective October 1, 1986, section 17(f) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(f)) is amended by adding at the end thereof the following new paragraph:

"(15) If a State agency determines that a member of a family has received an overissuance of food benefits under the program authorized by this section as the result of such member intentionally making a false or misleading statement or intentionally misrepresenting, concealing, or withholding facts, the State agency shall recover, in cash, from such member an amount that the State agency determines is equal to the value of the overissued food benefits, unless the State agency determines that the recovery of the benefits would not be cost effective.".

SEC. 4308. PRIORITY FUNDS FOR WIC MIGRANT PROGRAMS

(a) PRIORITY FUNDING.—Effective October 1, 1986, section 17(g) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(g)) (as amended by section 104(2)(A)) is further amended by inserting after paragraph (1) the following new paragraph:

"(2) Of the sums appropriated for any fiscal year for programs authorized under this section, not less than nine-tenths of 1 percent shall be available first for services to eligible members of migrant populations. The migrant services shall be provided in a manner consistent with the priority system of a State for program participation.".

(b) ACCOUNTABILITY.—To the extent possible, accountability for migrant services under section 17(g)(2) of the Child Nutrition Act of 1966 (as added by subsection (a)) shall be conducted under regulations in effect on the date of the enactment of this Act.

SEC. 4309. IMPROVING STATE AGENCY ADMINISTRATIVE SYSTEMS

Section 17(g)(3) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(g)(3)) (as amended by sections 104(2)(A) and 303(b)) is further amended by inserting "providing technical assistance to improve State agency administrative systems," after "subsection (d)(4),".

SEC. 4310. PAPERWORK REDUCTION

Section 17(h)(1) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(h)(1)) is amended by adding at the end thereof the following new sentence: "The Secretary shall limit to a minimal level any documentation required under the preceding sentence.".

SEC. 4311. ALLOCATION STANDARDS

Section 17(h)(3) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(h)(3)) is amended—

(1) in the second sentence, by striking out ", which satisfy allocation guidelines established by the Secretary"; and

(2) by striking out the last sentence.

SEC. 4312. ADVANCE PAYMENTS

Effective October 1, 1986, section 17(h)(4) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(h)(4)) is amended by striking out "shall" and inserting in lieu thereof "may".

SEC. 4313. AVAILABILITY OF FUNDS

(a) AVAILABILITY.—Section 17(i) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(i)) is amended—

(1) by designating the first, second, third, fourth, and fifth sentences as paragraphs (1), (2), (4), (5), and (6), respectively; and

(2) by inserting after paragraph (2) (as so designated) the following new paragraph:

"(3)(A) Notwithstanding paragraph (2)—

"(i) not more than 1 percent of the amount of funds allocated to a State agency under this section for supplemental foods for a fiscal year may be expended by the State agency for expenses incurred under this section for supplemental foods during the preceding fiscal year; or

"(ii) not more than 1 percent of the amount of funds allocated to a State agency for a fiscal year under this section may be expended by the State agency during the subsequent fiscal year.

"(B) Any funds made available to a State agency in accordance with subparagraph (A)(ii) for a fiscal year shall not affect the amount of funds allocated to the State agency for such year.".

(b) APPLICATION.—Section 17(i)(3)(A)(i) of the Child Nutrition Act of 1966 (as amended by subsection (a)) shall not apply to appropriations made before the date of enactment of this Act.

TITLE IV—OTHER NUTRITION PROGRAMS

SEC. 4401. HEARINGS ON FEDERAL AUDIT ACTIONS UNDER THE CHILD CARE FOOD PROGRAM

Section 17(e) of the National School Lunch Act (42 U.S.C. 1766(e)) is amended—

(1) by striking out "The" and inserting in lieu thereof "(1) Except as provided in paragraph (2), the"; and

(2) by adding at the end thereof the following new paragraphs:

"(2) A State is not required to provide a hearing to an institution concerning a State action taken on the basis of a Federal audit determination.

"(3) If a State does not provide a hearing to an institution concerning a State action taken on the basis of a Federal audit determination, the Secretary, on request, shall afford a hearing to the institution concerning the action.".

SEC. 4402. BASIS FOR NUTRITION EDUCATION GRANTS

Section 19(j)(2) of the Child Nutrition Act of 1966 (42 U.S.C. 1788(j)(2)) is amended by striking out "$75,000" each place it appears and inserting in lieu thereof "$50,000".

SEC. 4403. EXTENSION OF ALTERNATIVE MEANS OF ASSISTANCE

Section 14 of the National School Lunch Act (42 U.S.C. 1762a) is amended by adding at the end thereof the following new subsection:

"(g)(1) As used in this subsection, the term 'eligible school district' has the same meaning given such term in section 1581(a) of the Food Security Act of 1985.

"(2) In accordance with the terms and conditions of section 1581 of such Act, the Secretary shall permit an eligible school district to continue to receive assistance in the form of cash or commodity letters of credit assistance, in lieu of commodities, to carry out the school lunch program operated in the district.

"(3)(A) On request of a participating school district (and after consultation with the Comptroller General of the United States with respect to accounting procedures used to determine any losses) and subject to the availability of funds, the Secretary shall provide cash compensation to an eligible school district for losses sustained by the district as a result of the alteration of the methodology used to conduct the study referred to in section 1581(a) of such Act during the school year ending June 30, 1983.

"(B) There are authorized to be appropriated $50,000 to carry out out this paragraph, to be available without fiscal year limitation.".

SEC. 4404. NATIONAL DONATED COMMODITY PROCESSING PROGRAMS

In accordance with the terms and conditions of section 1114(a)(2) of the Agriculture and Food Act of 1981 (7 U.S.C. 1431e(a)(2)), whenever a commodity is made available without charge or credit under any nutrition program administered by the Secretary of Agriculture, the Secretary shall encourage consumption of the commodity through agreements with private companies under which the commodity is reprocessed into end-food products for use by eligible recipient agencies.

TITLE V—TECHNICAL CORRECTIONS

SEC. 4501. OBSOLETE PROVISIONS

(a) NUTRITION PROGRAM STAFF STUDY; TRUST TERRITORY APPROPRIATIONS.—(1) Sections 18 and 19 of the National School Lunch Act (42 U.S.C. 1767 and 1768) are repealed.

(2) The first sentence of section 3 of such Act (42 U.S.C. 1752) is amended by striking out "sections 13, 17, and 19" and inserting in lieu thereof "sections 13 and 17".

(b) STUDY OF MENU CHOICE.—Section 22 of such Act (42 U.S.C. 1769c) (as added by section 9 of the Child Nutrition Amendments of 1978 (92 Stat. 3623)) is repealed.

(c) CONFORMING AMENDMENTS.—(1) The National School Lunch Act (as amended by sections 207 and 208(a) and subsection (b)) is further amended by redesignating sections 20, 21, and 22 (42 U.S.C. 1769, 1769a, and 1769b) as sections 18, 19, and 20, respectively.

(2) Clause (3) of the first sentence of section 6(a) of such Act (42 U.S.C. 1755(a)) is amended by striking out "section 20" and inserting in lieu thereof "section 18".

SEC. 4502. OBSOLETE REFERENCES TO HEALTH, EDUCATION, AND WELFARE

(a) REFERENCES IN NATIONAL SCHOOL LUNCH ACT.—Clause (1) of the sixth sentence of section 17(a) of the National School Lunch Act (42 U.S.C., 1766(a)) is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(b) REFERENCES IN CHILD NUTRITION ACT OF 1966.—(1) The Child Nutrition Act of 1966 is amended by striking out "Health, Education, and Welfare" each place it appears in section 4(a) (42 U.S.C. 1773(a)), subsections (b)(6), (b)(13), (e)(2), (k)(1), and (k)(2) of section 17 (42 U.S.C. 1786), and subsections (d)(2) and (d)(3) of section 19 (42 U.S.C. 1788) and inserting in lieu thereof "Health and Human Services".

(2) Section 19(j)(3) of the Child Nutrition Act of 1966 (42 U.S.C. 1788(j)(3)) is amended by striking out "Office of Education of the Department of Health, Education, and Welfare" and inserting in lieu thereof "Department of Education".

SEC. 4503. CONFORMING AMENDMENTS

(a) DEFINITION OF SECRETARY.—Section 12(d) of the National School Lunch Act (42 U.S.C. 1760(d)) is amended by adding at the end thereof the following new paragraph:

"(8) 'Secretary' means the Secretary of Agriculture.".

(b) REDESIGNATION OF SUBSECTION.—Section 19 of the Child Nutrition Act of 1966 (42 U.S.C. 1788) (as amended by sections 105, 402, and 502(b)(2)) is further amended by redesignating subsection (j) as subsection (i).

And the House agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2638) to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment to the text of the bill struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SUMMARY STATEMENT OF CONFERENCE ACTION

The conferees recommend authorizations for the Department of Defense for procurement, research and development, test and evaluation, operation and maintenance, military construction, family housing, and for civil defense that total $210.0 billion. This figure is $25.6 billion below the President's request, $3.1 billion below the Senate bill, and $5.5 billion above the House amendment.

The conferees have agreed to authorizations for the Department of Energy National Security programs that total $7.45 billion. This figure is $650 million below the President's budget request, $26 million above the Senate bill, and equal to the House amendment.

The defense authorization bill provides authorizations for appropriations but does not provide budget authority. Budget authority is provided in appropriations bills.

In order to relate the conference recommendation to the budget resolution, matters in addition to the dollar authorizations contained in the bill must be taken into account.

In addition to defense programs authorized by dollar amount, the authorization bill

establishes personnel levels and includes a number of legislative provisions affecting military compensation. In total it is estimated that the conference agreement with respect to personnel matters would result in a reduction of $2.2 billion from the President's request.

The conferees have included a provision that would reduce the authorizations provided in the bill by $6.6 billion unless provisions are included in an appropriations bill to either: Delay the date on which military pay is paid from the last day of the month in which pay is earned to the first day of the month following the month in which pay is earned: or to reduce the amount of progress payments that may be paid under a defense contract.

The provision is included because the authorization in the bill are estimated to result in outlays during fiscal year 1987, in the absence of the use of "gimmicks" or lower appropriations, of $281.8 billion.

The table below summarizes authorizations included in the bill (in the column labeled conference agreement) and, in addition, summarizes the implication of the conference action for the budget totals for National Defense (Budget Function 050).

AIRCRAFT PROCUREMENT, ARMY

EH-60A (Quickfix)

The budget request contained $135.0 million for the procurement of 18 EH-60A (Quickfix) helicopters and $16.9 million for advance procurement. The House amendment would authorize $108.7 million for 18 EH-60A (Quickfix) helicopters and $16.9 million for advance procurement. The Senate bill would authorize $115.0 million for 18 EH-60A (Quickfix) helicopters and $16.9 million for advance procurement.

The Senate recedes.

AH-40 (Apache)

The budget request contained $1,189.3 million for the procurement of 144 AH-64 (Apache) helicopters and $39.1 million for advance procurement. The House amendment would authorize $1,050.2 million for 120 AH-64 helicopters and $39.1 million for advance procurement. The Senate bill would authorize $1,064.3 million for 120 Apache helicopters and $39.1 million for advance procurement.

The conferees recommend authorization of $1,032.8 million for the procurement of 120 AH-64 (Apache) helicopters and $39.1 million for advance procurement.

UH-60A (Blackhawk)

The budget request contained $155.4 million for the procurement of 78 UH-60A (Blackhawk) helicopters and $195.0 million for the advance procurement of 85 helicopters in fiscal year 1988. The House amendment would authorize $152.4 million for 78 Blackhawk helicopters and $139.0 million for the advance procurement of 78 helicopters. The Senate bill would authorize $155.4 million for the procurement of 78 UH-60A (Blackhawk) helicopters and $185.0 million for the advance procurement of 85 helicopters.

The conferees recommend authorization of $155.4 million for 78 Blackhawk helicopters and the advance procurement of $165.1 million for 72 UH-60A Blackhawk helicopters. The conferees recommend approval of the requested multiyear procurement authority for both the UH-60A and EH-60A airframe, provided savings of at least 12 percent are achieved.

Modification of Army aircraft

The request contained $662.6 million for Army aircraft modifications for fiscal year 1987.

The Senate bill would authorize $606.6 million for Army aircraft modifications. The House amendment would authorize $546.7 million for Army aircraft modifications. The conferees agreed to authorize $563.2 million for procurement of Army aircraft modifications in fiscal year 1987.

Specific program authorizations are detailed in the foregoing table.

Spares and repair parts

The budget request contained $710.5 million for Army aviation spares and repair parts. The House amendment would authorize $560.5 million for the program. The Senate bill would authorize the requested amount.

The conferees recommend authorization of $610.5 million for aviation spares and repair parts.

Support equipment and facilities

The budget request contained $160.9 million for aviation support equipment and facilities. The House amendment would authorize $150.4 million for such purposes. The Senate bill would authorize $153.0 million for such activities.

The conferees recommend authorization of $150.4 million for aviation support equipment and facilities as detailed in the foregoing table.

MISSILES, ARMY

Chaparral missile system

The budget request contained $103.7 million for procurement of 456 Chaparral Rosette Scan Seeker (RSS) missiles.

The House amendment would authorize $83.7 million for procurement of 356 Chaparral missiles.

The report accompanying the House amendment (H. Rept. 99-718) directs the Secretary of the Army not to obligate any of the amount authorized until the Secretary submits a report to the Committees on Armed Services and Appropriations of the Senate and House of Representatives providing detailed comparisons of the various procurement options available and assessing the value of establishing an analytic methodology that could be applied to major acquisition programs throughout the Army. A separate, independent report by the Cost Analysis Improvement Group (CAIG) in the Office of the Secretary of Defense, reviewing the Army's proposed acquisition strategy, is also to be provide to the committees

The Senate bill would authorize $100.7 million for procurement of 456 Chaparral missiles. The report accompanying the Senate bill (S. Rept. 99-331) contained no similar requirement.

The conferees agreed to authorize $30 million for procurement of Chaparral missiles. The conferees agreed to require the Secretary of the Army to submit the report directed by the House.

The Senate recedes.

Patriot missiles

The budget request contained $951.5 million for the procurement of 700 missiles and 12 Patriot fire units. The request also contained $45.3 million to support advance procurement.

The House amendment would authorize $921.5 million for procurement of 585 missiles and 12 fire units and $45.3 million for advance procurement. Section 110(a) of the House amendment would authorize the Secretary of the Army to enter a multiyear contract for procurement of the Patriot, providing that the contract contains negotiated price options that vary quantities by 30 percent in each year and that the multiyear contract offers 12 percent savings compared to annual contracts.

The Senate bill would authorize $920.0 million for 700 missiles and 12 fire units and $45.3 million for advance procurement. Section 108(a) of the Senate bill would provide authorization to enter into a multiyear procurement contract.

The conferees agreed to authorize $920.0 million for 700 Patriot missiles and 12 fire units and $40.3 million for advance procurement. Further, the conferees agreed to a provision that would authorize the Secretary to enter a multiyear contract for procurement of the Patriot providing that the multiyear contract offers 12 percent savings compared to annual contracts.

The Senate recedes with an amendment.

Stinger

The budget request contained $251.7 million for the procurement of 4,180 Stinger missiles and $40.3 million in advance procurement.

The House amendment would authorize the requested amount, subject to the conditions set forth in Section 110(a).

The Senate bill would also authorize the requested amounts. Section 108(b) of the Senate bill would direct the Secretary of the Army to solicit bids to establish a competitive second source for the Stinger missile and to determine which contracting method, multiyear or contracting, is more cost-effective. In order to enter into a multiyear contract, the Secretary would need to certify in a report, validated by the Government Accounting Office (GAO), that the multiyear method is the least costly.

The conferees agreed to authorize $251.7 million for procurement of 4,180 Stinger missiles. The conferees agreed to incorporate the provisions contained in the Senate bill.

The House recedes.

TOW II missile

The report accompanying the Senate bill (S. Rept. 99-331) directed the army to establish, expeditiously, a competitive second source for TOW II missiles. Funds are to be made available from procurement of missiles in fiscal year 1987 to select and qualify the second source.

The house report contained no similar language.

The conferees believe that cost savings and reliability improvements could be achieved. Consequently, the conferees agreed to direct the Secretary of the Army to establish a competitive second source for the procurement of the TOW II missile, unless the Secretary certifies to the Committees on Armed Services of the Senate and the House of Representatives that such a course of action is not cost-effective.

The House recedes.

Multiple launch rocket system

The budget request contained $474.2 million for procurement of 72,000 rockets and 44 self-propelled launcher loaders.

The House amendment would authorize $464.2 million for procurement of 72,000 rockets and 44 self-propelled launcher loaders, with 30 of the 44 launchers procured to be used to equip three batteries of the Army National Guard.

The report accompanying the House amendment (H. Rept. 99-718) directs that the Secretary of the Army examine acquisition strategies that provide for economic purchase of the launchers. A report concerning the proposed acquisition strategy, together with future Army requirements for launchers, is to be submitted to the Committees on Armed Services of the Senate and House of Representatives by February 1, 1987. Further, the House report directs that 30 of the 44 launchers be procured to equip three batteries of the Army National Guard.

The Senate bill would authorize $469.2 million for procurement of 72,000 rockets and self-propelled launcher loaders. The report accompanying the Senate bill (S. Rept. 99-331) contains no similar directions.

The conferees agreed to authorize $461.7 million for procurement of 72,000 rockets and self-propelled launcher loaders. The conferees agree to the provisions in the House report requiring a report from the Secretary of the Army concerning requirements and proposed acquisition strategies for MLRS launchers. The conferees agreed not to designate launchers for the Army National Guard.

WEAPONS AND TRACKED COMBAT VEHICLES, ARMY

M2/M3 Bradley fighting vehicle

The budget request contained $1,121.8 million for procurement of 870 Bradley fighting vehicles and $20.6 million in advance procurement for fiscal year 1988.

The House amendment would authorize $830.0 million for procurement of 593 Bradley fighting vehicles and $20.6 million for advance procurement for fiscal year 1988. The House amendment included a provision (sec. 121) that would establish a set of detailed requirements for the development of a test plan and conduct of the live-fire testing of the Bradley.

The Senate bill would authorize $926.8 million for procurement of 720 Bradley fighting vehicles and $20.6 million for advance procurement for fiscal year 1988. The Senate bill contained no provisions related to a test plan or conduct of live-fire testing.

The conferees agreed to authorize $895.8 million for procurement of 720 Bradley fighting vehicles and $20.6 million for advance procurement.

The conferees agreed that further testing of the proposed modifications to the Bradley vehicle, including alternative configurations designed to improve survivability, is warranted. However, the conferees believe that vehicle survivability should not be taken out of context, and that decisions concerning future modifications would be incomplete unless the combat performance of the alternative design configurations is thoroughly tested and evaluated.

The conferees agreed to a provision (sec. 121) that directs the Secretary of Defense to develop a balanced and affordable test plan to evaluate alternative design configurations for the Bradley fighting vehicle. The Secretary should utilize the Office of Development Test and Evaluation to develop the survivability testing, and the Office of Operational Test and Evaluation to develop the combat performance testing.

The conferees note that this provision is not intended to preclude the Secretary of the Army from initiating testing required by this section, as detailed testing procedures are approved by the Office of the Secretary of Defense.

The conferees also direct that the Army may not proceed with modifications to install reactive armor on the Bradley vehicle until the tests specified in this section have been completed. The Army may proceed at the earliest practical date with any other minor modifications that improve the survivability of the vehicle.

The Senate recedes with an amendment.

M1 Abrams tank

The budget request contained $1,643.6 million for procurement of 840 M1 tanks and $351.4 million for advance procurement for fiscal year 1988.

The House amendment would authorize $1,578.6 million for procurement of 840 M1 tanks and $351.4 million for advance procurement.

The Senate bill authorizes $1,643.6 million for procurement of 840 M1 tanks and $351.4 million for advance procurement.

The conferees agreed on authorization of $1,578.6 million for procurement of 840 M1 tanks, and $351.4 million for advance procurement.

The Senate recedes.

The conferees have been informed that while the overall totals in the President's budget submission for the M1 tank were correct, the allocation between funds required for procurement and those required for advanced procurement was incorrect.

The conferees expect that the Secretary of the Army will procure not less than 840 M1 tanks with the total funds authorized. To accomplish this objective, the conferees would welcome a reprogramming request from the fiscal year 1987 advance procurement funds.

WEAPONS AND OTHER COMBAT VEHICLES, ARMY

L119 howitzer

The budget request contained $26.5 million to procure 64 towed 105mm L119 howitzers.

The House amendment would authorize $12.0 million for the facilitization on-shore for future howitzer production, but would provide no authorization for purchase of any howitzers in fiscal year 1987.

The Senate bill would authorize $26.5 million for procurement of 64 howitzers.

The conferees agreed on authorization of $26.5 million for 64 howitzers.

The House recedes.

120mm mortar

The budget request contained $13.2 million to procure 145 120mm mortars.

The House amendment would authorize the amounts requested. The House amendment included a provision (sec. 122(a)) that would prohibit obligation of funds for procurement of 120mm mortars or mortar ammunition that is manufactured or assembled outside the United States, except for those mortars required for testing, evaluation, or type classification. Section 122(a) would also prohibit obligation of funds for fiscal year 1987 for procurement of 120mm mortars until the Secretary of the Army purchases the technical data package and conducts a cost-effectiveness analysis concerning potential domestic sources for manufacturing of mortars. The latter provision is consistent with the direction contained in the joint explanatory statement of the conference report (H. Rept. 99-235) on the fiscal year 1986 Defense Authorization Act (Public Law 99-145).

The Senate bill would authorize $13.2 million to procure 145 120mm mortars.

The conferees agreed to authorize $13.2 million to procure 145 120mm mortars.

The Senate recedes with an amendment that restricts the obligation of fiscal year 1987 funds only until the Secretary of the Army conducts the cost-effectiveness analysis concerning potential domestic sources for manufacturing of mortars.

Cannon tube forgings for surge

The report accompanying the House amendment (H. Rept. 99-718) directs the Secretary of the Army to provide to the Committees on Armed Services of the Senate and the House of Representatives a master plan concerning mobilization surge requirements.

The Senate bill contained no similar provision.

The Senate recedes.

AMMUNITION, ARMY

Overview, ammunition

The budget request contained $2,254.0 million for Army ammunition procurement in fiscal year 1987. The House amendment would authorize $2,062.8 million for procurement of Army ammunition. The Senate bill would authorize $2,283.3 million for the same purpose.

The conferees recommend authorization of $2,126.1 million for procurement of Army ammunition in fiscal year 1987. The amounts requested for specific items that were in dispute, the amounts allowed by the House amendment and the amounts in the Senate bill are listed in the foregoing table.

Copperhead

The budget request contained $8.2 million for the procurement of 220 Copperhead projectiles.

The House amendment would authorize the requested amount. The House amendment included a provision (sec. 122(b)) that would prohibit obligation of the funds for procurement until the Secretary of Defense certifies that a second production source has been established.

The Senate bill would authorize $18.2 million for the procurement of 305 projectiles. The Senate bill included no similar limitation.

The conferees agreed to authorize $18.2 million for procurement of 305 Copperhead projectiles.

The House recedes.

Lightweight multi-purpose weapons

The budget request contained $82.5 million for procurement of 136,000 lightweight multi-purpose weapons and $2.5 million for procurement of 963 training rounds.

The House amendment would authorize the requested amount. The House amendment included a provision (sec. 122(g)) that would prohibit obligation of the funds for procurement of the AT-4 weapon until the Secretary of the Army (1) completes development and operational testing of the M72E4 light antiarmor weapon; (2) type classifies the M72E4 weapon; (3) acquires a technical data package for the M72E4 weapon.

The Senate bill would authorize $82.5 million for procurement of 136,000 lightweight multi-purpose weapons and $7.3 million for procurement of 1410 training rounds.

The conferees agreed to authorize $69.5 million for procurement of 51,000 lightweight multi-purpose weapons and $7.3 for procurement of training rounds.

The conferees agreed to delete the House provision prohibiting obligation of funds for the AT-4 because the Urgent Fiscal Year 1986 Supplemental Act (Public Law 99-349) currently requires the Secretary of the Army to complete the required testing for M72E4, type classify the weapon, and acquire a technical data package. As such, the House provision is duplicative. In agreeing to delete this provision, the conferees expect that the Secretary will comply with existing public law.

Authorization of ammunition plants

To avoid duplication in Military Construction and Department of Defense authorization legislation, the report accompanying the House amendment (H. Rept. 99-718) directs that the authorizations for construction associated with ammunition plants in fiscal year 1988 and subsequent years be requested in conjunction with Department of Defense authorization legislation only.

The Senate bill contained no similar directions.

The Senate recedes.

Demonstration of casting

The report accompanying the House amendment (H. Rept. 99-718), directs that within the authorization for Army ammunition $6.0 million is to be used for conducting a demonstration of advanced casting technology in the production of selected artillery and mortar projectiles. On completion of the demonstration, program results are to be submitted to the Committees on Armed Services of the Senate and the House of Representatives.

The Senate report contained no similar direction.

The Senate recedes.

Mississippi Army Ammunition Plant

The conferees endorse the Army's program to achieve the designed mobilization rates of the M483 ICM round at the Mississippi Army Ammunition Plant. The conferees have no objection to the obligation of the remaining fiscal year 1986 M483 ICM funds for prove-out and M483 production.

OTHER PROCUREMENT, ARMY

Tactical and support vehicles

The budget request contained $865.7 million for procurement of tactical and support vehicles.

The House amendment would authorize $824.9 million for tactical and support vehicles. The Senate bill would authorize $815.7 million for tactical and support vehicles.

The conferees agreed to authorize $787.2 million for tactical and support vehicles. Within the authorization, the conferees agreed to an undistributed reduction of $58.4 million. In applying this reduction, the conferees encourage the Department of the Army initially to consider categories such as administrative use vehicles or passenger cars and other noncritical items.

Motorcycles

The budget request contained $7.1 million to procure 2,732 motorcycles. The House amendment would authorize the requested amount. The House amendment included a provisions (sec. 122(c)) that would prohibit obligation of funds for procurement of motorcycles until the Secretary of the Army certifies to the Congress that the acquisition strategy includes consideration of life-cycle costs, safety, maintenance, and durability.

The Senate bill would authorize the requested amount with no restrictions on the obligation of funds.

The Senate recedes.

10-ton trucks

The budget request contained $234.3 million for procurement of 1,523 Heavy Expanded Mobility Tactical Truck (HEMTT) trucks.

The House amendment would authorize $284.3 million for procurement of 1,773 HEMTT trucks. The House amendment included a provision (sec. 122(e)) that would provide the authority for the Secretary of the Army to purchase and validate the technical data package for the HEMTT truck program. Section 122(f) would provide the authority for the Secretary to exercise remaining fiscal year 1986 options to purchase 412 HEMTT trucks.

The Senate bill would authorize $234.3 million for procurement of 1523 10-ton trucks.

The conferees agreed to authorize $234.3 million to procure 1,523 10-ton trucks.

Under the current multiyear contract for the 10-ton truck (HEMTT), the production rate is six vehicles per day. The Army's budget request for fiscal year 1987 also anticipates a production rate of 6 vehicles per day. The conferees expect that this production rate will be sustained in fiscal year 1987 in order to avoid unnecessary cost increases, and the Secretary of the Army shall take whatever actions are necessary to maintain this production rate.

The conferees direct the Secretary of the Army to conduct a life-cycle cost study of future options for procurement of heavy tactical vehicles. This study should include an analysis of modifications to the existing 10 ton truck that incorporate Palletized Loading Systems. This analysis should also include an assessment of the savings available through procurement of non-development items of equipment and the cost of introducing new equipment items in the logistics support structure.

The conferees encourage the Secretary of the Army to acquire the technical data package for the HEMTT unless the Secretary determines it is not cost-effective. The House recedes on section 122(e) and 122(f).

Communications and electronic equipment

The budget request contained $3,698.0 million for communications and electronic equipment.

The House amendment would authorize $2,803.0 million for communications and electronic equipment. The Senate bill would authorize $3,471.6 million for communications and electronic equipment.

The conferees agreed to authorize $3,084.0 million for communications and electronic equipment.

Mobile subscriber equipment

The budget request contained $903.7 million for procurement of mobile subscriber equipment (MSE). The House amendment would authorize $853.7 million for procurement of MSE. The Senate bill would authorize $903.7 million for procurement of MSE.

The conferees agreed to authorize $903.7 million for procurement of MSE. The conferees agreed to a provision (sec. 122(e) that would place a cap on the total acquisition cost for the MSE program at $4.3 billion. This cap corresponds to the Army's current program that equips 26 Division Signal Battalion sets, 20 Corps Signal Battalion sets, and 2 training sets. The conferees direct that, if the Secretary of the Army determines that additional equipment is required due to changes in force structure, those added equipment requirements shall be identified in the Selection Acquisition Reports (SAR), and are not subject to the cost cap.

The House recedes with an amendment.

Single channel ground and airborne radio system (SINCGARS)

The administration requested $204.0 million for the procurement of 16,000 Single Channel Ground and Airborne Radio Systems (SINCGARS).

The House amendment contains no authorization for SINCGARS.

The Senate bill would authorize $54.0 million for the procurement of 16,000 SINCGARS. As a result of SINCGARS program delays, the fixed price production option (for procurement of 16,000 units in Option III) may lapse and require renegotiation. The report accompanying the Senate bill (S. Rept. 99-331) directs that the Option III contract for procurement of 16,000 units not cost the government any more than would have been paid under the lapsed fixed agreement. The report directs the Secretary of the Army to provide written notification to the Armed Services Committees of the Senate and the House of Representatives when the renegotiations are concluded. The report also strongly encourages the Army to take all necessary steps to accelerate the selection and qualification of a second source.

The conferees agreed to authorize $10 million for the procurement of SINCGARS radios.

The House recedes.

Trailblazer

The conferees agreed to authorize funds for the procurement of a trailblazer training simulator for the school at Fort Devens.

Supercomputers

The budget request contained $22.9 million for procurement of supercomputers for the Army.

The House amendment contained no authorization for supercomputers. The Senate bill would authorize $22.9 million for procurement of supercomputers.

The conferees agreed to authorize $22.9 million for procurement of supercomputers.

The conferees direct that none of the funds authorized for procurement of supercomputers be obligated until the Secretary of the Army submits a master plan to the Armed Services Committees of the Senate and the House of Representatives concerning the acquisition and deployment of supercomputers over the next five years.

The House recedes.

Aquila remotely piloted vehicle

The budget request contained $117.7 million for the remotely piloted vehicle (RPV) system consisting of unmanned air vehicles, ground stations, launcher and recovery subsystems, and maintenance shelters.

The House amendment contains no authorization for the Aquila program.

The Senate bill would authorize $50 million for procurement of the Aquila RPV. The Senate bill contained a provision (sec. 101(b)) that restricts obligation of funds until (1) the Director of Operational Test and Evaluation completes an assessment of the system; and (2) the Secretary of the Army certifies that the Aquila meets or exceeds all performance criteria and the Army has negotiated a procurement contract that limits the government's liability on the overall program.

The conferees agreed to authorize $50 million for procurement of the Aquila system. Further, the conferees agreed to incorporate the Senate provisions restricting the obligation of funds.

The House recedes.

GENERAL ARMY MATTERS

Acquisition plans for major army systems

The report accompanying the Senate bill (S. Rept. 99-331) directs the Secretary of the Army to conduct a comprehensive evaluation of the Army's future acquisition plans for major combat systems.

The report accompanying the House amendment (H. Rept. 99-718) directs the Secretary of the Army to conduct an analysis on future requirements for Army tank production.

The conferees believe that the Secretary of the Army should undertake a comprehensive review of its acquisition plans for major combat weapons.

This major review is directed because the conferees are concerned that:

(1) production of several primary combat systems are scheduled to end several years before the initiation of procurement for follow-on systems;

(2) presently approved production plans for major combat systems do not allow the Army to fully modernize its force structure;

(3) future bugetary constraints will limit major development efforts over the next several years.

Therefore, the conferees direct the Secretary of the Army to conduct a major review and provide a master plan to the Committees on Armed Services of the Senate and the House of Representatives by March 15, 1987. This report should address:

(a) requirements for retaining an active production base for combat systems,

(b) a reevaluation of the inventory objective for existing systems,

(c) feasible improvements in existing systems that will improve their combat capabilities, and

(d) a transition plan that ties together the current system, block improvements to current systems, and postulated future systems which are still in early R&D phases but which represent long-term Army plans for future combat.

The conferees expect that this master plan will represent the Army's roadmap for major acquisitions in light of realistic funding constraints. The conferees expect, however, that the plan will indicate the extent to which the master plan satisfies total Army requirements for force modernization.

DOD family of remotely piloted vehicles

The report accompanying the House amendment (H. Rept. 99-718) directed the Department of Defense of provide a master plan for Remotely Piloted Vehicles (RPVs) in conjunction with the submission of the fiscal year 1988 budget. At a minimum, this plan should incorporate: (1) harmonization of service requirements; (2) utilization of commonality to the maximum extent possible; (3) trade-offs between manned and unmanned vehicles in order to provide for future cost savings.

The Senate bill contained no similar direction.

The conferees agreed to require the master plan for RPVs.

The Senate recedes.

AIRCRAFT PROCUREMENT, NAVY

A-6E attack aircraft (Intruder)

The budget request contained $278.9 million for procurement of 11 A-6E aircraft in fiscal year 1987, $80.0 million for advance procurement of 12 A6-F aircraft in fiscal year 1987 and $31.2 million for initial spares. The House amendment and the Senate bill would authorize the amounts requested.

The conferees recommend authorization of $258.9 million for procurement of 11 A-6E aircraft in fiscal year 1987, $80.0 million for advance procurement of 12 A6-F aircraft in fiscal year 1988 and $31.2 million for initial spares.

The conferees support the Navy decision to replace existing Liquid Oxygen Systems (LOX) with an On-Board Oxygen Generating System (OBOGS) for carrier aircraft in the interest of shipboard safety and dollar savings. However, the conferees understand that installation of an OBOGS is best and most affordably accomplished during aircraft manufacture, yet the current A-6F baseline program does not include an OBOGS. Accordingly, the Secretary of the Navy is directed to incorporate an OBOGS in the A-6F.

F-14A fighter aircraft (Tomcat)

The budget request contained $541.1 million to procure 15 aircraft in fiscal year 1987, $127.7 million for advance procurement of 12 aircraft in fiscal year 1988 and $27.1 million for initial spares. The House amendment would authorize $360.7 million for procurement of 10 F-14A aircraft in fiscal year 1987, $127.7 million for advance procurement of 12 aircraft in fiscal year 1988 and $27.1 million for initial spares. The Senate bill would authorize the requested amount.

The conferees recommend authorization of $520.4 million for procurement of 15 F-14A aircraft in fiscal year 1987, $127.7 million for advance procurement of 12 aircraft in fiscal year 1988 and $27.1 million for initial spares.

The House recedes with an amendment.

As in the case of the A-6E aircraft discussed above, the conferees are concerned that the F-14D baseline program may not include an On-Board Oxygen Generating System (OBOGS). Accordingly, the Secretary of the Navy is directed to incorporate an OBOGS in the F-14D.

FA-18 fighter attack aircraft (Hornet)

The budget request contained $2,896.4 million to procure 120 aircraft in fiscal year 1987, $405.9 million for advance procurement of 132 aircraft in fiscal year 1988 and $104.4 million for initial spares.

The House amendment would authorize $2,140.6 million for procurement of 84 aircraft in fiscal year 1987, $198.3 million for advance procurement of 84 aircraft in fiscal year 1988 and $60.2 million for initial spares. The Senate bill would authorize $2,466.4 million for procurement of 96 aircraft in fiscal year 1987, $305.9 million for advance procurement of 102 aircraft in fiscal year 1988 and $104.4 million for initial spares.

The conferees recommend authorization of $2,250.0 million for procurement of 84 FA-18 aircraft in fiscal year 1987, $170.0 million for advance procurement of 84 aircraft in fiscal year 1988 and $75.0 million for initial spares.

The Senate recedes with an amendment.

Reductions made are without prejudice and are strictly the result of budgetary constraints. As in the case of the A-6E aircraft discussed above, the conferees are concerned that the FA-18 baseline may not include an On-Board Oxygen Generating System (OBOGS). Accordingly, the Secretary of the Navy is directed to incorporate an OBOGS in the FA-18.

AH-1T attack helicopter (Sea Cobra)

The budget request contained $36.2 million for AH-1T procurement for fiscal year 1987, no advance procurement and $1.0 million for initial spares. The House amendment and the Senate bill would authorize the amount requested.

The conferees were informed that Navy aircraft procurement plans have changed and that the Navy now plans procurement of improved AH-IW aircraft in fiscal year 1988. Accordingly, the conferees recommend authorization of $21.2 million for AH-1T procurement for fiscal year 1987, $15.0 million for advance procurement of AH-1W aircraft in fiscal year 1988 and $1.0 million for initial spares.

SH-60B antisubmarine warfare helicopter (Seahawk)

The budget request contained $199.7 million for procurement of 17 aircraft in fiscal year 1987, $21.1 million for advance procurement of 6 aircraft in fiscal year 1988 and $14.1 million for initial spares.

The House amendment would authorize $129.3 million for procurement of 11 aircraft in fiscal year 1987, $21.1 million for advance procurement of 6 aircraft in fiscal year 1988 and $14.1 million for initial spares. The Senate bill would authorize the amounts requested.

The conferees recommend authorization of the amounts requested.

The House recedes.

SH-60F anti-submarine warfare helicopter (CV Helo)

The budget request contained $138.8 million for procurement of seven aircraft in fiscal year 1987, $29.4 million for advance procurement of 18 aircraft in fiscal year 1988 and $18.2 million for initial spares.

The House amendment would authorize $117.8 million for procurement of seven aircraft in fiscal year 1987, $29.4 million for advance procurement of 18 aircraft in 1988 and $18.2 million for initial spares. The Senate bill would authorize the amounts requested.

The conferees recommend authorization of $117.8 million for procurement of seven aircraft in fiscal year 1987, $29.4 million for advance procurement of 18 aircraft in fiscal year 1988 and $18.2 million for initial spares.

The Senate recedes.

P-3C Antisubmarine warfare aircraft (Orion)

The budget request contained $312.4 million to procure 9 aircraft in fiscal year 1987, $93.2 million to support the procurement of nine aircraft in fiscal year 1988 and $8.6 million for initial spares.

The House amendment would provide no authorization for procurement of aircraft in fiscal year 1987, $93.2 million for advance procurement of an improved P-3G aircraft for fiscal year 1988 and no authorization for initial spares. The Senate bill would authorize the amounts requested.

The conferees recommend authorization of the amounts requested.

The House recedes with an amendment.

The conferees find that the situation regarding procurement of P-3C aircraft is essentially unchanged from that outlined in the conference report on the fiscal year 1986 Defense Authorization Act (H. Rept. 99-235). The procurement program remains an annual struggle between the Navy and the Office of the Secretary of Defense with the result that an inefficient program is perpetuated. This debate has not addressed the real issues involved with strengthening U.S. long-range ASW capabilities in the face of Soviet advances in submarine warfare.

To address the problem, the conference report required the Navy to submit a report with supporting analysis justifying the way in which the Navy allocated budget authority cost effectively between P-3C aircraft and P-3 aircraft modifications prior to obligating fiscal year 1986 funds for the P-3 program. Further, the Navy was required to establish a long-range maritime patrol (VP) procurement plan to expand the capabilities of the VP fleet, introduce competition into the program and provide for greater capabilities within the same general budget share.

To date, the Committees on Armed Services of the Senate and the House of Representatives have not received the required report, yet fiscal year 1986 funds have been obligated. And, despite speculation concerning a more capable successor to the current P-3C (VPX, P-3D, P-3G and Update IV mission avionics), the committees have not been provided the long-range maritime patrol procurement plan called for. Nevertheless, the conferees are aware of proposed Navy plans to pursue a so-called P-3G program that would combine the current airframe with new engines, elongated bomb-bay, cockpit changes, and enhanced survivability features with an Update IV mission avionics suite now nearing development competition.

Absent the required report and plan, the conferees question the feasibility and cost-effectiveness of the Navy's plan. Except for the Update IV avionics, the conferees do not believe the proposed P-3G would offer sufficient capability improvement to justify the investment.

The conferees believe the formula established last year in the fiscal year 1986 Defense Authorization Act still constitutes a fundamentally sound basis for proceeding with the long-range ASW patrol program. The centerpiece of that plan is broader competition for the P-3 mission avionics. The conferees intended that the Update III modification program be expanded to include competition similar to that ongoing in the Update IV program.

Last year the conferees authorized the Secretary of the Navy to transfer up to $120 million from procurement into modifications to accelerate the Update III modification program and foster competition. The conferees include the same provision in this year's conference bill (sec. 102(f)(1)). The provision would also cap expenditures for the fiscal year 1987 P-3 procurement program to those authorized in this act.

In addition, the bill also includes a provision (sec. 102(f)(3)) that would permit the Navy to transfer two of the P-3 aircraft authorized in fiscal year 1986 to fulfill the U.S. Navy obligations pursuant to the classified Maritime Surveillance Agreement of 1986.

Looking to the future, the conferees believe the key to increased competition in the P-3 modernization program is through industry competition for system integration and total system responsibility, as is the case with other ASW aircraft.

Accordingly, the Secretary of the Navy is directed to provide for P-3 system integra-

tion and total system responsibility through competitive procedures beginning with the first production P-3 Update IV mission avionics configured aircraft. Should a prototype P-3 Update IV configured aircraft be required for the purpose of competing system integration, the Secretary of the Navy may request reprogramming authority to use a portion of the advance procurement authorization for fiscal year 1988 for this purpose since such a course differs from the plans in the President's budget. The conferees stress that the Navy should not prototype a system with other than Update IV mission avionics.

E-2C (Hawkeye)

The budget request contained $286.5 million for procurement of six aircraft in fiscal year 1987, $24.1 million for advance procurement of six aircraft in fiscal year 1988 and $24.7 million for initial spares.

The House amendment would authorize the amounts requested. The Senate bill would authorize $424.5 million for procurement of 10 aircraft in fiscal year 1987, $24.1 million for advance procurement of six aircraft in fiscal year 1988 and $24.7 million for initial spares.

The conferees recommend authorization of $281.0 million for procurement of six aircraft in fiscal year 1987, $24.1 million for advance procurement of six aircraft in fiscal year 1988 and $24.7 million for initial spares.

The Senate recedes with an amendment.

SH-2F antisubmarine warfare helicopter (Seasprite)

The budget request contained $52.8 million for procurement of 6 aircraft in fiscal year 1987. The House amendment would authorize the amount requested. The Senate bill would provide no authorization for the SH-2F aircraft.

The conferees recommend authorization of $52.8 million for procurement of six aircraft in fiscal year 1987.

The Senate recedes with an amendment.

The conferees note that the recommended authorization would provide for one SH-2 Lamps Mark I helicopter system for each small deck ship not capable of handling the SH-60 Lamps Mark III helicopter system. Given competing priorities and budgetary constraints, the conferees believe one SH-2 Lamps Mark I system per small deck ship adequately addresses the Naval Reserve antisubmarine warfare helicopter requirement. Accordingly, the conferees intend that the U.S. Navy's procurement of SH-2F helicopters end with the fiscal year 1987 authorization.

E-6A electronic communications aircraft (TACAMO)

The budget request contained $226.6 million for procurement of three E-6A TACAMO aircraft in fiscal year 1987, $72.9 million for advance procurement of three aircraft in fiscal year 1988 and $29.9 million of initial spares. The House amendment would authorize $83.0 million for procurement of one E6A aircraft in fiscal year 1987, $24.3 million for advance procurement of one aircraft in fiscal year 1988 and no initial spares. The Senate bill would authorize the requested amounts.

The conferees recommend authorization of the amounts requested

The House recedes with an amendment.

The conferees recognize the importance of the TACAMO mission in the President's strategic modernization program. The conferees also recognize the advantageous contract between the Navy and its prime contractor and that the Defense Department has authorized the Navy to provide full funding to maintain certain not-to-exceed prices within the contract.

Nevertheless, the conferees are aware that very capable complements to the E-6A TACAMO may not be reasonably available. Accordingly, and in concert with the Secretary of the Navy, the Secretary of Defense is directed to evaluate satellite laser communications complements to the current E-6A TACAMO program and report his findings and recommendation to the Committees on Armed Services of the Senate and House of Representatives prior to March 1, 1987.

Modification of aircraft

The budget request contained $1,427.2 million for modification of Navy aircraft for fiscal year 1987. The House amendment would authorize $1,300.8 million for modification of aircraft. The Senate bill would authorize the amounts requested.

The conferees recommend authorization of $1,344.4 million for modification of Navy aircraft for fiscal year 1987. Specific details are presented in the foregoing table.

The conferees support cost effective approaches to improve aviation safety in the military forces. One such approach is the use of second generation or later ground collision avoidance systems for transport aircraft. Accordingly, the recommended authorization provides $27.6 million for common avionics, including $6.0 million for procurement of ground collision avoidance system retrofit kits for E-2/C-2, T-39 and UC-12B aircraft.

Aircraft spares and repair part

The budget request contained $1,856.1 million for aircraft spares and repair parts in fiscal year 1987. The House amendment would authorize $1,519.7 million for spares and repair parts in fiscal year 1987. The Senate bill would authorize the amounts requested.

The conferees recommend authorization of $1,790.1 million for aircraft spares and repair parts in fiscal year 1987. Specific details are presented in the foregoing table.

Aircraft support equipment and facilities

The budget request contained $656.6 million for support equipment and facilities for fiscal year 1987. The House amendment and the Senate bill would authorize the amounts requested.

The conferees recommend authorization of $631.1 million for aircraft support equipment and facilities for fiscal year 1987. Specific details are presented in the foregoing table.

WEAPONS PROCUREMENT, NAVY

Overview

The budget request contained $6,095.4 million for weapons procurement for the Navy for fiscal year 1987. The House amendment would authorize $5,725.8 million for weapons procurement. The Senate bill would authorize $5,597.5 million for weapons procurement.

The conferees recommend authorization of $5,450.0 million for weapons procurement for the Navy for fiscal year 1987.

Ballistic missiles

The budget request contained $1,437.0 million for ballistic missiles. The House amendment and the Senate bill would authorize the amounts requested.

The conferees recommend authorization of the amounts requested.

Other missiles

The budget request contained $3,343.1 million for other missiles for fiscal year 1987.

The House amendment would authorize $2,986.0 million for other missiles. The Senate bill would authorize $3,267.0 million for other missiles.

The conferees recommend authorization of $3,150.5 million for other missiles for fiscal year 1987. Specific details are presented in the foregoing table.

AIM-54 A/C (Phoenix)

The budget request contained $289.3 million for procurement of 205 missiles in fiscal year 1987 and $28.4 million for advance procurement of missiles for fiscal year 1988.

The House amendment would authorize $275.5 million for 300 missiles in fiscal year 1987 and $28.4 million for advance procurement of missiles for fiscal year 1988. The Senate bill would authorize the amounts requested.

The conferees recommend authorization of $267.3 million for procurement of 300 missiles for in fiscal year 1987 and $23.1 million for advance procurement of missiles for 1988.

The recommendation should not be interpreted as reduced support by the conferees for the stated goals and objectives of the Navy's competitive second source strategy for this program. Rather, it reflects what the conferees believe can and should be achieved by using current proposals from industry and recent changes in Navy acquisition policies and procedures. The conferees note that this approach has achieved both near term and long term savings in the Standard missile second source program.

Drones and decoys

The budget request contained $36.1 million for drones and decoys for in fiscal year 1987. The House amendment and the Senate bill would authorize the amounts requested.

The conferees are extremely interested in the military exploitation of unmanned aerial vehicles (UAVs). Accordingly, the Secretary of the Navy is directed to report the status of ongoing Navy UAV evaluations to the Committees on Armed Services of the Senate and the House of Representatives prior to March 1, 1987.

Weapons industrial facilities

The budget request contained $7.5 million of weapons industrial facilities for in fiscal year 1987. The House amendment would authorized the amount requested. The Senate bill would authorize $12.7 million for in fiscal year 1987.

The conferees recommend authorization of $12.7 million for weapons industrial facilities for in fiscal year 1987, an increase of $5.2 million from the budget request.

The conferees agreed that the increased authorization is to be used to continue the restoration of facilities damaged by accidental fire and explosives at the Allegheny Ballistics Laboratory. Allegheny Ballistics Laboratory is a government-owned, contractor-operated facility in West Virginia that produces rocket motors for Navy air-to-air missiles. The additional authorization is sufficient to construct a new cure bay complex, magazine, rocket motor disassembly building and a munitions assembly building.

MK-48 advanced capability (ADCAP) torpedoes

The budget request contained $508.4 million for 227 MK-48 advanced capacility (ADCAP) torpedoes.

The Senate bill would authorize the quantity and funds requested. The House amendment would authorize $468.4 million for 197 torpedoes.

The conferees have received information from the Navy indicating that ADCAP production delays are expected in fiscal year 1987 because of problems discovered (and corrected) during testing this past year. Accordingly, the conferees recommend authorization of $254.8 million for 50 torpedoes.

Anti-surface warfare (ASUW) torpedo

The budget request contained $17 million for 34 anti-surface warfare torpedoes.

The Senate bill would authorize the amount requested. The House amendment would provide no authorization for this program.

The Senate recedes.

MK-50 advanced lightweight torpedo

The budget request contained $109.9 million for 84 MK-50 advanced lightweight torpedoes.

The Senate bill would authorize the amounts requested. The House amendment would authorize $94.9 million for 67 torpedoes.

The Senate recedes.

MK-60 captor (encapsulated torpedo)

The budget requested no authorization for the MK-60 captor deep-water mine.

The Senate bill contained no authorization for the Captor mine. The House amendment would authorize $59.5 million for 130 mines.

The conferees agreed to provide authorization of $30 million for the procurement of 60 Captor mines.

Weapons procurement, undistributed reduction and inflation savings

The Senate bill would reduce the total authorization for the weapons procurement, Navy account by $445.1 million, including $96.7 million for an undistributed reduction and $348.4 million in inflation savings. The House amendment made no similar reductions.

The conferees agreed to a reduction of $197.3 million to reflect lower inflation in 1987.

The Senate recedes with an amendment.

SHIPBUILDING AND CONVERSION

The President's budget request contained $11,046.2 million for the construction, conversion, service life extension, and acquisition of 24 naval vessels.

The Senate bill contained an authorization of $9,323.8 million for 19 naval vessels. The House amendment contained an authorization of $8,355.3 million for 16 naval vessels.

The conferees agreed to authorizations totaling $10,607.1 million for 21 naval vessels.

Trident ballistic missile submarine (SSBN)

The budget request contained $1,509.1 million for the Trident submarine program, including $1,362.7 million for the fourteenth submarine and $146.4 million for advance procurement.

The Senate bill would authorize the amounts requested. The House amendment would provide no authorization for the Trident program.

The conferees agreed to authorizations of $1,446.4 million for the Trident submarine program, including $146.4 million for advance procurement.

Aegis ships

The budget request contained $1,913.8 million for 2 CG-47 class guided missile cruisers and $10.5 million for advance procurement. The budget also contained a request for $2,448 million for 3 DDG-51 class guided missile destroyers and $79.8 million for advance procurement.

The Senate bill would authorize the amounts requested for the CG-47 class guided missile cruiser program and $2,466 million for 3 DDG-51 guided missile cruisers and $79.8 million for advance procurement.

The House amendment would authorize $2,715.1 million for 3 CG-47 class guided missile cruisers and $10.5 million for advance procurement and $871.7 million for one DDG-51 class guided missile cruiser and $79.8 million for advance procurement.

The conferees agreed to authorizations of $2,715.1 million for 3 CG-47 class missile cruisers and $10.5 million for advance procurement and $2,390.3 million for a 3 DDG-51 class guided missile destroyers and $79.8 million for advance procurement.

Fleet oiler (conversion) (AO-177)

The budget contained a request for $62.3 million to enlarge one AO-177 class oiler.

The Senate bill would authorize the amount requested. The House amendment would provide no authorization for the AO-177 conversion.

The conferees agreed to provide $32.0 million for the fleet oiler conversion program. The conferees understand that this conversion will add 60,000 barrels of capacity to the AO-177 class ships.

Ocean surveillance ship (TAGOS)

The budget contained a request for $148.1 million for 3 TAGOS ocean surveillance ships.

The Senate bill authorize the amount requested. The House amendment would authorize $98.3 million for two TAGOS vessels.

The House recedes.

Fast combat support ship (AOE)

The budget contained a request for $612.7 million for one fast combat support ship (AOE).

The Senate bill would provide no authorization for this ship. The House amendment would authorize the amount requested.

The conferees agreed to provide $499 million for the fast combat support ship program.

Ship contract design

The budget contained a request for $69.4 million for ship contract design.

The Senate bill would authorize $79.4 million. The House amendment would authorize the amount requested.

The Senate recedes.

Shipbuilding and conversion, price adjustment and prior year savings

The Senate bill would reduce the total amounts authorized for the shipbuilding and conversion account by a total of $918.5 million, including fiscal year 1987 price adjustments of $139.1 million, prior-year program savings of $188.6 million, and inflation savings of $590.8 million.

The House amendment would reduce the shipbuilding and conversion account by $75.5 million based on savings from a prior-year program.

The conferees agreed to reflect price adjustments and inflation savings for fiscal year 1987 within individual shipbuilding programs. Prior-year shipbuilding funds remaining available for obligation total $461.5 million and are taken as a reduction against the fiscal year 1987 program.

OTHER PROCUREMENT, NAVY

Overview

The budget request contained $6,538.8 million for Navy other procurement for fiscal year 1987. The House amendment would authorize $5,773.1 million for other procurement. The Senate bill would authorize $5,934.1 million.

The conferees recommend authorization of $5,826.9 million for other procurement, Navy for fiscal year 1987. Specific details are presented in the foregoing table.

Sealift support equipment/seasheds

The budget request contained $58.3 million for sealift support equipment.

The Senate bill would authorize the amount requested. The House amendment would authorize $70.3 million, an increase of $12 million for seasheds.

The Senate recedes.

The conferees are in agreement that achieving sufficient logistics-over-the-shore capability should be a priority program. As such, the conferees urge the Navy to provide adequate support to complete this important effort as soon as possible.

The Department of Navy is encouraged to reprogram funds from available savings to stabilize the procurement of this important program.

The conferees also urge the Navy to consider the P-1 series steel pontoon as an alternative to the cantilevered elevated causeway.

AN/SQR-17 acoustic processor

The budget request contained $7.8 million for 8 AN/SQR-17 acoustic processors.

The Senate bill would authorize the amount requested. The House amendment would authorize $16.9 million for 20 AN/SQR-17 acoustic processors. This equipment would improve the antisubmarine warfare (ASW) capability of the FFG-7 class frigates assigned to the naval reserve.

The conferees wish the Navy to attain the greatest improvement in ASW capability for reserve frigates consistent with budget constraints. Recent testimony on the ability of these ships to perform adequately against a rapidly improving submarine threat demonstrates the need to seek cost-effective ASW improvements.

Accordingly, the conferees have agreed to provide no specific authorization for the AN/SQR-17 but to instead authorize $16.9 million for Reserve Frigate ASW Modernization. The conferees expect that the Navy will competitively evaluate both the cost and performance of various ASW systems, including the AN/SQR-17 processor and the AN/SQQ-89 system, to arrive at the best mix of systems of use on reserve ASW frigates within the funds available. The conferees also expect that, in accordance with current law, any equipment purchases made through this account will be made by competitive means.

AN/BLD-1 microwave intercept receiver

The budget requested no authorization for the AN/BLD-1 microwave intercept receiver.

The Senate bill contained no authorization for the AN/BLD-1 system. The House amendment would authorize $16.8 million for 8 systems.

The Senate recedes.

Aviation support equipment

The budget request contained $963.5 million for procurement of aviation support equipment for the Navy for fiscal year 1987. The House amendment would authorize $700.9 million for aviation support equipment. The Senate bill would authorize the amounts requested.

The conferees recommend authorization of $820.7 million for aviation support equipment for fiscal year 1987.

MK-92 coherent receiver transmitter (CORT) production kits

The budget requested no authorization for MK-92 coherent receiver transmitter (CORT) production kits.

The Senate bill contained no authorization for MK-92 CORT production kits. The House amendment specified that of the funds authorized for ordnance support equipment, $54 million is available only for the procurement of 6 CORT production kits.

The House recedes.

Civil engineering support equipment

The budget request contained $267.3 million for civil engineering support equipment for fiscal year 1987.

The House amendment would authorize $185.6 million for civil engineering support equipment. The Senate bill would authorize the amounts requested.

The conferees recommend authorization of $185.6 million for civil engineering support equipment for fiscal year 1987. Within the authorization, the conferees agreed to an undistributed reduction of $54.1 million. In applying this reduction, the conferees encourage the Department of the Navy to consider categories such as administrative use vehicles, or passenger cars, and other noncritical items.

Supply support equipment

The budget request contained $82.2 million for supply support equipment for the Navy for fiscal year 1987. The House amendment would authorize $71.8 million for supply support equipment. The Senate bill would authorize the amount requested.

The conferees recommend authorization of $71.8 million for supply support equipment for the Navy for fiscal year 1987.

Personnel and command support equipment

The budget request contained $556.3 million for personnel and command support equipment for fiscal year 1987. The House amendment would authorize $442.1 million for personnel and command support equipment. The Senate bill would authorize $555.2 million.

The conferees recommend authorization of $451.0 million for personnel and command support equipment for fiscal year 1987.

Spares and repair parts

The budget request contained $323.9 million for spares and repair parts.

The Senate bill would authorize the amount requested. The House amendment would authorize $302.4 million.

The Senate recedes.

Other procurement, undistributed reduction, prior-year program savings, and inflation savings

The Senate bill would reduce the total amount authorized for the other procurement, Navy account by $603.6 million, including an undistributed reduction of $400 million, prior-year program savings of $16 million and inflation savings of $187.6 million.

The House amendment made no similar reductions.

The conferees agreed to reductions in programs and budget activities as shown in the accompanying table.

The Senate recedes with an amendment.

PROCUREMENT, MARINE CORPS

Overview

The budget request contained $1,565.0 million for procurement, Marine Corps, for fiscal year 1987. The House amendment would authorize $1,456.9 million for procurement, Marine Corps. The Senate bill would authorize $1,382.7 million.

The conferees recommend authorization of $1,477.4 million for procurement, Marine Corps for fiscal year 1987. Specific details are presented in the foregoing table. Within the authorization, the conferees agreed to an undistributed reduction of $6.1 million. In applying this reduction, the conferees encourage the Marines Corps initially to consider categories such as administrative use vehicles, or passenger car, and other noncritical items.

AIRCRAFT PROCUREMENT, AIR FORCE

Air defense competition

The budget request contained $296.3 million for procurement of 20 air defense aircraft in fiscal year 1987 and $114.6 million in advance procurement for 60 aircraft in the following year. The House amendment would authorize the amount requested. The Senate bill contained no funds for air defense competition.

The House amendment contained a provision (sec. 113) that would permit the Secretary of the Air Force to award a multiyear contract for the procurement of the air defense aircraft. If the multiyear contracting authority provided were used, the Air Force would be required, immediately after contract award, to furnish the Committees on Armed Services of the Senate and House of Representatives with multiyear justification exhibits validating that the savings meet the prescribed criteria.

The Senate bill contained no similar provision.

The conferees recommend authorization of $296.3 million for procurement of 20 aircraft for air defense competition in fiscal year 1987 and $114.6 million in advance procurement for 60 aircraft.

The Senate recedes on the authorization to enter into a multiyear contract. The conferees expect the fiscal year 1988 budget request to properly fund the cancellation ceiling liability.

F-15 fighter aircraft (Eagle)

The budget request contained $1,675.4 million for procurement of 48 aircraft in fiscal year 1987 and $218.9 million for advance procurement in fiscal year 1988. The House amendment would authorize $975.4 million for procurement of 24 aircraft in fiscal year 1987 and $110.0 million for advance procurement in fiscal year 1988. The Senate bill would authorize $1,675.4 million for procurement of 48 aircraft in fiscal year 1987 and $218.9 million in advance procurement in fiscal year 1988.

The House amendment contained a provision (sec. 127(a)) that would restrict obligation of the funds authorized for procurement of the F-15E aircraft until the Secretary of the Air Force decides on whether to procure either the F-15E or the Advanced Tactical Fighter. The Senate bill contained no similar provision.

The conferees recommend authorization of $1,543.0 for procurement of 42 aircraft in fiscal year 1987, and $158.0 for advance procurement of 42 aircraft in fiscal year 1988.

The House recedes on section 127(a).

F-16 fighter aircraft (Falcon)

The budget request contained $2,881.9 million for procurement of 216 aircraft in fiscal year 1987 and $612.0 million for advance procurement in fiscal year 1988. The House amendment would authorize $1,926.3 million for procurement of 150 aircraft in fiscal year 1987 and $500.00 million for advance procurement of 180 aircraft in fiscal year 1988. The Senate bill would authorize $2,646.9 million for procurement of 192 aircraft in fiscal year 1987 and 486.0 million for advance procurement in fiscal year 1988.

The House amendment contained a provision (sec. 127(f)) that would restrict obligation of funds for the procurement of the F-16 until:

(1) the Joint Requirements and Management Board is convened to establish an acquisition plan for the F-16 aircraft;

(2) the plan is submitted to the Committee on Armed Services of the Senate and House of Representatives; and

(3) 30 calendar days expire after submission of the plan to the committees.

At the time the House of Representatives considered the fiscal year 1987 Defense authorization request, the Department of Defense and the Department of the Air Force did not agree on the configuration of the F-16 fire control radar. The House believed that the issue should be resolved before funds are obligated for the program. Subsequent agreement has been reached between the Department of Defense and the Department of the Air Force.

The Senate bill contained no similar limitation.

The conferees recommend authorization of $2,353.0 million for procurement of 180 aircraft in fiscal year 1987 and $463.0 million for advance procurement of 180 aircraft in fiscal year 1988.

The House recedes on section 127(f).

KC-10A combat aircraft (Extender)

The budget request contained $104.4 million for procurement of 8 aircraft in fiscal year 1987. The House amendment would authorize $78.1 million for procurement of 8 aircraft in fiscal year 1987. The Senate bill would authorize $104.4 million for procurement of 8 aircraft in fiscal year 1987.

The conferees recommend authorization of $89.0 million for procurement of 8 aircraft in fiscal year 1987.

AC-130H gunship

The budget request contained $18.2 million for initial start up for the AC-130H gunship combat aircraft. The House amendment did not authorize the AC-130H aircraft. The Senate bill would authorize $18.2 million for the AC-130H aircraft.

The Senate recedes.

MC-130H (Combat Talon)

The budget request contained $229.7 million for procurement of 5 aircraft in fiscal year 1987 and $15.1 million for advance procurement in fiscal year 1988. The House amendment would authorize $106.5 million for procurement of 2 aircraft in fiscal year 1987 and $7.3 million in advance procurement in fiscal year 1988. The Senate bill would authorize $229.7 million for procurement of 5 aircraft in fiscal year 1987 and $15.1 million in advance procurement in fiscal year 1988.

The conferees recommend authorization of $229.7 million for 5 aircraft in fiscal year 1987 and $15.1 million in advance procurement.

C-5B (Galaxy)

The budget request contained $1,937.4 million for procurement of 21 aircraft in fiscal year 1987. The House amendment would authorize $1,908.4 million for procurement of 21 aircraft in fiscal year 1987. The Senate bill would authorize $1,937.4 million for procurement of 21 aircraft in fiscal year 1987.

The conferees recommend authorization of $1,919.3 million for procurement of 21 aircraft in fiscal year 1987.

C-17 tactical airlift aircraft

The budget request contained $182.3 million for procurement of the C-17 in fiscal year 1987 and $35.0 million for advance procurement in fiscal year 1988. The House amendment would authorize $145.3 million in fiscal year 1987 and $35.0 million for advance procurement in fiscal year 1988. The Senate bill would authorize $182.3 million in fiscal year 1987 and $35.0 million for advance procurement in fiscal year 1988.

Section 127(c) of the House amendment would restrict obligation of funds authorized for the procurement of the C-17 aircraft until 60 legislative days have expired from the time the Committees on Armed Services of the Senate and House of Representatives receive the report of the General Accounting Office on the C-17 aircraft program. Section 127(c) would further provide that, in the event Congress decides that the C-17 aircraft is to not be procured, the funds may be used for the procurement of additional Air Force airlift aircraft, including the C-5B aircraft. The Senate bill contained no similar provision.

The conferees recommend authorization of $145.3 million for procurement of the C-17 aircraft in fiscal year 1987 and $35.0 million for advance procurement in fiscal year 1988.

The Senate recedes with an amendment to section 127(c). The amendment would restrict obligation of funds to $64.0 million until April 15, 1987.

T-46A trainer aircraft

No authorization was requested for the T-46A trainer aircraft. The House amendment would authorize $124.0 million for procurement of 12 aircraft in fiscal year 1987 and $27.0 million for procurement of 44 aircraft in fiscal year 1988. The Senate bill contained no authorization for the aircraft in fiscal year 1987.

Section 127(e) in the House amendment would provide that the maximum program production cost for the T-46A, excluding initial spares funding, could not exceed $3.1 billion in fiscal year 1986 dollars for 650 production aircraft. The maximum production unit cost for such program could not exceed $4.8 million in fiscal year 1986 dollars. Furthermore, if either limitation is exceeded in any year, the Secretary of the Air Force could not procure any T-46A trainer aircraft during a later fiscal year until competitions were held.

Section 202(e) of the Senate bill would prohibit obligation of any funds for the T-46 program.

The conferees agreed to delete both section 127(e) of the House amendment and section 202(e) of the Senate bill.

The conferees also agreed that no funds may be obligated or expended for the procurement of T-46 aircraft until the Secretary of the Air Force conducts a competition evaluating the cost and performance of the T-46A aircraft, the current trainer (T-37), an upgraded version of the T-37, and any other suitable aircraft (including the Navy's training aircraft, the T-34 and T-45). This competition shall consist of a fly-off between the T-37, T-46, and any other candidate aircraft.

The conferees further agreed that funds appropriated in fiscal year 1986 for the T-46A aircraft program shall be available to conduct the proposed competition.

Finally, the conferees agreed that no funds would be authorized in fiscal year 1987 for the procurement of T-46 trainer aircraft.

TR-1/U-2 aircraft

The budget request contained $94.5 million for procurement of 3 aircraft in fiscal year 1987. The House amendment would authorize $45.1 million for the program in fiscal year 1987. The Senate bill would authorize $94.5 million for procurement of 3 aircraft in fiscal year 1987.

The conferees recommend authorization of $80.2 million for procurement of 2 aircraft in fiscal year 1987.

Counter-infiltration aircraft

The budget request contained no authorization for funds for counter-infiltration aircraft. The House amendment would authorize $8.4 million for procurement of 2 aircraft in fiscal year 1987. The Senate bill contained no authorization for the aircraft in fiscal year 1987.

The House recedes.

Modification of Air Force aircraft

The budget request contained $3,101.3 million for modification of various Air Force aircraft in fiscal year 1987. The House amendment would authorize $3,188.0 million for Air Force aircraft modifications. The Senate bill would authorize $2,845.3 million for Air Force aircraft modifications.

The conferees recommend authorization of $2,944.2 million for Air Force aircraft modifications as detailed in the foregoing table.

In reaching agreement on the various modification programs, the conferees agreed that if the Secretary of the Air Force submits a reprogramming request for the H-3 helicopter program, it would be considered in a timely fashion.

B-52 modifications

The Administration requested $413.4 million to continue modification programs for B-52 aircraft. The Senate bill, for budgetary considerations, deleted funding associated with electronic countermeasure and radar modifications. The House amendment approved the requested amount.

The conferees received new information with regard to the availability of prior year funding in the B-52 modification accounts that would allow a significant portion of the program to proceed, even at the Senate level. The conferees, therefore, agreed to the Senate reduction of $158.6 million.

Air Force aircraft spares and repair parts

The budget request contained $3,477.9 million for Air Force aircraft spares and repair parts in fiscal year 1987. The House amendment would authorize $3,248.5 million for Air Force aircraft spares and repair parts. The Senate bill would authorize $3,428.1 million for procurement of Air Force aircraft spares and repair parts.

The conferees recommend authorization of $3,316.9 million for Air Force aircraft spares and repair parts as detailed in the foregoing table.

Air Force aircraft support equipment and facilities

The budget request contained $4,096.4 million for procurement of Air Force aircraft support equipment and facilities in fiscal year 1987. The House amendment would authorize $3,330.0 million for this purpose. The Senate bill would authorize $3,993.4 million for Air Force aircraft support equipment and facilities.

The conferees recommend authorization of $3,903.6 million for Air Force aircraft support equipment and facilities as detailed in the foregoing table.

MISSILES, AIR FORCE

MX advanced intercontinental ballistic missile system

The budget request contained $1,418.1 million for procurement of 21 MX missiles in fiscal year 1987. The House amendment would authorize $1,114.7 million for procurement of 12 MX missiles. The Senate bill would authorize $1,418.1 million for procurement of 21 MX missiles in fiscal year 1987.

The conferees recommend authorization of $1,114.7 million for procurement of 12 MX missiles.

The Senate recedes.

Advanced cruise missile

The Senate bill would provide the requested authorization for the advanced cruise missile. The House amendment would reduce the requested amount by $468.0 million and reduce the advance procurement request by $93.8 million.

Section 127(b) of the House amendment would restrict obligation of funds for the advanced cruise missile until the Secretary of the Air Force decides whether to procure either the Advanced Cruise Missile or the SRAM II weapon system.

The conferees recommend authorization of the requested amounts for the advanced cruise missile. The conferees stipulated certain restrictions on the obligation of procurement funds pending the completion of development milestones that are detailed in the classified annex to this report.

The House recedes on section 127(b).

AIM-7F/M Sparrow

The budget request contained $64.9 million for procurement of 379 Sparrow missiles. The House amendment would authorize $61.7 million for procurement of 379 Sparrow missiles in fiscal year 1987. The Senate bill would authorize the amount requested for 379 Sparrow missiles.

The conferees recommend authorization of $61.7 million for procurement of 379 AIM-7F/M Sparrow missiles in fiscal year 1987.

AIM-9L/M Sidewinder

The budget request contained $95.6 million for procurement of 1710 AIM-9L/M Sidewinder missiles in fiscal year 1987. The Senate bill would authorize the amount requested. The House amendment would authorize the amount requested.

The conferees recommend authorization of $93.8 million for procurement of 1710 AIM-9L/M Sidewinder missiles in fiscal year 1987.

AGM-130 Powered GBU-15

The budget request contained $26.6 million for procurement of 51 AGM powered GBU-15 missiles in fiscal year 1987. The House amendment contained no authorization for the program. The Senate bill would authorize the amount requested.

The conferees recommend authorization of $17.8 million for procurement of 20 missiles in fiscal year 1987.

AGM-65D Maverick

The budget request contained $581.0 million for procurement of 4,700 AGM-65D Maverick missiles in fiscal year 1987. The House amendment would authorize $75.7 million for procurement of 585 Maverick missiles in fiscal year 1987. The Senate bill would authorize $481.0 million for procurement of 3,600 Maverick missiles in fiscal year 1987.

The conferees recommend authorization of $410.5 million for procurement of 3,600 Maverick missiles in fiscal year 1987.

AGM-88A HARM

The budget request contained $493.4 million for procurement of 2,130 AGM-88A HARM missiles in fiscal year 1987. The House amendment would authorize $362.5 million for procurement of 1,450 HARM missiles in fiscal year 1987. The Senate bill would authorize $493.4 million for procurement of 2,130 HARM missiles in fiscal year 1987.

The conferees agreed to authorize $374.4 million for procurement of 1,655 AGM-88A HARM missiles in in fiscal year 1987.

Advanced medium range air-to-air missile (AMRAAM)

The budget request contained $656.6 million for procurement of 260 AMRAAM missiles and $89.9 million for advance procurement.

The Senate bill would authorize the amount requested. The House amendment would authorize $387.6 million for procurement of 135 AMRAAM missiles and $38.9 for advance procurement.

The House amendment contained a provision (sec. 127(d)) that would restrict obligation for low rate production procurement of the AMRAAM missile until the flight test results measuring the performance and design stability of the missile are evaluated against established program specifications. The Secretary of the Air Force is directed to provide to the respective Committees on Armed Services of the Senate and House of Representatives a report on the flight test results.

Section 127(d) would also require that:

(1) AMRAAM missiles that incorporate the producibility enchancements established for the program be flight tested before full rate production is undertaken;

(2) the test results be reported to the Committees on Armed Services of the Senate and House of Representatives, and

(3) 60 calendar days expire.

The section would also cap the cost of the AMRAAM program at $7.0 billion in fiscal year 1984 dollars for the procurement of 24,000 missiles.

The Senate bill contained no similar provision.

The conferees recommend authorization of $537.3 million for 180 missiles and $73.1 million for the advance procurement of 640 missiles.

The Senate recedes with an amendment that would require the following:

(1) no funds could be obligated for low rate production procurement until the Committees on Armed Services of the Senate and House of Representatives receive a report evaluating the flight test results of the missile against the low rate production criteria; except that not more than $170 mil-

lion may be obligated for long-lead procurement of the authorized missiles;

(2) all producibility enhancement must be tested before incorporation into the production missiles; and

(3) a cost cap of $7.0 billion for 24,000 missiles is established. The cap may be adjusted to reflect changes in congressional funding actions.

Modification of missiles

The budget request contained $146.5 million for the modification of missiles. The House amendment would authorize $141.3 million. The Senate bill would authorize $134.1 million.

The Senate recedes.

Missile spares and repair parts

The budget request contained authorization of $334.2 million for missile spares and repair parts. The House amendment would authorize $266.1 million. The Senate bill would authorize $334.2 million.

The conferees recommend authorization of $329.1 million as detailed in the foregoing table.

Air Force other support

The budget request contained $3,959.3 million in authorization for other support in fiscal year 1987. The House amendment would authorize $3,036.6 million. The Senate bill would authorize $4,023.9 million.

The conferees recommend authorization of $3,592.4 million for Air Force other support in fiscal year 1987.

Spaceborne equipment (COMSEC)

The budget request contained $61.9 million for procurement of communications security (COMSEC) equipment for spaceborne communications systems. The House amendment would authorize $51.9 million for the program. The Senate bill would authorize the request amount.

The conferees recommend authorization of $56.9 million for COMSEC in fiscal year 1987.

NAVSTAR global positioning system

The budget request contained $129.7 million to procure 8 NAVSTAR global positioning satellites and associated equipment. The House amendment would authorize $126.0 million for the program. The Senate bill would authorize the requested amount.

The conferees recommend authorization of $126.0 million for 8 satellites.

Space shuttle operations

The budget request contained $59.1 million for space shuttle operations. The House amendment would authorize the requested amount. The Senate bill would authorize $313.7 million for the program

The Senate recedes.

Defense support program

The budget request contained $108.5 million for the defense support program (DSP) and $250.0 million in advance procurement. The fiscal year 1987 request would initiate a new multiyear procurement for the program. The House amendment would authorize $108.5 million for the DSP program, $134.4 million in advance procurement and deny the proposed multiyear procurement. The Senate bill would authorize the requested amount, including the multiyear procurement.

The conferees recommend authorization of $63.6 million for the program, $222.7 million in advance procurement, and approval of the multiyear procurement request. The conferees agree that the Department of the Air Force may utilize the total funding available for the defense support program in order to execute a multiyear procurement contract.

Section 107(c) of the conference agreement would provide authority for the Department of the Air Force to enter into the multiyear contract. Such authority is contingent on certification by the Secretary of the Air Force that at least 20 percent savings would be realized under a multiyear contract.

Defense satellite communications program

The budget request contained $117.1 million to support the Defense Satellite Communications System (DSCS) in fiscal year 1987. The budget also contained $5.5 million in advance procurement. The House amendment would authorize $109.9 million for the program and $5.5 million in advance procurement. The Senate bill would authorize $107.1 million and $5.5 million in advance procurement.

The House recedes.

Space boosters

The budget request contained $52.7 million for the complementary expendable launch vehicle (CELV) program and $230.0 million for advance procurement. The request also contained authorization for a multiyear procurement. The House amendment would authorize $102.7 million for the CELV program, $161.0 million in advance procurement and deny the multiyear procurement. The Senate bill would authorize $102.7 million for the program, $180.0 million in advance procurement and approve the multiyear procurement.

The conferees recommend authorization of $83.7 million for the CELV and $180.0 million in advance procurement. The House recedes on the multiyear procurement because it was approved previously in the fiscal year 1986 Urgent Supplemental Appropriations Act.

Space defense system

The budget request contained authorization of $28.5 million for advance procurement for the antisatellite (ASAT) weapons system. The House amendment would provide no authorization. The Senate bill would authorize the requested amount.

The Senate recedes.

Special programs

The budget request for Air Force other missile support contained $45.3 million for other programs, $2.1 million for forest green, $24.9 million for IONDS, $1,852.0 million for special programs and $972.6 million for special update programs. The House amendment would authorize the requested amount for other programs and IONDS, $0.4 million for forest green, $1,529.8 million for special programs and $557.8 million for special update programs. The Senate bill would authorize the requested amounts for all of the foregoing programs except special programs. The Senate bill recommends authorization of $1,672.0 million for special programs.

The confereees recommend authorization of $45.3 million for other programs, $2.1 million for forest green, $24.9 million for IONDS, $1,623.4 million for special programs, and $972.6 million for special update programs.

OTHER PROCUREMENT, AIR FORCE

Overview

The fiscal year 1987 budget request contained authorization of $10,900.3 million for other procurement.

The Senate bill woud authorize 10,117.8 million for other procurement. The House amendment would provide $8,640.1 million in authorization.

The conferees recommend authorization of $9,180.9 million for other procurement in the following manner:

	Millions
Munitions and associated equipment	$1,101.0
Vehicular equipment	300.2
Electronics and telecommunications equipment	2,461.2
Other base maintenance and support equipment	5,588.5

Specific program authorizations are detailed in the foregoing table.

Tactical and suppport vehicles

The budget request contained $331.8 million for procurement of tactical and support vehicles.

The House amendment would authorize $300.2 million for tactical and support vehicles. The Senate bill would authorize $353.3 million for tactical and support vehicles.

The conferees agreed to authorize $300.2 million for tactical and support vehicles. Within the authorization, the conferees agreed to an undistributed reduction of $31.6 million. In applying this reduction, the conferees encourage the Department of the Air Force initially to consider categories such as administrative use vehicles or passenger cars and other noncritical items.

ITEMS OF SPECIAL INTEREST

Over the horizon backscatter radar

The budget request contained $188.2 million for the over-the-horizon-backscatter radar (OTH-B) program in fiscal year 1987. The Senate bill would provide the requested authorization. The House amendment would provide no authorization for the program.

The conferees recommend authorization of $110.0 million for one sector on the OTH-B radar program. Prior to the submission of the fiscal year 1988 budget request, the Secretary of the Air Force is directed to provide the Committees on Armed Services of the Senate and House of Representatives with a report detailing the performance of the OTH-B radar, the planned improvements to the system, the cost of the improvements and the schedule for implementing the improvements.

Base level data automation program

The budget request contained authorization of $99.2 million for the base level data automation program. The House amendment would authorize $47.2 million for the program. The Senate bill would authorize the requested amount.

The conferees recommend authorization of $49.2 million in fiscal year 1987.

The conferees recognize that, during a time of severe budgetary constraints, key programs that under more favorable conditions would be supported by the Congress must be reduced. The Air Force base level data automation program, unfortunately, falls into this category. The conferees are fully aware the funding reductions have direct impact on military mobility and readiness support programs. In light of the importance of this particular program, the conferees recommend that the Air Force, if necessary, make funds available for current or past fiscal years, as sources to support this program.

PROCUREMENT, DEFENSE AGENCIES

Overview

The budget request contained $1,488.4 million for procurement, defense agencies, for fiscal year 1987. The House amendment would authorize $1,365.2 million for procurement, defense agencies. The Senate bill would authorize $1,431.3 million.

The conferees recommend authorization of $1,418.7 million for procurement, defense agencies for fiscal year 1987. Specific details are presented in the foregoing table.

PROCUREMENT, NATIONAL GUARD AND RESERVE

National Guard and Reserve Forces

The House amendment provided $509.1 million in additional authorizations to the requested amount for procurement of Guard and Reserve Forces equipment in fiscal year 1987. The Senate bill authorized an additional $454.3 million for such purposes.

The House amendment contained a provision (sec. 105) that would require, beginning in fiscal year 1988, the secretary of Defense to budget separately for the National Guard and Reserve components. Another provision (sec. 106) in the House amendment would establish an obligation ceiling for Guard and Reserve funds.

The Senate bill contained no similar provisions.

The Senate recedes.

The conferees recommend authorization of $563.5 million in additional procurement for the Guard and Reserve Forces. Also, the conferees agreed to earmark 18 AH-64 Apache helicopters, 3 UH-60 Blackhawk helicopters, and 6 CH-47 Chinook helicopters for the Guard and Reserve Forces.

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Multiyear procurement (sec. 107)

For fiscal year 1987, the Department of Defense requested multiyear procurement authority for eight candidate systems.

The House amendment recommends approval of authority to enter into multiyear contracts for the Patriot missile system and the Stinger missile. The House amendment would deny the authorization for multiyear contracts for the following systems: UH-60A Blackhawk and EH-60A aircraft Quickfix airframes; F/A-18 aircraft; HARM missile; Defense Support Program; and Complementary Expendable Launch Vehicle.

Further, the House amendment contained a provision (sec. 110) that would provide the authority for the service Secretaries to enter a multiyear contract only if (1) the contract contains negotiated and priced options for quantities that vary by 30 percent up or down in each year; and (2) the Secretary certifies that the multiyear contract provides no less than 12 percent savings as compared to the same program executed with annual contracts.

The Senate bill recommends approval of authority to enter into multiyear contract for the UH-60A Blackhawk and EH-60A, Patriot Missile System, HARM weapon system, Defense Support Program. The Senate bill would deny authorization for MK-45 gun mounts, MK-6 ammunition hoists, and F/A-18 aircraft.

The conferees agreed to approve the following multiyear programs: UH-60 Blackhawk airframe, EH-60 Quickfix airframe, Patriot Missile System, Defense Support Program, HARM missile, MK-45 gun mounts, and MK-6 ammunition hoists. The conferees agreed to a provision that provides the authority to enter a multiyear contract only if the Secretary certifies that the multiyear contract provides not less than 12 percent savings as compared to the same program executed with annual contracts. With respect to the Defense Support Program, the conferees agreed to approve a multiyear contract only if that contract provides not less than 20 percent savings as compared to annual contracts.

Concerning the Stinger missile, the Senate bill contained a provision that would direct the Secretary of the Army to solicit bids to establish a competitive second source for the Stinger missile and to determine which contracting method, multiyear or contracting, is more cost-effective. In order to enter into a multiyear contract, the Secretary would need to certify in a report, validated by the Government Accounting Office (GAO), that the multiyear method is less costly.

The conferees agreed to the Senate provision concerning acquisition of the Stinger missile.

Finally, the conferees denied the requested multiyear procurement authority for the F/A-18 aircraft.

Air-to-air Stinger modification (sec. 122(c))

The budget request contained $28.8 million for modification of Army aircraft for incorporation of air-to-air Stinger missiles. Both the Senate bill and the House amendment contained the requested authorization.

The House amendment contained a provision (sec. 122(d)) that would restrict obligation of funds for the air-to-air Stinger missile aircraft modification program until a comprehensive acquisition plan is developed and integrated into the Army's forward area air defense plan. The Senate bill contained no similar provision.

The Senate recedes with an amendment.

The conference agreement includes a provision (see. 112(c)) that would require the following condition to be met before funds could be obligated for the program:

(1) a comprehensive acquisition plan for air-to-air Stinger missile, for Army aircraft is established; and

(2) a report on the plan is submitted to the Committees on Armed Services of the Senate and House of Representatives.

The conferees expect the air-to-air Stinger missile program to be integrated into the overall Army aviation master plan.

DDG-51 destroyer program—racer (sec. 131)

The Senate bill contained a provision (sec. 102(d)(2)) that would repeal section 102(h) of the Department of Defense Authorization Act, 1985 (Public Law 98-525) that limits obligation or expenditure of funds for the DDG-51 program until the Secretary of the Navy certifies that the lead ship of that class is capable of being equipped with the Rankine Cycle Energy Recovery (RACER) system without rearrangement of ship spaces and equipment or other major modification of the ship.

Section 124 of the House amendment would also repeal section 102(h) of the Department of Defense Authorization Act, 1985. The House amendment would further require the Secretary of the Navy to plan for the installation of RACER on the second flight of DDG-51 ships, including preparation of a ship design that includes the RACER system.

The conferees agreed to recommend the repeal of section 102(h) of the Department of Defense Authorization Act, 1985.

The House recedes.

Basic point defense missile system on amphibious vessels (sec. 132)

The House amendment contained a provision (sec. 125) that would require the Secretary of the Navy to maintain in an operational status the Basic Point Defense Missile System on any commissioned amphibious vessel equipped with the system on the date of enactment until a follow-on system of comparable capability is available for immediate replacement.

The Senate bill contained no similar provision.

The Senate recedes.

Rolling airframe missile (sec. 133))

The Administration requested $24.2 million for continuing research and development of the 5-inch Rolling Airframe Missile (RAM), $63.2 million in Weapons Procurement, Navy and $36.0 million in Other Procurement, Navy, for initial production of the missile and associated hardware.

The Senate bill would authorize the development request $40 million of the Weapons Procurement, Navy request and the Other Procurement, Navy request. However, the Senate bill also contained an amendment (sec. 102(g)) that restricted the obligation of those funds pending a certification from the Secretary of Defense.

The House amendment would authorize no funds for either development or procurement of the missile program and contained a provision (sec. 204(j)) that would impose restrictions on the obligation of any funds appropriated in fiscal year 1987 for purposes of further development or procurement of the RAM missile.

The RAM missile program has experienced serious development problems. Cost have risen substantially over initial estimates. Initial flight tests uncovered serious reliability problems. The program has been extensively restructured during the past year. Were this solely a U.S. Navy program, the conferees would likely support its termination.

The RAM missile program is exceptional, however, in that it involves close collaboration with the Federal Republic of Germany. The FRG Navy has a critical need for the RAM program and has borne 50 percent of the development cost to date. The Navy has developed an acquisition strategy that will pit the American and German contractors in competition for annual production orders. In many ways the RAM missile program represents a model for alliance cooperative acquisition strategies.

The conferees believe the joint development aspect of the RAM missile justifies continued development of the program, despite its serious past flaws. Further, while the Navy has taken constructive steps during the past nine months to give the program sound footing, the conferees remain concerned that the RAM missile is still unproven. Consequently, the conferees approve further development of the program and sufficient procurement funds to initiate production capability, contingent upon a certification by the Secretary of Defense as to the cost and performance of the RAM missile program. If that certification is not made by March 30, 1987, the RAM program is to be terminated.

Strategic bombers (secs. 141-142)

No authorization was requested for a strategic bomber contingency fund. Section 107 of the House amendment would authorize a $200.0 million strategic bomber contingency fund using amounts appropriated for procurement of aircraft for the Air Force for fiscal year 1985 that remain available for obligation.

Section 108 of the House amendment would restrict fiscal year 1987 funds for the Advanced Technology Bomber to the level appropriated in fiscal year 1986 unless the Secretary of Defense submits acquisition plans to the Congress providing for dual sourcing. A waiver could be provided if the Secretary prepares an acquisition strategy for the ATB and submits a report describing that strategy. Any revision could not be implemented until 60 days after the date on

which the revision report is received by both committees.

Further, the Secretary would be directed to submit a detailed financial analysis on the projected cost of procurement of 132 advanced technology bomber aircraft. The analysis would be the basis on which the President could certify the cost of the ATB program in fiscal year 1988, it would be reviewed by the General Accounting Office, and it would provide the required information base for imposing a cost cap on the program.

Section 1237 of the Senate bill would express the Sense of Congress that the advanced technology bomber (ATB) program and the advanced cruise missile (ACM) program should be supported. The provision would restrict the use of funds authorized for the ATB and ACM programs to those programs exclusively. Also, section 1237 would prohibit the use of any funds for additional B-1B bomber aircraft beyond the 100 B-1B's previously authorized.

The House recedes on section 107. The Senate recedes on section 108 with an amendment. The House recedes on section 1237.

The conferees remain supportive of the Administration's strategic bomber modernization program and note the considerable success of the B-1B program in meeting performance, cost and schedule objectives. This success is attributed, in part, to the two bomber program, which has created a competitive environment, and to the cap on total B-1B program costs.

Notwithstanding this success, however, the conferees agree that the B-1B program be limited to the 100 aircraft for which funds have already been authorized and appropriated and that no funds be authorized for the purpose of preserving a B-1B production option, either by procurement of "long lead" items or in any other manner.

As the B-1B line closes down, the conferees are concerned that the competitive environment that marked the B-1B acquisition will not be present to keep Advanced Technology Bomber (ATB) costs down. Also, although the benefits of a cost cap on the B-1B program have been widely acclaimed, the conferees believe that insufficient information exists at this time to establish a comparable funding cap on the ATB program. For these reasons, the conferees believe that an acquisition strategy for the ATB that provides the greatest possible assurance of delivering an effective force on time and within cost is necessary and important.

To this end, the conferees have included a provision that would require the Secretary of Defense to prepare an acquisition strategy for the Advanced Technology Bomber. This strategy should examine alternatives and make recommendations with respect to methods of maintaining cost constraints on the ATB program, including competitive procurement of major systems or subsystems, competition in integration and assembly, and the appropriate timing of and level for a total program cost cap in the ATB program. The section also would require a detailed financial analysis of the procurement program and a review of the completed analysis by the Comptroller General.

CHEMICAL DETERRENT PROGRAMS

Overview

The administration requested a total of $1,135.2 million for the U.S. chemical deterrent program in fiscal year 1987. Of the total amount requested, $814.4 million or 72 percent is for protective measures; $200.7 million or 18 percent is for retaliatory programs; and $120.1 million or 10 percent is for the demilitarization of existing unitary munitions.

Demilitarization (sec. 151)

The Senate bill contained a provision (sec. 106) that provided $120.1 million for the chemical demilitarization program. The House amendment contained a similar provision (sec. 106) authorizing $120.1 million for this purpose.

The Senate recedes.

Binary chemical munitions (sec. 152)

The fiscal year 1987 budget request contained authorization of $158.5 million for the binary chemical weapons program. The House amendment authorized $68.3 million for the program. The Senate bill authorized the requested amount.

The House amendment contained a provision (sec. 123) that would prohibit the obligation of fiscal year 1986 and 1987 funds before October 1, 1987 for the binary chemical weapons program. Section 123 would further require the Secretary of Defense to submit a report to the Congress on the military requirements for long-range stand-off chemical weapons and the comparative advantages and disadvantages of the Bigeye bomb vis-a-vis substitutes for it.

Section 128 of the House amendment would prohibit the withdrawal of currently stored chemical munitions in Europe unless they are replaced with binary chemical munitions stationed in at least one European member nation of the North Atlantic Treaty Organization.

The Senate bill contained a provision (sec. 109) that is a technical amendment to section 1411(b)(1) of the fiscal year 1986 Department of Defense Authorization Act (Public Law 99-145). The amendment would clarify the intended reference to the appropriate NATO decision-making body that approves military force goals.

The conferees recommend authorization of $121.3 million for the binary chemical weapons program in fiscal year 1987. The conferees agreed to provide full funding for the 155mm (GB-2) binary artillery shell, both for production facilities and for the procurement of munition components. However, subject to section 1411 of the Department of Defense Authorization Act of 1986 (Public Law 99-145), final assembly of binary chemical munitions, including the GB-2, may not occur before October 1, 1987.

The conferees agreed to provide $35.0 million for the production of the Bigeye binary chemical bomb in fiscal year 1987. However, the conferees adopted bill language in section 152 that provided that these funds may not be obligated or expended before October 1, 1987 for the procurement, including components, or assembly of the Bigeye bomb. Section 152 of the bill also directs the Secretary of Defense to involve the Comptroller General in monitoring Bigeye testing, and directs the General Accounting Office to submit an evaluation of these tests to the Committees on Armed Services of the Senate and House of Representatives not later than June 1, 1987.

In a related action, the conferees agreed to deny funds to develop a second source for the Bigeye bomb. In view of the technical issues that need to be resolved before full scale production of Bigeye can be justified, the conferees believe that the development of a second source at this time is premature. The conferees further agreed that of the fiscal year 1986 funding for Bigeye production facilities, only $90 million shall be available for obligation. Furthermore, these funds may be obligated or expended only upon certification by the President that: (1) production of the Bigeye is in the national security interests of the United States; and (2) all design, planning and environmental requirements for such facilities have been met.

Additionally, the conferees agreed that no final assembly of the Bigeye bomb may occur before October 1, 1988. The bill also requires the Secretary of Defense to submit a report to the Congress not later than March 15, 1987, on the requirements for a long-range stand-off chemical weapon system. The conferees agreed to provide $5.0 million under Defense Agencies for research and development of a long-range chemical stand-off weapon.

In other provisions related to the chemical deterrent program, the House recedes on section 109 of the Senate bill. The House also recedes on section 128 of the House amendment, and on section 1221 of the Senate bill. The Senate recedes on section 1021 of the House amendment. The Senate recedes with an amendment to section 123 of the House amendment.

The following table summarizes the conferees' recommendations with respect to the Binary Munitions Production Program.

BINARY MUNITIONS PROCUREMENT SUMMARY

[In millions of dollars]

Item	Fiscal year 1987 request	H.R. 4428 as passed	S. 2638 as passed	Conference
155mm artillery:				
Production facilities	60.6	32.6	60.6	60.6
Metal parts	4.6	4.6	4.6	4.6
DC facility	18.6	18.6	18.6	18.6
Prove out DC	2.5	2.5	2.5	2.5
Total	86.3	58.3	86.3	86.3
Bigeye bomb:				
Production	56.8	10.0	56.8	35.0
Facilities	15.4	0	15.4	0
Total	72.2	10.0	72.2	35.0
Grand total	158.5	68.3	158.5	121.3

Protective equipment

The conferees continue to strongly support both research and development, and procurement of chemical protective equipment for U.S. military personnel. Specific funding for each of these programs is contained in the funding charts for each of the services. Any funding reductions recommended for these programs are without prejudice.

Chemical protective mask.—As part of the binary chemical modernization program, the Army has been developing a new protective mask to replace the M17. The report on the Senate bill (S.Rept. 99-331) encouraged the Army to terminate development work on a new mask, to select a design on a competitive basis among the several candidates, and to begin procurement of the new mask with 1987 procurement funds. In addition, no procurement funds were to be used to procure additional M17 masks.

The report accompanying the House amendment (H.Rept. 99-718) contained no similar direction.

The conferees support the Army's stated requirement on the need for a new generation chemical protective masks. The Army has been developing a new mask for over a decade, and the conferees believe that the Army has completed sufficient testing—

both developmental and operational—to enable it to make a source selection for the production of a new mask. Therefore, the conferees direct the Army to select a new mask from among the competitive developers as soon as possible, but not later than March 1, 1987. Upon completion of this competitive selection, and prior to the obligation of fiscal year 1987 production funds, the Army shall report to the Committee on Armed Services of the Senate and House of Representatives on the results of this competition.

The conferees direct that this selection be made on the basis of a full open competition. However, in making this selection, the conferees encourage the Secretary of the Army to give full consideration to the agent resistance, protection factor, producibility, use acceptance, comfort and durability of the competitive designs, as well as the ability of the competitors to rapidly validate their technical data packages and enter production. In addition, in determining the relative costs and merits of the competitive designs, consideration should be given to those masks that have already incorporated any pre-planned product improvements identified by the Army.

Lexington—Blue Grass Depot (sec. 153)

The Senate bill contained a provision (sec. 1221) that would prohibit the shipment of chemical weapons into the Lexington—Blue Grass Depot in Richmond, Kentucky. Following disposal of existing munitions at the depot, the facility could not be used for further chemical weapons-related activities. The Secretary of Defense could waive the provision if he determines that it is in the national security interest.

The House amendment contains no similar provision.

The House recedes.

Report of chemical weapons demilitarization (sec. 154)

The House amendment contained a provision (sec. 1021) that would require the Secretary of Defense to submit a report by February 1, 1987 to the Committees on Armed Services of the Senate and House of Representatives on the chemical weapons demilitarization program. The report is to describe the methods for carrying out such programs that optimize safety and cost effectiveness considerations. This report will complement the Army's report to Congress on an accelerated chemical destruction plan, and thus help the Congress reach a decision on the most prudent destruction plan to pursue.

The Senate bill contained no similar provisions although the Senate asked for a similar report in the report language accompanying its bill.

The Senate recedes.

LEGISLATIVE PROVISIONS NOT ADOPTED

DDG-51 destroyer program—helicopter facilities

The Senate bill contained a provision (sec. 102(d)(1)) that would require the Secretary of the Navy to incorporate helicopter support facilities into each DDG-51 class destroyer constructed with funds authorized to be appropriated by this Act.

The House amendment contained no similar provision.

The Senate recedes.

The conferees reaffirm their desire that the Navy develop and produce the most cost-effective design for the DDG-51 class detroyer. The Secretary of the Navy's recent report on options for expanding DDG-51 class helicopter support facilities indiciates that options may exist of upgrading the helicopter capability of these ships in a prudent and relatively inexpensive manner.

The conferees encourage the Navy to explore and move forward with such helicopter support capability for the DDG-51 class as may be accommodated within available resources.

MSH-X minesweeper hunter

The Senate bill contained a provision (sec. 102(e)) that would authorize the Secretary of the Navy to procure from one or more allied foreign countries a lead minesweeper hunter ship and a partially outfitted hull of a minesweeper hunter ship. The provision would require that follow-on MSH-X ships be constructed in U.S. shipyards and that funds not be obligated or expended for procurement of an MSH-X ship or a partially outfitted hull until the Secretary of the Navy certifies the inability of U.S. shipyards to build a minesweeper hunter ship in a timely manner.

The House amendment contained no similar provision.

The conferees remain concerned about the serious shortcomings in U.S. mine countermeasures capability. Despite good faith efforts over the years to redress these deficiencies, the results have been disappointing, and corrective actions are clearly needed.

The conferees are aware that the Navy has contracted to acquire a European minesweeper hunter design—now designated as coastal minehunter (MHC)—in an effort to speed up the acquisition process. In accordance with current law, the Navy plans to construct any ships employing this design in U.S. shipyards.

The conferees expect the Navy to acquire a U.S.-built minesweeper hunter of a design that meets all applicable requirements and specifications, using funds that remain available for that purpose ($115 million).

The Senate recedes.

Consolidation of Navy munitions funds

The Senate bill contained a provision (sec. 102(f)) that would require the President to include within a single account all budget requests for Navy munitions for fiscal year 1988 and subsequent years.

The House amendment contained no similar provision.

The Senate recedes.

30mm GAU-8 ammunition

The Senate bill contained a provision (sec. 103(b)) that would restrict the obligation of funds for the 30 millimeter GAU-8 ammunition program until such time as the requirement for depleted uranium penetrators is broken out as a separate procurement items.

The House amendment contained a provision (sec. 111) that directs the Secretary of Defense to procure depleted uranium penetrators on a government-furnished material basis from at least two sources in the existing production base for such penetrators.

In addition, the House report (H. Rept. 99-718) directed the General Accounting Office (GAO) to evaluate the cost/benefit tradeoffs to the government of separately providing the depleted uranium penetrator as compared to acquiring a complete munition round from a contractor. Also, the evaluation is to assess the advantages and disadvantages of the government, rather than a contractor, functioning as the integrator of the round.

The conferees agreed to delete both provisions.

The conferees understand and expect the Department of the Army, acting in its capacity as single manager of ammunition, to procure, competitively, the fiscal year 1986 and the fiscal year 1987 30mm API ammunition on a procurement breakout basis.

The conferees also expect that depleted uranium (DU) components for the 30mm API ammunition will be competitively procured from the production base.

The conferees do not intend to reopen competition that may already have occurred with the fiscal year 1986 and fiscal year 1987 30mm API ammunition program.

The conferees also endorse the GAO report requested by the House.

Flight inspection aircraft

The House amendment included section 112 which directed the Secretary of the Air Force to obligate within 180 days of the enactment of the fiscal year 1987 Defense Authorization Act previously authorized and appropriated funds for the procurement of a new flight inspection aircraft.

Such aircraft should be procured competitively and should meet the performance specifications established in paragraph 2C(2) of the Department of the Air Force Program Management Directive for Flight Inspection Aircraft dated July 11, 1984.

The Senate bill contained no similar provision.

The House recedes.

Contingent authorization

The House amendment contained a provision (sec. 114) that would make available $30 million for Missile Procurement, Army; $57.3 million for Other Procurement, Army (to be derived from other support equipment); and $490.4 million for Aircraft Procurement, Air Force from amounts authorized for procurement only to the extent that amounts are made available through reductions elsewhere in the Act.

The Senate bill contained no similar provision.

The House recedes.

Upgrade of A-10 weapons delivery system

The House amendment contained a provision (sec. 115) that would authorize the Secretary of the Air Force to upgrade the A-10 weapons delivery system. Such upgrades should include flight control modifications to improve gun firing stability, enhancement of target strafing accuracy, tactical training against moving targets, accurate lateral toss-capable bombing and effective self-defense against likely air threats.

The Senate bill contained no similar provision.

The House recedes.

The conferees support the A-10 upgrade program but are reluctant to proceed with the weapons delivery system improvement program without detailed cost and schedule information.

The conferees encourage the Department of the Air Force to evaluate the proposed upgrade program and, if a decision is made to undertake the program, to provide to the respective Committees on Armed Services of the Senate and House of Representatives a report in support of the decision.

A/F 32T-9 noise suppressor system

The House amendment contained a provision (sec. 127(g)) that would restrict the obligation of any funds made available to the Department of the Air Force for the procurement of the A/F 32T-9 Noise Suppressor System unless competitive procurement is utilized.

The Senate bill contained no similar provision.

The House recedes.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

General

The Administration requested a total authorization of $41,929.9 million for fiscal year 1987 Research, Development, Test, and Evaluation (RDT&E) appropriations. The conferees agreed on a total authorization of $36,215.6 million for the RDT&E program, a reduction of $5,714.3 million from the Administration's request. The following table summarizes the conference actions:

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION (RDT&E)—SUMMARY

[In thousands of dollars]

Department	Fiscal year request	Senate bill	House amendment	Conference
Army	5,550,300	4,815,669	4,763,664	4,712,729

ITEMS OF SPECIAL INTEREST

Advanced medium range air-to-air missile

The Advanced Medium Range Air-to-Air Missile (AMRAAM) full scale development contract was certified to Congress by the Secretary of Defense as having a fixed-price type contract for an amount not more than $556,580,480 with the development contractor. The amount of $556,580,480 is for the work content specified within the contract at the time of certification. The conferees understand that a need now exists to activate a third test site and to procure an additional captive carry vehicle. Several other actions need to be taken to assure Congress that adequate test results will be available at key decision points. The conferees agree that these activities may be funded by adding the required scope of work to the existing contract provided they are accomplished at no overall increase in cost of the total development program. The conferees intend to provide the Air Force with the maximum management flexibility required to carry out a successful development program while continuing to constrain the overall cost of the program.

Advanced technology transition

The Administration requested $13.492 million for the Navy's advanced technology transition program. This program's purpose is to facilitate the transition of promising new ideas from the technology base into advanced development.

Both the Senate bill and the House amendment full supported the request. The conferees encourage the Navy to reprogram additional funds into this important program.

Air defense technology program

The Administration requested a total of $53.5 million in two existing and two new line items for the purpose of investigating technologies relevant to strategic defense against air breathing threats. The House bill would authorize $17.85 million.

These programs, when taken together, are analogous to the Strategic Defense Initiative (SDI) which is investigating technologies relevant to defense against ballistic missiles. The conferees strongly endorse this initiative but believe that the effort should be consolidated under a single line item. Accordingly, the conferees provided $30 million for an Air Defense Technology Program. The conferees agree that the early emphasis of this program should be on surveillance, acquisition and tracking technologies and that there should be the greatest possible cooperation and interaction with the SDI Organization to take advantage of relevant technologies developed in the SDI program and to avoid duplication of effort.

All source imagery processor

The conferees agreed to authorize the full request for the All Source Imagery Processor with the understanding that the Marine Corps will pursue the tactical system with a complementary secondary dissemination system for other products.

Applied optics university research

The conferees believe that the number of university centers (currently just two) conducting research in applied optics for the Department of Defense should be increased. Any newly designated center should have broad spectrum optics capabilities and be located so as to meet Department of Defense needs. To overcome the shortage of trained personnel in infrared detector fabrication, any newly designated center should also have the capability to train researchers as well as to develop new optics materials.

The conferees recommend that the directors of Department of Defense supported university optics centers be constituted as an informal committee to assess the current and future optics needs of the individual services and of the Department of Defense, as a whole, and that they be tasked to provide assistance and guidance to the Department in that regard.

A-7 strikefighter

Both the Air Force and Air National Guard have expressed strong interest in the evaluation of the A-7 Strikefighter. The A-7 Strikefighter would be a modified version of the existing A-7D and A-7E aircraft. It would consist of upgraded avionics, a new or modified engine, and a stretched fuselage to accommodate the larger engine.

If developed, the A-7 Strikefighter would be procured for the Air National Guard by modifying existing Guard A-7D and Navy A-7E aircraft. It would be procured in lieu of F-16's, at one half the cost of the F-16. The Air Force estimates the total A-7 Strikefighter inventory objective at approximately 350 aircraft.

The conferees support this effort to make maximum use of existing assets. By upgrading the inventory of A-7 aircraft (which have considerable service life remaining) these aircraft will remain operational beyond the year 2010.

The conferees recommend an authorization of $35.0 million for Air Force evaluation of the A-7 Strikefighter. Following the inital evaluation of prototype aircraft, the conferees expect this program to be fully competed. Approval to proceed with overall modification program will be contingent upon the performance of the prototype aircraft and the overall affordability of the program.

Ballistic missile research and development

The conferees agreed that the United States must pursue a vigorous research and development program for penetration aids and for earth penetrating warheads in order to ensure the continued effectiveness of the U.S. ballistic missile deterrent in the face of Soviet active and passive defensive measures. These measures threaten to erode the effectiveness of the U.S. strategic deterrent.

The conferees share a desire that cooperation be enhanced between the Air Force and Navy in pursuing penetration and advance re-entry vehicle programs and that specific plans be developed for the application of systems emerging from these research programs to Trident II, Peacekeeper, and the Small ICBM. Accordingly, at the time of the submission of the fiscal year 1988 budget request, the conferees request that the Secretary of Defense submit: (1) a report on the status of cooperative efforts between the two services and with the nuclear weapons laboratories pertaining to penetration aids and earth penetrating warheads, and (2) specific recommendations regarding the introduction of these capabilities into U.S. modern ballistics missile forces.

Battle group passive horizon extension system

The Senate bill would authorize the amount requested by the Administration for the Battle Group Passive Horizon Extension System (BGPHES). The House amendment would reduce the request by $11.8 million.

The conferees agreed to authorize the requested amount for the BGPHES. The conferees have learned that the Navy is considering a new platform for the BGPHES mission. The conferees have authorized the funds exclusively for the program presented and justified in the budget request. The BGPHES program should be considered an item of Congressional interest.

Follow-on tactical reconnaissance system

The Senate would authorize $30.583 million for the Air Force tactical air reconnaissance system, the amount requested by the Administration. The House amendment would reduce the request to $18.583 million.

The conferees agreed to authorize $20.583 million for the tactical air reconnaissance system. Within the program line is the Advance Deployable Digital Imagery Support System (ADDISS). The conferees do not intend that this reduction be applied against the ADDISS effort.

Ground launched hellfire missile

The Hellfire is a helicopter-fired, laser guided missile intended for deployment as the primary anti-armor weapon system on the Army's AH-64 Apache helicopter.

A need exists for a longer range, more lethal anti-armor weapon system than that currently available to Army divisions. The conferees have been advised that the 9th Infantry Division (Motorized) has been evaluating ground launched Hellfire since 1982. This evaluation has included live firings from two prototype HMMWV surrogate platforms.

The conferees believe the ground launched Hellfire may satisfy the urgent, near-term, anti-armor requirements of the Army's Motorized Division while increasing our overall anti-armor capability. The conferees therefore recommend $2.0 million be authorized for the evaluation and qualification of the ground launched derivative of the Hellfire missile.

Integrated platform communications

The House amendment added $69.021 million for a new line item call Integrated Platform Communications Development. As a related matter, the House recommended reductions in Fleet Telecommunications (24163), Submarine Communications (64502), and Navy Strategic Communications (11402). The Fleet Telecommunications program includes a project to develop a communications data bus for the radio room on DDG-51 class destroyers.

The conferees agreed not to authorize funds for Integrated Platform Communications Development. However, the conferees direct the Secretary of the Navy to conduct a definitive study of data bus technologies and their applicability to surface ships, submarines and aircraft, and to report the results of this study to the Committees on Armed Services of the Senate and House of Representatives.

Furthermore, the conferees direct that all communications data bus development shall be managed within a single program element. Consolidation of communications data bus development using the data bus for the radio room on DDG-51 class destroyers is mandated where that data bus applicability is found appropriate and cost effective.

Minimum essential emergency communications network

The Senate bill would authorize $92.527 million for research and development associated with the Minimum Essential Emergency Communication Network (MEECN), the full amount requested by the Administration. The House amendment would authorize $57.527 million.

Due to budgetary considerations, $72.527 million is authorized for this purpose. The

conferees direct the Air Force to maintain the current pace of the Miniature Receive Terminal (MRT) program in allocating the reduction of $20 million.

M-1 diesel alternative

The M-1 Abrams Main Battle Tank is currently powered by a 1,500 horsepower turbine engine (AGT-1500) which is being procured on a sole source, multi-year basis.

While the performance of the AGT-1500 engine has been excellent, the conferees nevertheless believe that substantial benefits could be derived from introducing competition into the engine procurement program. Such competition could come either in the form of a competitive procurement (or second source) for the AGT-1500 or from evaluation of a diesel alternative to the AGT-1500. The conferees believe both approaches should be considered.

The conferees believe particular attention should be paid to the evaluation of suitable diesel alternative power plants for future production M-1's and possible follow-on applications. This effort should focus on existing engines (particularly where increased commonality with NATO systems might be achieved) and should be conducted at minimal cost to the government.

The conferees encourage the conduct of "side by side" testing of diesel aternatives and the AGT-1500 to evaluate such characteristics as acceleration, maximum speed, fuel economy, etc. To perform these tests the Army is expected to make available at least two vehicles to any engine manufacturer offering a suitable engine for competition.

The conferees authorized $9.0 million for the M-1 Diesel Alternative.

National aerospace plane

The Administration requested $149.0 million for research and development in the Navy, Air Force and Defense agencies accounts for the National Aerospace Plane (NASP) program. The conferees support a vigorous research effort on the critical technical issues pertaining to the feasibility of this vehicle, and agreed to authorize up to $130 million for this purpose in the Department of Defense.

During the authorization conference, the Department of Defense requested that NASP funding to transferred from Navy and Defense Agencies accounts into the Air Force RDT&E account. Accordingly, the conferees agreed that $104 million be included in Air Force RDT&E for this purpose with the understanding that the Director, Strategic Defense Initiative Office will transfer up to $26 million to the Air Force for NASP research.

Navy strategic communications

The Senate bill would authorize $143.282 million for the Navy strategic communications research and development program, the amount requested by the Administration. The House amendment would authorize $50.0 million.

The conferees recognize the importance of survivable communications to the effectiveness of the U.S. submarine launched ballistic missile force and agreed to provide $113.282 million for Navy strategic communications research and development, primarily to support the E-6A aircraft program. On a related issue, the conferees, although supportive of efforts to deploy systems with a common communications architecture, agreed that existing plans for the E-6A should not be changed at this time because of cost, schedule and configuration (weight and space) considerations.

The conferees see considerable potential in the ability of space-based laser communications, if they prove feasible and affordable, to satisfy a broad range of tactical submarine and other communications requirements, and to complement the Take Charge and Move Out (TACAMO) aircraft program in ensuring strategic connectivity. Accordingly, the conferees provided $35.875 million to accelerate research and development that would be required to support a full scale development decision for a laser communications satellite.

Penguin integration/LAMPS MK-III

The conferees believe the cost to develop, integrate and procure the Penguin missile may exceed its military value to the Battle Force. Therefore, the conferees have established two cost ceilings. First, total RDT&E costs for Penguin-unique development should not exceed $66.7 million, with a ten percent allowable adjustment for exchange rate fluctuation. Second, recurring fly-away unit price should not exceed $550,000 for 193 missiles. Both amounts are measured in fiscal year 1986 dollars.

The conferees agreed to specify that the Penguin program be terminated if either of these cost thresholds is exceeded.

Shuttle recovery

The conferees have long recognized the critical need for ensured access to space and strongly support the recovery of our space launch posture at the earliest possible time. Accordingly, the conferees have supported a number of adjustments in space related programs that have been requested since the submission of the fiscal year 1987 budget. The conferees are aware, however, that these recovery efforts are dynamic and that additional changes in the allocation of fiscal year 1987 resources to space needs may be required. The conferees, therefore, invite the submission of reprogramming requests for these purposes, if required and will give such requests priority attention.

Stinger air defense missile

The House recommended an addition of $1.0 million to develop an electronic safety device for the Stinger air defense missile. This safety device would make it more difficult for unauthorized individuals (such as terrorists) to fire a Stinger missile.

The conferees agreed to provide $1.0 million to conduct a study evaluating the cost and programmatic impacts of such a safety device. The study shall address in detail the operational implications of such a modification to the Stinger. The conferees direct that this study be submitted to the Committees on Armed Services of the Senate and the House of Representatives by April 30, 1987.

Submarine technology

In the Navy's budget for technology base programs, projects are normally developed to support single effects, or one-dimensional improvements. Some technologies, however, are polyfunctional, changing more than one characteristic of a weapon system. For example, in submarines a new development might increase propulsion efficiency while simultaneously reducing noise. Sometimes these polyfunctional technologies also reduce cost. Despite potential benefits, however, the budget review process does not specifically promote the development of polyfunctional technologies.

The Navy is encouraged to pursue such polyfunctional technologies for the purpose of improving submarine performance characteristics.

Surface ASW systems

The conferees note that the Surface ASW (63553) and Surface ASW Systems Improvement programs (64713) are managed by two separate offices within the Navy.

To improve coordination and avoid unnecessary duplication, the conferees direct the Navy to bring these programs under a single manager.

Theater mission planning centers

The Administration requested $22.275 million for Theater Mission Planning Centers, including over the horizon targeting. The Senate bill would authorize the Administration request. The House amendment would authorize $10 million. The conferees agreed to authorize $17.275 million.

The conferees urge the Administration to have a significantly improved operational system for flexible targeting of the nuclear variant of the Tomahawk missile on line at the earliest possible date and funded out of the Tomahawk program (PE 64367). Further, the conferees urge the Administration to improve significantly the operational system for rapid reprogramming of the conventional variant of the Tomahawk missile by the end of fiscal year 1987. The conferees note the lack of timely progress in this area and will oppose any further funding of this program beyond fiscal year 1987 if such improvements to the program are not evident by the end of that year.

The conferees note that a considerable amount of money and effort has been expended in supporting the Defense Mapping Agency in gathering and processing appropriate data to support worldwide targeting missions. The conferees urge the Department of Defense to better utilize the Defense Mapping Agency and its assets in implementing a system for flexible targeting of the nuclear variant of the Tomahawk missile, and a rapidly reprogrammable targeting capability for the conventional variant of the Tomahawk missile. The conferees further urge the Department of Defense to complete the full system upgrade for rapid re-targeting capabilities of all variants of the missile by the end of fiscal year 1991.

PROGRAM LIMITATIONS

LEGISLATIVE PROVISIONS ADOPTED

Copperhead guided projectile (sec. 202)

The House amendment contained a provision (sec. 203) that would require the Army to provide commonality on guided projectiles and to select a second source for the Cooperhead.

The Senate bill contained no similar provision.

The Senate recedes with an amendment.

V-22 Osprey aircraft (sec. 203(a))

The House amendment contained a provision (sec. 204(a)) that would limit authorization of funds for the V-22 Osprey aircraft until the Secretary of the Navy makes certain certifications to the Committees on Armed Services of the Senate and the House of Representatives.

The Senate bill contained no similar provision.

The Senate recedes with an amendment.

Marine Corps pegasus engine (sec. 203(b))

The House amendment contained a provision (sec. 204(e)) that would provide authorization of $16 million for certain improvements to the Marine Corps AV-8B aircraft Pegasus engine program.

The Senate bill contained no similar provision.

The Senate recedes with an amendment to reduce the authorization to $8.0 million.

Floating beam avionics rack (sec. 203(c))

The House amendment contained a provision (sec. 204(f)) that would add $10.0 million for the floating beam avionics rack program. This authorization was not requested in the budget and was not included in the Senate bill.

The conferees take no position on whether deficiencies which may exist in the current avionics rack in S-3A aircraft should be corrected by modifying the existing rack or by procuring new ones.

The conferees agreed to direct the Secretary of the Navy to report to the Armed Services Committees of the Senate and the House of Representatives not later than November 1, 1986 on how the Navy intends to correct whatever deficiencies exist within S-3 avionics rack.

Rankine cycle energy recovery (Racer) system (sec. 203(d))

The Administration requested $22.474 million for the Ship Propulsion System program, which included $7.474 for development of the Rankine Cycle Energy Recovery (Racer) system. For a variety of operational and economic reasons, the Navy subsequently terminated this program. The Senate bill did not include funds for Racer. The House amendment contained a provision (sec. 204(g)) which provided $20.0 million for testing of the Racer system.

The conferees agreed to transfer $20.0 million from Navy research and development to the Office of the Secretary of Defense. The Secretary is to use up to $20.0 million to evaluate and test the Racer system, if the Secretary determines such testing is necessary.

The conferees take no position on the merits of Racer and agree to abide by the program decisions made by the Secretary of Defense.

The Senate recedes with an amendment.

Harm block IV/low-cost seeker (LCS) (sec. 203(e) and 204(b))

The Administration requested $14.7 million for Navy research and development of the Low-Cost Seeker (LCS) and $3.9 million for research and development of the High Speed Anti-Radiation Missile (HARM). In addition, the Administration requested $14.8 million for Air Force development of the LCS and $2.4 million for Air Force research and development of the HARM missile. The Senate bill would approve the Administration's request for these programs. The House amendment (sec. 212) would provide no authorization for either Navy or Air Force research and development of the HARM missile, and would provide an additional authorization of $27.6 million for research and development of the LCS (sec. 204(h) and 205(d)).

The conferees agreed to provide $39.2 million for Navy research and development of the LCS (sec. 203(e)) and $17.4 million for Air Force LCS (sec. 204(b)) research and development. The conferees also agreed to approve the Administration's request in both services for HARM research and development.

The conferees recognize the need to improve the capabilities of the HARM missile in order to counter advanced threat systems. Both LCS and the Block IV upgrade to the current HARM seeker appear to offer substantial enhancements in the missile's performance. The conferees expect the Navy to conduct a competitive evaluation between the HARM Block IV seeker and the LCS and to select the most cost-effective alternative.

Trident II (sec. 203(f))

The Senate bill contained a provision (sec. 202(c)) that would fence the funds for the Trident missile development program from undistributed reductions in Navy programs.

The House amendment contained no similar provision.

The House recedes.

Libyan lessons learned equipment modification (sec. 203(g))

The House amendment contained a provision (sec. 204(i)) to authorize $50.0 million to the Navy for equipment modification identified from the Libyan lessons learned study.

The Senate bill contained no similar provision.

The conferees agreed to provide the Navy with authorization of up to $50.0 million for the equipment modifications.

Short range attack missile (sec. 204(a))

The House amendment contained a provision (sec. 205(a)) that would limit the Air Force to one of two new systems—either the Advanced Cruise Missile or the Short Range Attack Missile (SRAM II).

The Senate bill contained no similar provision.

The conferees agreed that there exists a requirement for a short range standoff capability for the penetrating bomber force in addition to the requirement for longer range cruise missiles. The conferees were also in agreement that the existing Short Range Attack Missile (SRAM A) has limitations. The conferees do not believe, however, that the Department of Defense has provided sufficient justification for the development of a new SRAM versus modifying the existing SRAM.

In view of likely budgetary constraints, and the funding demands of a very robust bomber modernization program over the next several years, the conferees are reluctant to commit to a new missile development program without the benefit of clear justification. Accordingly, the conferees agreed to provide $70 million to initiate full scale development of a SRAM A modification or SRAM II replacement and stipulated in the bill that none of these funds can be obligated or expended for full scale development activities until the Secretary of Defense provides to the Committee on Armed Services of the Senate and House of Representatives a report containing analyses of the comparative total program cost and effectiveness of SRAM missile and warhead alternatives.

The Senate recedes with an amendment.

Space defense system (sec. 204(c))

The House amendment contained a provision (sec. 205(c)) that would limit authorization for the Space Defense System to $140.0 million and deny authorization for production verification of the Miniature Homing Vehicle.

The Senate bill contained no similar provision.

The conferees agreed to authorize $200.0 million for the Space Defense System research and dvelopment and to deny funding for production verification.

The Senate recedes with an amendment.

Pave tiger/seek spinner (sec. 204(d))

The Senate bill would authorize the Administration's report for the Seek Spinner program. The House amendment would increase the request by $185 million.

The conferees agreed to increase the Seek Spinner program by $80.0 million. The $80.0 million is for facilitization for production of the Pave Tiger/Seek Spinner system.

Medical application of free-electron laser (sec. 205(a))

The House amendment contained a provision (sec. 206(a)) to authorize $15.0 million to the Defense Agencies only for the application of Free-Election Lasers for medical research and material.

The Senate bill contained no similar provision.

The Senate recedes.

Laser Pantography (sec. 205(b))

The House amendment contained a provision (sec. 206(c)) that would authorize $4.0 million to the Defense Agencies only for the Laser Pantography project.

The Senate bill contained no similar provision.

The Senate recedes.

Strategic technology (sec. 205(c))

The Senate bill would authorize the Administration's request of $240.62 million for the Strategic Technology program in the Defense Agencies. The House amendment would reduce the request by $10.0 million.

The conferees agreed to authorize the request and to make $10.0 million of this request available only for independent research in ocean science and related areas to provide assessment of non-acoustic submarine detection possibilities.

Advanced field artillery tactical data system (AFATADS) marine integrated fire and air support systems (MIFASS) (sec. 206(a)

The Senate bill contained a provision (sec. 202(a)) that would limit funds for the Army AFATADS and the Navy MIFASS programs until the Secretary of Defense certifies to the Congress that both systems are necessary.

The House amendment contained a provision (sec. 204(d)) that would deny funds for MIFASS.

The House recedes with an amendment.

Advanced tactical aircraft, Navy (sec. 206(b))

The Senate bill contained a provision (sec. 202(b)) that would deny funds for the full-scale development of the Navy Advanced Tactical Aircraft (ATA) until the Secretary of Defense certifies to the Congress that the ATA design will accommodate essential Air Force peculiar requirements for such aircraft.

The House amendment contained no similar provision.

The House recedes with an amendment Secretary of Defense certification to Congress that both the ATA and Advanced Tactical Fighter (ATF) requirements have been finalized and agreed to by Air Force, Navy and the Office of Secretary of Defense.

Advanced tactical fighter, Air Force (sec. 206(b))

The Senate bill contained a provision (sec. 202(d)) that would require a Secretary of Defense certification on the design of the Air Force Advanced Tactical Fighter (ATF) and the ability of that design to accommodate essential Navy-peculiar requirements for such aircraft.

The House amendment contained no similar provision.

The House recedes.

Advanced anti-armor weapon system (AAWS) (sec. 207)

The House amendment contained a provision (sec. 216) that would authorize $48.735 million to the Army for the AAWS medium following certification to the Congress by the Secretary of the Army on certain aspects of the development program.

The Senate bill contained no similar provision.

The Senate recedes with an amendment.

Consolidation of electronic warfare programs (sec. 208)

The House bill deleted funding for 25 individual program dealing with electronic warfare in each of the service's research and development accounts and consolidated those programs into a single electronics warfare program under the direction of the Assistant Secretary of Defense for Command, Control, Communications and Intelligence. Section 206(b) of the House bill provided that $488.8 million would be available only for research, development test and evaluation of electronic warfare systems. Section 206(b) also provided that not less than $125 million of the $488.8 million be available solely for development and demonstration of the Integrated Communication Navigation Identification Avionics and the Integrated Electronic Warfare System and the associated Very High-Speed Integrated Circuit based modular architecture programs. The Senate bill contained no similar provision. The Senate recedes with an amendment.

The conferees note the continuing difficulty the Department of Defense is having in developing a coordinated and integrated electronic warfare masterplan. The plans that have been developed to date illustrate the lack of coordination among the services. Although some progress has been made during the past year, the actions fall short of the serious tasks facing the services.

The conferees directed the services last year to prepare an electronic warfare masterplan. The masterplan represents modest progress but falls short of the serious challenge facing the department in this crucial area. More concrete and far reaching steps are justified. Therefore, the conferees direct that the Under Secretary of Defense for Acquisition establish a coordinating council, which he shall head, to develop a Department of Defense Electronic Warfare Masterplan that shall guide the services in developing and executing individual electronic warfare projects.

The conferees decided to remove funding from the following individual electronic warfare programs in each of the services and to institute in their place a single consolidated electronic warfare program element within each of the Services' research accounts.

Army	Navy	Air Force
63711A	24575N	63743F
63718A	24576N	63749F
63755A	25674N	64220F
63762A	62113N	64724F
64750A	63206N	64737F
	64224N	64738F
	64226N	64739F
	64255N	27584F
	64573N	27582F

A single account will finance designated electronic warfare activities within each of the individual services. During fiscal year 1987 the Service's may not obligate more than 80 percent of the funds in those consolidated accounts until the Under Secretary of Defense for Acquisition has issued an Electronic Warfare Masterplan.

Further, the conferees direct that $100 million be made available to the Under Secretary of Defense for Acquisition for purposes of funding electronic warfare programs. The Under Secretary is expected to use that $100 million to strengthen or broaden programs within individual services that offer significant promise. The funds may also be used to initiate projects or activities that lack sufficient attention within Service electronic warfare programs.

One electronic warfare program not consolidated was the Integrated Electronic Warfare System. This system is scheduled to be the common electronic warfare suite in both the Air Force's Advanced Technology Fighter and the Navy's Advanced Tactical Aircraft. The Air Force is responsible for advanced development of this system. The conferees understand that additional funding may be required for the Integrated Electronic Warfare System so that it will be available in time to be integrated into the Navy's Advanced Tactical Aircraft. The conferees encourage the Air Force to submit a reprogramming to accelerate development of that program if necessary.

Limitation of testing electromagnetic pulse (sec. 209)

The House amendment contained a provision (sec. 219) that would deny certain types of testing in the Chesapeake Bay during fiscal year 1987.

The Senate bill contained no similar provisions.

The Senate recedes.

STRATEGIC DEFENSE INITIATIVE

LEGISLATIVE PROVISIONS ADOPTED

Strategic defense initiative (SDI) funding (sec. 211)

The Senate bill contained a provision (sec. 205(a)) that would authorize $3,597.0 million for the SDI program.

The House amendment contained a provision (sec. 208) that would authorize $2,846.0 million for the SDI program.

The Senate recedes with an amendment to authorize SDI at $3,213.0 million.

Anti-tactical ballistic missile (ATBM) system (sec. 212)

The Senate bill contained a provision (sec. 205(a)(2)) that would authorize $50 million within the SDI program for the development of an anti-tactical ballistic missile (ATBM) system on a cooperative basis with our allies. The House amendment contained a similar provision (sec. 209), that would also direct the Secretary of Defense to establish a separate ATBM office within the SDI organization.

The House recedes.

SDI institute (sec. 213)

The Senate bill contained a provision (sec. 1212) that would deny the expenditure of funds for a Federally Funded Research and Development Center (FFRDC) for SDI until the Secretary of Defense and Comptroller General submitted a report on such a center and 30 legislative days had passed.

The House amendment contained a similar provision (sec. 218). The House version, however, would only require the Secretary of Defense to submit a report. It also specified that an FFRDC could not be established unless funds for that purpose are specifically authorized to be appropriated in an Act other than an appropriation Act or continuing resolution.

The conferees recognize the need for technical support to carry out the system tradeoffs and system integration efforts required to manage a program as complex as the Strategic Defense Initiative (SDI). The conferees agreed, however, that the Congress should specifically authorize the establishment of a new FFRDC for this purpose. In assessing the most appropriate means to provide technical support to the SDIO, the conferees agreed to require a report from the Comptroller General, in addition to a report from the Secretary of Defense.

The Senate recedes with an amendment.

SDI cost report (sec. 214)

The Senate bill contained a provision (sec. 207) that would amend the SDI cost report requirement contained in the fiscal year 1986 Defense Authorization Act to require the Secretary of Defense to provide certain additional SDI cost related information to the Congress.

The House amendment contained no similar provision.

The House recedes.

Report on SDI deployment schedule (sec. 215)

The Senate bill contained a provision (sec. 1226) that would require the Department of Defense to provide a report to Congress detailing what SDI technologies can be developed and deployed within the next 10 years.

The House amendment contained no similar provision.

The House recedes.

Report on Soviet ABM Treaty compliance (sec. 217)

The Senate bill contained a provision (sec. 1228) that would request a report on the implications for the Strategic Defense Initiative of the application of the restrictive and the less restrictive interpretations of the 1972 Anti-Ballistic Missile treaty.

The House amendment contained a provision (sec. 1024) that would request an annual report on Soviet compliance with the anti-ballistic missile treaty.

The House recedes on section 1228.

The House recedes on section 1024, noting that the information requested is covered by the reporting requirement levied last year in section 1002 of the Defense Authorization Act for fiscal year 1986, mandating an annual report on Soviet compliance with all arms control commitments.

LEGISLATIVE PROVISIONS NOT ADOPTED

Limitation on SDI contracts to foreign countries

The Senate bill contained a provision (sec. 208) that would prohibit funds for any SDI related contracts to foreign countries or companies unless the Secretary of Defense certifies that this work could not reasonably be done in the U.S. This provision would not apply to projects associated with tactical ballistic missile defense nor to existing contracts.

The House amendment contained no similar provision.

The Senate recedes.

Transfer of SDI technology to the Soviet Union

The House amendment contained a provision (sec. 1047) that would specify the military technology developed with SDI funds from fiscal years 1987 and 1988 could not be made available to the Soviet Union unless the President determine such a transfer to be in the interests of maintaining peace and national security.

The Senate bill contained no similar provision.

The House recedes.

BALANCE TECHNOLOGY INITIATIVE

LEGISLATIVE PROVISIONS ADOPTED

SDI, the Balanced Technology Initiative and the Conventional Defense Initiative (secs. 221 and 222)

The Senate bill contained a provision (sec. 205) that would authorize funding for the Strategic Defense Initiative (SDI), and would establish within the Department of Defense under the research and development appropriation for the Defense Agencies a Balanced Technology Initiative (BTI), with funding to be allocated by the Director of Defense Research and Engineering to finance promising new technologies that could substantially advance our conventional defense capabilities or that offered the promise of "leapfrogging" areas of Soviet and Warsaw Pact advantages in conventional forces. Additional funds would be authorized for the project in the conventional defense technology base, to be allocated to promising technologies that offer the prospect, when developed, of significant new conventional defense capabilities.

The House amendment contained a provision (Sec. 207) that would establish a Conventional Defense Initiative (CDI) program and designated in the House Report (H. Rept. 99-718) projects amounting to $462.3 million authorized within the various Research, Development Test and Evaluation accounts.

The House recedes to the Senate on section 205 with an amendment, and the Senate recedes to the House on section 207 with an amendment and accepts many of the CDI projects proposed in the House report.

The Balanced Technology Initiative and the Conventional Defense Initiative share a common purpose which is to improve the capabilities of U.S. conventional forces. Beyond this commitment to a common purpose, however, the two proposals have complementary objectives. The BTI developed from the conviction of the Senate that the creative energy and initiative currently being applied to technologies for the SDI should be directed as well to improving conventional forces.

The CDI emerged from a conviction by the House that other countries have developed capable weapons and systems that could be used by U.S. military forces. The House intends the CDI to constitute the start of a dedicated comparative evaluation program in which systems developed in other countries or for other applications might be evaluated for use by U.S. defense forces. The conferees characterized the differences by stating that the CDI was designed to take advantage of conventional systems that are available today, whereas the BTI is designed to take advantage of technologies that hold great promise for the weapons systems of tomorrow.

The conferees endorse both approaches. They accepted the Senate provision establishing and authorizing funding for the Balanced Technology Initiative, and designated for funding a set of specific programs with special promise that were proposed in the Conventional Defense Initiative. The conferees believe the Department should expand its efforts to improve conventional defense capabilities by utilizing both approaches.

The Administration requested $4.78 billion in DoD accounts for the President's Strategic Defense Initiative (SDI) program in fiscal year 1987. The Administration also requested $534 million for SDI in Department of Energy (DOE) accounts. The SDI program is intended to determine the feasibility of comprehensive strategic defenses against ballistic missiles that are survivable and cost effective at the margin. The program is also tasked with developing defensive deployment options as a possible response should the Soviet Union break out of the ABM Treaty.

SDI Funding

The Administration requested a significant funding increase for SDI in fiscal year 1987, reflecting the high priority it attaches to this program. Compared to last year's SDI appropriation of $3.018 billion, this year's request for $5.319 billion represents a 73% real increase. The funding request in the five major DOD program elements was as follows:

Strategic Defense Initiative Funding

[In millions of dollars]

Surveillance, Acquisition, Tracking and Kill Assessment	1,262.4
Directed Energy Weapons	1,614.9
Kinetic Energy Weapons	991.2
Systems Concepts and Battle Management	462.2
Survivability, Lethality, and Key Support Technologies	454.4
Total	4,785.1

The conferees continue to support a robust SDI research program because they believe the program serves a number of valid U.S. national security purposes. However, they believe that SDI should be but one part—albeit an important part—of a broad-based and balanced U.S. technology initiative that addresses the entire range of nuclear and conventional deficiencies in our defense posture.

The conferees are concerned that the current and projected funding levels for SDI, as reflected in the Administration's fiscal year 1987 request and the Five Year Defense Plan, threaten to absorb an inordinate proportion of defense dollars allocated to research and development. The conferees also believe that the Administration's fiscal year 87-91 funding profile for the SDI is excessive in light of the absence of basic architectures for this program and continuing indications of basic disagreements within the administration as to the program's goals.

Accordingly, the conferees decided to provide a 13% real increase in SDI funding for fiscal year 1987 in lieu of the 71% real growth requested by the administration. The conferees authorize $3,213.0 million of SDI in DOD accounts and $317.0 million in DOE accounts, for a total of $3,530.0 million. The allocation of these funds among the five line-items within the SDI is left to the discretion of the Director of the SDI Office, bearing in mind the Congressional guidance herein. In making this decision, the conferees endorsed a concept for a Balanced Technology Initiative proposed in the Senate bill, and directed that $453 million in funds be applied to, but not limited to, specified conventional defense enhancement purposes consistent with this concept. No portion of these funds may be applied to any project or activity in support of the SDI. The conferees also accepted a number of near-term demonstration projects totalling $162.3 million under the Conventional Defense Initiative in the House amendment. These programs are described in House Report (H. Rept. 99-718).

The conferees intend to support the Balanced Technology and Conventional Defense Initiatives in the years ahead. As part of this broad technological thrust, the conferees also urge support for SDI at a robust but measured level consistent with the Administration's policy of a restrictive interpretation of the ABM Treaty until such time as progress in defining appropriate and realistic architectures, and determining the technical feasibility, survivability and cost effectiveness at the margin of potential SDI systems warrants further growth in funding.

Refocusing the SDI

The conferees further accept the Senate's view that SDI should be structured to promote a number of realistic goals consistent with our national security interests. First, SDI continues to represent an important response to the threat to U.S. national security posed by the Soviet Union's activities in the areas of strategic defense research, development, and deployment. Since the signing of the ABM Treaty in 1972, the Soviet Union has continued to spend as much on its strategic defense forces—including air and civil defense—as it has on its strategic offensive forces. This indicates that since the signing of the ABM Treaty, the Soviet Union has continued to maintain the high priority that it has historically attached to strategic defense of its homeland. SDI research is necessary in order to understand better the nature and pace of Soviet research on strategic defenses, especially research on "exotic" technologies.

Second, the conferees believe that a portion of the SDI research program should emphasize options for near-term deployment as a hedge against the possibility of a Soviet ABM "breakout" in the near-term. The committee continues to believe that the SDI Organization (SDIO) is paying inadequate attention to such issues.

Third, the Administration has continued to place primary emphasis within the SDI program on comprehensive strategic defenses that would be highly effective in the face of a determined adversary utilizing responsive countermeasures. Defenses of this type would be very complex, and the ability of defensive technologies to support these goals is as yet uncertain. Issues such as effective mid-course discrimination and the ability of computer software to perform the necessary battle management functions remain to be resolved.

Accordingly, while the conferees believe that the potential ability of ballistic missile defenses to provide comprehensive nationwide population protection should continue to be explored, the major emphasis within the SDI should be dedicated to developing survivable and cost effective defensive options for enhancing the survivability of U.S. retaliatory forces and command, control and communications systems.

Fourth, the conferees also support a robust SDI research program for the leverage it provides to our negotiators in Geneva. The conferees, however, believe that it is not necessary to fund the President's entire request for SDI to maintain our negotiating leverage in Geneva. It is their belief that leverage for arms control negotiations comes only from real defense programs which are aimed at realistic objectives, adequately funded, and broadly supported by a bipartisan consensus. The conferees believe our negotiators in Geneva are well-served by a robust and well-managed SDI research program.

In this regard, the conferees would note that negotiating leverage is sometimes a perishable commodity. If we are to capitalize on the historic opportunities in arms

control created in part by SDI, we should be prepared to consider adjustments to the pace and scope of SDI if the Soviet Union agrees to significant, stabilizing and verifiable reductions in strategic offensive forces.

The Question of Priorities

The conferees had to deal with broad policy issues, including the addressing of priorities. The conferees note that if SDI research were successful in rendering nuclear weapons "impotent and obsolete," the United States would still require a second research and development effort to negate bomber-delivered and cruise-missile-carried weapons. In the judgment of the conferees, the advent of low observables technology may well make this effort quite as challenging as the President's vision of SDI.

And even if technology succeeds in eliminating the threat of both missile and bomber delivered nuclear weapons, the world's citizens may still not be freed from the threat of mass destruction, whether from clandestinely delivered nuclear weapons or from other forms of warfare. Moreover, our European allies would surely have reason to pause at the prospect of the elimination of nuclear weapons, in light of the enormous disparity in conventional weapons between NATO and the Warsaw Pact.

Therefore, NATO needs to vigorously pursue its technological capabilities in dealing with the threat of tank armies as well as the threat of ballistic missiles. NATO must find ways in which its collective technological capabilities can be made to counter the masses of Soviet weapons systems that we are not prepared to match numerically but which we must deter.

Exploiting Technology at the Conventional Level

Research and development on basic new technology and on technology for conventional warfare has suffered greatly in recent years: in 1981 over 16% of RDT&E funds were invested in the defense technology base, but in the fiscal year 1987 budget request, only 8.7% was allocated to the technology base. In real terms, the technology based funding has declined every year since fiscal year 1983. The sharpest decrease coincides precisely with the buildup of the SDI program. Indeed, the funding level proposed for SDI next year will be larger than the entire research and development budget for the Department of the Army.

The conferees have decided to expand the role of technology and innovative weapons concepts while reducing the growth rate of the SDI research program. This involves measures to strengthen the defense technology base, research on advanced conventional warfare technologies (with the goal of "leapfrogging" current quantitative imbalances and the narrowing qualitative advantages of current fielded equipment) and careful evaluation of available weapons and systems developed by our allies. Therefore, the conferees accepted the Senate action in redirecting a portion of SDI funding to meet these other high-priority objectives, and have provided appropriate bill language establishing the BTI; they also have accepted many of the items proposed in the House's CDI with corresponding statutory provisions.

The conferees intend to encourage balanced technology development efforts across-the-board, in areas such as armor/anti-armor initiatives; defenses against armed helicopters; hypervelocity missiles for ground combat use; defense against anti-ship missiles, including those with "stealth" characteristics; "smart" mines for both land and ocean warfare; lightweight, air transportable vehicles with anti-armor capabilities for rapid transport to remote areas; improved conventional anti-submarine warfare munitions; and "smart" standoff munitions and submunitions for aircraft delivery outside of lethal air defense ranges. They also intend to pursue vigorously opportunities to exploit weapons and systems developed by other friendly countries.

The conferees recognize that technology alone cannot constitute a solution to conventional force imbalances. Continued investment in major end items of equipment is also an important contribution to redressing force imbalances. The conferees have, in many cases, acted to preserve production rates of major end-items from reductions taken in lower-priority accounts. They have also supported the evaluation of a number of equipment items of foreign manufacture that were included in the House's CDI. The conferees are convinced that, unless our technology development efforts for conventional forces are enhanced, a serious imbalance between NATO and the Warsaw Pact will continue for the foreseeable future. The solution to this requires greater balance in our defense technology efforts.

Programmatic Recommendations for the Balanced Technology Initiative and the Conventional Defense Initiative

A Balanced Technology Initiative fund for enhancing technology research in selected areas of importance to conventional defenses is established. Fiscal year 1987 funding is authorized at not less than $300 million, and the Director of Defense Research and Engineering shall be responsible for the apportioning of the funds to the military services and defense agencies, in accordance with the priorities expressed herein and in the bill language. In addition to these funds, not less than $153 million is authorized for enhancing the defense technology base; the Director of Defense Research and Engineering shall be responsible for apportioning these funds among the services and defense agencies. Finally, an additional $162.3 million is authorized for specific projects proposed in the House's Conventional Defense Initiative, as enumerated in the Army and Navy RDT&E tables accompanying this report.

The Director of Defense Research and Engineering will have a critical role to play in the establishment of the BTI program, both in apportioning funds authorized in this bill and in identifying ongoing research efforts that should be augmented, consolidated, or otherwise included in a broad-based conventional defense technology development effort aimed at "leapfrogging" current deficiencies. Therefore, the committees on Armed Services and Appropriations of the Senate and House of Representatives expect to receive a detailed report on the programs he selects, their prior and enhanced funding levels for fiscal year 1987, their prior and enhanced funding profiles for the current FYDP, and a set of major milestones and dates against which the Congress will be able to measure progress under this initiative.

Miscellaneous Provisions

Legislative provisions adopted

Testing of the anti-satellite weapons (sec. 231)

The Senate bill contained a provision (sec. 203) that would repeal section 8097 of the Department of Defense Appropriation Act, 1986.

The House amendment contained a provision (sec. 215) that would direct the Secretary of Defense not to carry out tests of the Space Defense System (F-15/miniature homing vehicle anti-satellite system) against an object in space until the President certifies that the Soviets, after enactment of this act, had tested a dedicated anti-satellite system against an object in space. The House provision would expire on October 1, 1987.

The conferees agreed to accept the House provision with the understanding that tests of the Space Defense System against "points" in space using celestial bodies, such as were conducted during fiscal year 1986, would be permitted during fical year 1987 without restriction.

The Senate recedes.

MX missile and development of small mobile missile (sec. 232)

The Senate bill contained a provision (sec. 204) that would require the Secretary of Defense to report on ICBM modernization to include the configuration for the small mobile missile and to specify options for follow-on basing of the MX. The section would also limit authorization on the small mobile missile to $675.0 million and $200.0 million for the follow-on basing development effort.

The House amendment contained a provision (sec. 210) that would deny deployment of more than 10 MX missiles until certain milestones were achieved in the small mobile missile program.

The conferees remain strongly committed to a modern triad of strategic forces and to the unique attributes that a modern ICBM element brings to the triad. Moreover, there is strong commitment to continued investment in ICBM modernization in order to provide survivability, and continued effectiveness in the face of Soviet active and passive defenses. In this regard, the conferees agreed with the Senate request that the recommendations and decisions pertaining to the Small ICBM and follow-up basing research, which are addressed below, be presented to the Congress in the form of an ICBM modernization "roadmap" encompassing Small ICBM, MX, and MX survivable basing options, including the role of strategic defenses.

The conferees applaud the success of the Peacekeeper missile development program and agree to provide $290 million in research and development, recognizing that the program is now at the critical juncture of transitioning to a deployed system.

The conferees also agreed to provide $120 million for follow-on basing research. The conferees do not intend approval of funding for follow-on basing research to imply any change in the existing limitation on the deployment of Peacekeeper missiles. Moreover, the conferees believe that any basing options for Peacekeeper involving superhard silos are unlikely to provide the desired degree of long term survivability in the absence of defense options.

The conferees are in complete agreement that the configuration of the Small ICBM must assure sufficient mobility to secure the benefits of high survivability and the resulting enhancement of crisis stability. There is also agreement that a commitment to develop and deploy a small ICBM be based on a realistic assessment of its affordability. The conferees are confident that the research and testing conducted in support of the upcoming decision on the Small ICBM will have a very positive bearing on the resolu-

tion of important issues pertaining to mobility and cost, and will enhance support for whatever missile configuration emerges from that decision process.

The conferees agree to provide $1,200.0 million for Small ICBM research and development, and encourage the Administration to pursue as a goal, a 1992 initial operational capability for the missile configuration selected.

In addition to the reporting requirement addressed above, the conferees agree to a provision in law that would repeal the provisions of the fiscal year 1984 Defense Authorization Act pertaining to the linkage of MX deployment and the Small ICBM when full scale engineering development of the Small ICBM begins.

Restrictions on use of research and development funds of the Department of Defense (sec. 233)

The Senate bill contained a provision (sec. 206) that would prohibit the use of funds authorized in this Act for the purpose of making any grant or contribution to any educational institution unless the Secretary of Defense determines that the purpose of the grant or contribution has a potential relationship to a military function or operation and the grant is based on the technical merit of the proposed research.

The House amendment contained no similar provision.

The House recedes.

Coordination of research activities (sec. 234)

The House amendment contained a provision (sec. 217) that would require the Secretary of Defense to strengthen coordination among Department of Defense (DOD) research facilities and other organizations in DOD.

The Senate bill contained no similar provision.

The Senate recedes with an amendment.

Department of Defense Veterans' Administration medical research (sec. 235)

The House amendment contained a provision (sec. 211) that would establish a cooperative medical research program with the Veterans' Administration. The Senate bill did not contain a similar provision.

The conferees agreed that an authorization of $20.0 million should be available only for cooperative medical research to be administered by the Secretary of Defense and the Administrator of Veterans' Affairs.

In addition to this $20 million authorization, the Secretary of Defense is directed to conduct a study of assess the feasibility and potential benefits of establishing a continuing, joint medical research program between the Defense Department and the Veterans' Administration. In determing the feasibility of such a program, the Secretary shall consider all appropriate programmatic, organizational and budgetary issues. Upon completion of this evaluation, the Secretary is requested to make a recommendation regarding establishing such a program. This study and recommendation shall be submitted to the Committees on Armed Services of the Senate and House of Representatives by April 1, 1987.

The conferees agree to abide by the decision of the Secretary of Defense.

The Senate recedes with an amendment.

LEGISLATIVE PROVISIONS NOT ADOPTED

Software Engineering Institute (SEI) and Very High Speed Integrated Circutis (VHSIC)

The Senate bill contained a provision (sec. 202(f)) that would authorize $14.54 million for the SEI and $127.897 for VHSIC programs.

The House amendment contained no similar provision.

The conferees agreed to authorize funds for the SEI and VHSIC with no legislative language.

Standoff land attack missile

The House amendment contained a provision (sec. 204(b)) that would limit funds for the Navy Standoff Land Attack Missile.

The Senate bill contained no similar provision.

The House recedes.

Inter-cooled recuperated cycle (ICRC) gas turbine propulsion system

The House amendment contained a provision (sec. 204(c)) that would deny authorization for the ICRC gas turbine system.

The Senate bill contained no similar provision.

The House recedes.

Synthetic aperture radar (SAR) technology

The House amendment contained a provision (sec. 204(k)) that would authorize $5.0 million for SAR technology efforts. The Senate bill contained no similar provision.

The conferees agreed to authorize $1.0 million for this effort with no legislative language.

Advanced medium range air-to-air missile (AMRAAM)

The House amendment contained a provision (sec. 205(b)) that would require the Secretary of Defense to validate to the Congress the AMRAAM cost certification required by Public Law 99-145.

The Senate bill contained no similar provision.

The House recedes.

Technical on-site inspection

The House amendment contained a provision (sec. 205(e)) that would authorize $9.85 million to the Air Force for technical on-site inspection.

The Senate Bill contained no similar provision.

The conferees agreed to authorize $9.85 million for this project with no legislative language.

Transfer of funds

The House amendment contained a provision (sec. 202) that would authorize $90.0 million to the Director of Central Intelligence for certain specified activities.

The Senate bill contained no similar provision.

The House recedes.

Ballistic missile defensive system

The House amendment contained a provision (sec. 1045) that would provide for a Congressional declaration on the development of an anti-tactical ballistic missle (ATBM) system comparable to the Soviet SA-12.

The Senate bill contained no similar provision.

The conferees agreed to drop the provision given that there were provisions in other sections of the Senate and House bills (sec. 205(b) and sec. 207, respectively) that provided funding and direction for the development of an ATBM system.

TITLE III—OPERATION AND MAINTENANCE AND WORKING CAPITAL FUNDS

OVERVIEW

The Senate bill would authorize $80,707,274,000 for Department of Defense Operations and Maintenance and $1,097,300,000 for Working Capital Fund accounts, a reduction from the President's request of $5,065,726,000 and $100,000,000, respectively.

The House would authorize $81,351,600,000 for Department of Defense Operations and Maintenance and $1,155,800,000 for Working Capital Fund accounts, a reduction from the President's request of $4,421,400,000 and 41,500,000, respectively.

The conferees agreed to authorize $78,597,260,000 for Department of Defense Operation and Maintenance and $908,300,000 for Working Capital Fund accounts, a reduction from the President's request of $7,175,740,000 and $289,000,000 respectively. This level of authorization is $2,299,014,000 below the Senate bill and $3,008,840,000 below the House amendment.

The conferees only agreed to these lower authorization levels for Operation and Maintenance and Working Capital Fund accounts after extensive discussion revealed the virtual inevitability of substantially greater reductions recommended by the House and Senate Appropriations committees. Faced with this prospect, the conferees agreed to authorize a level of funding for the Operation and Maintanence and Working Capital Fund accounts that equalled the higher of the two levels recommended by House and Senate Appropriations committee. In reaching these levels, the conferees increased reductions contained in the Senate bill and House amendment and made additional reductions from among those contained in the House and Senate Defense Appropriations bills. Every effort was made to limit the impact on readiness and quality of life programs. The conferees also agreed to a provision authorizing higher levels of spending for readiness programs in these accounts, if appropriated.

Despite these efforts to protect readiness and quality of life programs, the conferees remain seriously concerned about the potential adverse impact of substantially lower funding levels and reductions to specific programs.

Looking at the situation from a macro point of view, the recommended authorization for Operation and Maintenance accounts essentially represents zero real growth over fiscal year 1986 actual obligations of $76.8 billion. In the case of Working Capital Funds it represents 47.2 percent negative program growth. What must be kept in mind is that the Operation and Maintenance accounts are "level of effort" programs that respond to existing and emerging requirements. Unless force structure is pared back, or new weapon systems deliveries decline—neither of which has happened—the operation and maintenance accounts are being asked to do more with less. What makes this problem even more difficult is that about 80 percent of the operation and maintenance budget is fixed to support existing operations, honor existing contracts, and provide minimum quality of life requirements. The discretionary part of the operation and maintenance budget is largely composed of programs that contribute to readiness and have been strongly supported by Congress, such as training, depot

maintenance, and quality of life improvement programs. Nevertheless, if operation and maintenance funding is not sufficient to maintain existing and emerging requirements, these essential programs will have to be cut back with an adverse impact on readiness, morale, and job satisfaction. Unless quick action is taken to bring operation and maintenance resources in line with mission requirements, the conferees fear that the military services may be on the fast track to "unreadiness" and serious quality of life problems.

The conferees are also concerned about the impact of emerging requirements that have not been adequately addressed in the budget request or during congressional deliberations. For example, the President's request very likely understated military medical care requirements by as much as $500 million. In addition, congressional reductions in the operation and maintenance request associated with fuel savings were based on the assumption that a barrel of crude oil would cost between $13–$14 dollars a barrel in fiscal year 1987. Recent developments raise serious questions about the validity of such projections and could result in a substantial funding shortage. Because medical care costs will have been paid and anticipated stock fund fuel refunds may not be forthcoming, offsetting reductions would have to be made in discretionary areas of the operation and maintenance budget at the expense of readiness and quality of life programs.

Finally, the necessity to achieve such large reductions in the Operation and Maintenance and the Working Capital Fund accounts required the acceptance of virtually all reductions recommended by the House and Senate Armed Services committees. And in cases where such program reductions were reflected in the House and Senate Appropriations bills, the level of reduction was increased beyond that recommended by the Armed Services Committees. In many instances, the conferees believe these reductions to be excessive and fear that they may seriously degrade readiness and military capabilities.

Recognizing the potentially serious problems associated with the recommended funding levels and specific program reductions, the conferees direct that during fiscal year 1987, the Secretary of Defense shall give priority in reprogramming funds that become available through lower than anticipated inflation, contract savings, or other sources into the operation and maintenance accounts to redress the impact on force readiness of the reductions imposed on these accounts during the fiscal year 1987 budget process.

Additional authorization for the Army National Guard

The House amendment included $25 million in additional authorization for increased Federal support for the operation, maintenance, modification, and repair of Army National Guard armories.

The Senate bill contained no similar authorization.

Due to the extraordinary funding constraints on the operation and maintenance accounts, the conferees deleted the $25 million in specific authorization but agreed to a provision that would authorize such additional funds as necessary to support increased Federal support to Army National Guard Armories, If subsequently appropriated by Congress.

The House recedes with amendment.

LEGISLATIVE PROVISIONS

LEGISTLATIVE PROVISIONS ADOPTED

Assistance for the Tenth International Pan American Games (sec. 303)

Section 303 of the Senate bill would authorize $15 million for Department of Defense support of the Tenth International Pan American Games.

The House amendment contained a similar provision (sec. 303).

The Senate recedes.

Transportation of livestock feed (sec. 304)

Section 316 of the House amendment would authorize the Secretary of Defense to use National Guard equipment and personnel to transport livestock feed to drought stricken areas of the United States during 1986.

The Senate bill contained no similar provision.

The Senate recedes.

Authority for payment to NASA (sec. 305)

The Senate bill contained a provision (sec. 1229) that would authorize the use of $556.3 million of funds authorized for the Air Force for payments to NASA for space shuttle launch services.

The House amendment contained a provision (sec. 1050) that would authorize the Secretary of Defense to make payments to NASA for space shuttle services in advance of receipt of such services subject to certain conditions and an overall limitation of $531 million.

The conferees agreed to include a provision that would authorize the Secretary of Defense to make payments to NASA from funds authorized to be appropriated for Operations and Maintenance, Air Force for 1987 subject to certain conditions and an overall limitation of $268.8 million.

The Senate recedes with an amendment.

PROGRAM CHANGES AND PERMANENT LAW CHANGES

LEGISLATIVE PROVISIONS ADOPTED

Management of civilian personnel (secs. 311, 531-533)

The Senate bill contained a provision (sec. 421) that would authorize fiscal year 1987 end strength for the Department of Defense civilian personnel of 1,084,836 and limit funding obligations for civilian personnel at $31,811,640,000.

Section 304(c) of the House amendment would eliminate the requirement for the authorization of civilian personnel appropriations by end strength and section 304(a) would prohibit the Department of Defense from using end strength or any related methodology to manage civilian personnel.

The conferees agreed to extend for one more year the lifting of congressional end strength ceilings, not to impose a limitation on funding obligations for civilian personnel and to continue the prohibition on Department of Defense management of civilian personnel or related methodology through fiscal year 1987.

The conferees directs the Secretary of Defense to report to the Committee on Armed Services of the Senate and House of Representatives by February 1, 1987 on the experiences of the Department of Defense concerning the management of civilian personnel without a congressionally imposed end strength. In submitting this report, the conferees expect the Secretary of Defense to address in detail claimed efficiencies and cost savings achieved through the increased use of part time and temporary civilian employees in a ceiling free management environment.

The conferees also agreed to modify the existing quarterly reporting requirements on the number and dollar obligations associated with Department of Defense civilians to reflect the number of civilians and dollar obligations for each month within the quarter.

The Senate recedes with amendments.

The conferees agreed to reduce the operation and maintenance accounts by $192.8 million with the understanding that such a reduction is not to be associated with civilian end strength but a general productivity target reduction to encourage better management of civilian personnel and other resources within the Department of Defense.

Section 304(b) of the House amendment would exclude from any internal Department of Defense management controls civilian employees who are being paid from non-Government funds.

The Senate bill contained no similar provision.

The Senate recedes.

The House amendment contained a provision (sec. 305) that would amend section 2203 of title 10, United States Code, to require the Secretary of Defense to capture and reflect, in budget justification materials provided to Congress, data regarding the numbers and costs of contract civilian employees in the same fashion as is done for Federal employees.

The Senate bill contained no similar provision.

The Senate recedes.

Procurement of certain bakery and dairy products outside the United States (sec. 312)

The House amendment contained a provision (sec. 306) that would allow the Secretary of Defense to authorize Department of Defense elements outside the United States to procure through other than competitive procedures bakery and dairy products produced by the Army and Air Force Exchange Service in a facility outside the United States.

The Senate bill contained no similar provision.

The Senate recedes.

Functions of military commissaries; purchase of alcoholic beverages by nonappropriated fund instrumentalities (sec. 313)

The House amendment contained a provision (sec. 307) that would specify the categories of merchandise that may be sold in commissaries, would apply the surcharge on sales prices in commissary stores as a uniform percentage of the sales price of all merchandise sold in commissary stores, and would limit the release of commissary sales information. The provision would also provide that alcoholic beverages purchased for resale on a military installation located in the United States shall be purchased from the most competitive source, except that military installations in the contiguous United States would purchase and accept delivery for wine and beer products from a source within the state in which the military installation is located.

The Senate bill contained no similar provision.

The Senate recedes.

Authority for the Secretary of Defense to accept gifts for the Defense Dependents' Education System (sec. 314)

The House amendment contained a provision (sec. 308) that would authorize the Secretary of Defense to accept gifts to be used in connection with the operation or administration of the Department of Defense Dependents Schools.

The Senate bill contained no similar provision

The Senate recedes.

Prohibition of purchase of petroleum products from companies producing oil in Angola (sec. 316)

The House amendment contained a provision (sec. 310) that would prohibit the Secretary of Defense from entering into a contract for the purchase of petroleum products from a company, if the company (1) is engaged in the production of petroleum in Angola, or (2) during the preceding 12-month period has purchased petroleum products, directly or indirectly, from Angola.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would (1) limit the prohibition to petroleum products which originated in Angola from a company engaged in the production of petroleum products in Angola, (2) permit the Secretary to waive the prohibition when he determines that it is in the best interest of the United States, and (3) delete the prohibition as it applies to a company which has purchased Angolan products during the preceding 12-month period.

The conferees agreed that the goal of the prohibition is to prevent the Department of Defense from furnishing financial support to the Marxist Government of Angola. They were concerned, however, that the outright prohibition on the procurement of petroleum products from a company engaged in the production of petroleum in Angola could have a detrimental effect on the readiness of U.S. armed forces, particularly in the Middle East and in parts of Africa. The waiver authority is intended to grant the Secretary the flexibility necessary to procure petroleum products and ensure the readiness of U.S. armed forces.

The conferees intend that the Secretary will exercise the waiver authority on a specific procurement-by-procurement basis. The conferees do not intend to grant a standing authority which would permit the Secretary to grant a waiver without a review of the circumstances of the specific procurement. It is the intent of the Congress that Department of Defense procurement of Angolan petroleum products be eliminated, if possible, or at least reduced to the absolute minimum consistent with the readiness of U.S. armed forces.

Prohibition of contracts for the performance of certain Army ammunition activities (sec. 317)

The Senate bill contained a provision (sec. 305) that would prohibit the use of funds authorized to be appropriated by this Act for continuing or completing any study relating to the conversion to contract of McAlester Army Ammunition Plant, at McAlester, Oklahoma, or Crane Ammunition Activity, at Crane, Indiana until:

(1) detailed reports have been submitted to Congress by the General Accounting Office or Department of Defense concerning the cost effectiveness of such a conversion and its impact on readiness and mobilization base requirements, or

(2) March 31, 1987.

The House amendment contained a provision (sec. 311) that would prohibit the Secretary of Defense and the Secretary of the Army from contracting out functions currently performed by Department of Defense employees at McAlester Ammunition Plant and Crane Ammunition Activity.

The Senate recedes.

National Board for the Promotion of Rifle Practice (sec. 318)

Section 313 of the House amendment would amend section 4308 of title 10, United States Code, to provide the Secretary of the Army with the authority to support national and regional rifle matches sponsored by the National Board for the Promotion of Rifle Practice by providing necessary personnel services and allowances for competitors.

The Senate bill contained no similar provision.

The Senate recedes.

Prohibition on joint use of Gray Army Airfield with civilian aviation (sec. 319)

The House amendment contained a provision (sec. 314) that would prohibit joint use with civilian aviation of Robert Gray Army Airfield at Fort Hood, Texas.

The Senate bill contained no similar provision.

The Senate recedes.

Report on proposed regulations relating to movement of household goods and cargoes (sec. 320)

The House amendment contained a provision (sec. 1040) that would preclude the implementation of certain regulations until such time as the Military Traffic Management Command submits a report discussing the effect of the regulations on cost and quality of service.

The Senate bill contained no similar provision.

The Senate recedes.

LEGISLATIVE PROVISION NOT ADOPTED

Preference for United States agricultural products in commissary food purchases

The House amendment contained a provision (sec. 315) that would require the Secretary of Defense when acquiring food products through the use of competitive procedures for resale in commissary stores located in the United States to give preference to United States companies that use United States agricltural commodities in their products.

The Senate bill contained no similar provision.

The House recedes.

HUMANITARIAN AND OTHER ASSISTANCE

LEGISLATIVE PROVISIONS ADOPTED

Extension of authorization for humanitarian assistance (sec. 331)

The Senate bill contained a provision (sec. 1214) that would extend the authority of the Secretary of Defense to transport humanitarian relief supplies abroad for fiscal year 1987.

The House amendment contained no similar provision.

The House recedes. The conferees note that the reports on applications for shipments under this provision of law do not contain detailed information about the sponsoring organization. The conferees direct the Secretary of State to have available more detailed information on each future applicant, to include the applicant's address, telephone numbers, and principal officers. Future reports should also be filed with the Senate Committee on Foreign Relations and the House Committee on Foreign Affairs as well as with the Committees on Armed Services.

Humanitarian assistance (sec. 332)

Both the House and Senate Bills contained sections on the transportation of humanitarian relief supplies to Afghanistan refugees. The House provisions were contained in section 312. The Senate provisions were reflected in section 304.

The House recedes with amendment.

The conferees recommend that a total of $17.0 million be authorized for appropriation in fiscal year 1987 and that all funds remain available until expended. Of this total, $10.0 million represents new authorization; and $7.0 million represents fiscal year 1986 funding whose availability has been extended.

Of the total available, the conferees agree that $3.0 will be for the purpose of administrative costs for managing the transportation program and for transportation costs outside the United States. The charges for transportation outside the United States may include both acquisition and lease/rent of local transportation assets.

The House bill included a worldwide distribution provision for $3.0 million. The funds were to provide worldwide transportation of excess materials as defined in section 2547(b) of title 10, United States Code. Because the destination of these excess materials was not defined, the House provision was not accepted by the conferees. However, the conferees did agree that they would look favorably upon a Department of Defense reprogramming request, within the total amount authorized, for the refugee problems in the region of the Thailand and Cambodia border subject to the following guidelines:

(a) The Department of Defense shall provide a prediction of unobligated balances within this account as of September 30, 1987.

(b) The maximum amount of funds available for reprogramming for other than Afghanistan refugees is limited to $3.0 million.

(c) The status reports required in the bill language will include unobligated balance estimates and plans for Thailand-Cambodian humanitarian relief.

The reports required by this section are to satisfy conferee concerns about prior-year unobligated balances and efficient obligation of fiscal year 1987 funding amounts.

Humanitarian and civic assistance provided in conjunction with a military operation (sec. 333)

The Senate bill contained a provision (sec. 1215) authorizing the Secretary of Defense to conduct humanitarian and civic assistance in countries where U.S. Armed Forces were conducting authorized military operations, provided (a) prior approval was granted by the Secretary of State, (b) all expenses incurred were paid for with funds appropriated specifically for humanitarian and civic assistance, and (c) that an annual report describing such activities was filed with Congress after the fact.

The House amendment contained no similar provision.

The House recedes with several amendments. The conferees were concerned with potential problems at both the low end and the high end of the civic action scale. On the high end, to avoid the possibility of the legislation being interpreted as a major new foreign aid program, the conferees imposed an expenditure cap of $3 million for fiscal year 1987 and $16.4 million for the period of fiscal years 1987 through 1991. The conferees also tightened the definitions of acceptable activities under this legislation, for example, clarifying that no funds could be spent on airstrips. On the low end of the scale, the conferees were concerned that modest activities could generate burdensome paperwork because of the requirements for prior approval, separate financing, and annual reporting. The conferees, therefore, exempted diminimus activities from this section. The conferees did not put a specific dollar ceiling on the definition of diminimus but wish to make clear they had in mind activities that have been commonplace on foreign exercises for decades. These would include a unit doctor's examination of villagers for a few hours with the administration of several shots and the issuance of some medicines—but would not include the dispatch of a medical team for mass innoculations. Diminimus would also include the opening of an access road through trees and underbrush for severla hundred yards—but would not include the asphalting of any roadway.

TITLE IV—PERSONNEL AUTHORIZATIONS

PART A—ACTIVE FORCES

END STRENGTHS FOR ACTIVE FORCES

Active duty military strengths for the Navy, Marine Corps and Air Force in the Senate bill and the House amendment differed by a total of 4,850. The House recedes to the strengths in the Senate bill and the conference agreement, 6,850 below the Administration's request, is summarized in the following table:

Active forces	Administration request	House	Senate	Conference
Army	780,900	780,800	780,800	780,800
Navy	592,700	583,300	587,000	587,000
Marine Corps	200,300	198,800	199,600	199,600
Air Force	607,200	606,470	606,850	606,850
Total	2,181,100	2,169,370	2,174,250	2,174,250

Extension of control on enlistments into the Army (sec. 402)

The Senate bill contained a provision (section 402) that would extend for another year the requirement that at least 65 percent of male non-prior-service Army recruits be high school graduates. The House

amendment included no similar provision. The House recedes with an amendment making the requirement permanent law.

Strength of active duty officer corps (sec. 403)

The House amendment contained a provision (section 651(d)) that would require officer personnel strengths to be managed to attain a ratio within the armed forces (other than the Coast Guard) of enlisted members to officers of not less than 6.12 to 1 by September 30, 1987, with the goal of achieving a ratio of 6.5 to 1 by September 30, 1990.

The Senate bill included a provision (section 403) that would reduce the size of the total commissioned officer corps in the Department of Defense by 2 percent per year for each of the next three fiscal years from the fiscal year 1986 active commissioned officer end strength. This total reduction would be allocated among the military services by the Secretary of Defense based on his assessment of the relative priorities of the military services. In addition, the Senate bill included a provision that would require annual authorization of the size of the active commissioned officer corps in each of the military services beginning in fiscal year 1988.

The conferees are concerned about the overall size of the officer corps in each of the military services and about the disproportionate growth in the officer corps in the last five years. The House recedes with an amendment providing for a reduction of 6 percent in the size of the total active commissioned officer corps (including commissioned warrant officers) in the Department of Defense by the end of fiscal year 1989 from the fiscal year 1986 active commissioned officer end strength. In order to enable the military services prudently to plan and execute these reductions, the provision calls for a 1 percent reduction by the end of fiscal year 1987, an additional 2 percent reduction by the end of fiscal year 1988, and the final 3 percent reduction by the end of fiscal year 1989. The total reduction is to be allocated among the military services by the Secretary of Defense based on his assessment of the relative priorities of the military services. The provision requires the Secretary of Defense to report to the Congress no later than February 1, 1987, on the allocation and impact of the reductions in commissioned officer strength among the military services for fiscal years 1987 and 1988, and no later than February 1, 1988, on the allocation and impact of the reductions for fiscal year 1989.

Representatives of the military services have expressed concern that they might not be able to execute a 2 percent reduction in the active commissioned officer corps in fiscal year 1987 under existing officer personnel management statutes. The conferees, however, believe that existing laws—including, for example, sections 632 and 638 of title 10, United States Code—are adequate to enable prudent execution of any portion of the 1 percent reduction in fiscal year 1987 that might not be achieved by other means.

The conferees intend to review the implementation of these reductions in the size of active commissioned officer corps during the fiscal year 1988 Defense authorization process. This review will also consider whether Congress should establish an annual authorization for the end strength of the active commissioned officer corps. To assist in this review, the conferees direct the Secretary of Defense to submit to the Committees on Armed Services of the Senate and House of Representatives by February 1, 1987 a report identifying any temporary or permanent changes in current officer personnel management law he deems necessary to carry out the full 6 percent reduction in the size of the active commissioned officer corps by the end of fiscal year 1989.

PART B—RESERVE FORCES

RESERVE FORCES END STRENGTH

End strengths for selected reserve (sec. 411)

The Senate bill froze the average strengths of the selected reserve components at the fiscal year 1986 authorized levels. The House amendment reduced the Administration's minimum end strength request by 10,845—a 61,759 increase over the fiscal year 1986 levels.

The conference agreement, which establishes selected reserve end strengths with a two percent management flexibility, is summarized in the following table:

Reserve forces	Administration request (minimum end strength)	House (minimum end strength)	Senate (average strength)	Conference (end strength)
Army National Guard	462,800	456,596	440,025	452,681
Army Reserve	327,600	326,600	290,639	318,011
Naval Reserve	155,700	152,994	134,212	149,486
Marine Corps Reserve	44,400	43,663	41,900	43,470
Air National Guard	115,200	115,013	108,700	113,767
Air Force Reserve	80,500	80,489	75,600	79,562
Coast Guard Reserve	13,000	13,000	12,500	12,850
Total	1,192,200	1,188,355	1,103,576	1,169,827

The House amendment also contained a provision (sec. 403) that would prescribe drill strength levels for the reserve components as of the end of a fiscal year (end strengths) and allow the Secretary of Defense to increase the total end strength by 2 percent on a determination that such action is in the national interest.

The House recedes with an amendment prescribing drill strength levels as end strengths, giving the Secretary of Defense flexibility to vary the total strength by up to 2 percent.

End strength for reserves on active duty in support of the reserve components (sec. 412(a))

The Senate bill froze full-time manning for the reserve components at the fiscal year 1986 authorized levels, reducing the Administration's request for full-time support by 12,112. The House amendment reduced the Administration's request for full-time strength levels by a total of 5,946.

The conference agreement is summarized in the following table:

Full-time support	Administration request	House	Senate	Conference
Army National Guard	28,721	25,731	23,731	24,731
Army Reserve	13,657	12,657	12,157	12,407
Naval Reserve	23,197	21,476	19,010	21,476
Marine Corps Reserve	1,782	1,745	1,475	1,745
Air National Guard	8,356	8,169	7,269	8,169
Air Force Reserve	676	665	635	665
Total	76,389	70,443	64,277	69,193

Counting of personnel in certain reserves call-up situations (sec. 412(b))

The Senate bill contained a provision (section 412(b)) that would exclude certain personnel from the number of reserves counted as ordered to active duty under section 673 or section 673b of title 10, United States Code. Excluded would be members of reserve components who perform duties in connection with call-ups under those sections but who would be on active duty in support of the reserve components in any event.

The House amendment included no similar provision.

The House recedes with an amendment making clear that members on active duty in support of the reserve components may perform duties in connection with call-ups.

Accounting for certain authorized reserve component members (sec. 413)

The Senate bill contained a provision (sec. 413) that would revise the manner in which reserve strength levels are prescribed to improve accounting and to accommodate reserve component training requirements. The provision would: (1) clarify that levels of military personnel on full-time duty in support of the reserve components must be authorized by law; (2) clarify that the authority of the Secretary of Defense to increase the authorized end strengths by up to 0.5 percent applies only to the active forces; (3) provide to the Secretary of Defense authority to increase the end strength for reserves on active duty or full-time National Guard duty in support of the reserve components by up to 2 percent; (4) exclude members of reserve components on active duty for training and members on full-time National Guard duty for 180 days or less from the active duty and full-time support personnel strengths; and (5) require additional information to be included in the annual manpower requirements report to permit Congressional review of the incidence of long-term training for members of the reserve components. The Senate bill also contained a provision (sec. 411) that would prescribe drill strength levels for the reserve components on the basis of man-years (average strengths).

TITLE V—DEFENSE PERSONNEL POLICY

PART A—ACTIVE FORCES

LEGISLATIVE PROVISIONS ADOPTED

Assignment of active-duty members outside the United States (sec. 501)

The House amendment contained a provision (sec. 501) that would modify the requirement that a recruit have 12 weeks of basic training or its equivalent before being posted overseas. The House provision would simply require basic training or its equivalent.

The Senate bill included a similar provision (sec. 501) but would retain the 12-week aspect of current law for times of war or national emergency.

The House recedes with a technical amendment.

Service of members on state and local juries (sec. 502)

The House amendment contained a provision (sec. 503) that would authorize the Secretary concerned to exempt active military personnel from state jury duty.

The Senate bill included no similar provision.

The Senate recedes.

Extension of expiring authority for spot promotions of Navy lieutenants (sec. 503)

The Senate bill contained a provision (sec. 503) that would extend for two years the authority to promote certain Navy lieutenants to lieutenant commander outside the normal promotion process.

The House amendment included a similar provision (sec. 504) but would extend the

authority for only one year on the reasoning that spot promotion may not be an appropriate long-term solution to a shortage of field grade engineering officers.

The Senate recedes.

Repeal of requirements regarding enlistment of women in the Air Force during fiscal year 1987 (sec. 504)

The House amendment contained a provision (sec. 505) that would remove the 19 percent statutory female enlisted accession goal for the Air Force for fiscal year 1987.

The Senate bill contained no similar provision.

The Senate recedes.

Authority to exempt physicians at Uniformed Services University of the Health Sciences from reductions in retired pay (sec. 505)

The House amendment contained a provision (sec. 506) that would exempt from the dual compensation restrictions of section 5532 of title 5, United States Code, retired military physicians who are members of the faculty of the Uniformed Services University of the Health Sciences.

The Senate bill contained no similar provision.

The Senate recedes with an amendment limiting the number of physicans who may be exempted under the authority provided by this section to no more than two at any one time.

Treatment of excess leave upon reenlistment (sec. 506)

The Senate bill contained a provision (sec. 502) that would permit a member who has taken leave in excess of that authorized and who is being discharged or released from active duty for the purpose of immediate reenlistment or commissioning to count the negative leave against leave that will accrue on the new term of service.

The House bill contained no similar provision.

The House recedes.

Termination of gender-based distinctions in promotions of officers of the Naval Reserve and Marine Corps Reserve (sec. 507)

The Senate bill contained a provision (sec. 508) that would remove end sex-based distinctions in the promotion process by eliminating a requirement that women compete separately from their male contemporaries in the promotion process and allowing both men and women in the reserve components of the naval services to compete for promotion through the grades of rear admiral and major general without restriction.

The House amendment included no similar provision.

The House recedes.

Senate confirmation of certain flag and general officer positions (sec. 508)

The Senate bill contained a provision (sec. 509) that would require Presidential appointment, by and with the advice and consent of the Senate, for a small number of miltary positions currently authorized in law to entitle their incumbents to specified flag or general officer grades.

The House amendment included no similar provision.

The House recedes with a technical amendment.

Position of staff judge advocate to the commandant of the Marine Corps (sec. 509)

The Senate bill contained a provision (sec. 510) that would establish in statute the position of staff judge advocate to the Commandant of the Marine Corps, to be filled by Presidential appointment by and with the advice and consent of the Senate.

The House amendment included no similar provision.

The House recedes with a technical amendment. The conferees note their belief that the exception of this particular position from the general rule governing retired grade is entirely consistent with both the language and the intent of section 1370 of title 10, United States Code.

Technical correction relating to personnel administration at Air Force Institute of Technology (sec. 510)

The Senate bill contained a provision (sec. 507) that would make a technical change to the statute concerning the classification and pay of civilian employees of the Air Force Institute of Technology.

The House amendment contained no similar provision.

The House recedes.

Temporary increase in the number of general and flag officers authorized to be on active duty in three and four-star grades (sec. 511)

The Senate bill included a provision (sec. 511) that would extend through fiscal year 1987 temporary authorities for the military services to have on active duty a greater number of three-star and four-star flag and general officers than would be permitted under existing statutory formulas. Specifically, the Army could have an additional lieutenant general to serve as the Director of the Department of Defense Task Force on Drug Enforcement; the Marine Corps could have an additional lieutenant general, plus an additional general to serve as the Commander-in-Chief of the United States Central Command; the Air Force could have an additional general to serve as the Director of the Strategic Defense Initiative Organization; and the Navy could have three additional vice admirals.

The House amendment included no similar provision.

The House recedes with an amendment deleting the authority for an additional Army lieutenant general and deleting the provisions in the Senate bill restricting the authorities for additional Air Force and Marine Corps generals to particular positions.

Extension of mandatory retirement age for medical officers (sec. 512)

The House amendment contained a provision (sec. 508) that would extend the mandatory retirement age of active duty medical officers from 62 to 67.

The Senate bill contained no similar provision.

The Senate recedes with an amendment requiring the Secretary of Defense to report not later than March 1, 1987, on initiatives designed to improve the staffing of critical wartime medical specialities (including physician, nurse and enlisted specialties) in the active and reserve components. Among other initiatives, the report should address the desirability of extending the mandatory retirement age of active and reserve medical personnel, extending the age limitations on enlistments and on officer accessions into the active and reserve components, improving Department of Defense marketing techniques for attracting critical medical personnel into the active and reserve components and relaxing participation requirements for medical personnel in the reserve components.

Study of representation of religious faiths in the armed forces (sec. 513)

The House amendment contained a provision (sec. 507) finding that the Department of Defense has taken insufficient steps to alleviate an imbalance in the proportion of chaplains serving from the various faiths and calling for a study of ways to bring the distribution of chaplains more in line with the distribution of faiths among members of the Armed Forces.

The Senate bill contained no similar provision.

The Senate conferees objected to the finding in the House provision but agreed to a study of the faith balance issue. The Senate, therefore, recedes with an amendment deleting any congressional findings and calling for a study to determine whether a faith balance problem exists within the Corps of Chaplains of the Armed Forces.

LEGISLATIVE PROVISIONS NOT ADOPTED

Wearing of religious apparel by members of the Armed Forces while in uniform.

The House amendment contained a provision (sec. 502) permitting members of the Armed Forces to wear religious apparel so long as it was "neat and conservative" and did not interfere with the performance of the member's duties.

The Senate bil contained no similar provision.

The House recedes.

PART B—RESERVE FORCES

LEGISLATIVE PROVISIONS ADOPTED

Increased Presidential authority to augment active forces with the Selected Reserve (sec. 521)

The Senate bill contained a provision (sec. 505) that would: 1) increase from 100,000 to 250,000 the number of Selected Reservists the President may order to active duty involuntarily pursuant to section 673b of title 10, United States Code, and 2) permit the President to extend the current 90 day period outlined in section 673b and to require that he notify the Congress immediately of any decision to extend the 90 day period.

The House amendment contained a similar provision (sec. 511) that would increase the number of Selected Reservists the President may order to active duty involuntarily to 200,000.

The Senate recedes with amendments that would: 1) authorize the President to extend the current 90 day limit for an additional 90 days provided that he immediately notify the Congress of his decision to extend the period and provide the Congress with a rationale for his decision; and 2) make various technical changes to the existing statute.

The conferees emphasize that this provision does not affect the President's responsibilities under the War Powers Resolution or Congress' ability to terminate the status of all personnel on active duty under section 673b.

Active duty of national guard (sec. 522)

The House amendment contained a provision (sec. 513) that would limit the statutory power of a governor of a state to withhold his consent to active duty training of his national guard as part of a reserve component of the armed forces on the basis of the loaction, purpose, type, or schedule of the active duty training.

The Senate bill included no similar provision.

The Senate recedes with a technical amendment placing the provision in title 10, United States Code (relating to Armed Forces). The conferees reiterate that under this provision, the governor still will have the authority to block the training if he or she thinks the guardsmen are needed at home for local emergencies. The conferees intend that nothing about the words "location, purpose, type, and schedule" should constrain a governor in according appropriate priority to a state or local emergency, such as a flood or other natural disaster.

Treatment of single parents enlisting in reserve components of the armed forces (sec. 523)

The House amendment contained a provision (sec. 514) that would prohibit the service Secretaries from disqualifying a person applying to enlist in a reserve component upon discharge or release from active duty because the person is a single parent if the person became a single parent while serving on active duty. The House amendment also authorized the Secretary concerned to require such a person to execute a written agreement with respect to child care.

The Senate bill contained no similar provision.

The Senate recedes with amendments that would: 1) require that the single parent be otherwise eligible for enlistment; 2) stipulate that the single parent status must not have been a factor in the person's discharge or release from active duty; 3) authorize the Service Secretaries to require an acceptable child care agreement as a prerequisite to enlistment; and 4) provide the authority for fiscal years 1987 and 1988 only.

The conferees intend to ensure that members who were successful single parents while on active duty are not held to a higher standard by the reserve components. The conferees intend to revisit this issue in two years in order to review the impact of the provision.

Active duty status of reserve component members in a captive status (sec. 524)

The Senate bill contained a provision (sec. 506) that would permit the involuntary order to active duty of a member of a reserve component who, as a result of his status as a member of the armed forces, is taken captive in a hostile action directed at the United States.

The House amendment included no similar provision.

The House recedes with a technical amendment.

CIVILIAN PERSONNEL

LEGISLATIVE PROVISIONS ADOPTED

Eligibility for appointment as Secretary of a military department (sec. 534)

The House amendment contained provisions (Division D) that would provide for reorganization of the Department of Defense. The Senate bill contained no similar provisions.

The House recedes with an amendment. The provisions of Division D have been overtaken by the enactment of the Goldwater-Nichols Department of Defense Reorganization Act of 1986, (Public Law 99-433) and are therefore unnecessary. However, the conferees agreed that Act required an excessive time period (ten years) following an individual's military service before that individual could be eligible for appointment as a service secretary. The House amendment reduces that ten-year period to five years.

TITLE VI—COMPENSATION AND OTHER PERSONNEL BENEFITS

PART A—PAY AND ALLOWANCES

LEGISLATIVE PROVISIONS ADOPTED

Military pay raise for fiscal year 1987 (sec. 601)

The Senate bill contained a provision (sec. 601) that would increase the rate of basic pay, basic allowance for quarters, and basic allowance for subsistence for members of the uniformed services by four percent effective on October 1, 1986. This provision also included a four percent increase in monthly cadet and midshipman pay.

The House amendment contained no legislative provision authorizing a pay raise but recommended sufficient budget authority to ensure funding for a three percent pay raise effective on January 1, 1987.

The House recedes with an amendment providing a three percent pay raise for all members of the uniformed services, (including cadets and midshipmen) effective on January 1, 1987.

Authority to pay ROTC members in advance for field training (sec. 602)

The Senate bill contained a provision (sec. 603) that would authorize the service Secretaries to pay in advance up to one month's pay to ROTC participants who are ordered to participate in field training or a practice cruise.

The House amendment contained a similar provision (sec. 602).

The Senate recedes.

Reimbursement for accommodations in place of quarters (sec. 603)

The Senate bill contained a provision (sec. 602) that would extend through fiscal year 1991 the existing authority to pay basic allowance for quarters to members for housing expenses incurred when shipboard quarters are uninhabitable during overhaul and government quarters are unavailable. Reimbursement under this authority would not exceed $1,657,000 per year through fiscal year 1991.

The House amendment contained no similar provision.

The House recedes.

Pay, allowances, and benefits for members of Reserve components (sec. 604)

The House amendment contained a provision (sec. 512) that would restructure compensation payable to a member of the reserve component incapacitated in the line of duty.

In addition, section 512 would consolidate the legislative authority for medical care, incapacitation pay, disability retirement, and death benefits dispersed throughout title 10, 32, and 37, United States Code, and would repeal outdated or duplicative sections of law.

The Senate amendment contained a similar provision (sec. 636).

The Senate recedes.

LEGISLATIVE PROVISIONS NOT ADOPTED

Report on variable housing allowance recapture provision.

The House amendment contained a provision (sec. 603) that would require the Secretary of Defense to report to the Committees on Armed Services of the Senate and House of Representatives on the operation of the variable housing allowance program under the recapture provision enacted in section 602(c)(2) of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 636).

The Senate bill included no similar provision.

The House recedes. The conferees agree that a statutory report requirement is unnecessary. The conferees fully expect that the military services and the Department of Defense will want to inform the Committees on Armed Services concerning their experiences with the recapture provision, especially if the developing evidence suggests that the provision should be repealed.

Termination of pay inequity between officers and enlisted personnel in certain health professions training

The Senate bill contained a provision (sec. 604) that would prescribe the rate of pay for pay grade 0-1 for all students attending the Uniformed Services University of the Health Sciences (USUHS) and for all students enrolled in the Armed Forces Health Professions Scholarship (AFHPS) program when they are serving on active duty.

The House amendment contained no similar provision

The Senate recedes.

The conferees believe that students participating in the USUHS and AFHPS programs who have more than four years of prior enlisted service should continue to be paid at the 0-1E rate and note that Congress created the enhanced company grade rates to eliminate pay disincentives to enlisted personnel pursuing officer status. The conferees, emphasize, however, that if officials at the Uniformed Services University of the Health Services continue to assert that the 1-1E pay rate creates an inequity, the conferees would intend to resolve the matter in accord with the approach taken in the Senate provision.

PART B—TRAVEL AND TRANSPORTATION

LEGISLATIVE PROVISIONS ADOPTED

Transportation of motor vehicles for members making permanent changes of station (sec. 611)

The House amendment contained a provision (sec. 611) that would revise existing statutory authority for the shipment of privately owned vehicles (POVs) at government expense by (1) eliminating the requirement that the major portion of a POV shipment be by ship; (2) eliminating the requirement that surface transportation be between customary ports of embarkation and debarkation; and (3) defining "change of permanent station," for purposes of POV moves, as moves to and from areas outside the continental United States, and moves attending homeport changes.

The Senate bill contained provisions (sec. 612 and sec. 613) that would authorize the overland shipment of POVs (1) for COHORT overseas moves, (2) in adverse conditions, and (3) from ports in northern Europe to one or more inland processing points in southern Germany.

The Senate recedes with a technical amendment preserving the existing authority for overland transportation of POVs in certain circumstances within the continental United States.

Coordination of permanent change of station moves with school year (sec. 612)

The House amendment contained a provision (sec. 617) that would require the service Secretaries to establish procedures to ensure that, to the maximum extent practicable, permanent change of station (PCS) moves of members with dependents in elementary or secondary schools occur between normal school years.

The Senate bill contained no similar provision.

The Senate recedes with an amendment requiring that coordination of PCS moves of appropriate members occur at times designed to avoid disruption of school schedules to the maximum extent practicable within operational and other military requirements.

Authorization limit on funds for PCS travel (sec. 613)

The Senate bill contained a provision (sec. 617) that would limit the amount authorized to be appropriated for fiscal year 1987 to not more than $2,657,553,000 for permanent change of station (PCS) travel.

The House amendment contained a similar provision (sec. 651(a)) that would limit the total amount expended during fiscal year 1987 for PCS moves to $2,533,760,000.

The Senate recedes with an amendment limiting the amount authorized to be appropriated for fiscal year 1987 for PCS travel to not more than $2,533,760,000.

Reimbursement or actual lodging expenses plus per diem for members entitled to travel allowances (sec. 614)

The Senate bill contained a provision (sec. 615) that would convert the military system of reimbursement for expenses incident to temporary duty to the "lodgings plus" system established for Federal civilian employees in Public Law 99-234. The conversion would only be effective in fiscal years for which the Secretary of Defense were to certify that lodgings plus would cost no more than the existing system.

The House amendment contained a similar provision (sec. 612).

The House recedes with a technical amendment resolving drafting differences between the two provisions.

Transportation and travel allowances for escorts for certain dependents (sec. 615)

The House amendment contained an amendment (sec. 615) that would authorize the service Secretaries to provide space-required travel on military aircraft or to pay transportation and travel allowances to a member who can not reasonably bring an underage or incapacitated dependent to a new duty location when that member first reports to a new duty location.

The Senate bill contained no similar provision.

The Senate recedes.

Travel expenses for overseas dependents requiring medical care in certain circumstances (sec. 616)

The Senate bill contained a provision (sec. 616) that would authorize government reimbursement for travel expenses of dependents accompanying members stationed outside the continental United States who require medical care not available at the duty location and who travel to another location for such medical treatment.

The House amendment contained no similar provision.

The House recedes.

Per diem for dependents receiving transportation allowance (sec. 617)

The House amendment contained a provision (sec. 613) that would authorize the payment of per diem to military dependents who must change their permanent duty station due to reasons of separation or retirement of the member or because of unusual or emergency circumstances like the evacuation of dependents, death of the service member, early return of dependents for personal reasons and the cancellation of military orders while dependents are enroute to the new duty station.

The Senate bill contained no similar provision.

The Senate recedes.

Modification of family separation allowance (sec. 618)

The House amendment contained a provision (sec. 614) that would prohibit the payment of family separation allowance type II to members who elect unaccompanied overseas tours in accompanied tour areas. In addition, section 614 would grandfather those members receiving family separation allowance on September 30, 1986 for the remainder of their unaccompanied overseas tours.

The Senate bill contained no similar provision.

The Senate recedes.

Improved dislocation allowance (sec. 619)

The Senate bill contain a provision (sec. 611) that would authorize the payment of a dislocation allowance under the following six new circumstances:

(1) when the member's dependents actually move pursuant to section 406(e) of title 37, United States Code, under unusual or emergency circumstances and no permanent change of station (PCS) orders providing authority for such movement have been issued; (2) when the member's dependents actually move, pursuant to section 406(h) of title 37, when the secretary concerned determines it is in the best interests of the member or the dependents and the United States; (3) when the member's dependents actually move after the member is reported dead, injured, ill, or absent in a missing status for more than 29 days; (4) when the member's dependents, or (5) a member without dependents, actually begin some travel pursuant to PCS orders before the order's effective date and the orders are then cancelled, modified or revoked requiring the dependents, or the member without dependents, to return to the original duty station or to another duty station; and (6) when a member performs consecutive overseas tours at the same location but one of these tours is with dependents and one of the tours is without dependents.

The House amendment contained no similar provision.

The House recedes.

Transportation and storage of household goods (sec. 620)

The Senate bill contained a provision (sec. 614) that would authorize the services Secretaries to pay the cost of members' excess household goods storage and to recoup these payments from the members involved. Section 614 also would permit the immediate return shipment from overseas of household goods and a motor vehicle that had been shipped in advance of dependents when unexpected and uncontrollable circumstances (e.g., sickness) prevent the dependents from actually moving overseas.

The House amendment contained no similar provision.

The House recedes with amendments that would: 1) permit the service member to pay or arrange for disposition of the excess household goods if he so chooses; and 2) make a technical change.

LEGISLATIVE PROVISIONS NOT ADOPTED

Foreign currency exchange for movement of household goods

The House amendment contained a provision (sec. 1039) that would require the reinstitution of the foreign currency rate adjustment program of the Army's Military Traffic Management Command effective April 1, 1987 if the Comptroller General certified to Congress no later than September 30, 1986 that cost savings to the government could reasonably be expected by the reinstitution of the program.

The Senate bill contained no similar provision.

The House recedes.

The conferees note that the Comptroller General certified on September 30, 1986 that cost savings to the government could not reasonably be expected by the reinstitution of the foreign currency rate adjustment program.

PART C—BONUSES AND SPECIAL AND INCENTIVE PAYS

LEGISLATIVE PROVISIONS ADOPTED

Enhanced aviation officer continuation pay (sec. 631)

The Senate bill contained a provision (sec. 621) that would permit certain aviators to enter 6-year retention agreements in exchange for the highest level of aviation officer continuation pay as late as their eighth year of aviation service and would terminate the existing limitation on aviation career incentive pay for officers receiving aviation officer continuation pay.

The House amendment included a provision (sec. 601) that would terminate the existing restriction against hazardous duty incentive pay for officers receiving aviation officer continuation pay.

The Senate recedes with an amendment adding to the House provision the Senate provision lengthening the period during which 6-year retention agreements may be entered into.

Aviation career incentive pay is career-directed; aviation officer continuation pay is continuaton period-directed. The statutory coordination of the two recognizes that aviation officer continuation periods constitute segments of aviation officer careers. It seeks to optimize the relationship between the cumulative costs and benefits of the two compensations. The conferees are well aware that the existing statutory limitation on aviation career incentive pay for officers serving under retention bonus agreements has the effect of making the real value of the bonus something less than its "face" value. The conferees are confident, however, that military aviators are able to take that effect into account evaluating the bonus. The conferees, therefore, reject the suggestion that the limitation on aviation career incentive pay is a surreptitious taking with one hand what is offered with the other.

Inclusion of aviation cadets under aviation career incentive pay (sec. 632)

The Senate bill contained a provision (sec. 622) that would include aviation cadets in the definition of officer for all purposes related to aviation career incentive pay.

The House amendment included no similar provision.

The House recedes.

Special authority relating to the payment of Selected Reserve enlistment bonus (sec. 633)

The Senate bill contained a provision (sec. 623) that would authorize the payment of a selected reserve enlistment bonus for an enlistment during the period of October 1, 1985, through November 8, 1985. The House amendment contained no similar provision.

The House recedes.

The conferees note that there was no statutory authority to pay a selective reserve

enlistment bonus to persons entering the reserve components between October 1, 1985, and November 8, 1985, because of the delay in final Congressional approval of the conference report accompanying the Department of Defense Authorization Act, 1986.

Despite advance Department of Defense notification to all the reserve components that no authority existed for payment of these bonuses after September 30, 1985, pending enactment of new legislation, the Army National Guard did not comply with Department of Defense instructions. As a result, some individuals were led to believe that they would receive an enlistment bonus, notwithstanding the lack of legislative authority to pay such bonuses. The conferess have agreed to the Senate provision in order to keep faith with the individuals involved. The conferees are very distressed that corrective action is required in this case and want to make clear that they do not expect to this situation to occur again.

Special pay for members proficient in foreign languages (sec. 634)

The Senate bill contained a provision (sec. 624) that would authorize a new special pay for foreign language proficiency. This stipend, not to exceed $100 a month, would be paid to members certified as being proficient or receiving training in a foreign language identified by the Secretary of Defense as necessary for national defense. The Senate provision would limit the total obligational authority for this special pay to no more than $7,300,000 during fiscal year 1987.

The House amendment contained no similar provision.

The House recedes with an amendment limiting obligational authority for the program to $9,000,000 in fiscal year 1988.

The conferees intend that this program be designed to—

(1) pay a stipend to those members who develop a proficiency in critical foreign language communication skills that test at or above a utility level established by the Department of Defense; and

(2) encourage the development of critical foreign language skills by judiciously limiting the specialty pay to members who obtain reading, speaking, and listening skills as a second language.

In addition, the conferees plan to review the critical foreign language program next year and, if warranted, institute a graduated pay scale to encourage members to further increase their foreign language proficiency.

LEGISLATIVE PROVISIONS NOT ADOPTED

Special pay for board certified psychologists

The Senate bill contained a provision (sec. 625) that would authorize special pay for psychologists who have been awarded a diploma as a Diplomat in Psychology by the American Board of Professional Psychology. The special pay would range from $2,000 per year for officers with less than ten years of service to $5,000 per year for officers with 18 or more years of service.

The House amendment contained no similar provision.

The Senate recedes.

The conferees note their displeasure with the continued failure of the Department of Defense to expand the use of non-physician providers. The conferees believe that non-physician providers like psychologists are a cost-effective way to significantly extend the capability of the Department of Defense to provide care to its beneficiary population. The conferees serve notice that, if the Department of Defense does not implement a plan for expanded use of non-physician providers, they intend to mandate such an expansion in the future.

Although the conferees are very sympathetic to the intent of the Senate special pay provision and believe that tying such special pay to a board certification requirement is an innovative way to encourage non-physician providers to enhance their professional credentials, they believe that the issue requires further study and have, therefore, deferred acceptance of the Senate provision.

PART D—BENEFITS FOR SURVIVORS AND FORMER SPOUSES

LEGISLATIVE PROVISIONS ADOPTED

Court-ordered survivor annuities for former spouses (sec. 641)

The House amendment contained a provision (sec. 631) that would provide state courts with the option of ordering military service members to participate in the Survivor Benefit Plan and to designate a former spouse as beneficiary as part of a divorce agreement.

The Senate bill contained no similar provision.

The Senate recedes.

Miscellaneous survivor benefit and former spouse amendments (sec. 642-644)

The House amendment contained a provision (sec. 632) that would: 1) authorize the payment of survivor benefits to the surviving dependent children of a retirement-eligible active duty member who dies if no surviving spouse exists or if the surviving spouse subsequent dies; 2) provide 55 percent of retired pay for life to eligible incapacitated dependent children; 3) lower from 60 to 55 the age as which a surviving spouse may remarry without losing the entitlement to survivor benefits; and (4) revise the statutory definition of disposable military retired pay for purposes of court orders addressing military retired pay as divisible marital property or for awarding alimony or child support that could be collected directly from military retired pay.

The Senate bill contained no similar provision.

The Senate recedes with an amendment making the effective date of the incapacitated dependent children provision March 1, 1986.

Revision of open period to elect former spouse and child coverage (sec. 645)

The House amendment contained a provision (sec. 633) that would authorize members who elected former spouse coverage under the Survivor Benefit Plan during the period November 8, 1985 through February 28, 1986 to convert to former spouse—child coverage within one year of the date of enactment.

The Senate bill contained no similar provision.

The Senate recedes.

Extension of medical benefits for certain former spouses (sec. 646)

The House amendment contained a provision (sec. 634) that would provide care in the military medical care system followed by the right to convert to a private health insurance plan to certain long-term former spouses whose divorces were finalized after April 1, 1985 until the end of the two-year period following the final decree of divorce or April 1, 1988, whichever is later. Section 634 would also require the Secretary of Defense to report on the development of a medical conversion plan and any legislative authority that may be required to ensure its prompt implementation.

The Senate bill contained no similar provision.

The Senate recedes.

LEGISLATIVE PROVISIONS NOT ADOPTED

Improved death gratuity

Currently, the death gratuity is equal to six months of basic pay with a minimum payment of $800 and a maximum payment of $3000.

The Senate bill contained a provision (sec. 631) that would change the death gratuity computation to three months of basic pay, basic allowance for subsistence, and basic allowance for quarters with a minimum payment of $3,000 and a maximum payment of $9,000.

The House amendment contained no similar provision.

The Senate recedes.

The conferees note that, although the death gratuity was established in 1908, the military estate program has been expanded to include social security benefits, dependency and indemnity compensation, and Serviceman's Group Life Insurance (SGLI). The maximum SGLI payment was recently increased to $50,000.

PART E—MISCELLANEOUS BENEFITS

LEGISLATIVE PROVISIONS ADOPTED

Tuition assistance for Army reserve components officers (sec. 651)

The House amendment contained a provision (sec. 641) that would authorize the use of the tuition assistance program by reserve components officers in order to complete baccalaureate degree requirements. The House provision would limit eligibility to members of the Army reserve components for undergraduate courses only and would limit funding in fiscal year 1987 to $4.2 million.

The Senate bill contained no similar provision.

The Senate recedes with an amendment limiting the authority for this program to fiscal year 1987 only and restricting funding to $3 million. As outlined in the report of the House Committee on Armed Services (H. Rept. 99-718), the conferees intend that this program be used only by individuals unable to use the reserve G.I. Bill, i.e. those able to attend class at a less than half-time rate.

The conferees direct the Secretary of Defense to submit to the Committees on Armed Services of the Senate and House of Representatives a report outlining current policy with respect to the educational requirements for both initial commissioning and promotion of officers in the reserve components. The conferees intend to review the policy to determine whether to provide authority for use of the tuition assistance program by reserve component officers in the future.

Benefits for dependents of certain sentenced, discharged or dismissed members (sec. 652)

The Senate bill contained a provision (sec. 633(a)) that would authorize the service Secretary to provide travel and transportation allowances as well as the movement of household goods for a military member with dependents who is discharged from the service for other than honorable conditions. Additionally, section 633(b) would authorize abused dependents of military members who were discharged from the service because of child or spouse abuse to receive

medical care that may be required as a result of the abuse for up to one year following the member's discharge.

The House amendment contained a similar provision on transportation (sec. 616). With regard to medical care, the House amendment contained a provision (sec. 1033) that would require a report on the desirability of establishing a program to provide one year of medical care to the dependents of military members who are discharged or who leave the service voluntarily, who abused their dependents while in the service and whose dependents require medical care as a result of the abuse.

The House recedes with an amendment substituting the House language on transportation for the Senate language on transportation.

Improved employment opportunities for military spouses (sec. 653)

The Senate bill contained a provision (sec. 634) that would lower from GS-8 and above to GS-5 and above the level at which a military spouse would be given hiring preference for Department of Defense jobs if the spouse is among those determined to be best qualified for the position and if the position is located in the same geographic area as the permanent duty station of the member.

The House amendment contained no similar provision.

The House recedes.

Retirement credit for certain National Guard technicians (sec. 654)

The Senate bill contained a provision (sec. 635) that would provide Federal retirement credit for National Guard civilian technicians who served as technicians prior to January 1, 1969, regardless of whether they were serving in a technician position on or after January 1, 1969.

The House amendment contained no similar provision.

The House recedes with an amendment prohibiting the provision of retirement credit for service prior to January 1, 1969 to former National Guard technicians who have already retired from Federal service.

Meal reimbursement for nonprofit youth groups residing at military installations (sec. 655)

Section 1038 of the House amendment would authorize meal reimbursement for nonprofit youth groups when residing at a military installation pursuant to an agreement in effect on June 30, 1986.

The Senate bill contained no similar provision.

The Senate recedes.

Authorization for members of the Selected Reserve to have limited use of commissary services (sec. 655).

The Senate bill contained a provision (sec. 637) that would authorize members of Selected Reserve components to use military commissary stores for a number of days each year equal to the number of days a member is on active duty.

The House amendment contained no similar provision.

The House recedes.

ADMINISTRATION OF PERSONNAL BENFITS

LEGISLATIVE PROVISIONS ADOPTED

Enhanced method of determining true costs of military retirements (sec. 661)

The Senate bill contained a provision (sec. 642) that would direct the Secretary of Defense to compute the contribution required to be made into the Military Retirement Fund based on two amounts—one for the active components and one for the reserve components. Current law requires contributions to be calculated as a single amount based on the combined force. Although the change would not affect the degree to which future benefits were funded, it would change the amount contributed to the fund in a particular year. As a result, less contributions would be required on an annual basis.

The House amendment contained no similar provision.

The conferees agree that the change would be an appropriate method of computing the contributions into the fund. However, they were concerned that the data centrally available on the members of the reserve components are less than adequate. Collecting the requisite data would be valuable for many purposes and essential for computing the contribution to the fund under the revised methodology.

The House recedes with an amendment that would direct the service Secretaries to submit data required pursuant to Department of Defense Instruction 7730.54 (dated May 7, 1986) to the Secretary of Defense by September 30, 1987—particularly data related to the following categories identified in the instruction:

(1) Date of initial entry into military service

(2) Total days of active Federal military service

(3) Years creditable for reserve retirement

(4) Reserve component accumulated total creditable retirement points earned during the most recently completed retirement year

(5) Reserve component accomulated paid points earned during the most recently completed retirement year

(6) Reserve component total accumlated creditable points toward retirement earned during career

Authority to pay bank charges in the event of government error in mandatory direct deposit of members' pay (sec. 662)

The Senate bill contained a provision (sec. 632) that would authorize government reimbursement of a service member who incurs overdraft charges as a result of a government error in depositing the member's pay if the member's participation in the direct deposit program is mandatory.

The House amendment included no similiar provision.

The House recedes.

Limit on reserve unit and individual training spending (sec. 663)

The House amendment contained a provision (sec. 651(e)) that would limit the amount spent in fiscal year 1987 for reserve unit and individual training to $5,084,500,000.

The Senate bill contained no similar provision.

The House recedes.

LEGISLATIVE PROVISIONS NOT ADOPTED

Taxation of military benefits

The Senate bill contained a provision (sec. 1225) that would express the sense of the Senate that military benefits are not subject to federal income taxation.

The House amendment included no similar provision.

The Senate recedes. The Conferees note the favorable treatment accorded military compensation and benefits in section 144 and 1168 of the Tax Reform Act of 1986.

Accounting for payments of claims for benefits

The Senate bill contained a provision (sec. 641) that would amend section 1552(c) of title 10, United States Code, to provide that when paying a claim for benefits arising from an error in a service member's record, payment may be made out of applicable current appropriations or from appropriations (if available from which the expense would have been paid if payment had been made when due under the corrected record.

The House amendment contained no similar provision.

The Senate recedes.

Enlistment bonus cost reduction

The House amendment contained a provision (sec. 651(c)) that would prohibit the payment of enlistment bonuses to new Navy, Marine Corps and Air Force recruits in fiscal year 1987.

The Senate bill contained no similar provision.

The House recedes.

TITLE VII—HEALTH-CARE REFORM MANAGEMENT REFORM

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Improvement in military health-care delivery system (sec. 701)

The House amendment contained a provision (sec. 811) that would make four changes in the operation of the military health care system.

First, section 811 would provide specific authority to the Secretary of Defense to contract for health care services with a variety of providers and insurers, including health maintenance organizations and preferred provider organizations, and would authorize the Secretary to prescribe a premium, deductible, copayment, or other charge for health care provided under this section.

Second, section 811 would establish a Military Health Care Account into which all funds currently appropriated to Operation and Maintenance, Defense Agencies, for the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) would be transferred. The Secretary of Defense would transfer to each service on a quarterly basis the funds determined necessary by the Secretary to meet each service's CHAMPUS obligations for that quarter; using their operation and maintenance appropriation for the direct care system and their allotment from the transfer account, the services would then be responsible for providing all medical care to their beneficiary populations (including CHAMPUS costs).

Third, section 811 would direct the Secretary of Defense to establish a health care enrollment system in which beneficiaries would elect to enroll in a specific health plan, for example, the local military hospital, CHAMPUS, a civilian health maintenance organization, or the proposed Champus Reform Initiative; the plan selected would have responsibility for ensuring the availability of all covered services to its beneficiary population.

Fourth, section 811 would require the use of Diagnosis Related Groups (DRGs) as the primary budgetary tool for allocation of resources to military medical facilities, beginning October 1, 1987, for inpatient procedures and beginning October 1, 1988, for outpatient procedures.

The Senate bill contained no similar provision.

The Senate bill contained a provision (sec. 701) that would permit the Secretary of Defense to waive the copayment requirements and restrictions on covered services prescribed in sections 1079 and 1086 of Title 10, United States Code, for the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS), in the case of certain contracted health care services.

The House amendment contained no similar provision.

The Senate bill contained a provision (sec. 702) that would permit the sharing of staff, equipment, and resources between the civilian and military health care systems, in contracts entered into under sections 1079 and 1086 of title 10, United States Code, if such sharing would result in more effective, efficient, or economical health care for authorized beneficiaries.

The House amendment contained no similar provision.

The House recedes to the Senate provisions with amendments. The Senate recedes to the House provision with amendments.

As proposed by the House bill, health care enrollment is to be phased in over a three-year period beginning October 1, 1987. However, initial implementation is required only as part of the CHAMPUS Reform Initiative demonstration project contained in section 702. The conferees expect that enrollment can be achieved on a voluntary basis. Beneficiaries may be assigned to military hospitals, however, if necessary to ensure full utilization of those hospitals, but no involuntary enrollment may occur prior to October 1, 1990.

In the case of the Military Health Care Account, the conferees have clarified that the Secretary of Defense may obligate funds to the extent they are available in the account for medical care under CHAMPUS, the demonstration project authority contained in section 1092 of title 10, United States Code, and the new authority to contract for alternative delivery of health care provided in this section. The Secretary of Defense will then make available to the Secretary of each service the amount from the account that the Secretary of Defense determines necessary to meet that service's CHAMPUS expenditures. Using their operation and maintenance appropriation for the direct care system and their allotment from the transfer account, the services would be responsible for providing all medical care to their beneficiary population (including CHAMPUS costs) and would have to seek to reprogram funds appropriated for other programs to make up any shortfall.

The Military Health Care Account would become effective October 1, 1987. The conferees expect the account to be reflected in the President's budget request for fiscal year 1988.

Diagnosis Related Groups are to be used to replace the current Health Care Unit as the primary resource allocation tool for patient care provided in military hospitals. However, military hospitals would continue to receive additional budget resources for their wartime mobilization and training missions.

CHAMPUS Reform Initiative (sec. 702)

The House amendment contained a provision (sec. 815) that would affect the Department of Defense's proposed CHAMPUS Reform Initiative, commonly called Project Imprint, by requiring the Secretary of Defense, within 60 days after the date of enactment, to submit a report on (1) methods to guarantee competition, (2) the merits of using a voucher system or fee schedule, and (3) methods to guarantee participation of community hospitals. Section 815 would prohibit the obligation or expenditure of funds for the CHAMPUS Reform Initiative until a period of 30 days of continuous session of Congress elapses after the Secretary submits such report.

The Senate bill contained no similar provision.

The Senate recedes with amendments striking the prohibition on the obligation or expenditure of funds and directing a demonstration project on the phased implementation of the CHAMPUS Reform Initiative.

The Secretary of Defense is to conduct a demonstration project on the proposed CHAMPUS Reform Initiative to begin during fiscal year 1988, operate the project for at least one year, and apply the project to not more than one-third of the CHAMPUS program. A health care enrollment system is to be included in the demonstration. Based on the results of the demonstration project, the Secretary may proceed to phase in fully the CHAMPUS Reform Initiative over the next two years in remaining areas.

The Secretary is to report to Congress on the design, implementation, and operation of the demonstration project and the full reform initiative at specified points in the process. If the demonstration project is to be conducted in one continguous geographic area, the report must be submitted not later than 60 days before initiation of the project. If the Secretary of Defense opts instead to implement the demonstration project based on one-third of the CHAMPUS population, rather than one-third of the geographic area, the report must be submitted not later than 60 days before issuance of any Request for Proposals for that project.

CHAMPUS catchment areas (sec. 703)

The House amendment contained a provision (sec. 813) that would authorize the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) to pay for the nonemergency inpatient hospital care of beneficiaries residing with a 40-mile radius of a military treatment facility if private insurance provides primary coverage.

The Senate bill contained no similar provision.

The Senate recedes.

Medical informatin systems acquisition (sec. 704)

The House amendment contained a provision (sec. 812) that would redirect the Department of Defense's proposed procurement of a medical information system, commonly known as the Composite Health Care System (CHCS).

Section 1203 of the Department of Defense Authorization Act, 1986 (Public Law 99-145) directed the Department of Defense to conduct a demonstration project at two military hospitals using the Veterans Administration's Decentralized Hospital Computer Program (DHCP). In the meantime, the Department of Defense was permitted to proceed with its plan for procurement of CHCS, including the extended benchmark test, but with certain prescribed milestones and reporting requirements on the part of the General Accounting Office and the Secretary of Defense.

Section 812 of the House bill would cancel the extended benchmark test and would instead direct the department to base its medical information system procurement on operational testing in military medical facilities. In the operational test, the department would be required to compare the functional capabilities and costs of at least three competing systems in a realistic testing environment in military hospitals. Vendors would be required to provide incremental price and delivery schedules for each function described in phases I, II, IID, and III of the Request for Proposals.

Section 812 of the House bill would also extend the test of the Veterans Administration's DHCP and would establish procedures for evaluating of the results of both test programs, such as the use of military evaluation teams.

The Senate bill contained a provision (sec. 705) that would repeal section 1203 of Public Law 99-145 and would require that the Department of Defense's procurement of a medical information system proceed in accordance with the existing Request for Proposals, namely utilization of an extended benchmark test.

The Senate recedes with amendments requiring an extended benchmark best, striking a number of the requirements included in the House amendment for the conduct and evaluation of the results of the operational test, and terminating the demonstration project of the Veterans Administration's DHCP effective October 1, 1987.

Confidentiality of medical quality assurance records (sec. 705)

The Senate bill contained a provision (sec. 703) that would protect military medical quality assurance records—for example, peer review proceedings—from release or disclosure, in order to foster the candor necessary to ensure the best possible quality of military medical care.

The House amendment included no similar provision.

The House recedes with an amendment restricting the use of information obtained during epidemiologic assessment interviews of military personnel identified as having been exposed to a virus associated with the acquired immune deficiency syndrome.

Use of Public Health Service hospitals as facilities of the uniformed services (sec. 706)

The House amendment contained a provision (sec. 814) that would extend from December 31, 1987 to December 31, 1988 the earliest date after which the Unformed Services Treatment Facility status of 10 former Public Health Service hospitals could be terminated.

The Senate bill contained no similar provision.

The Senate recedes.

Limitation on dental insurance program (sec. 707)

Section 651 of the Department of Defense Authorization Act, 1986 (Public Law 99-145) authorized the Secretary of Defense to establish a dental insurance program for spouses and children of active duty service members but provided that no contracts could be signed or funds obligated prior to September 30, 1986.

The Senate bill contained a provision (sec. 704) limiting authorization for initial implementation of a dental insurance program to $18,000,000 in fiscal year 1987. The President's budget requested $78 million.

The dental insurance program would provide on a voluntary enrollment basis 100 percent coverage for preventive, diagnostic, and emergency services and 80 percent coverage for composite and amalgam fillings and dental applicance repairs. Additionally, the program would be structured so that the cost of premiums would not exceed ten

dollars per month per family. The provision would restrict the government's share to no more than 60 percent of total program cost with an annual expenditure cap of $105,000,000 in fiscal year 1986 dollars.

The House amendment contained no similar provision.

The House recedes with an amendment deleting the requirement that the government cost may not excede 60 percent. However, the conferees expect that the cost to the government will very closely approximate the 60 percent level, as previously estimated by the Department of Defense. If this does not prove to be the case, the conferees intend to revisit the issue and will consider lowering the $105,000,00 annual expenditure cap.

LEGISLATIVE PROVISIONS NOT ADOPTED

Eligibility of philanthropic institutions to receive reimbursement under CHAMPUS

The House amendment contained a provision (sec. 816) that would prohibit the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) from denying payment for services to a hospital operated primarily for philanthropic purposes on the basis that such a hospital does not impose a legal obligation on patients to pay for such services.

The Senate bill contained no similar provision.

The House recedes.

TITLE VIII—UNIFORM CODE OF MILITARY JUSTICE

LEGISLATIVE PROVISIONS ADOPTED

LEGISLATIVE PROVISIONS

Defense of lack of mental responsibility (sec. 802)

The House amendment contained a provision (sec. 702) that would conform the military defense of lack of mental responsibility under the Uniform Code of Military Justice to the civilian defense of insanity title 18, United States Code.

The Senate bill included a similar provision (sec. 802).

The House recedes with an amendment creating a verdict of not guilty only by reason of lack of mental responsibility.

Court-martial jurisdiction over reserve members (sec. 804)

The House amendment contained a provision (sec. 704) that would extend military criminal jurisdiction over reservists to conform with the modern total force.

The Senate bill included no similar provision.

The Senate recedes with an amendment ensuring the fair and prudent exercise of the new authority to call reservists involuntarily to duty for proceedings under the Uniform Code of Military Justice.

Statute of limitations (sec. 805)

The House amendment contained a provision (sec. 705) that would conform the statute of limitations in the Uniform Code of Military Justice to the civilian counterpart provisions of title 18, United States Code.

The Senate bill included a similar provision (sec. 805).

The House recedes.

Detail of judge advocates (sec. 807)

The House amendment contained a provision (sec. 707) that would clarify the circumstances under which judge advocates are detailed to assist, for example, the Department of Justice in litigation involving the Department of Defense.

The Senate bill included a similar provision (sec. 807).

The House recedes with a technical amendment clarifying that judge advocates may assist another agency without reimbursement to the Department of Defense by the other agency in cases of interest to the Department of Defense.

TITLE IX—PROCUREMENT POLICY REFORM

MANAGEMENT OF THE ACQUISITION PROCESS

LEGISLATIVE PROVISIONS ADOPTED

Senior civilian management of acquisition process (sec. 901-903)

The Senate bill contained five provisions (sec. 911, 912, 913, 914, and 915) that would (1) establish the position of Under Secretary of Defense for Acquisition, define the appointment process, powers, duties, and precedence of that office; (2) establish the position of Deputy Under Secretary of Defense for Acquisition; (3) establish the position of Director of Defense Research and Engineering; (4) require the Director of Operational Test and Evaluation to report to the Under Secretary of Defense for Acquisition, and (5) amend the Small Business Act to require the Director of the Office of Small and Disadvantaged Business of the Department of Defense to report to the Under Sercretary of Defense for Acquisition.

The House amendment contained two provisions (sec. 901 and 213) that would (1) define the duties of the Under Secretary of Defense for Acquisition, maintain existing supervision and policy for contract audit, and require the Director Operational Test and Evaluation to report personally to the Secretary of Defense and (2) convert the position of Director of Operational test and Evaluation to Assistant Secretary level.

The House recedes to the Senate with an amendment that would (1) define the duties and procedence of the Under Secretary of Defense for Acquisition; (2) establish the position of Deputy Under Secretary of Defense for Acquisition; and (3) modify the status of other senior civilian acquisition officials.

The conferees agreed to:

Clearly and specifically prescribe the duties and precedence of the Under Secretary of Defense for Acquisition (USD-A) so as to establish the authority and jurisdiction of the Level-II position;

Maintain existing law governing audit policy and the Inspector General. In conjunction with the Inspector General of the Department of Defense, the Under Secretary of Defense for Acquisition will coordinate audit and oversight of contractor activities to prevent duplication of effort on the part of the different elements within the Department of Defense;

Establish a Lever III position of Deputy Under Secretary of Defense for Acquisition. The position of Director, Defense Research and Engineering would be reestablished as an Executive Level IV position;

Maintain the current requirement that the Director of Operational Test and Evaluation report directly to the Secretary of Defense; but require, in addition, that any reports by such Director also be forwarded directly to the Under Secretary of Defense for Acquisition;

Require the Director of the Office of Small and Disadvantaged Business Utilization to report to the Under Secretary of Defense for Acquisition.

Enhanced program stability for major defense acquisition programs (sec. 904)

The Senate bill contained a provision (sec 921) that would require the Department of Defense to establish a cost, performance and schedule baseline for all programs designated as defense enterprise programs.

The House amendment contained a similar provision (sec. 903) that would require the department to establish a baseline for all major defense acquisition programs. The baseline would include cost, performance characteristics and specifications, scheduled milestones, testing parameters and initial provisioning plans. The House amendment would require that these baselines be transmitted to the Congress prior to approval of funding for either full-scale development or full-rate production.

The Senate recedes with technical amendments. Sec 907 directs the Department to prepare baselines for all major defense acquisition programs. The Department need transmit to the Congress only those baselines for programs designated as defense enterprise programs (sec. 909).

Defense enterprise programs (sec. 905)

The Senate bill contained a provision (sec. 921) that would require the Department of Defense to establish within each military service Defense Enterprise Programs with streamlined reporting procedures for program managers.

The House amendment contained a similar provision (sec. 902). The House provision, however, would preclude the Secretary from designating a program for streamlined management unless the program was a major defense acquisition program.

The House recedes with an amendment. The conferees intend that all major acquisition programs eventually become defense enterprise programs. The conferees, however, do not wish to preclude the services from designating as a defense enterprise program, programs which do not qualify as major defense acquisition programs.

Milestone authorization of defense enterprise programs (sec. 906)

The Senate bill contained a provision (sec. 921) that would establish procedures for authorizing defense enterprise programs on a milestone basis. Sec. 921 would require the Secretary of Defense to submit a cost, schedule and performance baseline for an entire acquisition phase, and would require the Secretary of Defense, in submitting the budget for the fiscal year in which a new acquisition phase (either full-scale development or full-rate production) is to begin, to request authority to obligate funds required to complete the phase. The Senate provision also contained procedures for reviewing defense enterprise programs which breached the baseline which was approved at the time the Congress authorized the Secretary to proceed with the program on a milestone basis.

The House amendment contained a similar provision (sec. 903), but would allow the Secretary to designate a program for milestone authorization even if such program has not been subject to streamlined program management.

The conferees decided that the management baseline for defense enterprise programs would be the same as the baseline required for all major defense acquisition programs as specified in sec. 904 of the conference report. Those baselines are not otherwise required to be submitted to the Congress if the programs are not designated as defense enterprise programs.

The conferees note that milestone authorization does not necessitate any specific contractual arrangement or type. The requirement to stay within the baseline under

which the program is authorized is a commitment by the Department of Defense to manage a program to the minimum requirements stated in the baseline in return for an agreement by Congress to commit to a stable funding profile. Accordingly, contractual requirements may be more stringent than the requirements stated in the baseline.

The House recedes with technical amendments.

Preference for nondevelopmental items (sec. 907)

The Senate bill contained a provision (sec. 945) that would establish a preference for the procurement, where appropriate, of nondevelopment, or off-the-shelf, items. The provision would establish a requirement that, to the maximum extent practicable, the services define requirements so that nondevelopment items could be used and fulfill those requirements using nondevelopment items. In addition, the Senate provision would require the Department of Defense to issue implementing regulations, designate a person responsible for overseeing the implementation, and submit a report to Congress within one year detailing the actions taken to implement these requirements.

The House amendment (sec. 905) would add a new section to chapter 137 of title 10, United States Code, that would establish a preference for the acquisition of nondevelopmental items. This new section would require the Department of Defense, to the maximum practicable extent, to state its requirements in the broadest functional description and in such a manner that nondevelopmental items may be offered to fulfill those needs. In addition, it would require an independent evaluation by the Comptroller General of the actions taken by the Secretary of Defense. It would also require the Secretary of Defense to identify impediments to the Defense Department's acquisition of nondevelopmental items, to remove those impediments within his jurisdiction, and to recommend to Congress any legislative changes the Secretary deems necessary.

The Senate recedes with an amendment that would: (1) direct that the Secretary of Defense appoint the Under Secretary of Defense for Acquisition to be the official responsible for implementation of this policy; (2) require the Secretary of Defense to submit a report to the Committees on Armed Services of the Senate and House of Representatives identifying actions taken to implement the requirements of this provision; (3) provide that the Department of Defense fulfill its requirements through the procurement of nondevelopmental items; (4) clarify that the Department of Defense should state its requirements in the broadest possible terms, be it in terms of required functions, performance or essential physical characteristics; (5) delay the deadline for the General Accounting Office report on the progress made by the Department of Defense to two years; and (6) add to the definition of nondevelopmental items, items currently being produced, but not yet in use or not yet available in the commerical marketplace. The conferees agreed to the additional category of items to ensure that newly developed products would be able to compete on an equal basis with products already in the marketplace but to continue to distinguish between items already produced and those that require continuing development or testing prior to actual production.

Requirements related to undefinitized contractual actions (sec. 908)

The House amendment contained a provision (sec. 925) that would limit the use of funds for undefinitized contractual actions. For each quarter during fiscal years 1987 and 1988, the provision would require the Secretary of Defense, with respect to the Defense Logistics Agency, and the Secretary of each military service to report to the Committees on Armed Services of the Senate and the House of Representatives on the percentage of all funds placed on contract that were undefinitized. If the report showed that undefinitized contractual actions represented more than 10 percent of all contractual actions during a given quarter, the service Secretary would be prohibited from obligating additional funds using undefinitized contractual actions. The provision would also establish general restrictions and guidelines regarding the use of undefinitized contractual actions.

The Senate recedes with an amendment.

The conferees agreed to a provision that would require a service Secretary to report to the committees only if the service breached the 10 percent threshold. The quarterly reporting requirement was changed to a semi-annual review. In addition, the agreement would not prevent the service Secretary from obligating funds using undefinitized contractual actions during the first reporting period and extended the duration of the 10 percent ceiling into the first half of fiscal year 1989. These changes were made because the conferees agreed that the services should be allowed adequate time to implement this new requirement and to avoid unnecessary delay in the issuance of undefinitized contractual actions for valid purposes.

The conferees agreed to revise the method contained in the House amendment for determining the amount of funds represented by undefinitized contractual actions. Instead of basing the total on the "not to exceed" price, the conference agreement would only count obligations on undefinitized contracts. This change would allow the services to use existing contract reporting mechanisms for tracking the percentage of funds obligated on undefinitized contractual actions. It would also encourage the services to hold down the amount of funds obligated on undefinitized contractual actions.

Four categories of contracts would be exempted from the limitations under this provision: (1) foreign military sales, (2) purchases less than $25,000, (3) special access programs, and (4) Congressionally-mandated long-leadtime purchases. Undefinitized contractual actions for foreign military sales were excluded because the departments cannot prevent a foreign nation from requesting that an item be purchased by the most expeditious process. Purchases less than $25,000 were exempted because undefinitized contractual actions under this amount are not currently subject to regulations governing undefinitized contractual actions. Special access items are subject to special oversight procedures, and the conferees agreed that the services cannot control the definitization of long-leadtime items until a full procurement contract is negotiated.

The conferees also agreed on a waiver provision allowing the Secretary of Defense to breach the 10 percent threshold for urgent and compelling considerations relating to national security or public safety by notifying the Committees on Armed Services of the Senate and House of Representatives of such a waiver within 30 days of the issuance of the waiver. The conferees agreed that the services might, in an extreme emergency situation, need the flexibility to obligate funds using undefinitized contractual actions without being restricted by the 10 percent ceiling.

The conferees agreed to two changes in the general restrictions on the use of undefinitized contractual actions that were contained in the House amendment. First, the requirement that an undefinitized contract action provide for agreement on a definitization schedule within 180 days was changed to require definitization within 180 days of the submission of a qualifying proposal. This change reflects a recognition by the conferees that definitization of undefinitized contractual actions depend on the timely submission of contractor proposals.

Second, initial spares procurement was exempted from the requirement to definitze within 1870 days of the submission of a qualifying proposal or the expenditure of 50 percent of the "not to exceed" price because initial provisioning contracts must remain undefinitized until sufficient logistics experience is gained to determine the requirement and configuration for each spare part.

The conferees direct the Secretary of Defense to submit a report to the Committee on Armed Services of the Senate and House of Representative by July 1, 1987 detailing the actions taken by the Department of Defense and the Armed Forces to effectively manage the issuance and timely definitization of these contract actions. The report should include a determination by the Secretary on the feasibility of the 10% limitations effective on October 1, 1987 as well as a recommendation for any modification or repeal of the limitation. The conferees will consider any recommendations for the modification or repeal of the 10% limitation based on demonstrated ability to manage effectively undefinitized contracts. Should no Congressional action be taken, the 10% limitation will be effective on October 1, 1987.

The reports submitted under this section to the Committees on Armed Services will be made available for review by all interested Members of Congress.

Competitive prototype strategy requirement for major defense acquisition programs (sec. 909)

The House amendment contained a provision (sec. 934) that would require the use of a competitive prototype strategy in the development of a major weapon system or subsystem. The provision also required contractors to submit bids for full scale engineering development of the prototype, production estimates, and if possible, fixed price or not to exceed production price options on the prototypes. The provision provided Secretarial waiver authority if competitive prototyping is either impractical or too costly.

The Senate bill contained no similar provision.

The Senate recedes with an amendment. The conferees endorse an expanded use of competitive prototype procedures in the acquisition process. The conferees believe that the Under Secretary of Defense for Acquisition should direct a thorough review of Department policies on prototyping generally and competitive prototyping specifically. The conferees invite the Under Secretary to present the results of that review to the Congress, and suggest revisions to sec. 909 if he judged that to be necessary.

The conferees amended provisions in the original House provision which required

71-059 O-87-40 (Pt. 21)

fixed price or not to exceed production price options on pre-tested prototypes. The conferees judge that this procedure, like an earlier concept of "total package procurement" is not a viable approach to major defense acquisition.

Survivability, lethality and operational testing (sec. 910)

Section 214 of the Houe amendment contained a provision that would require all new major conventional systems and weapons to be subjected to realistic, live-fire testing before entering production. A system would be tested for vulnerability and survivability by firing all the conventional threat munitions likely to be encountered in combat at the system configured for combat. A weapon would be tested for lethality by firing it at foreign targets configured for combat. The amendment would also require that independent operational testing be conducted for all new major conventional systems before entering production and that such test would include a side-by-side test of the system being acquired with equal-cost quantities of the system intended to be replaced or the nearest competitor of the system being acquired.

The Senate bill contained no similar provision.

The conferees agreed to a modified version of the House provision contained in section 214. The provision would require that a major conventional weapons system not proceed beyond low-rate initial production until (1) a realistic survivability or lethality test is completed; and (2) an initial operational test and evaluation is completed. Such survivability and lethality tests would be carried out early enough to allow design deficiencies to be corrected before production. Employees of the contractor for the system being tested would not be involved in the conduct of the initial operational test and evaluation.

The conferees direct that the Secretary of Defense conduct, as a matter of high priority, a comprehensive review of testing policy in the Department. The conferees believe that the Secretary's review should include the following issues:

(1) A review of the length of time currently required in the acquisition process and ways to reduce the time devoted to testing;

(2) A review of existing testing policies of the Department and the Military Departments, and a determination of inconsistencies in fundamental testing philosophies and approaches;

(3) A review of the relationship between development testing and initial operational testing, and what role each plays in the acquisition process.

The last issue merits special attention by the Secretary. The conferees believe that developmental testing and initial operational testing are separate, yet complementary, elements in the acquisition process. Developmental testing is designed to support the development of improved weapon systems. Initial operational testing is designed to prevent the production of flawed systems. Initial operational testing can never assume the functions of developmental testing, because the legislative history that established the Office of Operational Test and Evaluation inherently created an independent inspector general-type of function. Similarly, development testing (by definition) implies close collaboration with the developers of new systems, which prohibits such testing from performing the role the Congress intended for initial operational testing.

This situation suggests that fundamental review by the Secretary is in order. The conferees invite the Secretary to comment on section 910, as well as section 123 in Public Law 99-145 and other testing statutes. The Committees on Armed Services in both the U.S. Senate and the House of Representatives intend to conduct comprehensive hearings on testing policies and procedures next year and are prepared to amend section 910 and other statutory testing provisions after thorough consideration of the Secretary's review. The Secretary is invited to offer draft legislation if his review suggests such a course is warranted.

The Secretary shall transmit his report to the Committees on Armed Services of the Senate and the House of Representatives by March 15, 1987 to facilitate early hearings.

Goals for increased use of multiyear contracting authority (sec. 911)

The Senate bill contained a provision (sec. 954) that would ensure that the Department of Defense increase the use of multiyear contracting authority in fiscal year 1988. An amount not less than 10 percent of the total obligational authority used by the Department of Defense for procurement programs of the department during fiscal year 1988 would be established as the multiyear procurement goal. Further, not later than January 1, 1987, the Secretary of Defense would provide the Committees on Armed Services of the Senate and the House of Representatives with (1) a report on the procurement programs eligible for multiyear contracting; (2) an assessment of the feasibility and desirability of the multiyear procurement goal; and (3) an assessment of whether the Secretary of Defense expects to achieve the multiyear procurement goal or, if not, the reasons why the goal would not be achieved.

The House amendent contained no similar provision.

The House recedes.

Federally funded research and development centers (sec. 912)

The House amendment contained a provision (sec. 923) that would limit the work placed by the Secretary of Defense with a Federally Funded Research and Development Center (FFRDC) to work that was within the purpose, mission, and general scope of effort of such center as established in the sponsoring agreement. In addition, the House provision would require an extensive report by the General Accounting Office (GAO) on the role of FFRDCs and would prohibit the creation of new FFRDCs unless the sponsoring agency first provides to Congress a report on the planned purpose and mission of the proposed FFRDC.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would clarify the focus of the GAO review and report.

REQUIREMENTS RELATING TO THE ACQUISITION PROCESS

LEGISLATIVE PROVISIONS ADOPTED

Small business set-asides (sec. 921)

The House amendment contained a provision (sec. 911) that would require agencies to ensure that a fair proportion of contracts per industry category, rather than overall contracts, be awarded to small businesses. It would also require, that in order to be eligible for a contract under a set-aside or the 8(a) program, the contractor itself must agree to perform at least 50 percent of the work under the contract. Exceptions would be authorized when warranted to reflect industry practice. The amendment would also direct that the Small Business Administration reduce the size standard for any industry if over the past three years more than 30 percent of the dollar amount of all contracts in that industry category were awarded under a set-aside. Finally, it would provide that the cost of a set-aside contract to the awarding agency would not be allowed to exceed a "fair market price", a term already defined in the Federal Acquisition Regulations, and would provide that the public be given timely information regarding the decision to set-aside a contract.

The Senate bill contained no similar provision.

The House conferees agreed that allowing agencies to satisfy small business contract award goals through set-aside of a predominant number of contracts in virtually a handful of industries has been of marginal benefit to smaller firms, has prevented larger small businesses from growing past the size standard and diverted efforts from other industry segments in which little progress has been made.

The House conferees believe the requirement to reduce the size standards within certain industry categories must work hand in hand with a corresponding increase in the number of contracts open to unrestricted competition. Without this corresponding increase in the number of unrestricted bidding opportunities, those companies no longer considered small would be at an extreme disadvantage. The intent of the provision is to ensure that such companies would have every opportunity to compete for the approximately 70 percent of the government contracts which would be unrestricted. In short, the provision is intended to insure that there is an incentive to grow, modernize and achieve economies of scale by providing for market opportunities beyond the set-aside program.

The House conferees were also concerned that there was no adequate improvement mechanism requiring contractors to perform at least 50 percent of the work with their own work force. Although an agreement could not be reached on a provision to established specific remedial measures against contractors who agree to perform as required and then violates the provision, the conferees intend to monitor closely the Small Business Administration's efforts to enforce this section.

The Senate recedes with an amendment that would establish the right of a company affected by a size standard change required under this section to judicial review of the Small Business Administration's detemination of the appropriate size standard. In addition, the conferees agreed to increase the industry categories affected by the requirement to reassess the size standard to include refuse systems and related services and dredging, two additional categories in which the existing size standard is inappropriately high. The provision allows the Small Business Administration flexibility to evaluate the existing size standards and to craft actual size standards consistent with the objectives of the Act.

Finally, the amendment delays specifically the date for implementation of the provision to allow the Committees on Small Business of the Senate and the House of Representatives the opportunity to examine the information required to be provided by the Small Business Administration after the agency's review of existing size standards its promulgation of proposed new size stand-

ards pursuant to these provisions, and to reconsider the issues raised.

Thresholds for certain requirements relating to small purchases (sec. 922)

The House amendment contained a provision (sec. 936) that would increase the threshold for requiring publication of notice in the *Commerce Business Daily* of planned competitive purchases from $10,000 to $25,000. Although small purchases in the Department of Defense account for only eight percent of all dollars spent, they represent 98 percent of all contract actions. An increase of the threshold to $25,000 is projeced to result in considerable savings in administrative lead time.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would, in addition to the House provision, require that all agencies at the activity purchasing the item, a notice of proposed procurement actions expected to exceed $10,000 but no more than $25,000, except that the Department of Defense must post a notice of all solicitations for contract actions expected to exceed $5,000. This requirement is consistent with existing Federal Acquisition Regulations and the Defense Supplement to the Federal Acquisition Regulations.

Requirements relating to procedures other than competitive procedures (sec. 923)

The Senate bill contained a provision (sec. 946) that would amend section 2304 to clarify that a determination to award a contract for services using noncompetitive procedures should be based on the unique capabilities of the contractor rather than the uniqueness of the services to be provided. It would also provide, in statute, recognition that for purposes of allowing the award of a noncompetitive follow-on contract, some contracts for services require the contractor to develop an expertise that would be lost or extremely expensive to replace were the contract awarded to another company.

The House amendment contained no similar provision.

The House recedes with technical amendments and a provision that would add in section 2304(c)(1) an additional proviso to allow a noncompetitive award when a limited number of sources are available, rather than just one source. This addition was made in recognition of certain procurements, generally limited to procurements for critical items, where more than just one source may be available but where limitation of sources is warranted. The conferees expect this exception to be used infrequently and only when absolutely required.

Evaluation factors in award of contracts (sec. 924)

The Senate bill contained a provision (sec. 947) that would amend section 2305 of title 10, United States Code, to recognize that, particularly in the acquisition of services, the quality of the services provided is of paramount importance.

The House amendment contained no similar provision.

The conferees generally believe that the Department of Defense places too little emphasis on the quality of the product or service provided. Many reasons are postulated for the priority placed on price rather than quality, and without agreeing on the cause of such over reliance on price, the conferees have highlighted the procurement of services as one area in which clearly the quality of the service provided is at least as significant as price, if not more significant. The conferees also agreed that, if an agency determines that the quality of the services, rather than cost or price, is the highest priority, the agency should reflect that determination through appropriate weighting and evaluation factors.

The House recedes with technical amendments.

Computation of contract bid prices (sec. 925)

The House amendment contained a provision (sec. 1048) that would preclude the Department of Defense from awarding a contract based on the evaluation of option prices if the department was not reasonably certain that the options would be exercised.

The Senate bill contained no similar provision.

The Senate recedes with a technical amendment.

Prices for products sold commercially (sec. 926)

The Senate bill contained a provision (sec. 941) that would amend section 2323 of title 10, United States Code, adopted in the Defense Procurement Improvement Act (Public Law 99-145). Section 2323 requires a contractor to certify that the price it is offering the Department of Defense is not greater than the lowest price given to its commercial customers if the offer is for a product that is sold to the public. The Senate bill would clarify that this provision applies only to spare or repair parts rather than all items of supply, and limit the types of sales that must be considered when determining the contractor's lowest commercial price. The types of sales to be excluded in this calculation were limited in one instance by providing that sales to the government be excluded but only for a one year period.

The House amendment contained a similar provision (sec. 914) that would exclude the following transactions when determining the company's lowest commercial price: (1) sales to the Federal government; (2) intracompany sales or transfers; (3) sales to dealers, distributors, or original equipment manufacturers, unless the government can demonstrate that the sale is under the same terms and conditions as a sale to a dealer, distributor or original equipment manufacturer; (4) sales to foreign purchasers; and (5) sales to educational institutions for educational purposes.

The conferees agreed that this provision was not intended as an overall requirement for the government to receive most favored customer status but, rather, to focus on the issue of noncompetitive sales to the Department of Defense of spare or repair parts at prices greatly in excess of the prices charged for the same item when sold in the commercial marketplace.

The conferees agreed to make permanent the exclusion of sales to the Federal government in the calculation of the contractor's lowest commercial price. In keeping with congressional efforts to allow the government to make small dollar purchases with a minimum amount of restraint and requirements, the conferees agreed also to exclude from the application of this provision purchases made utilizing simplified small purchase procedures.

The House recedes with an amendment.

Allocation of overhead to parts to which the contractor has added little value (sec. 927)

The Senate bill contained a provision (sec. 942) that would amend section 1245 of the Department of Defense Authorization Act, 1985 (Public Law 98-525) to eliminate from the application of that provision items of supply included in contracts or subcontracts for which the price is based on established catalog or market prices of items sold in substantial quantities to the general public.

The House amendment contained no similar provision.

The House recedes with an amendment that would delete subsection 942(d). The conferees concluded that, because the section did not require the submission of cost or pricing data but, instead, relates to how the Department of Defense would require contractors to price items sold to the government, subsection (d) was unnecessary.

Clarification of requirements to mark supplies to identify suppliers and sources (sec. 928)

The Senate bill contained a provision (sec. 944) that would amend section 2384 of title 10, United States Code, to exclude from the requirments of that section items of supply for which the price is based on established catalog or market prices of commerical items sold in substantial quantities to the general public. Section 2384 requires the Secretary of Defense to prescribe regulations requiring that, whenever practicable, the contractor identify the actual manufacturer or producer of the item or of all sources of supply of the contractor for that item, the national stock number of the item and the identification number of the actual producer or manufacturer of the item or of each source of supply, and the source of any technical data delivered under the contract.

The House amendment contained no similar provision.

The conferees agreed that vendors of commercial products should not be required to provide to the government the identity of the actual manufacturer or producer of an item, its sources of supply for the item, the actual manufacturer or producer's identification number, or the source of any technical data provided under the contract, as long as the government purchased the item using competitive procedures or the contractor's price was based on established catalog or market prices. The purpose of this provision was to ensure that when the government purchased an item it could identify the actual manufacturer or producer of the item, if it was other than the company that provided the item to the government, so that it could determine whether to purchase the item directly from the manufacturer or producer. When items being provided are standard commercial products sold to the government under competitive procedures or at an established catalog or market price, the government is assured of the reasonableness of the price, and attempting to identify the actual manufacturer is not essential to ensuring the reasonableness of that price.

The House recedes with a technical amendment that would clarify that the exemption from the requirement to identify supplies applies only with respect to identification of the actual manufacturer or producer or sources of supply, the actual manufacturer's or producer's identification number, or the source of any technical data provided under the contract.

PROCUREMENT PERSONNEL POLICY

LEGISLATIVE PROVISIONS ADOPTED

Conflict of interest in defense procurement (sec. 931)

The Senate bill contained a provision (sec. 931) that would prohibit contacts between certain senior defense officials and a de-

fense contractor regarding future employment and would entitle a covered senior defense official to receive severance pay for a certain time period until that official obtains employment outside the federal government.

The House amendment contained a provision (sec. 924) that would prohibit the acceptance of compensation from a defense contractor by former Department of Defense officials for a period of two years after separation from government service if that official had personal and substantial responsibility for a procurement function involving contact with that contractor during the two-year period preceding separation. The restrictions would apply to officials in a civilian position of grade GS-13 or above or a military grade of O-4 and above.

The Secretary of Defense would have the authority to exempt certain senior civilian officials, except when those officials participated personally and substantially in the negotiation or settlement of a contract with a defense contractor. It would also require a contractor to submit annually a report to the Secretary of Defense on those persons in its employ who held positions in the Department of Defense in the previous two years. Violation of the prohibition would result in a fine and up to one year's imprisonment for a person knowingly accepting or providing such compensation; a fine of $100,000 or three times the compensation paid for a contractor knowingly violating the prohibition; and a fine of $10,000 for a company failing to file the required reports.

The Senate receded with an amendment that would modify the House provision by restricting coverage to certain former Department of Defense officials who, for a majority of the working days within the two years before separating from the Department of Defense (1) performed a procurement function at a site or plant that is owned or operated by a contractor and was the official's principal duty assignment or (2) personally and substantially participated in procurement functions relating to a major defense system involving contact with a contractor.

The prohibitions on accepting compensation would also apply to an official in a Senior Executive Service position or a military grade of 0-7 or above who acted as a primary representative of the United States in the negotiation or settlement of a Department of Defense contract in excess of $10,000,000. By the term "primary representative" the conferees intend to describe an official who was an actual decisionmaker, even though without official responsibility for the negotiations.

The amendment would also limit coverage to contractors who had contracts with the Department of Defense during the preceding fiscal year in an aggregate amount of at least $10,000,000. The amendment would further substitute increased civil penalties for criminal penalties. The Senate amendment would provide that a current or former officer of employee, before accepting compensation, could obtain a written opinion from a designated agency ethics official and such opinion, if finding that this section is inapplicable to the acceptance of compensation by the current or former officer or employee, would serve as a conclusive presumption in favor of such officer or employee.

The conferees intend these measures to help dispel the appearance and deter any actual occurrence of conflicts of interest by procurement officials in the Department of Defense and to improve the post-employment reporting of former government procurement officials employed in the defense industry.

Plan for enhancement of professionalism of acquisition personnel (sec. 932)

The House amendment contained two provisions (sec. 906 and sec. 926) that would (1) require the Secretary of Defense to submit to Congress a report that describes methods to enhance career opportunities for program managers and other acquisition personnel and (2) establish a Defense Acquisition Corps within the Office of the Secretary of Defense, the military departments, and the various defense agencies.

The Senate bill contained no similar provisions.

The Senate recedes with an amendment that would combine the two provisions into a single provision that would require that the Secretary of Defense submit to the Committees on Armed Services of the Senate and House of Representatives a plan to enhance the professionalism and career opportunities for the acquisition personnel of the Department of Defense. The plan would (1) include criteria for the examination, selection, appointment, placement, classification, training, and assignment of acquisition personnel; (2) assess the feasibility and desirability of the designation of certain acquisition personnel as acquisition professionals and of the establishment of an alternative personnel system, and (3) include recommendations for appropriate legislative recommendations.

Educational requirements for acquisition personnel (sec. 933)

The House amendment contained a provision (sec. 916) that would modify section 1622(b) of title 10, United States Code, to require that, before a person is appointed a program manager in the Department of Defense, that person must not only have attended a program management course at the Defense Systems Management College, or a comparable course at another institution, but have actually completed the course.

The Senate bill contained no similar provision.

The Senate recedes.

Plan for coordination of defense acquisition educational programs (sec. 934)

The House amendment contained a provision (sec. 927) that would direct the Secretary of Defense to establish by regulation a Defense Acquisition University that included acquisition related defense schools already in existence.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would authorize the Secretary of Defense, through the Under Secretary of Defense for Acquisition, to provide the Committees on Armed Services of the Senate and House of Representatives with a plan for the coordination of educational programs managed by the Department of Defense for its acquisition personnel. The plan should include provisions for the education of acquisition personnel:

(1) Through programs offered by the Department of Defense either through Department of Defense courses or programs offered in lieu of those courses;

(2) In various acquisition specialties, including contracting, logistics, quality, program management, systems engineering, production, and manufacturing; and

(3) To ensure that duplication of functions and courses among defense department schools providing educational courses for acquisition personnel is avoided.

LEGISLATIVE PROVISION NOT ADOPTED

Safeguarding of military whistleblowers

The House amendment contained a provision (sec. 921) that would provide protection through administrative and judicial review for members of the military services who disclose to appropriate government officials information concerning government wrongdoing or waste of government funds.

The Senate bill contained no similar provision.

The House recedes.

REQUIREMENTS RELATING TO DEFENSE CONTRACTORS

LEGISLATIVE PROVISIONS ADOPTED

Codification and extension of prohibition on employment of persons convicted of defense contract related felonies and related criminal penalty on defense contactors (sec. 941)

The Senate bill contained a provision (sec. 933) that would amend section 932 of the Department of Defense Authorization Act, 1986 (Public Law 99-145) to extend the prohibition on employment of persons convicted of a felony in relation to a government contract to prohibit the service of such persons on the board of directors. In addition, the Senate bill would also increase the minimum time in which such persons would be prohibited from being employed from one to three years.

The House amendment contained no similar provision.

The House recedes with an amendment that would strike the section of the Senate bill that would have increased the minimum time that such persons would be prohibited from working on any defense contract and clarifying that the provision would prohibit any person so convicted of serving on the board of directors of any company that contracts with the Department of Defense. The conferees agreed that the specified period is a minimum one and that establishing a minimum period greater than one year would not be in the best interest of the public. Accordingly, the conferees agreed that some flexibility should exist for the Secretary to consider the circumstances of the conviction, the penalty already imposed by the court, efforts to make restitution, and the interest to be served by the application of the prohibition.

The conferees also agreed to clarify that the fine established in Public Law 99-145 was a criminal penalty.

Protection of contractor employees from reprisal for disclosure of certain information (sec 942)

The House amendment contained a provision (sec. 922) that would provide certain protection for employees of Department of Defense contractors who disclose information on violations of law, regulation, mismanagement, and abuse of authority, or a substantial and specific danger to public health or safety.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would (1) provide that a contractor employee may not be discriminated against as a reprisal for disclosing substantial violations of statutory law to a Member of Congress or the Departments of Defense or Justice and (2) requires the Inspector General

to investigate and report on allegations of such reprisals.

Revision of work measurement provisions (sec. 943)

The Senate bill contained a provision (sec. 943) that would repeal section 917 of the Department of Defense Authorization Act for Fiscal Year 1986 (Public Law 99-145) relating to cost and price management. Section 917 required defense contractors to record and maintain certain types of cost and pricing data, including bills of material, and bills of labor expressed in standard hours of work content.

The House amendment contained no similar provision.

The House recedes with an amendment.

The amendment would require the heads of Department of Defense agencies to require contractors to make available (by providing access to) cost and pricing information in a timely manner with respect to covered contracts. The head of the agency or his authorized representative would have access to such information. The conferees intend that regulations governing access by authorized agency representatives under this section be consistent with the efforts of the Under Secretary of Defense for Acquisition to coordinate audit and oversight of contractor activities.

Such data to be made available would include work measurement system data, including standard hours of work content; various categories of proposed, negotiated and incurred costs; and bills of material. The conferees intend that cost data maintained by the contractor which reflects recurring as well as nonrecurring costs in the various categories should also be made available. The conferees further intend that revisions to the data be made available as the contractor records such revisions.

The requirements under this new section would apply to all manufacturing contracts for major weapon systems either pending or entered into on or after the date of enactment of this act. Further, the requirements of this section would only apply to contracts covered by the requirements of 10 U.S.C. 2306a.

The amendment would make clear that this section would not require a contractor to maintain additional data or data in a form or manner different from that in which the contractor otherwise maintains such data.

LEGISLATIVE PROVISION NOT ADOPTED

Certification of allowable indirect costs

The House amendment contained a provision (sec. 933) that would require a contractor submitting a proposal for interim or final settlement of indirect costs to certify that all indirect costs included in the proposal are allowable.

The Senate bill contained no similar provision.

The House recedes.

MISCELLANEOUS

LEGISLATIVE PROVISIONS ADOPTED

Contracting with firms owned or controlled by governments which support terrorism (sec. 951)

The Senate bill contained two provisions (sec. 951 and sec. 952) relating to Department of Defense contracts with companies owned or controlled by foreign governments or agents of those governments that support acts of international terrorism as determined by the Secretary of State under section 6(j) of the Export Administration Act.

The House amendment contained no similar provision.

The House recedes with an amendment that would make technical changes and limit the requirement for contractors to report foreign ownership to those with foreign ownership by countries listed under section 6(j). In additon, the conferees direct that the requirement to report be implemented in the least obtrusive means.

The conferees note that the Department of Defense has developed a strict policy with respect to the involvement of hostile foreign government ownership of contractors eligible for Department of Defense contracts. The conferees believe that the Department of Defense has been diligent in implementing such policy and expect that this provision will only serve to provide additional information and enhance the existing Department of Defense policy.

Truth in Negotiations Act amendments (sec. 952)

The Senate bill contained a provision (sec. 948) that would amend section 2306(f) of title 10, United States Code, to state that cost or pricing data include only data that are factual and verifiable and do not include judgmental data. It would further provide that no judgmental or intentional understatement of cost or pricing data may be used as an offset to an adjustment under this section.

The House amendment contained a similar provision (sec. 912) that would also define the term "cost and pricing" data to exclude information that is judgmental in nature, such as estimates of future productivity. Such data would, therefore, not be considered for purposes of determining whether defective pricing occurred or for purposes of determining whether a contractor may be entitled to an offset against an amount to be recovered for defective pricing.

The House amendment would also recognize for the first time in statute a contractor's right to offset against an amount that the government is entitled to recover, an amount that reflects cost or pricing data not revealed to the government that would have resulted in an increase in the agreed-to price. This provision parallels that which authorizes the government to recover when the failure to provide accurate, complete and current data resulted in an increase in price. As in the case of a recovery by the government, proof that information available to the contractor prior to the agreement on price establishes the right to recover that amount. The entitlement to recovery may be rebutted through proof by the government that, even if the required data had been provided, the government would not have agreed to a price increase. Finally, the section would restructure the existing Truth in Negotiations Act language to clarify its application.

The Senate recedes to the House with an amendment that would prohibit an offset, if the contractor intentionally withheld from the government information that would indicate a higher cost for an item or service and, thus, certified that the cost or pricing data it submitted was accurate, complete and current when, in fact, the contractor knew it to be false. The amendment would also clarify that a subcontractor may be required to provide cost or pricing data even though the requirement has been waived for the prime contractor or higher-tier subcontractor. The conferees acknowledge the practice of the Department of Defense to waive the requirement for certified cost or pricing data for universities under cost no-fee contracts but to require such data from subcontractors of the university.

The conferees were very concerned with clarifying the definition of cost or pricing data that a contractor is not required to provide and certify to data relating to judgments, business strategies, plans for the future or estimates. A contractor is required, on the other hand, to disclose any information relating to execution or implementation of any such strategies or plans. For example, a corporate decision to attempt to negotiate a new labor wage rate structure with its employee union, although verifiable, is not cost or pricing data for purposes of this section. If the company has made an offer to the union, the fact that an offer has been made, and the details and status of the offer, on the other hand, is information that should be conveyed to the government. Finally, this provision was amended to clarify that it applies to contracts and modifications to contracts entered into after the effective date of this Act.

Thus, the provisions of this Act apply only as to information provided to support a new contract or the exercise of an option or modification of an existing contract but not to the cost or pricing data provided to support an existing contract entered into prior to the effective date.

Rights in technical data (sec. 953)

The Senate bill contained a provision (sec. 953) that would require the Secretary of Defense to prescribe regulations defining the rights of the United States, its contractors and subcontractors, in technical data relating to items sold to the Department of Defense.

The House amendment contained a similar provision (sec. 913).

The Senate recedes with an amendment.

The conferees agreed to the House provision which would require the Department of Defense to publish regulations defining the terms "developed" and "at private expense". Efforts to define the terms have been ongoing since 1962 without resolution. Because of the lack of definitions in the Federal Acquisition Regulations and the Defense Supplement to those regulations, the military departments have differed in their approach on the issue. The conferees agreed that a uniform approach throughout the Department of Defense was desirable and necessary. In addition, the conferees believe that every effort should be made to make the policy and definitions similar in the Department of Defense and the civilian agencies to the extent the agencies are dealing with similar items.

Although agreeing that some flexibility in defining terms is necessary, the conferees believe that a statement of congressional intent is appropriate. The conferees believe that previously proposed Department of Defense regulations published for public comment September 10, 1985, defined the term "developed" in an excessively stringent manner by requiring an "actual reduction to practice"—a term of art used to establish an inventor's priority rights under the patent laws. The conferees agree that, for purposes of determining whether an item or process has been developed at private expense, an item should generally be considered "developed" if the item or process exists and reasonable persons skilled in the applicable art would conclude that a high probability exists that the item or process will work as intended. The conferees determined, however, that, because circumstances may exist in

which such a standard may be inappropriate, crafting of more exact parameters would be better accomplished through the regulatory process.

In addition, the conferees agree that as a matter of general policy "at private expense" development was accomplished without direct government payment. Payments by the government to reimburse a contractor for its indirect costs would not be considered in determining whether the government had funded the development of an item. Thus, reimbursement for Independent Research and Development expenses and other indirect costs (capital funds and profits), although such payments are in indirect support of a development effort, are treated for purposes of this Act as contractor funds.

The conferees also agreed that, although Congress has mandated increased competition in the Department of Defense's acquisition of goods and services, many alternatives exist to achieve that goal and do so more effectively, without coercing contractors and subcontractors into relinquishing legitimate rights in technical data. On the other hand, where the government is likely to purchase a substantial number of these items in the future, the government should attempt to acquire unlimited rights in data for items developed at private expense.

The Department of Defense should generally seek to acquire the same rights in data that a commercial customer would in acquiring the same product. For example, if a contractor were to purchase an item in the commercial sector, it would not receive unlimited rights to use, release or disclose technical data necessary to manufacture the item or perform the necessary processes to manufacture the item. If a contractor paid for a modification to an existing item, it may acquire rights in data to the modification but not the rights to use, release or disclose data to the underlying product. If, on the other hand, one contractor pays another contractor to develop a new item, the purchasing contractor, to some extent, is paying for the expertise of the developing contractor and, if so, is likely to acquire the rights to manufacture or release and disclose the data to someone else to manufacture. In the event funds are mixed in such a way that no clear allocation of funds from either party to the development of a segregable item can be determined, the parties should agree to the rights to be accorded each party. The same applies to the government in contracting with its suppliers.

When entering into a contract with a supplier for which the government will fund directly a portion of the development costs, the government must evaluate whether its contribution is substantial enough to warrant the government's unlimited rights to use, release or disclose technical data pertaining to that item. The Department of Defense should establish by policy negotiation objectives to be used as guidance in determining whether the government should acquire rights when the contractor would be entitled to retain them and the trade-off when paying for some portion of the development. Such guidance should factor into account the number of items to be purchased in the future, the amount of funding contributed by the government, if any, and other variables that would take into account the benefit to be achieved by the government acquiring unlimited rights to use, release or disclose such data. The conferees agree that such guidance should also provide that, with exception, the government should not require a contractor to provide technical data relating to commercial products, except that data necessary for maintenance, repair and training.

Notwithstanding the above, the government should continue to evaluate, in determining which contractor should receive a contract, whether the government will have the ability to compete the item in future acquisitions—either through the acquisition of data rights or a requirement to develop alternative sources.

The conferees agreed to make the provisions of this section applicable in 210 days. The Department of Defense is required to issue proposed regulations within 90 days and final regulations within 180 days. This will allow the public to comment on the proposed regulations, as well as review the final regulations 30 days prior to their effective date. The conferees hope that with the requirement to publish the final rules 30 days before they become effective the public will have the opportunity to review the regulations as they have been adjusted from the initial proposed regulations, prior to their becoming effective. Finally, the amendment would clarify that the validation procedures required under this section apply only as to technical data delivered under contracts entered into after the effective date of this Act. As to data required to be delivered under contracts entered into prior to the effective date, the standards in effect on the date the contract was entered into continue to apply.

The conferees also agreed to the Senate provision requiring notification to a contractor that technical data delivered with restricted rights was released or disclosed under section 2320(D). The conferees wish to make clear that the notification need not be made prior to the government's release, but should be made as soon as reasonably possible.

Recovery of costs to provide technical data (sec. 954)

The House amendment contained a provision (sec. 935) that would authorize the government to charge those who do not need the technical data to bid on a government contract an amount equal to the true administrative cost of searching for and reproducing the data. The provision would require the release of data at no additional cost to any requestor who is a U.S. citizen or U.S. corporation that will certify that it needs the data in order to bid on or perform a government contract. In addition, the provision would authorize the Defense Department organization that responds to the request to retain those amounts recovered under this section.

The Senate bill contained no similar provision.

The Senate recedes with an amendment deleting the provision in the House amendment specifying that the fees established under this section may not exceed those established under section 9701 of title 31. Because that section related to user fees, which are consistent with the cost recovery allowed under this section, the conferees concluded the reference was confusing and unnecessary. The amendment would also provide that the definition of technical data is the same as provided under section 2302 of title 10, United States Code, and would clarify that this provision is not intended to prevent the government from requiring contractors to provide a refundable bond in order to secure technical data.

This provision is not intended to require the agency to establish new procedures for release of technical data packages with bid sets, and the conferees strongly advocate the continuation of the existing procedures for releasing technical data to bidders at the time bid sets are provided. The conferees are aware of numerous instances, however, when extraordinary volumes of technical data have been requested when the requestor did not require the data to bid on a government contract or to determine whether it could bid on a future requirement. The conferees agreed that in such cases the government ought to be able to recover the full cost of dedicating personnel and equipment to provide such data.

This provision is also not intended to have an affect on the standards for releasing data. The Department of Defense shall continue to determine releasability based on existing law, and this provision relates only to the fees which the government may change once a determination as to releasability is made.

Comparable budgeting for similar systems (sec. 955)

The House amendment contained a provision (sec. 904) that would require the Secretary of Defense, in preparing the defense budget for any fiscal year, (1) to identify each common procurement weapon system included in the budget; (2) to take all feasible steps to minimize variations in procurement unit costs of such common procurement weapon systems; and (3) to identify and to justify in the budget any variations in procurement unit costs for common procurement weapon systems.

The Senate bill contained no similar provision.

The Senate recedes.

Funding of procurement technical assistance programs serving distressed areas (sec. 956)

The House amendment contained a provision (sec. 915) that would amend section 2411(2) of title 10, United States Code, to authorize the Department of Defense to pay up to 75 percent of the cost of running a technical assistance program sponsored by any state, local government or private, nonprofit organization, if the program serves an area with an unemployment rate one percent higher than the national average or per capita income of 80 percent or less of the state average.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would clarify the term "area" to be served by the program to mean: any civil jurisdiction, group of civil jurisdictions, or civil jurisdiction or group of jurisdictions excluding any civil jurisdiction or jurisdictions, served by the procurement assistance program. In addition, the amendment would clarify that a procurement technical assistance program would be eligible for 75-percent funding by the Department of Defense, if it solely serves a distressed area (an area that, as a whole, meet the requirements established under the section). Thus, a state or local government or private nonprofit organization may operate more than one technical assistance program: one solely serving a distressed area that would qualify for 75-percent funding and another serving an area not considered distressed that would be eligible for 50-percent funding.

Subcontractor information to be provided to procurement technical assistance centers (sec. 957)

The House amendment contained a provision (sec. 937) that would require defense

contractors awarded a contract in excess of $100,000 in that year to provide to the procurement technical assistance centers a listing of the name, business address, telephone number, and area of responsibility of employees of the contractor responsible for issuing subcontracts.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would increase the threshold for requiring contractors to provide the information to $500,000. The conferees agreed that the $500,000 threshold, which is consistent with the threshold for requiring small business subcontracting plans, was a more appropriate level.

LEGISLATIVE PROVISION NOT ADOPTED

Priority for domestic firms

The House amendment contained a provision (sec. 938) that would require the Department of Defense to award a contract to a U.S. firm that would provide a product domestically produced if the price offered by the U.S. firm is not more than 5 percent higher than the price of the otherwise low foreign bid.

The Senate bill contained no similar provision.

The conferees agree that every effort is needed to be made to ensure that the U.S. industrial base is not eroded by imports of cheaper foreign goods. However, the conferees acknowledge that in the defense sector the United States continues to maintain an approximate two-to-one advantage of exports over imports. In addition, the conferees expressed concern that other countries might retaliate against U.S. defense exports if the provision was adopted.

Consequently, the conferees could not reach an agreement on this issue, but have committed to holding hearings on this subject in the next session of Congress. The House recedes.

MISCELLANEOUS REPORTS

LEGISLATIVE PROVISIONS ADOPTED

Amending section 139a concerning selected acquisition reports (sec. 961)

The Senate bill contained a provision (sec. 1203) that would amend various provisions in section 139a and section 139b of title 10, United States Code, concerning Selected Acquisition Reports (SAR). The fiscal year 1986 Defense Authorization Act (Public Law 99-145) contained a provision (sec. 1201) directing the Department of Defense, the General Accounting Office and the Congressional Budget Office to recommend revisions to the SAR reports to improve their utility. The changes incorporated in section 1203 of the Senate bill were recommended by the Department of Defense and have the effect of bringing SAR reporting criteria more in line with current systems. More fundamental changes were suggested by the Department, by GAO and by CBO but were not incorporated in this section.

The House conferees intend to conduct a thorough review of the Selected Acquisition Reports during the coming year, with a goal of incorporating more sweeping revisions. The conferees judged, however, that the changes incorporated in section 1203 were constructive and should not be delayed pending a more systematic review.

The House recedes with a technical amendment.

The conferees emphasize the importance of the Selected Acquisition Reports in the oversight process and commend the Department of Defense for its efforts to improve the reports.

Report on efforts to increase contract awards to Indian-owned businesses (sec. 962)

The House amendment contained a provision (sec. 1025) that would require a report on the efforts of the Department of Defense to increase awards of defense contracts to Indian-owned businesses in accordance with the memorandum of understanding between the Department of Defense and the Small Business Administration.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the report to cover fiscal years 1986 and 1987 and delaying the reporting requirement until 1988.

Report on geographic distribution of defense contracts (sec. 963)

The House amendment contained a provision (sec. 1026) that would require a report on the distribution of contracts within geographic regions in the United States and Department of Defense efforts to reduce the disparity in the distribution of contracts by dollar value and number.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would provide that the Secretary of Defense submit a report on the efforts of the department to increase competition and enhance the defense industrial base, including efforts such as the use of technical assistance centers and other programs to assist contractors in bidding on defense contracts.

LEGISLATIVE PROVISION NOT ADOPTED

Components manufactured outside the United States

The House amendment contained a provision (sec. 804) that would require that each comprehensive annual Selected Acquisition Report (SAR) for a major defense acquisition program include information detailing the use of components manufactured outside the United States, including the dollar value and country of origin of such components.

The Senate bill contained no similar provision.

The House recedes.

TITLE X—MATTERS RELATING TO ARMS CONTROL

LEGISLATIVE PROVISIONS ADOPTED

SALT II compliance (sec. 1001)

The Senate bill contained a provision (sec. 1210) that would express the sense of the Senate that the United States should continue voluntary compliance with the central numerical sublimits on delivery systems of the strategic offensive arms agreements with the Soviet Union, provided that the Soviet Union complies with those sublimits.

The House amendment contained a provision (sec. 1061) that would deny funds to deploy weapons in excess of the numerical sublimits in the SALT II agreement unless the President certified that the Soviets had exceeded these sublimits.

The conferees agreed to accept non-binding language that incorporated the sense of the Senate provision in the Senate bill, and the definitions of the numerical sublimits in the House amendment.

The House recedes with an amendment.

Nuclear testing (sec. 1002)

The Senate bill contained a provision (sec. 1230) stating it was the sense of the Congress that the President should request advice and consent of the Senate to ratification of the Threshold Test Ban Treaty and the Peaceful Nuclear Explosives Treaty, and that he should propose to the Soviet Union immediate negotiations on a comprehensive test ban treaty.

The House amendment contained a provision (sec. 3036) that would prohibit funds from being spent on nuclear tests above one kiloton yield for one year starting January 1, 1987 unless the President certified that the Soviets had conducted a nuclear test above one kiloton after January 1, 1987, or had refused to accept and implement verification measures.

The House recedes. The conferees took this position in light of the October 10, 1986 letter from the President giving his commitment to take two important steps limiting nuclear testing.

First, he pledged to inform General Secretary Gorbachev in Reykjavik that as a first order of business for the 100th Congress, if the Soviet Union will, prior to the initiation of ratification proceedings in the Senate next year, agree to essential TTBT/PNET verification procedures which could be submitted to the Senate for its consideration in the form of a protocol or other appropriate codicil, he will request the advice and consent of the Senate to ratification of the TTB and PNE treaties. However, if the Soviet Union fails to agree to the required package of essential procedures prior to the convening of the 100th Congress, he will still make ratification of these treaties a first order of business for the Congress, with an appropriate reservation to the treaties that would ensure they would not take effect until they are effectively verifiable. He will work with the Senate drafting this reservation.

Second, he pledged to inform the General Secretary in Reykjavik that, once our verification concerns have been satisfied and the treaties have been ratified, he will propose that the United States and the Soviet Union immediately engage in negotiations on ways to implement a step-by-step parallel program—in association with a program to reduce and ultimately eliminate all nuclear weapons—of limiting and ultimately ending nuclear testing.

Military impact statement by the joint chiefs of staff on United States non-compliance with existing strategic offensive arms agreements (sec. 1003)

The Senate bill contained a provision (sec. 1220) that would require the Chairman of the Joint Chiefs to submit to Congress by October 1, 1986, classified and unclassified versions of a report on matters related to a U.S. policy on non-compliance with existing strategic offensive arms agreements. It would also withhold funds for JCS studies and analyses pending receipt of the report on October 1, 1986.

The House bill contained no similar provision.

The conferees agreed to adopt a modified version of the Senate bill, changing the date the report is due to October 15, 1986 in order to accommodate to the date of enactment of the fiscal year 1987 Defense Authorization Act.

Sense of Congress expressing support for a central role for nuclear risk reduction centers (sec. 1004)

The House amendment contained a provision (sec. 1027) expressing support for the President's willingness to negotiate an agreement with the Soviet Union establishing Nuclear Risk Reduction Centers and recommending that the U.S. center be as-

signed a central role in the coordination of federal risk reduction activities.

The Senate bill contained no similar provision.

The Senate recedes with an amendment.

The conferees strongly support the Nuclear Risk Reduction Center initiative and agree that the U.S. center should be the locus of U.S. nuclear risk reduction activities specified in any agreement that may emerge from the on-going negotiations with the Soviet Union. The conferees amended the language of the House amendment to make clear that, if an agreement with the Soviet Union establishing the centers is reached, the responsibilities of the U.S. center should include making recommendations to the President's National Security Advisor regarding additional risk reduction arrangements that might be proposed to the Soviet Union in any future negotiations on this subject.

LEGISLATIVE PROVISIONS NOT ADOPTED

Strategic arms agreements

The Senate bill contained a provision (sec. 1211) that would express the Sense of the Senate that, consistent with international law, it is not in the U.S. national interest to continue to comply with any strategic arms agreements that the Soviet Union is violating

The House amendment contained no similar provision.

The Senate recedes.

TITLE XI—MATTERS RELATING TO NATO

LEGISLATION PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Modernization of NATO's southern flank (sec. 1101)

The Senate bill contained a provision (sec. 1205) that would authorize the President to transfer excess equipment from Department of Defense stocks, at no cost, to those member nations of NATO's southern flank which are eligible for U.S. security assistance and are integrated into NATO's military structure, for the purpose of helping to modernize the defense capabilities of these nations. Prior notification is required for each proposed transfer including a certification of need and an assessment of their impact of the transfer on the U.S. Armed Forces. It is the committee's intent that equipment be transferred which is dated by our standards, but which could still make a military contribution to the defense of NATO's southern flank.

The authorization would provide that:

(1) The equipment to be transferred be that which is excess to the requirements of U.S. active duty forces, or programmed to be excess;

(2) The security assistance eligibility in the legislation be limited to those countries which are eligible for Foreign Military Sales credit and/or participation in the Military Assistance Program; and

(3) (The President grant such equipment on the basis of the military requirements of the southern flank nations and the contribution such transfers will make to the defense of the southern flank of NATO.

The conferees understand that, at the present time, this provision would authorize the transfer of equipment to Greece, Portugal, and Turkey.

The House amendment contained no similar provision.

The House recedes with amendments.

The authority of this provision is placed under the framework of the Foreign Assistance Act of 1961, as amended, for fiscal years 1987 and 1988 only. The conferees, expect that the Administration will submit to the Foreign Relations Committee of the Senate and the Foreign Affairs Committee of the House of Representatives a proposal for permanent authority in the fiscal year 1988 budget request for foreign assistance.

For the purposes of this authority, the conferees intend that items such as F-4, A-7, and T-33 aircraft, M-48A1 tanks and M114A2 howitzers, or other equipment of comparable military utility are illustrative of the types of equipment that could be transferred.

In providing this authority, the conferees intend that transfers to recipient nations be consistent with the current policy framework for the Eastern Mediterranean region that is established in section 620C of the Foreign Assistance Act of 1981, and amended.

Cooperative logistics arrangements in NATO (sec. 1102)

The Senate bill contained a provision (sec. 1206) that would authorize the Secretary of Defense to enter into bilateral or multilateral NATO Weapon System Partnership Agreements with NATO member nations, under the aegis of the NATO Maintenance and Supply Organization (NAMSO), for the cooperative logistic support of weapon systems fielded in Europe by the United States and one or more NATO ally. Each partnership would be jointly managed by the participating nations, and administrative costs would be equitably shared among them. The transfer of defense acticles or defense services to NAMSO for the purposes of a Weapon System Partnership Agreement would be in accordance with the provisions of the Arms Export Control Act.

The House amendment contained no similar provisions.

The House recedes with an amendment specifying that defense articles or defense services transferred to NATO member nations, as well as NAMSO, would be in accordance with the provisions of the Arms Export Control Act.

NATO Cooperative Projects (sec. 1103)

The Senate bill contained a provision (sec. 1207) that would amend section 27 of the Arms Export Control Act to expand authority for NATO cooperative armaments projects to other friendly countries.

The House amendment contained no similar provision.

The House recedes with two amendments. The first amendment would provide that the reporting requirements of Section 36(b) of the Arms Export Control Act would continue to apply for all sales conducted under the authority of section 27 of the Arms Export Control Act for countries other than NATO member nations. The second amendment would specify that the existing reporting requirement in section 27 requires a cost estimate of revenue loss incurred by a waiver of various FMS surcharges under sections (21(e) (1)(d) and 43(b) of the Arms Export Control Act.

For fiscal year 1987, it is the intention of the conferees that, in addition to the NATO countries, the four countries eligible for cooperative projects under section 27 will be Australia, Israel, Japan, and the Republic of Korea.

In adopting the amendment to section 27, the conferees intend in no way to alter the exclusive legislative jurisdiction of the Foreign Relations Committee of the Senate and the Foreign Affairs Committee of the House of Representatives over the Arms Export Control Act.

Acquisition and cross servicing agreements (sec. 1104)

The Senate bill contained a provision (sec. 1208) that would extend the terms of the NATO Mutual Support Act to countries with which the United States has defense alliances or conducts joint exercises, or which allow the stationing or positioning of U.S. forces or materiel, by authorizing the Secretary of Defense to enter into agreements with such countries for the acquisition and reciprocal provisions of logistical support, supplies and services. The Secretary may designate a country, after consultation with the Secretary of State, if he determines that the designation is in the national security interest of the United States.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to notify the Committees on Armed Services in the Senate and the House of Representatives and the Senate Foreign Relations Committee and the House Foreign Affairs Committee 30 days prior to the designation of a non-NATO country for cross-servicing agreements. The conferees believe that the designation of such countries should be examined by the relevant committees on the Congress on a case-by-case basis. The conferees urge the Secretary of Defense to exercise caution in extending this authority outside of NATO. The conferees understand that for fiscal year 1987, this authority will be extended to acquisition and cross-servicing agreements with Egypt, Israel, Japan, and the Republic of Korea only.

Cooperative research and development with non-NATO allies and other friendly countries (sec. 1105)

The Senate bill contained a provision (sec. 1209) that would allot up to $40 million of funds authorized in section 201 of the Act for cooperative R&D projects with major non-NATO allies. The provision would define a "major non-NATO ally" as "a country with which the United States has a mutual security treaty or mutual security assistance treaty or a country which shares with the United States a mutual commitment to freedom and individual freedoms."

The House amendment contained no similar provision.

The House conferees felt the definition of non-NATO ally was too broad and vague. The House recedes with an amendment changing the definition to: "any country designated as an allied country by the Secretary of Defense with the concurrence of the Secretary of State," and with technical amendments.

TITLE XII—DEPARTMENT OF DEFENSE MANAGEMENT

MANAGEMENT OF CERTAIN PROCUREMENT MATTERS

LEGISLATIVE PROVISIONS ADOPTED

Contracts for overhaul, repair, and maintenance of naval vessels (sec. 1201)

The House amendment contained a provision (sec. 801) that would amend section 7799a of title 10, United States Code, to require the Secretary of the Navy to consider all costs of performing overhaul, repair, or maintenance work on a combatant or escort naval vessel in an area outside the homeport of that vessel (including costs to the Navy that are subject to estimation before contract award) in the evaluation of bids or

proposals for a contract to perform such work.

The House amendment would also require the Secretary of the Navy to award contracts for overhaul, repair, or maintenance work on naval vessels of six months or less duration to a contractor able to perform the work in the vessel's homeport, provided that adequate competition is available among firms able to perform the work in the vessel's homeport.

The House amendment would also repeal section 8104 of the Department of Defense Appropriations Act, 1986 (section 101(b) of Public Law 99-190), which provides that none of the funds available to the Department of the Navy may be used to enter into any contract for the overhaul, repair, or maintenance of any naval vessel on the West Coast of the United States which includes charges for interport differential as an evaluation factor for award.

The Senate bill contained no similar provision.

The conferees agreed to the House provision with an amendment. Before contract award the Secretary of the Navy would be required to consider the foreseeable costs of moving the ship and its crew from the homeport to the outside area and from the outside area back to the homeport at the completion of the contract work in the evaluation of bids or proposals for a contract to perform overhaul, maintenance, or repair on a naval vessel outside the vessel's homeport.

The Senate recedes with an amendment.

Handling of hazardous waste generated during repair or maintenance of naval vessels (sec. 1202)

The House amendment contained a provision (sec. 802) that would require that the Secretary of the Navy ensure that contracts entered into for repair or maintenance of a naval vessel include the following provisions.

(1) That types and amounts of hazardous wastes that are expected to be generated during performance of repair or maintenance be identified in the contract;

(2) That the contractor be responsible for the removal, handling, storage, transportation, and disposal of hazardous wastes generated during performance of repair or maintenance; and

(3) That the contractor be compensated for the duties listed in paragraph (2).

The House amendment would further provide the Secretary of the Navy shall renegotiate the contract if the contractor, during the performance of repair or maintenance under the contract, discovers hazardous wastes different in type or amount from those identified in the contract and if such hazardous wastes originated on the naval vessel on which the repair or maintenance is being performed, including any waste materials rendered hazardous as a result of the performance of the work required by the contract.

The House provision would also require each naval vessel, or Supervisor of Shipbuilding in lieu of each vessel, at or upon which hazardous wastes are produced or from which hazardous wastes are removed, to obtain an identification number in accordance with regulations issued by the Environmental Protection Agency.

The Senate bill contained no similar provision.

The conferees agreed to the House provision with two amendments. First, the Secretary of the Navy would be required to renegotiate the contract if the contractor, during performance of the contract, discovers hazardous wastes different in type or amount from those identified in the contract and if such hazardous wastes originated on the naval vessel on which the repair or maintenance is being performed.

Second, the conferees agreed to delete the provisions that would require naval vessels or Supervisors of Shipbuilding to obtain hazardous waste identification numbers.

The Senate recedes with an amendment.

Limitation on transfer of certain technical data packages (sec. 1203)

The House amendment contained a provision (sec. 803) that would authorize, under certain conditions, the use of Department of Defense appropriations for the transfer of a technical data package from any U.S. government-owned and operated defense plant manufacturing large caliber cannons to a friendly foreign government. It would further authorize such funds to be used to assist a foreign government in producing a defense item currently being manufactured or developed in such plants.

The Senate bill contained no similar provision.

The Senate recedes.

Requirement concerning transportation of members of the armed forces by chartered aircraft (sec. 1204)

The House bill contained a provision (sec. 805) that would improve the procedures for ensuring the safety of passenger aircraft chartered by the Department of Defense for the transportation of military personnel. The provision would require airlines to meet certain safety requirements prior to contracting with the Department of Defense and would provide for a series of safety inspections after contract award and during the operation of chartered aircraft. The Secretary would also be required to establish a review board that would make recommendation on suspension and reinstatement of air carriers if involved in a fatal or serious accident or if found in violation of Federal Aviation Administration regulations.

The Senate bill contained no similar provision.

The Senate recedes to the House with an amendment.

The House provision contained a section that would require a preflight safety inspection of all aircraft subject to this provision be conducted not more than 72 hours before each flight to ensure a high degree of flying safety. The Senate amendment would require a preflight safety inspection anytime during the operation of but not more than 72 hours before each internationally scheduled charter mission departing the United States and would require these same inspections for domestic charter missions to the greatest extent practical.

Fuel sources for heating systems on military installations (sec. 1205)

The Senate bill contained a provision (sec. 2181(a)) that would restrict the Secretary of a military department from converting a heating facility at any United States military facility in Europe from coal-fired to any other energy source unless that conversion is required by the host government or is life cylce cost effective. If the Secretary of the military department makes such a determination, conversion could not begin until 30 days after notification of Congress.

The House bill contained a provision (sec. 806(c)) that would direct the Secretary of a military department to convert, where practical, from coal-fired heating plants to district heat utility systems at United States military facilities in the Federal Republic of Germany.

The House recedes.

The Senate bill contained a provision (sec. 2181(b)) that would require the Secretary of Defense, where he determines it to be cost effective, to use coal produced in the United States to operate heating facilities at military installations in the United States. In addition, the Secretary of Defense would be required to take such actions as may be necessary to implement the program for rehabilitation and conversion of current steam heating plants to coal burning facilities set forth in section 8110 of the Defense Appropriations Act, 1986 (as contained in section 101(b) of Public Law 99-190) and to make maximum use of private venture capital and long-term contracting. In achieving the coal consumption target of 1.6 million short tons coal a year over current levels set forth in section 8110, the Secretary of Defense is required to consume at least 300,000 short tons of anthracite coal. The Senate bill would also require the Department of Defense to purchase at least 300,000 tons of anthracite coal in fiscal year 1987. Finally, the Secretary of Defense would be required to make an annual report to Congress on his actions to implement the program set forth in section 8110.

Section 806(a) and (b) of the House amendment would amend section 2689 of title 10 United States Code to lift all restriction on the use of oil and gas for heating systems at military installations in the United States and repeals the mandatory coal consumption levels for new and replacement heating systems at military installations set forth in section 8110.

The conferees agreed to accept the House provision, but with the recognition of a continuing need to ensure secure sources of domestic energy, such as coal, in support of national security and defense readiness interests. Accordingly, the conferees direct the Department of Defense to pursue a vigorous program to increase the use of U.S. coal at its CONUS facilities wherever cost-effective. This program should make a maximum use of private venture capital, expertise and initiative through third party contracting to maximize benefits to both private and public interests.

The Senate recedes.

The Senate bill contained a related provision (sec. 2186B) that would amend section 2690 of title 10, United States Code, requiring that each new heating or cogeneration system that is installed or constructed at any military installation which requires 100 million British thermal units input per hour or more shall have multiple fuel capability unless the Secretary of the military department concerned waives this requirement for the following reasons:

(1) Local restrictions, or

(2) Costs make the installation or construction of solid or dual fuel equipment infeasible, and

(3) He notifies the appropriate committees of Congress in writing of the waiver and the reasons for exercising such waiver authority.

The Senate recedes.

Defense Investigative Service investigation of special access program contractors (sec. 1206)

The House bill contained a provision (sec. 808) that would require the Director of the Defense Investigative Service to conduct inspections of the classified documents control system at least every six months of

each special access program contractor. It would also require the Secretary of Defense to submit an annual unclassified report to Congress that would certify contractor compliance with established procedures, would describe failures to comply, and identify planned corrective action.

The Senate bill contained no similar provision.

The Senate recedes with an amendment.

The conferees agreed the protection of classified material should be considered among the Department of Defense's highest priorities. While oversight of the security of classified material at most defense contractors is the responsibility of the Defense Investigative Service, for programs designated as requiring special access, oversight is retained within the military department responsible for such programs.

The Senate amendment would require the Defense Investigative Service conduct a one-time review of security administration of Department of Defense special access programs at all Department of Defense contractors involved in such programs. The review would include the frequency and adequacy of security inspections conducted by the Department of Defense of these contractors.

The amendment would also require the Secretary of Defense to provide an unclassified report to the Committees on Armed Services of the Senate and the House of Representatives by May 1, 1987.

Finally, the amendment authorizes the Director of the Defense Investigative Service, after consultation with the Secretary of Defense, to conduct inspections of such programs as he deems appropriate, unless otherwise directed by the Secretary.

Contract goal for minorities (sec. 1207)

The House amendment contained a provision (sec. 1032) that would provide for not less than ten percent of each of the amounts appropriated for the Department of Defense in procurement; research, development, test and evaluation; military contruction; and operations and maintenance to be set-aside for small business concerns owned and controlled by socially and economically disadvantaged individuals, historically Black colleges and universities; and minority institutions. It would provide for technical assistance to potential contractors, competitive procedures and advance payments. The Secretary of Defense would be required to submit a report to Congress by May 1 of each year on the compliance with this section. The program would terminate in five years.

The Senate bill contained no similar provision.

The Senate recedes to the House provision with amendments that would replace the mandated 10% set-aside with a goal of 5% of the total combined amount of contracts and subcontracts for the next three years. Further, the amendment would allow the Department of Defense to enter into contracts using less than full and open competitive procedures, but paying a price not to exceed the "fair market" value by more than 10%. The technical assistance program would be further defined to ensure that real strides would be made in assisting these firms.

Penalties would be imposed on any person found misrepresenting the status of a business under this section. They could receive a fine of not less than $10,000 or imprisonment of not less than one year, or both.

The Secretary would be directed to report to Congress twice a year on this program; once in May of each year on the progress made to date and again in October on the compliance with the goals for that fiscal year.

The conferees further agree that this program needs time to operate before a determination can be made as to its success or failure, and the conferees agree that the issue of mandating any specific amount of set aside or increasing the 5% goal from that agreed to in this act shall not be considered by them in the fiscal year 1987, 1988, 1989 Defense Authorization or Defense Appropriations bills or the Continuing Resolutions.

Manpower reports on major defense acquisition programs (sec. 1208)

The Senate bill contained a provision (sec. 441) that would require the Secretary of Defense to report to the Committees on Armed Services of the Senate and House of Representatives, at least 90 days in advance of a decision to proceed with full-scale engineering development or with production and deployment of a major weapon system, on the manpower requirements of the system.

The House amendment included no similar provision.

The House recedes with an amendment making the provision applicable only to decisions taken after December 31, 1986.

ECONOMY AND EFFICIENCY

LEGISLATIVE PROVISIONS ADOPTED

Increase in threshold applicable to statutory contracting-out procedures (sec. 1221)

The Senate bill contained a provision (sec. 1003) that would amend section 502(d) of the Defense Authorization Act, 1981 (10 U.S.C. 2304 note) to raise the threshold for the performance of full cost studies from 40 to 50 or fewer Department of Defense civilian employees.

The House amendment contained no similar provision.

The conferees agreed to raise the threshold for the performance of full cost studies to 45 or fewer Department of Defense civilian employees.

The House recedes with amendment.

Prohibition on contracts for performance of firefighting and security functions (sec. 1222)

The Senate bill contained a provision (sec. 1004) that would extend through fiscal year 1987 the current prohibition on the contracting out of firefighting functions currently being performed by Department of Defense civilians. The Senate provision would also require a report to Congress from the Department of Defense and United States Fire Administration reviewing the performance standards, inherently governmental activities within the firefighting function, and an estimate of cost savings associated with the contracting out of such functions over a five year period.

Section 807 of the House amendment would amend chapter 159 of title 10, United States Code, to permanently prohibit the contracting out of firefighting and security guard functions currently being performed by Department of Defense civilians except for:

(1) Contracts at locations outside the United States;

(2) Contracts at Government-owned but privately operated installations; and

(3) Contracts (or the renewal or contracts) in effect on September 24, 1983.

The conferees agreed to the House provision for a permanent prohibition on firefighting functions currently being performed by Department of Defense civilians. The conferees also agreed to extend the current prohibition on security guard functions currently being performed by Department of Defense civilians for one additional year with the provision that the Secretary of Defense may contract out new security guard functions if he determines that it will not have an adverse effect upon installation security, safety, and readiness. The conferees agreed to strike section 1233 of the Defense Authorization Act, 1986 (Public Law 99-145) and adopted the following language providing general policy guidance:

Except as otherwise provided by law, the Secretary of Defense shall procure each supply or service necessary for or beneficial to the accomplishment of the authorized functions of the Department of Defense (other than functions which the Secretary of Defense determines must be performed by military or government personnel) from a source in the private sector if such a source can provide such supply or service to the Department at a cost that is lower (after including any cost differential required by law, executive order, or regulation) than the cost at which the Department can provide the same supply or service.

The Senate recedes with amendments.

Realistic and fair cost comparisons in determinations relating to contracting out the performance of certain Department of Defense functions (sec. 1223)

The Senate bill contained a provision (sec. 1005) that would require the Secretary of Defense to ensure that all costs (including quality assurance, technical monitoring of performance, liability insurance, employee retirement and disability benefits, and all other overhead costs) considered in determinations relating to contracting out the performance of certain Department of Defense functions be realistic and fair.

The House amendment contained no similar provision.

The conferees agreed to amend the Senate provision to read that the Secretary of Defense "shall" ensure that such costs be considered and are fair and realistic."

The House recedes with amendment.

Requirements relating to proposed increased utilization of civilian personnel (sec. 1224)

The Senate bill contained a provision (sec. 422) that would prohibit conversion of any commercial or industrial type activity that is being performed by a private contractor on the date of enactment of this Act to performance by Department of Defense civilian employees except:

(1) In time of war, national emergency declared by Congress or the President, or upon a written declaration of the Secretary of Defense that such conversion is required in the interest of national security interests; or unless

(2) The Secretary of Defense notifies Congress of such conversion and provides a detailed cost study that compares all relevant direct and indirect costs of contractor and Department of Defense civilian performance of such activity over a five year period.

The House amendment contained no similar provision.

The House recedes with an amendment that would require that an estimate of costs of performance of any commercial or industrial activity (including workload) being performed by private contractors by more than 50 employees which is to be returned to in-house performance be prepared and that

the Secretary of Defense transmit periodic compilations of these reports to the Committees on Armed Services of the Senate and House of Representatives.

LEGISLATIVE PROVISIONS NOT ADOPTED

Prevailing wage provisions

Section 1002 of the Senate bill contained a provision that would exempt all military construction contracts of $250,000 or less from the provisions of the Davis Bacon Act (40 United States Code 276a(a)), which currently requires the Federal government to pay local prevailing wage rates on all contracts in excess of $2,000, and would prevent severing of contracts for the purpose of avoiding the proposed threshold.

Section 2715 of the House amendment contained a similar provision that would amend section 2852 of Title 10, United States Code, for fiscal year 1987 to raise the threshold for military construction and family housing contracts from $2,000 to $25,000; to prevent severing of contracts to avoid the new threshold; and to establish the private right to seek court enforcement of the contract splitting language.

The Senate recedes from its provision.

The House recedes from it provision.

The conferees agree to delete each of the differing House and Senate prevailing wage provisions, resulting in no change in current law.

TITLE XIII—GENERAL PROVISIONS

FINANCIAL MATTERS

LEGISLATIVE PROVISIONS ADOPTED

Transfer authority (sec. 1301)

The House amendment contained a provision (sec. 1001) that would permit the transfer of an authorization made available in the fiscal year 1987 Defense Authorization Act to any other authorization made available in the Act upon determination by the Secretary of Defense that such a transfer would be in the national interest. The provision would provide the authority for reprogrammings involving the transfer of authorization between authorizations as set out in bill language. The authority to transfer could only be used to provide authorization for higher priority items than the items from which authorization was transferred and could not be used to provide authorization for an item that was denied authorization by the Congress. The Secretary of Defense would be required to promptly notify the Congress of transfers. The total amount of transfers would be limited to $2 billion.

The House provision would also provide that a transfer made pursuant to this section would transfer the obligation limitation associated with the authorization.

The Senate bill contained no similar provision.

The Senate recedes.

General authorization for civilian pay contingencies (sec. 1302)

The Senate bill contained a provision (sec. 1201) that would place contingencies on civilian pay and other matters.

The House amendment contained similar provisions (sec. 201(b) and section 301(b)).

The House recedes.

Foreign currency (sec. 1303)

The Senate bill and the House amendment each contained a provision (sec. 306 and sec. 202, respectively) that would authorize to be appropriated $3.5 million for the purchase of foreign currencies to carry out programs for the Department of Defense.

The conferees have placed this provision in the general provision section.

Special Defense Acquisition Fund (sec. 1304)

The Senate bill contained a provision (sec. 1213) that would increase to $1.1 billion the capitalization of the Special Defense Acquisition Fund (SDAF). The current ceiling is $1.0 billion.

The House amendment contained no similar provision.

The conferees recommend increasing the SDAF ceiling to $1.07 billion.

The contract authority granted in this section is available only in such amounts as provided in appropriations acts.

Limitation on obligation of fiscal year 1985 and fiscal year 1986 funds (sec. 1305)

The House amendment contained a provision (sec. 4007) that would provide that $4.4 billion of funds appropriated for fiscal years 1985 and 1986 and which remain available for obligation may not be obligated.

The Senate bill contained no similar provision.

The conferees agreed to a provision that would limit the obligation of approximately $4.4 billion of funds. The amount of the limitation would be reduced, on an account year basis, by rescissions made in appropriations bills for fiscal year 1987.

The Senate recedes with an amendment.

Limitations on obligations contained in Titles I–III (sec. 1308)

The House amendment contained limitations on obligations that could be incurred from various budget accounts for fiscal year 1987 in sections 101(b), 102(a)(2), 102(b)(2), 102(c)(1), 102(c)(2), 102(d)(2), 102(e)(2), 103(b), 104(b), 106(b), 201(c), and 301(c).

The Senate bill contained no similar provision.

The conferees agreed to include obligation limitations, where consistent with conference agreements, as contained in the House amendment but included a provision that would provide that:

(1) The limitations would apply only to funds directly appropriated or funds transferred by provisions in appropriations acts that explicitly identify the funds transferred; and

(2) The limitations would not apply to obligations from an account that would be reimbursed from other accounts or from sources outside the government.

The Senate recedes with an amendment.

Codification of requirement for periodic reports on unobligated balances (sec. 1307)

The Senate bill contained a provision (sec. 1202) that would amend section 1407 of the Department of Defense Authorization Act, 1986 (Public Law 99-145) to require that the required reports on unobligated balances be submitted each year not later than March 1, April 25, and September 1.

The House amendment contained a provision (sec. 932) that would amend chapter 131 of title 10, United States Code, by inserting a new section containing the text of section 1407 of the Department of Defense Authorization Act, 1986.

The conferees agreed to the House provision, with an amendment to require that the required reports be submitted each year not later than February 1, April 25, and August 15.

The Senate recedes with an amendment.

Reports on inflation budgeting (sec. 1307 and sec. 1308)

The House amendment contained five provisions relating to budgeting for defense inflation.

Section 928 would require that the President's budget submission include separate identification in each budget account of amounts requested to offset inflation: limit the total request for inflation on all defense purchases to the amount that would be estimated with the GNP deflator projections in the President's budget; require separate identification of inflation amounts by account for the two fiscal years immediately preceding the fiscal year for which the budget request is made; require justification for use of any inflation index other than the GNP deflator; require the Secretary of Defense to identify the effect of any Congressional programmatic adjustments on inflation estimates; establish a defense inflation fund in the Treasury to contain appropriations for inflation on Selected Acquisition Report programs and mandate reporting requirements for the funds; and limit disbursements from the fund to inflation costs as determined under the economic price adjustment clauses that would be required by section 929 of the House amendment. This provision would become effective with respect to fiscal year 1988.

Section 929 would require the use of economic price adjustment clauses in contracts for major Selected Acquisition Report programs and include limitations on the terms of such clauses. This provision would become effective with respect to contracts entered into 180 days after enactment.

Section 930 would require periodic reports from GAO on the implementation of sections 928 and 929, and section 931 would require a GAO report on a financial management system for DOD.

Section 939 would preclude the Secretary of Defense from obligating or expending appropriations in excess of the amount needed to carry out a program and, more specifically, preclude the Secretary from obligating appropriations for a program unless a contract relating to the program had been entered into within three years after the appropriation became available.

The Senate bill contained no similar provisions.

The conferees agreed to require two reports from the Secretary of Defense in order to obtain information on inflation estimates, appropriations to offset estimated inflation, and actual inflation experience in the defense budget and defense contracts.

The Secretary of Defense would be required to report annually on amounts appropriated for the fiscal year in progress, and the preceding two fiscal years, to offset estimated inflation in each budget account and to compare amounts appropriated for inflation with estimated requirements at the time the report is submitted. In addition, the report would include an explanation of all variances between amounts originally appropriated for inflation and current estimates of inflation requirements in each account and specifically identify the disposition of any excess appropriations and the source of funds used to make up for any deficient appropriations.

In addition, the Secretary of Defense would be required to report on February 1, 1987, on the current incidence and types of economic price adjustment clauses in contracts for weapon systems subject to Selected Acquisition Report reporting requirements. The Secretary would also be required to provide information on the methodology used in determining estimated and actual inflation for defense budget accounts and on actual inflation in contracts for weapon systems subject to Selected Acquisition Report reporting requirements that contain economic price adjustment clauses.

Finally, the Secretary would be required to compare inflation in such contracts with inflation for major weapon system budget accounts determined using the methodology as reported by the Secretary. The conferees expect this report to reflect a careful analysis using numerical examples taken from actual contracts and historical experience with actual inflation indices.

The Senate recedes on sections 928 and 929 of the House amendment with amendments. The House recedes on sections 930, 931 and 939.

Debt collection (sec. 1309)

The House amendment contained a provision (sec. 1002) that would require the Secretary of Defense to enter into contracts for collection services to recover indebtedness owed to the United States Government, arising out of activities related to the Department of Defense and delinquent more than three months. The authority to enter into such contracts would be subject to the availability of appropriations. In any such contract, the collector would be required to submit a status report to the Secretary on his success in collecting such debt at least every six months.

The House amendment also would authorize the Secretary to report any such debt of more than $100, which is delinquent more than 31 days, to consumer reporting services.

The Senate bill contained no similar provision.

The Senate recedes.

Contingency reduction in authorization levels (sec. 1310)

The House amendment contained a provision (sec. 4005) that would shift the pay date for military personnel from the last day of the month to the first day of the following month effective in September, 1987, thereby lowering the outlays projected for fiscal year 1987 by approximately $2.9 billion.

The Senate bill contained no similar provision.

The Senate recedes with an amendment. The conferees agreed to a provision that would reduce authorizations in this bill by $6.6 billion unless an act or resolution making appropriations for the Department of Defense implements at least one of two actions that would lower outlays in fiscal year 1987. The authorization reduction of $6.6 billion would reduce estimated outlays by $2.9 billion. The two actions are (a) a delay in the pay date for military personnel from the last day of the month to the first day of the following month, or (b) a reduction in the current level of progress payments for defense contractors.

In the absence of one of the actions, the provision would:

Reduce the military pay raise in the conference report from 3% on January 1 to 2%;

Reduce the conference report authorization for procurement by $3.0 billion;

Reduce the conference report authorization for RDT&E by $1.2 billion;

Reduce the conference report authorization for O&M and Stock Funds by $1.6 billion;

Reduce the conference report authorization for military construction and family housing by $166 million; and

Reduce the conference report authorization for Department of Energy National Security programs by $167 million.

Other than reducing the military pay raise from 3% to 2%, the contingency reductions would not be allocated to specific programs. The reductions would simply be general reductions to the Procurement, R&D, O&M, Military Construction and the Department of Energy titles of the bill.

The conferees stress that they adopted a contingent reduction because of the unrealistic budget authority to outlay ratio implied in the spending targets incorporated in the fiscal year 1987 budget resolution. The budget resolution requires unachievable reductions in outlays in light of the target for budget authority. The conferees found it impossible to meet both the budget authority and outlay targets without imposing unacceptable reductions on readiness accounts or resorting to gimmicks.

The conferees decided not to use the budgetary gimmick of delaying the military pay data to meet the budget resolution targets. A contingent reduction in authorization levels was adopted by the conferees to illustrate the types of reductions in defense spending that would be necessary to meet the fiscal year 1987 outlay target for National Defense in the fiscal year 1987 budget resolution. The conferees expressed the hope that the budget resolutions for fiscal year 1988 and beyond will have a more realistic combination of budget authority and outlay targets that do not force Congress to choose between disproportionate reductions in faster-spending personnel and readiness accounts and the use of budgetary gimmicks that make no meaningful contribution to deficit control and which, in fact, may exacerbate the problem of deficit control in the future.

LEGISLATIVE PROVISIONS NOT ADOPTED

Reductions in authorizations

The House amendment contained a provision (sec. 4006) that would reduce authorization contained in other sections of the bill.

The Senate bill contained no similar provision.

The conferees considered the authorization reductions contained in section 4006 in agreements on the various titles and incorporated the reductions as appropriate in the authorizations provided.

The House recedes.

Report on Army Debt Collection

The House amendment contained a provision (sec. 1022) that would require the Secretary of the Army to report to the Congress within 60 days of the date of enactment on actions he had taken to collect debts reported in a December 13, 1985 General Accounting Office report.

The Senate bill contained no similar provision.

The House recedes.

Limitations on certain spending authority

The Senate bill contained a provision (sec. 1234) that would subject certain specified spending authorities in the Senate bill to the availability of appropriations.

The House amendment included a similar provision (sec. 1003) that would subject any entitlement provision of the House amendment to the availability of appropriations.

The House recedes. The conference report subjects certain specified provisions to the availability of appropriations on a section-by-section basis, as appropriate.

SPECIAL OPERATIONS MATTERS

LEGISLATIVE PROVISIONS ADOPTED

Special Operations Forces (see 1311)

The conferees determined that there are serious deficiencies in the capabilities of the United States to conduct special operations and to engage in low intensity conflicts. The conferees recognized that the current Chairman of the Joint Chiefs of Staff has brought attention to these deficiencies and has been actively seeking effective solutions. Although lauding the efforts of the Chairman of the Joint Chiefs of Staff, the conferees determined that legislation is necessary to overcome the unending resistance in the Department of Defense to necessary organizational and other reforms of special operations forces.

The conferees carefully considered the degree of specificity to include in this provision. Although several elements of this provision are more specific than may normally be expected in legislation, the conferees determined that the seriousness of the problems and the inability or unwillingness of the Department of Defense to solve them left no alternative. The action of the conference committee is fully consistent with the power provided in the Constitution for the Congress to "provide for the common Defence," The conferees determined that the failure to act forcefully in this area and at this time would be inconsistent with the responsibilities of the Congress to the American people.

Congressional Findings

The Senate bill contained a provision (sec. 1224(a)) that would present 15 congressional findings concerning deficiencies in the special operations capabilities of the United States.

The House amendment contained no similar provision.

The Senate recedes.

Assistant Secretary of Defense

The Senate bill contained a provision (sec. 1224(e)) that would establish the position of Assistant Secretary of Defense for Special Operations and Low Intensity Conflict and specify the responsibility of such official.

The House amendment contained a provision (sec. 1011(b)) that would establish the position of Director of the National Special Operations Agency and specify that such official has the rank of an Assistant Secretary of Defense.

The House recedes with an amendment to revise the principal duty of the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict.

Unified Combatant Command

The Senate bill contained a provision (sec. 1224(b)) that would:

(1) Require the President to establish a unified combatant command for special operations forces;

(2) Specify the grade of general or admiral for the commander of such command;

(3) Specify that the commander of such command shall be responsible for and shall have the authority necessary to conduct all affairs of such command relating to special operations forces, including nine specified functions;

(4) Require the commander of such command to be fully prepared to assume operational command of selected special operations if directed to do so;

(5) Assign to such command all active and reserve special operations forces of the Army, Navy, and Air Force based in the United States unless otherwise directed by the National Command Authorities;

(6) Require the President to assign special operations forces located outside the United States to the unified combatant command in whose geographic area such forces are stationed;

(7) Require special operations missions to be conducted under the operational com-

mand of the unified combatant commands in whose geographic areas such missions are to be conducted; and

(8) Require the Secretary of Defense to substantially augment the capabilities of the Office of the Secretary of Defense to provide effective policy and resource oversight of special operations forces.

The House amendment contained a provision (sec. 1011(b)) that would:

(1) Establish a National Special Operations Agency;

(2) Require the Director of such agency to be appointed from civilian life by the President, by and with the advice and consent of the Senate;

(3) Specify that the Director reports directly to the Secretary of Defense and is the principal adviser to the Secretary and the Chairman of the Joint Chiefs of Staff for all matters pertaining to special operations forces and activities;

(4) Specify the authority of the Director;

(5) Specify the titles, qualifications, and selection of three Deputy Directors of such agency;

(6) Require all special operations forces to be assigned to such agency;

(7) Authorize the Secretary of Defense to reassign forces from such agency to a combatant command;

(8) Require forces assigned to such agency to be organized as the Joint Special Operations Command;

(9) Require such command to be commanded by the Deputy Director for Operations of such agency;

(10) Require the Director of such agency to assign to each unified combatant command, subject to the approval of the commander of such command, an officer to serve as the theater special operations commander;

(11) Provide the commander of a unified combatant command with command and operational control of special operations forces assigned or allocated to such command;

(12) Provide that such operational control is to be exercised through the theater special operations, commander, except in the case of elements of the Navy assigned to fleet operations;

(13) Assign responsibility to the Director of such agency for the preparation, justification, and execution of budgets for such agency; and

(14) Authorize the Director of such agency to select, train, and assign the military and civilian personnel of such agency.

The House recedes with amendments to:

(1) Add to chapter 6 of title 10 a new section 167 dealing with the unified combatant command for special operations forces (hereinafter referred to as the "special operations command");

(2) Require all active and reserve special operations forces stationed in the United States to be assigned to the special operations command unless otherwise directed by the Secretary of Defense;

(3) Delete the requirement that the President assign special operations forces located outside the United States to the unified combatant command in whose geographic area such forces are stationed;

(4) Specify additional responsibilities of the commander of such command to conduct specialized courses of instruction for commissioned and noncommissioned officers; to establish priorities for special operations forces requirements; to acquire, as well as develop, special operations-peculiar equipment; to acquire special operations-peculiar material, supplies, and services; and to formulate, as well as submit, requirements for intelligence support;

(5) Require the commander of such command to monitor the preparedness of special operations forces assigned to other unified combatant commands to carry out assigned missions;

(6) Provide that the separate budget proposal for such command is to include funding for the development and acquisition of special operations-peculiar equipment and the acquisition of other materiel, supplies, or services that are peculiar to special operations activities;

(7) Require that, to the extent that programs and budgets approved by the Congress for special operations forces may be revised, such programs and budgets may be revised only by the Secretary of Defense after consulting with the commander of the special operations command; and

(8) Delete the requirement that the Secretary of Defense substantially augment the capabilities of the Office of the Secretary of Defense to provide effective policy and resource oversight of special operations forces.

The action of the conference committee reflected the view that the organizational arrangement for special operations forces should be institutionalized to provide long-term stability for the development of required mission capabilities. The conferees determined that the most effective organizational arrangement is the establishment of a unified combatant command for special operations forces.

The conferees agreed that the command authority provided to combatant commanders by the Goldwater-Nichols Department of Defense Reorganization Act of 1986 would substantially enhance the ability of the commander of the special operations command to correct deficiencies in the special operations capabilities of the United States. At the same time, the conferees agreed that the commander of the special operations command needs to have additional authority to control or influence resource decisions and the execution of such decisions. For this reason, the conferees agreed to require that the separate budget proposal (which is to be submitted for each combatant command by the Secretary of Defense under section 166 of title 10) for this command include funding for development and acquisition of special operations-peculiar equipment and acquisition of other material, supplies, or services that are peculiar to special operations activities. The conferees intend that the budget, after it is enacted into law, would be executed by the commander of the special operations command.

To further strengthen the resource role of the commander of the special operations command, the conferees agreed to require that authorized revisions of the programs and budgets approved by the Congress for special operations forces be made only by the Secretary of Defense after consulting with the commander. This mechanism is designed to protect special operations forces funding from reallocation by the Military Departments. The conferees determined that this mechanism was necessary to counter the low priority that the Military Departments have traditionally assigned to special operations forces funding and the tendency of the Departments to shift such funding to meet their higher priorities.

With respect to the assignment of forces to the special operations command, the conferees agreed to require all active and reserve special operations forces stationed in the United States to be so assigned unless otherwise directed by the Secretary of Defense. The conferees believed that special operations forces now assigned to the U.S. Atlantic Command and U.S. Pacific Command and stationed in the United States should continue to be assigned to those commands. Although holding this belief, the conferees determined that the law need not specify such assignments. Section 167(c) of title 10 (as added by subsection (b)) would authorize the Secretary of Defense to make these assignments if he determines that they are appropriate.

In listing ten specified functions for the commander of the special operations command, the conferees were especially mindful of the critical requirement to improve and update currently lagging strategy, doctrine, and tactics for the employment of special operations forces. Of equal concern to the conferees is the imperative to fix responsibility in one place for training of all assigned special operations forces and for the conduct of specialized courses of instruction (including supplemental language and area training) for commissioned and noncommissioned officers relating to special operations activities.

The conferees determined that there are critical deficiencies in current intelligence support for special operations forces. Accordingly, the conferees agreed that the Secretary of Defense should ensure that the intelligence requirements formulated and submitted by the commander of the special operations command receive sufficient priority to enable the effective conduct of operations.

Intelligence and Special Activities, Regulations, and Definitions

The House amendment contained a provision (sec. 1011(b)) that would:

(1) specify certain intelligence and special activities of the National Special Operations Agency that would not be authorized by this section;

(2) require the Secretary of Defense to prescribe regulations for the activities of such agency to permit operational security for forces and activities while providing effective oversight, accountability, and assignment of responsibility in the execution of such operational security measures;

(3) define special operations forces; and

(4) define special operations activities.

The Senate bill contained no similar provision.

The Senate recedes with amendments to specify certain intelligence and special activities of the special operations command that would not be authorized by this section, to require the Secretary of Defense to prescribe regulations for the activities of such command, to revise the definition of special operations forces, and to specify special operations activities.

In the absence of common service definitions regarding the composition and activities of special operations units, the conferees determined that clarification of the terms "special operations forces" and "special operations activities" was necessary. Accordingly, the conferees agreed to identify special operations forces and specify special operations activities. The principal purpose of clarifying these terms is to establish the extent of the responsibility of the commander of the special operations command for strategy, doctrine, tactics, resources, and activities.

Major Force Program Category

The Senate bill contained a provision (sec. 1224(b)(6)) that would require the Secretary of Defense to create a major force program category for special operations forces in the Five-Year Defense Plan of the Department of Defense.

The House amendment contained a similar provision (sec. 1011(b)).

The House recedes with an amendment to provide that the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict, with the advice and assistance of the commander of the special operations command, shall provide overall supervision of the preparation and justification of program recommendations and budget proposals to be included in such major force program category.

Theater Special Operations Commanders

The Senate bill contained a provision (sec. 1224(c)) that would require the commanders of the theater special operations commands assigned to the U.S. European Command and the U.S. Pacific Command to be of general or flag officer grade.

The House amendment contained no similar provision.

The House recedes with an amendment to also require the commanders of other theater special operations commands designated by the Secretary of Defense to be of general or flag officer grade.

Interagency Coordination

The Senate bill contained a provision (sec. 1224(d)) that would require the President to establish within the National Security Council a "Board for Unconventional Warfare."

The House amendment contains no similar provision.

The House recedes with amendments to establish a "Board for Low Intensity Conflict" and to codify this requirement in section 101 of the National Security Act of 1947 (50 U.S.C. 402).

The Senate bill contained a provision (sec. 1224(e)) that would express the sense of the Congress that the President should designate a Deputy Assistant to the President for National Security Affairs for Unconventional Warfare.

The House amendment contained no similar provison.

The House recedes with an amendment to title this position as Deputy Assistant to the President for National Security Affairs for Low Intensity Conflict.

Special Operations Forces Master Plan

The Senate bill contained a provision (sec. 1224(f)) that would require programs and activities under the Special Operations Forces Master Plan to be paid for with funds appropriated to the Department of Defense for such purposes.

The House amendment contained no similar provision.

The Senate recedes.

Reports to the Congress

The Senate bill contained a provision (sec. 1224(g)) that would require the President to submit by March 1, 1987 a report to the Senate and House Committees on Armed Services on the actions that have been taken to correct deficiencies identified in special operations capabilities and to implement the Senate provision.

The House amendment contained no similar provision.

The House recedes with amendments to require the Secretary of Defense to submit to the Congress not later than 120 days after the date of enactment a report on the plans of the Secretary for implementation of this section, to require the President to submit his report to the Congress (instead of the Armed Services Committees), to revise the matters to be included in the President's report, and to require the President's report to be submitted not later than one year after the date of enactment.

Transition

The Senate bill contained a provision (sec. 1224(b)) that would require the President to establish the unified combatant command for special operations forces within 180 days of the date of enactment.

The House amendment contained a provision (sec. 1011(d)) that would:

(1) Require the nomination of the Director of the National Special Operations Agency not later than 30 days after the date of enactment;

(2) Require establishment of the National Special Operations Agency not later than six months after the date of enactment;

(3) Authorize the Secretary of Defense to spend unobligated funds to carry out the House provision; and

(4) Require the Secretary of Defense to provide that the initial assignment of personnel to the National Special Operations Agency be made from headquarters staffs whose functions are rendered redundant by the establishment of such agency.

The House recedes with an amendment to authorize the Secretary of Defense to spend unobligated funds appropriated to the Department of Defense for fiscal years before fiscal year 1987 in such sums as are necessary to carry out this section and section 167 of title 10, United States Code (as added by subsection (b)), during fiscal year 1987.

Special operations airlift (sec. 1312)

The conferees agreed that elimination of special operations airlift deficiencies is deserving of the highest priority within the Department of Defense.

The House bill contained authorization of $268.3 million for service life extension of HH-53 aircraft, conversion of CH/HH-53 aircraft to PAVE LOW-enhanced configuration, and application of blade- and boom-folding modifications to PAVE LOW helicopters.

The Senate bill contained authorization for $55.0 million for HH-53 service life extension only.

The Senate recedes with an amendment to provide $106.5 million for the purpose of PAVE LOW modification. The conferees agreed to defer consideration of the application of blade- and boom-folding modification to PAVE LOW helicopters, without prejudice, until consideration of the fiscal year 1988 authorization request. Similarly, the conferees agreed to defer consideration of the House authorization of $20 million for tactical-upgrade modifications for forward-deployed HH-3 helicopters without prejudice and direct that the Air Force maintain these special operations/combat rescue aircraft in support of the unified combatant commands, with adequate logistics and modification resources, until their replacement overseas by new joint-service HH/MH-60 helicopters.

The House bill contained a provision (sec. 1012) that would require a joint-services development program for the HH-60/MH-60 special operations/combat rescue helicopter, designating the Air Force as executive agent.

The Senate recedes with an amendment that would require the Army to perform as executive agent for the HH/MH-60 program, require a single airframe capable of both land and shipboard operation for the Army, Navy and Air Force, and direct that there be maximum practicable commonality between HH/MH-60 and MH/47 avionics.

PAYMENT OF CERTAIN EXPENSES WITH RESPECT TO DEVELOPING COUNTRIES

LEGISLATIVE PROVISION ADOPTED

Authority to pay expenses of developing countries for participation in combined military exercises (sec. 1321)

The Senate bill contained a provision (sec. 1216) that would provide authority for the Secretary of Defense to pay the expenses of a developing country participating with the United States in a combined military exercise.

The House amendment has no similar provision.

The House recedes with an amendment that would allow such reimbursement, in the amount not to exceed $1.6 million in fiscal year 1987 or $13.4 million in the period of fiscal years 1987 through 1991.

Authority to pay certain expenses of defense personnel of foreign countries (sec. 1322)

The Senate bill contained a provision (sec. 1217) that would authorize the Secretary of Defense to pay the travel, subsistence and similar personal expenses of defense personnel of developing countries in connection with the attendance of such personnel at bilateral or regional meetings where their practicipation is determined to be in the national security interest of the United States. This authority currently exists for defense personnel from Latin America only.

The House amendment contained no similar provision.

The House recedes with amendment that would (1) impose a spending cap of $800,000 per year for fiscal years 1987, 1988, and 1989; (2) add a reporting requirement, and (3) grant the authority for a three-year period only.

MISCELLANEOUS REPORTS

LEGISLATIVE PROVISIONS ADOPTED

Army National Guard Reporting (sec. 1331)

The Senate bill contained a provision (sec. 1238) that would require that the Secretary of Defense require the Chief of the National Guard Bureau to develop and implement procedures to monitor the backlog of maintenance and repair projects of Army National Guard armories.

The House amendment contained no similar provisions.

The Senate recedes.

Submarine overhaul study (sec. 1332)

The Senate bill contained a provision (sec. 1235) that would require the Secretary of the Navy to conduct a study as to the desirability and feasibility of applying production line techniques for the overhaul of *Los Angeles* class submarines.

The House amendment contained no similar provision.

The Senate recedes.

Report on landing area for AV-8B harrier aircraft on Iowa class battleships (sec. 1333)

The House amendment contained a provision (sec. 1022) that would require the Secretary of Defense to submit to the Congress within six months of the enactment of this Act a report on the feasibility and benefits of removing the rear turret from an *Iowa* class battleship to create a landing area for AV-8B Harrier aircraft.

The Senate bill contained no similar provision.

The Senate recedes.

Report of cleanup of National Presto Industries (sec. 1334)

The House amendment contained a provision (sec. 1052) that directed the Secretary of Defense to investigate and report to the committees on Armed Services of the Senate and House of Representatives on the sources, origin, and responsibility for the hazardous waste contamination at the National Presto Industries, Eau Claire, Wisconsin. The Senate bill contained no similar provision.

The Senate recedes.

TECHNICAL AND CLERICAL AMENDMENTS

LEGISLATIVE PROVISIONS ADOPTED

Technical corrections (sec. 1341-1342)

The House amendment contained two provisions (sec. 4002 and 4003) that would effect technical corrections in the Department of Defense Authorization Act, 1985 (Public Law 98-525), and the Department of Defense Authorization Act, 1986 (Public Law 99-145).

The Senate bill included no similar provisions.

The Senate recedes.

Clerical amendments (sec. 1343)

The House amendment contained a provision (sec. 4001) that would effect clerical amendments in titles 10, 14, and 37, United States Code.

The Senate bill included no similar provisions.

The Senate recedes.

MISCELLANEOUS

LEGISLATIVE PROVISIONS ADOPTED

Limitation on sources of funds for Nicaraguan Democratic Resistance (sec. 1351)

The House amendment contained a provision (sec. 1044) that would restrict the source of funds for reprogramming to provide aid to the Contras to the procurement accounts. Operation and maintenance funds could not be used as the source of the reprogramming. In addition, not more than 10 percent of the total amount could be taken from ammunition procurement accounts. The Secretary of Defense would be required to submit a report to Congress describing the source of these funds.

The Senate recedes with an amendment that would prohibit the use of any funds from the ammunition procurement accounts.

Prohibition on shuttle (sec. 1352)

The conferees agreed to include a provision in the conference agreement that would prohibit the use of defense budget function 050 funds for the procurement of the fourth shuttle orbiter. This action is taken in view of overall fiscal pressures on the defense budget sector.

Reporting of terrorist threats (sec. 1353)

The Senate bill contained a provision (sec. 1219) that would require the Secretary of Defense to instruct appropriate officials of the Department of Defense to take such action as may be necessary to ensure that credible, time-sensitive intelligence concerning potential terrorist threats be promptly reported to the headquarters or office of Department of Defense concerned. This intelligence should be reported through the most appropriate and expeditious communications network available to the Department of Defense.

The provision would also exempt the Secretary of Defense from the requirement to issue these instructions if he determines that such instructions would be inappropriate or unwise and notifies Congress of that determination before March 1, 1987.

The House bill contained no similar provision.

The House recedes.

Use of marine mammals for national defense purposes (sec. 1354)

The House amendment contained a provision (sec. 1031) that would provide that notwithstanding the Marine Mammal Protection Act of 1972 the Secretary of Defense, with the concurrence of the Secretary of Commerce and after consultation with the Marine Mammal Commission, may authorize the taking of not more than 25 marine mammals each year for national defense purposes.

The House amendment would also provide that any mammal taken under this authority shall be captured, supervised, cared for, transported, and deployed in a humane manner consistent with conditions established by the Secretary of Commerce.

The House amendment would further provide that a mammal may not be taken if such mammal is determined to be a member of an endangered or threatened species under section 4 of the Endangered Species Act of 1973.

The Senate bill contained no similar provision.

The Senate recedes.

Reimbursement for incidental expenses incurred while providing voluntary services (sec. 1355)

The House amendment (sec. 1034) contained a provision that would authorize the Secretaries of the military departments to reimburse incidental expenses incurred by volunteers providing services as ombudsmen or for a family service center program.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that reimbursements made to volunteers may only be paid with nonappropriated funds.

Defense of legal malpractice suits (sec. 1356)

The House amendment contained a provision (sec. 1035) that would provide for the United States to defend and be the exclusive defendant in a legal malpractice claim against a lawyer acting in the scope of employment with the Department of Defense.

The Senate bill included no similar provision.

The Senate recedes. This provision is not intended to create a new cause of action. It is merely intended to provide protection for Department of Defense lawyers similar to that provided for doctors in section 1089 of title 10, United States Code.

Off-post rental housing lease indemnity pilot program (sec. 1357)

The House amendment contained a provision (sec. 1042) that would establish a pilot program under which the service Secretaries could guarantee to compensate certain landlords who rent to military members in the event the members damage the rental property. Such compensation would be in lieu of the landlords requiring the members to pay a security deposit.

The Senate bill contained no similar provision

The Senate recedes with a technical amendment.

Wage rate for certain Corps of Engineers employees (sec. 1358)

Section 1037 of the House amendment would require that electric powerplant controllers and powerplant shift operators assigned to the Soo Locks Power Plant in the Detroit District in the North Central Region of the United States Army Corps of Engineers be paid wages determined in the same manner as employees paid from the Special Power Rate Schedules.

The Senate bill contained no similar provision.

The Senate recedes.

Reimbursement for transferred Defense Industrial Reserve Equipment (sec. 1359)

Section 1043 of the House amendment would require the military departments to reimburse the Defense Industrial Reserve for the "full cost (including direct and indirect costs) of storage, repair, maintenance, and allocated overhead" of property transferred to such departments from the Defense Industrial Reserve.

The Senate bill contained no similar provision.

The Senate recedes.

Extension of exemption for polygraph test program (sec. 1360)

The Senate bill contained a provision (sec. 1204) that would amend section 1221(e) of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 727):

(1) By striking out "cryptologic" and inserting in lieu thereof "cryptographic", and

(2) By exempting from the test program and polygraph examination conducted under the authorization granted by the Secretary of Defense on August 31, 1982, on a person in a national program—

(A) Which has as its purpose the collection of specialized intelligence through reconnaissance;

(B) Which is under the purview of the Director of Central Intelligence; and

(C) For which a polygraph examination was established as a condition for participation in such programs before October 1, 1985.

The provision would limit the number of polygraph examinations that could be conducted during fiscal year 1987 so as not to exceed the number conducted pursuant to said authorization during fiscal year 1986.

The House amendment contained no similar provision.

The House recedes.

Facilities for the detention of certain aliens (sec. 1361)

The Senate bill contained a provision (sec. 1223) directing the Secretary of Defense to transmit to the Attorney General a list of facilities which would be suitable for use for the detention of the Marielito criminal aliens together with information on costs.

The House amendment contained no similar provision.

The House recedes, with an amendment that would direct the Secretary of Defense to report to the Committees on Armed Services of the Senate and House of Representatives any suitable facilities not otherwise needed for Department of Defense activities.

Correctional facilities at Fort Riley, Kansas (sec. 1362)

The Senate bill contained a provision (sec. 1236) that would prohibit the correctional facilities at Fort Riley, Kansas from being closed, transferred or relocated unless the

Secretary of Defense informed the Congress of such an intent and 180 days had elapsed.

The House amendment contained no similar provision.

The House recedes.

Minuteman education program (sec. 1363)

The Senate bill contained a provision (sec. 1232) that would restrict obligation of graduate educational funds under the Minuteman Education Program unless specific contractual requirements were met.

The House bill contained no similar provision.

The House recedes with an amendment that would prohibit the Secretary of the Air Force from altering the source of education services for the program during fiscal year 1987 without first advising the Committees on Armed Services of the Senate and the House of Representatives of the reasons for altering the source of those services.

Treatment of Communist countries (sec. 1364)

The Senate bill contained a provision (sec. 1233) that would amend the Foreign Missions Act by requiring the Secretary of State to impose on members of foreign missions and their dependents of Soviet bloc countries in the United States limitations and restrictions equivalent to those imposed by the Soviet Union. The Soviet bloc countries included Bulgaria, Cuba, Czechoslovakia, the German Democratic Republic, Hungary, Poland, and Rumania. The restrictions were also applicable to government activities involving international trade and instrumentalities of these foreign missions.

The House bill contained no similar provision.

The House recedes with an amendment.

The conferees agreed that espionage activities by the Soviet Union and its allies in the United States are a grave threat to the national security of the United States, and that the United States must begin to act vigorously to counter the espionage activities of these countries. The conferees believe, however, that prior to enacting any measures into law, the President should submit to the chairmen of the Committee on Foreign Relations and the Select Committee on Intelligence of the Senate, and the chairmen of the Committee on Foreign Affairs and the Permanent Select Committee on Intelligence of the House of Representatives a report prepared under the direction of the Secretary of State in close cooperation with the Director of Central Intelligence, the Secretary of Defense and the Director of the Federal Bureau of Investigation. This report should describe the espionage activities of the Soviet Union and certain other countries in the United States and assess the impact of such activities. The report should further assess how these countries use the relative freedom of access they have in the United States and should include an analysis of how the principle of diplomatic reciprocity affects the security interests of the United States. The report also should propose to Congress measures that would be effective in curtailing espionage against the United States. The report should be issued not later than March 1, 1987 and should be submitted in both classified and unclassified versions.

Such measures as the Congress deems appropriate should be enacted in the Foreign Relations Authorization Act for fiscal years 1988 and 1989.

In preparing this report, the conferees emphasize that the Office of Foreign Missions of the Department of State not be used for the conduct of or assessment of intelligence activities.

Civil Air Patrol (sec. 1365)

The House amendment contained a provision (sec. 4004) that would amend section 9441(b)(9) of title 10, United States Code, that relates to activities of the Civil Air Patrol. Specifically, section 4004 would permit the Civil Air Patrol to improve major equipment items that are obtained by other means than through the Department of Defense excess property program. Current law precludes the Civil Air Patrol from modernizing equipment that is obtained through donation or other means of acquisition.

The Senate bill contains no similar provision.

The Senate recedes.

Amendment of Military Selective Service Act to provide eligibility for benefits to certain persons who fail to register (sec. 1366)

The House amendment contained a provision (sec. 1051) that would bar any person born since 1960 who has failed to fulfill a requirement to register with the Selective Service System from working with any firm under a Department of Defense contract or subcontract. The House amendment also contained a provision (sec. 4008) that would bar the Federal government from denying any Federal benefit to any non-registrant who was honorably discharged from the Armed Forces or who was permanently disabled.

The Senate bill contained no similar provisions.

The House recedes on section 1051.

The Senate recedes on section 4008 with an amendment that would clarify that a non-registrant is not to be denied any Federal benefit if he can demonstrate that his failure to register was not knowing or willful. The conferees added this provision in order not to penalize an individual with an obvious disqualifying handicap, such as total paralysis of the limbs or an individual who has been honorably discharged from the armed services. Under the law, such an individual is required to register but the conferees did not believe it would be fair to extend this provision to an individual who honestly believed he did not have an obligation to register because of such a handicap or because he was a member of the armed forces. At the same time, the conferees do not intend for this provision in any way to provide an option for self-classification. For example, the conferees do not intend that a person who knowingly failed to register because he viewed himself as a conscientious objector would meet the standards of the conference provision as someone whose failure to register was not knowing or willful. Established procedures for classification, which follows registration, are the only means for determining conscientious objector status. Total paralysis or the existence of an honorable discharge certificate, on the other hand, are objective factors that could lead one to believe, albeit erroneously, that he was not required to register.

Correction of effects of contamination at Rocky Mountain Arsenal (sec. 1367)

The House amendment contained a provision (sec. 1036) that would direct that any monies awarded to the United States, as a result of a judgment or settlement in the litigation concerning the effects of the contamination at the Rocky Mountain Arsenal, be made available to the Secretary of the Army for the exclusive purpose of correcting the effects of the contamination. The Senate bill contained no similar provision.

The Senate recedes.

Sense of Congress regarding death of Lt. Col. Arthur D. Nicholson, Junior (sec. 1368)

The House amendment contained a provision (sec. 1049) that would express the sense of the Congress that (1) the Government of the Union of Soviet Socialist Republics should apologize for and renounce the murder of Lt. Col. Nicholson and should indemnify the family of Lt. Col. Nicholson financially; and (2) the President should name the East-West control point between the American and Soviet sectors in Berlin, currently known as Checkpoint Charlie, in honor of Lt. Col. Nicholson.

The Senate bill contained no similar provision.

The conferees agreed to an amendment to modify the House provision by deleting the section renaming Checkpoint Charlie.

The Senate recedes with an amendment.

Status of members of Commission on Merchant Marine and Defense; extension of report deadline and availability of appropriations (sec. 1369)

The House amendment contained a provision (sec. 821) that would amend section 1536 of the Department of Defense Authorization Act, 1985 (Public Law 98-525) to provide that members of the Commission on Merchant Marine and Defense shall not be considered to be Federal employees for certain purposes, to extend the deadline for reports of the Commission and to extend the availability of funds appropriated to the Commission.

The House amendment would further require that the President make the required appointments to the Commission before the end of the 30-day period beginning on the date of enactment of this Act.

The Senate bill contained no similar provision.

The conferees agreed to that portion of the House provision that establishes a time limit for presidential appointments to the Commission. The remainder of the House provision was enacted in Public Law 99-426.

The Senate recedes.

Nuclear non-proliferation information (sec. 1370)

The Senate bill contained a provision (sec. 1231) that would amend the Nuclear Non-Proliferation Act of 1978 (Public Law 95-242) to include the Department of Defense among those executive departments and agencies required to keep certain congressional committees informed of their activities with respect to nuclear non-proliferation. The Senate bill would also provide that, upon request, the Secretary of Defense have access to all information regarding nuclear proliferation matters that the Secretary of State or Secretary of Energy has or is entitled to have.

The House amendment contained no similar provision.

The conferees agreed to the Senate provision with an amendment that the access granted to the Secretary of Defense by the provision would not apply to any intra-departmental document or portion thereof that solely provides internal, confidential advice on policy concerning the conduct of interagency deliberations on nuclear proliferation matters.

The House recedes with an amendment.

The conferees recognize that nuclear proliferation is, by its very nature, a national security problem. The purpose of this provi-

sion is to assure that the Secretary of Defense is fully informed on nuclear proliferation matters and has access to national security information of legitimate interest to him.

The conferees intend that the information to be provided under this provision include all information necessary for the Secretary of Defense to discharge fully his national security responsibilities in the area of nuclear proliferation. It includes intelligence information, documents, and cables pertaining to nuclear proliferation matters, including agreements for nuclear cooperation and negotiations leading thereto, subsequent arrangements, as well as all other information available to the Secretaries of State and Energy dealing with nuclear proliferation diplomacy and initiatives of the United States.

Because of concerns that this provision might permit access to internal information that is inappropriate, not needed, or beyond the legitimate national security interests of the Secretary of Defense, the conferees make clear their intent that the information be provided under this provision does not and is not meant to include inter-departmental documents or portions of documents within the Departments of State or Energy that solely provide internal, confidential policy advice to the Secretaries of those Departments about the conduct of interagency deliberations or other policy advice of an internal, confidential nature that is not related to the national security responsibilities of the Secretary of Defense.

Nuclear winter study and report (sec. 1371)

The House amendment contained a provision (sec. 3302) that would require the Secretary of Defense to conduct a comprehensive study on various phenomena associated with nuclear winter and to report to the President and the Congress not later than November 1, 1987 on the results. The House provision also provides that upon submission of this report the Secretary of Defense shall contract with the National Academy of Sciences for an independent evaluation of the report and for a subsequent report on the findings to the Secretary of Defense and the Committees on Armed Services of the Senate and the House of Representatives not later than April 1, 1988.

The Senate bill contained no similar provision.

The Senate recedes.

Transfer of two naval vessels to Taiwan (sec. 1372)

The conferees agreed to a provision that would authorize the Secretary of the Navy to sell two patrol gunboats of the *Tacoma* class to the Coordination Council for North American Affairs, representing the people on Taiwan.

The sale would be subject to such terms and conditions as the President may require, shall be for a price not less than the value in U.S. dollars of the vessels involved, and any expenses incident to the transfer would be charged to the purchaser.

The transfer authority would expire two years after the date of enactment of this Act.

Drug interdiction efforts by DOD (sec. 1373)

The Senate bill contained a provision (sec. 1218(a)) that would require the National Drug Enforcement Policy Board to report on the manner and extent to which the Department of Defense should be involved in drug enforcement activities.

The House amendment contained no similar provision.

The Senate recedes with an amendment requiring the President to submit to Congress, not later than 180 days after enactment, a comprehensive program for drug interdiction and enforcement, including the appropriate role of the military in such a program. The conferees believe that such a comprehensive program, coordinating the authority and mission of the various agencies involved in drug enforcement, is essential. The apparent confusion and conflict among the drug agencies has been detrimental to the United States government's drug enforcement efforts to date.

The amendment also modifies section 374 of title 10, United States Code, to require the Secretary of Defense to provide such assistance in the form of manpower or equipment as he deems appropriate when requested by a civilian drug enforcement agency. The conferees support an increased role for the military in drug interdiction but believe that the proper role for the military and the impact on military preparedness must be addressed at the outset. Therefore, the form and extent of the assistance provided is to be at the Secretary's discretion, subject to the limitations contained in Chapter 18 of title 10, United States Code, and other applicable law, such as the Economy Act.

Authorization of funds for the Henry M. Jackson Foundation (sec. 1374)

The conferees agree to authorize $10 million for the Henry M. Jackson Foundation. Established as a memorial to the late Senator from Washington, the foundation supports a highly successful program in the area of Middle East and Chinese studies and United States-Sino-Soviet relations. The foundation has already raised more than $4 million from public contributions since its establishment in 1983, and the conferees believe this one-time appropriation to the foundation is a fitting tribute to Senator Jackson's lifetime of dedicated service to the nation.

LEGISLATIVE PROVISIONS NOT ADOPTED

Drug interdiction efforts by DoD

The Senate bill contained a provision (sec. 1218(a)) that would require the National Drug Enforcement Policy Board to report on the manner and extent to which the Department of Defense should be involved in drug enforcement activities.

The House amendment contained no similar provision.

The Senate recedes.

The conferees note that this provision is contained in separate legislation under consideration by the Congress.

Drug educational and counseling report

The Senate bill contained a provision (sec. 1218(b)) that would require the Secretary of Defense to submit a report to Congress concerning: 1) the extent to which military dependents are receiving drug and substance abuse education in Department of Defense operated schools; 2) the type of drug education programs currently provided; 3) whether additional drug education programs are needed; and 4) the extent to which drug education programs do or should include preventative peer counseling classes.

The House amendment contained no similar provision.

The Senate recedes.

The conferees note that this provision is contained in separate legislation under consideration by the Congress.

Coast Guard

The Senate bill contained a provision (sec. 1222(a)) that would provide that, from funds authorized to be appropriated for the Department of Defense in fiscal year 1987, $200 million shall be provided for the acquisition and maintenance of U.S. Coast Guard defense-related inventories and $100 million shall be provided in operating funds for the performance of defense readiness responsibilities of the U.S. Coast Guard. The provision would also provide that of these amounts, $15 million be available for transfer to the Secretary of Transportation to be used only for enhanced drug interdiction assistance as described in section 1222(b) of the Senate bill.

The House amendment contained no similar provision.

The Senate recedes.

Enhanced drug interdiction assistance

The Senate bill contained provisions (secs. 1222(b) and (c)) that would authorize the assignment on-board naval vessels at sea in drug-interdiction areas Coast Guard personnel who are trained in law enforcement and who have the power to arrest, search, and seize property and persons suspected of violating the law.

The House amendment contained no similar provision.

The Senate recedes.

The conferees note that this provision is contained in separate legislation under consideration by the Congress.

Authorization for appropriations for enhanced drug interdiction activities

The Senate bill contained a provision (sec. 1227) that would authorize $212,115,000 to be appropriated to the Department of Defense for enhanced drug interdiction assistance. Section 1227 also would direct loans of aircraft to the Customs Service and the Navy and require the Customs Service to assume responsibility for the operation and maintenance cost of certain equipment.

The House amendment contained no similar provision.

The Senate recedes.

The conferees note that this provision is contained in separate legislation under consideration by the Congress.

Sense of Congress on use of armed forces to protect United States citizens and air carriers at airports outside the United States

The House amendment contained a provision (sec. 1041) declaring it to be the Sense of Congress that members of the Armed Services be detailed to provide security for American citizens and American air carriers at foreign airports.

The Senate bill contained no similar provision.

The conferees note that section 553 of the International Security and Development Cooperation Act of 1985 mandated that the Secretary of Transportation undertake a study of an expanded air marshal program for providing security on air routes outside the United States. The Committee of Conference on that bill intended that this report should include consideration of modifying the role of the current air marshal program. Specifically, consideration should be given to expanding the role of the air marshal to more fully utilize them as ground security coordinators to complement and provide U.S. Government representation as security screening points in high-risk foreign international airports. The conferees on the National Defense Authorization

Act note that the report was due at the start of 1986 and is now long overdue. The conferees direct the Secretary of Transportation to complete that required report and to include within it consideration of the possible use of military personnel. The Secretary of Defense should be given the opportunity to append any comment he may choose on the use of military personnel. Therefore, the House recedes.

Introduction of U.S. Armed Forces into Nicaragua

Section 1046 of the House amendment would provide that funds appropriated to the Department of Defense may not be obligated or expended for the purpose of introducing U.S. Armed Forces into or over Nicaragua for combat unless the Congress has declared war on enacted specific authorization for such introduction, or such introduction is necessary to meet a clear and present danger of hostile attack upon the United States, its territories or possessions or its allies, or to meet a clear and present danger to, and to provide necessary protection for, the U.S. Embassy, U.S. Government personnel, or U.S. citizens, or to respond to hijacking, kidnapping, or other acts of terrorism involving citizens of the United States or its allies.

Moreover, section 1046 would provide that its provisions would not apply if MIG aircraft, or other aircraft of similar design or capability, or nuclear weapons are introduced into Nicaragua. Finally, section 1046 would not invalidate any requirement of the War Powers Resolution nor any authority of the United States to act under the provisions of the Inter-American Treaty of Reciprocal Assistance.

The Senate bill contained no similar provision.

The House recedes.

Authorization for nuclear winter research

The House amendment contained a provision (sec. 3301) that would authorize for fiscal year 1987 $8.5 million for the Department of Defense and $2.5 million for the Department of Energy for nuclear winter research. The House provision further provides that the Secretaries of Defense and Energy shall submit a report by September 30, 1987 on the allocation of funds appropriated pursuant to the authorization.

The Senate bill contained no similar provision.

The House recedes.

OTHER PROVISIONS ADOPTED

Intelligence Program Reductions

The conferees considered the impact undistributed and inflation reductions contained in this Act might have on the National Foreign Intelligence Program and agreed to exempt that program from all undistributed reductions. With respect to inflation adjustments, the conferees agreed to exempt the Central Intelligence Agency and certain Air Force special activities from inflation adjustments. These exemptions have been taken into account in the recommended reductions for each account and line item.

Communications Security

In light of the vulnerability of certain domestic communications to intercept by hostile intelligence services the Senate authorized $129 million to permit prompt implementation of an NSA plan to encrypt selected domestic communications circuits and for a number of other initiatives the details of which are classified. The House has no comparable provisions.

In conjunction with the conferees on the Intelligence Authorization Act for FY 1987, the conferees agreed to authorize $44.5 million for certain initiatives. Additional details relating to this action are addressed in section 102 of the Intelligence Authorization Act for fiscal year 1987 and the Classified Schedule of Authorizations related thereto.

Improved DOD Security/Stilwell Commission

The Senate authorized $22.3 million to accelerate implementation of the Stilwell Commission recommendations to improve personnel and industrial security and reduce the likelihood of espionage in the military services and defense agencies. The House had no comparable provision. The conferees endorsed the Senate position but noted that Defense Appropriations measures failed to include funds for this purpose. Accordingly, the conferees did not include these funds in the conference report. The conferees encourage the Department of Defense to reprogram such funds as might be available during fiscal year 1987 to implement those actions identified in the Senate Report on this subject.

TITLE XIV—BARRY GOLDWATER SCHOLARSHIP AND EXCELLENCE IN EDUCATION PROGRAM

Barry Goldwater Scholarship and Excellence in Education Foundation (secs. 1401-1412).

The Senate bill contained a number of provisions (secs. 5100-5111) that would create and establish procedures for the operation of the Barry Goldwater Scholarship and Excellence in Education Foundation.

The House amendment contained no similar provision.

The House recedes with technical amendments.

DIVISION B—MILITARY CONSTRUCTION AUTHORIZATIONS

COMPARISON OF HOUSE AND SENATE BILLS

The Senate bill would authorize $8,507,438,000 in Division B to provide military construction and related authority in support of the military departments during fiscal year 1987.

The House amendment provided $8,347,576,000 in new authorization.

The Department of Defense and the respective military departments requested $9,987,138,000.

SUMMARY OF RESOLUTION OF DIFFERENCES

The conferees agree to an authorization of appropriations for military construction and family housing for fiscal year 1987 of $8,409,289,000.

Authorization of appropriations conference agreement, fiscal year 1987

Title I—Army:	
Inside the United States	660,510,000
Outside the United States	452,210,000
Unspecified minor construction	20,000,000
Planning and design	130,580,000
Family housing construction	354,330,000
Family housing support	1,247,266,000
Homeowners assistance program	5,500,000
Subtotal	2,870,396,000
Title II—Navy:	
Inside the United States	1,109,795,000
Outside the United States	156,290,000
Unspecified minor construction	15,000,000
Planning and design	143,770,000
Defense access roads	5,500,000
Family housing construction	159,292,000
Family housing support	557,981,000
Subtotal	2,147,438,000
Title III—Air Force:	
Inside the United States	784,642,000
Outside the United States	351,878,000
Unspecified minor construction	16,000,000
Planning and design	117,260,000
Defense access roads	32,700,000
Family housing construction	108,840,000
Family housing support	732,409,000
Subtotal	2,143,729,000
Title IV—Defense Agencies:	
Inside the United States	180,130,000
Outside the United States	227,100,000
Unspecified minor construction	4,000,000
Contingency construction	5,000,000
Planning and design	88,200,000
Conforming storage facilities	10,000,000
Family housing construction	270,000
Family housing support	17,330,000
Subtotal	532,030,000
Title V—NATO Infrastructure	247,000,000
Title VI—Guard and Reserve Forces:	
Army National Guard	133,271,000
Army Reserve	86,700,000
Naval and Marine Corps Reserve	44,500,000
Air National Guard	145,325,000
Air Force Reserve	58,900,000
Subtotal	468,696,000
Total authorization of appropriations	8,409,289,000

SUMMARY OF MILITARY FAMILY HOUSING, 1987

[Dollars in thousands]

Item	Army	Navy	Air Force	Defense agencies
New construction	$250,830	$130,712	[1] $43,196	$270
Number of units	3,032	1,368	522	3
Number of mobile home spaces	108	300	24	0
Improvements	$79,500	$26,580	$58,644	0
Planning and design	$24,000	$2,000	$7,000	0
Operation	$495,466	$260,515	$344,615	$2,794
Number of units	158,009	90,688	138,498	652
Maintenance	569,852	265,846	307,684	509
Leasing	$173,885	$22,459	$72,745	$14,027
Number of domestic units [2]	4,825	1,665	1,463	0
Number of foreign units	22,581	1,923	9,200	916
Debt payment	$8,063	$9,071	$7,365	0
Total request	$1,601,596	$717,183	$841,249	$17,600
Summary:				
Total Housing Program	$3,177,628			
New construction	[1, 3] 435,008			
Improvements	164,724			
Planning and design	33,000			
Operations	[4] 1,103,390			
Maintenance	1,143,891			
Leasing	[5] 283,116			

SUMMARY OF MILITARY FAMILY HOUSING, 1987—Continued

[Dollars in thousands]

Item	Army	Navy	Air Force	Defense agencies
Debt payment	24,499			

[1] Includes $.9 million for housing management offices at Davis-Mo nthan AFB Arizona, McGuire AFB, New Jersey, and Pope AFB, North Carolina; and $2 million for a maintenance shop at Beale AFB, California.
[2] Includes authorization for 7,063 Section 801 Program lease points.
[3] For 5,357 units/mobile home spaces; 4,925 and 432 mobile home spaces.
[4] $2,247,281 for 387,847 units.
[5] For 42,573 units.

General Topics

MILITARY FAMILY HOUSING BUILD-TO-LEASE AND RENTAL GUARANTEE PROGRAMS

The Senate bill extended the sec. 801 program for two years and authorized each service to construct up to 3,000 additional units. The Senate bill also extended the sec. 802 program for four years and included several changes to make the sec. 802 program more viable as a housing alternative to military construction. The House amendment placed a moratorium on the Section 801/802 housing program and instructed the Secretary of Defense to conduct a study of other alternatives.

The conferees are encouraged by the savings that the current sec. 801/802 projects which have been submitted to the committees may provide to the government. Eight of the ten projects report savings of 10 percent or greater over military construction. Significant progress has also been made on the issues of cost effectiveness analysis, permanent financing, and efficiency in the mechanics of bringing new projects on line. The conferees are concerned, however, with how these programs relate to the overall housing acquisition program, specifically with the lack of criteria to determine when to use sec. 801 or sec. 802 in lieu of military construction, and what portion of the housing deficit should be earmarked for these programs.

The conferees agree to extend the sec. 801 program for an additional two years and to provide for 1,000 additional leases per service with no limitation on the number of contracts, provided that the Office of the Secretary of Defense submits to the appropriate committees of the Senate and House of Representatives: 1) uniform criteria establishing when the sec. 801-802 programs are to be used, prior to advertising for any proposals; 2) a report by January 31, 1987, addressing the current CONUS housing deficits and multi-year plan to meet the needs of the services and defense agencies; and 3) economic analyses establishing the cost of the military construction alternative and corresponding sec. 801 alternative lease ceiling for each project prior to bid opening. The department will continue to submit to the appropriate Committees of the Senate and House of Representatives the selected proposals with corresponding economic analyses for 21-day notification prior to anticipated award date. The conferees expect savings of at least five percent versus the military construction alternative before the committees will approve the lease request.

The sec. 803 program has the potential to reduce the military housing shortage with a minimum amount of appropriated funds and show significant savings over the traditional military construction procedure. Savings of 38 to 45 percent have been reported on the two projects submitted to the committees this year. The House recognizes the difficulty in financing new construction utilizing the current sec. 802 rules and recedes to the Senate amendments. The services are also authorized an additional 600 leases under the sec. 802 program with no limitation on the number of contracts that can be entered into.

IMPROVEMENTS TO MILITARY FAMILY HOUSING

The budget request contained $145.9 million for improvements to existing Army family housing units and $51.6 million for improvements to existing Navy family housing units.

The Senate bill would authorize $79.5 million for the Army improvements and $26.6 million for the Navy improvements. The reductions were based on the authorization balances remaining from the fiscal year 1986 authorizations, which were larger than the fiscal year appropriations for housing improvements. The House amendment would authorize the amounts requested.

The House recedes.

The Army and Navy are directed to apply the remaining authorization balances from fiscal year 1986 toward their respective fiscal year 1987 appropriation requests for housing improvements.

SPACE LIMITATIONS ON OFFICER HOUSING

The Senate bill contained a provision to increase the square footage for family housing for officers holding special command positions and the senior noncommissioned officer of a military installation. The House amendment contained no similar provision.

The Senate recedes.

The conferees agree with waivers to the maximum allowable square footage for officer housing at Ft. Drum, New York and Yongson, Korea to meet the special requirements of certain command positions. In previous authorization requests, similar waivers have been granted. Rather than taking a piecemeal approach, the conferees direct the Secretary of Defense to study this problem and recommend appropriate action to the Committees on Armed Services of the Senate and the House of Representatives. No further waivers will be granted until the committees have received the department's recommendation.

PHILIPPINE BASES

The Senate bill contained $73 million in fiscal year 1987 for construction projects at air and naval bases in the Philippines. The House amendment contained no funds for that purpose.

The House recedes with an amendment.

The conferees agree that it is in the best interest of the United States to modernize the facilities on these bases and, therefore, have funded the department's request to the maximum extent given the current budget contraints.

BASE CLOSURES

It has been estimated that significant savings could be realized each year if non-essential military installations were closed. The fiscal year 1986 Defense Authorization Act streamlined procedures to close non-essential bases, responding to criticism by the Defense Department that it lacked sufficient legislative authority to expeditiously close such installations. The revised procedures essentially restored the department's authority to what it had been in the early 1970s, a period during which the Nixon and Ford Administrations successfully closed a number of installations. In providing these streamlined procedures, the conferees strongly encouraged the Secretary of Defense to take aggresive action in this area, and to provide closure proposals to Congress as part of the fiscal year 1987 budget request.

Despite this guidance, the Department of Defense budget request for fiscal year 1987 again contained no closure candidates. Earlier requests by the Senate Committee on Armed Services for an analysis of the department's installation structure which addressed the relative priority of each base have been ignored. In response to another request by the Chairman of the Senate Committee on Armed Services, the department did provide an illustrative list of three installations which might be considered typical closure candidates. However, department witnesses testified that these installations, like those similarly identified last year, were used for illustrative purposes only, and were not closure candidates. The department maintained that the revised closure procedures were still too cumbersome to permit it to formally propose installations for closure.

In response to the repeated unwillingness of the department to exercise stewardship over its installations through analysis and identification of closure candidates, the Senate bill authorized the formation of a "Blue Ribbon Task Group on Military Base Closures." Its purpose would be to study and evaluate military installations with a view to determining and recommending which based should be closed. The report of the Task Group would be complete no later than July 31, 1987. The House amendment contained no similar provision.

The Senate recedes.

The conferees remain convinced that the department's installation structure does contain bases which could be closed at substantial long term savings. In this era of resource scarcity, particularly in personnel and operations and maintenance accounts, the conferees view as irresponsible the department's continued unwillingness to address this matter. The Senate recedes on the basis that waiting for the Blue Ribbon Task Group's report could actually hinder department action as part of the two year budget submission due Congress early in 1987.

The conferees again admonish the department to perform a thorough analysis of its installation structure, identifying bases of marginal utility which should be closed. This analysis should be completed promptly so that a list of closure candidates providing significant savings can be included in the fiscal years 1988 and 1989 budget request.

MINOR CONSTRUCTION

The Senate bill contained a provision (sec. 2162) that increased the Minor Construction threshold to $2 million from $1 million. A further provision (sec. 2171) provided for a lump sum authorization for appropriation for projects costing less than $2 million and authority to reprogram minor military construction projects not otherwise authorized.

The House amendment contained a provision (sec. 2711) that codified the threshold for Minor Construction at $1 million, the threshold for unspecified minor construction requiring Congressional notification at $500 thousand and the threshold for unspecified construction out of the operations and maintenance accounts at $200 thousand.

The Senate recedes.

The conferees agree that the Senate approach should be explored because it could increase the department's flexibility to meet

unforeseen construction requirements. Since this represents a major change to current law, the conferees have deferred action until the concept can be further studied and a consensus reached with appropriate committees of Congress with jurisdiction over this matter. It is the intention of the conferees to explore this matter in detail before taking final action on the Military Construction bill for fiscal year 1988-89.

TEST PROGRAM FOR MILITARY INSTALLIATION MASTER PLANNING

The Senate bill contained a provision (sec. 2173) requiring a test program for military installation master planning.

The House amendment contained no similar provision.

The Senate recedes.

The conferees agree that in order to provide Congress with information necessary to determine the desirability and feasibility of using installation master plans as a basis for determining long-term military construction requirements, the Secretary of Defense shall, at the same time he submits the annual request for military construction authorization pursuant to section 2859 of title 10, United States Code, for fiscal year 1988, include in such request:

(1) master plans for at least two military installations of each military department; and

(2) a request for the authorization of those construction projects included in the installation master plans referred to in clause (1) that are scheduled to be constructed within five fiscal years after the fiscal year in which the request is submitted.

LAND TRANSFER

The conferees authorized all specific land transfers contained in the Senate bill and the House amendment. The conferees believe that the Department should propose general authorizing legislation to accommodate these situations rather than requesting case by case authorization. At a minimum such legislation should include sale of such property at fair market value and replacement of facilities displaced at no cost to the government.

TITLE I—ARMY

The Senate bill provided $2,949,746,000 in authorization for the Department of the Army military construction and family housing programs. The House amendment provided authorization of $2,913,930,000 for such purposes. The conferees agree to a total of $2,870,396,000, which is $43,534,000 below the House figure and $79,350,000 below the Senate figure. Among the items considered in conference and acted upon by the conferees were the following:

10TH MOUNTAIN DIVISION, FORT DRUM, NEW YORK

The budget request contained authority to build $615 million in military construction projects to support the 10th Mountain Division being organized at Fort Drum, New York.

The request included $232 million in authorization for fiscal year 1987, and advanced authorizations of $221 million for fiscal year 1988 and $162 million for fiscal year 1989. The Senate bill contained $615 million in project authority and would reduce authorization for fiscal year 1987 to $200 million. The Senate bill did not contain any advance authorizations for fiscal years 1988 and 1989. The House amendment would authorize $180 million for fiscal year 1987 and advanced authorizations of $221 million for fiscal year 1988 and $214 million for fiscal year 1989.

The Senate recedes with an understanding that the Secretary of the Army is directed to keep the Committees on Armed Services of the Senate and the House of Representatives fully advised of construction progress at Fort Drum by providing status reports on a regular basis. The Secretary of the Army is directed to submit to the Committees on Armed Services of the Senate and the House of Representatives each year with the Army's annual military construction budget a report that details the problems and progress of the construction during the previous year as well as anticipated milestones during the coming year. As a minimum, this report should address the following:

(1) scheduled versus actual obligation of funds

(2) significant events since the last report

(3) status of contractors performance on his approved subcontracting plan, and

(4) status of the schedule for fielding the light infantry division.

In addition, the Secretary should notify the committees prior to award of each prime contract specifying who is to receive the contract, the amount of the contract, and a copy of the subcontracting plan for small and small disadvantaged businesses.

6TH INFANTRY DIVISION, ALASKA

The budget request contained $126.7 million for 7 military construction projects and $33 million for 150 units of family housing to support the formation of the 6th Infantry Division at Fort Wainwright, Alaska.

The Senate bill would authorize a lump sum for the 7 construction projects requested and would reduce the total amount to $96.7 million. The Senate bill also would authorize $33 million requested for family housing. The House amendment contained no funds for the military construction projects or the family housing units.

The conferees recommend authorization of $72.3 million for 5 specific construction projects and no funds for family housing. The approved construction projects are barracks modernization, $19 million; child development center, $5.5 million; dining facility, $10 million; tactical equipment shop, $9.9 million; and utilities expansion, $27.9 million.

DISTRIBUTED REDUCTIONS TO ARMY MILITARY CONSTRUCTION

The Senate bill contained a general reduction of $65.1 million in authorization for Army military construction. The House amendment contained no such general reduction.

The conferees agree to a distributed reduction of $34.8 million as follows:

[In thousands of dollars]

Location and project	Budget Request	Conference Agreement
Aberdeen Proving Ground, MD—Barracks complex	19,000	18,000
Fort Leonard Wood, MO—Engineer school/post headquarters	14,000	13,000
Fort Polk, LA—Multipurpose range complex	27,000	26,000
Fort Myer, VA—Physical fitness training center	3,800	0
New Cumberland Army Depot, PA—Eastern Distribution Center phase II	51,000	43,000
Germany—Site security enhancements	17,000	7,000

The distributed reduction also includes a $10 million general reduction in appropriations for Army projects in Germany made by the Committees on Appropriations of the Senate and the House of Representatives.

TITLE II—NAVY

The Senate bill provided $2,161,343,000 in authorization for the Department of the Navy military construction and family housing programs. The House amendment provided authorization of $2,110,333,000 for such purposes. The conferees agree to a total of $2,147,438,000, which is $37,105,000 above the House figure and $13,905,000 below the Senate figure. Among the items considered in conference and acted upon by the conferees were the following:

STRATEGIC HOMEPORTING

The Senate bill contained $85 million for facilities in support of the Navy's strategic homeporting program at Naval Station, Everett, Washington. The House amendment contained no similar provision. The conferees agree to authorize $43.58 million for this purpose with legislative language restricting the obligation of funds.

The conferees have serious concerns about the unresolved environmental and cost sharing issues associated with the homeport at Everett, Washington. In regard to the environmental issue, a final supplemental environmental impact statement is still outstanding and Federal, state and local permits have not been obtained. Final approval of a dredging permit is also outstanding. Therefore, in order to ensure that environmental concerns are fully addressed prior to the initiation of construction at the base, the conferees have prohibited the obligation and expenditure of fiscal year 1987 military construction funds for the Everett homeport until all Federal, state and local permits for dredging activities have been issued.

With respect to cost sharing, the conferees support commitments from state and local officials to play an active role in addressing overall costs of the project. The conferees have also prohibited the obligation and expenditure of fiscal year 1987 military construction funds for Everett, Washington, until the State of Washington has appropriated in fiscal year 1987 its share of funds for fiscal years 1988 and 1989 for all projects agreed with by the Navy for homeporting at Everett, Washington. The conferees anticipate a more formal definition of such commitments over the next few months and direct the Secretary of the Navy to report to the Committees on Armed Services of the Senate and the House of Representatives on the status of these commitments by December 31, 1986.

It is the understanding of the conferees that the terms "all projects agreed with by the Navy" includes, but is not limited to, the contribution by the State and local government of $10.1 million for off-base road work and related capital projects associated with the access road to the new base as stated in a letter received by the Committee on Armed Services of the House of Representatives, Subcommittee on Military Installations and Facilities, from the Secretary of the Navy dated June 16, 1986.

Further, the conferees agree that not more than a total of $272 million including $16 million for defense access roads, may be obligated or expended by the Department of Defense and the Department of the Navy during fiscal years 1986 through 1991 for construction associated with strategic homeporting at Everett, Washington.

The Senate bill contained $57.65 million for facilities to support the Naval Station, New York. The House amendment contained $54.4 million for these facilities. The Senate recedes.

The conferees express their support for the strategic homeporting concept but are concerned whether funds will be available to support the homeports on the West Coast and the Gulf Coast. Therefore, the Secretary of the Navy is expected to support the amounts for the Gulf Coast homeports as outlined in the following table:

[In thousands of dollars]

	Fiscal year	
	1988	1999
Pensacola, FL	16,500	15,229
Mobile, AL	10,923	17,731
Pascagoula, MI	17,437	30,054
Lake Charles, LA	10,470	5,301
Galveston, TX	29,563	1,804
Corpus Christi (Ingleside), TX	39,517	33,862
	124,420	103,981

NAVY BRIGS

The Senate bill contained no funds for the consolidated brig facilities at Naval Air Station, Miramar, California and Naval Weapons Station, Charleston, South Carolina. The House amendment contained $22.5 million for the brig at Miramar and $16.5 million for the brig at Charleston.

The Senate recedes.

The conferees agree that the Secretary of Defense should continue to study Defense Department-wide alternatives to meet the confinement facility needs for all services and report its findings to the Committee on Armed Services of the Senate and House of Representatives.

The conferees further direct that the Secretary of Defense designate the Charleston Brig as a pilot joint-use facility to test the concept of tri-service consolidation.

LEASE AND DEVELOPMENT OF CERTAIN REAL PROPERTY, SAN DIEGO, CALIFORNIA

The Senate bill contained a provision (sec. 2183) to lease and develop certain Navy property in San Diego, California. The House amendment contained a similar provision (sec. 2208).

The Senate recedes to the House language with additional language to ensure that the development of the land is formulated through the San Diego Association of Governments' Broadway Complex Coordinating Committee and to allow the Navy to obtain an ownership interest in new facilities if such an arrangement is in the best interest of the Navy.

PROPELLANT FACILITY UPGRADE, NAVAL ORDNANCE STATION, INDIAN HEAD, MARYLAND

The House amendment authorized $950,000 for the upgrade of the Propellant Facility at Indian Head, Maryland in lieu of the $3.68 million requested. The Senate bill provided no authorization. The reduced scope for this project will provide for the construction of this facility at a greatly reduced cost. The facility upgrade will eliminate costly delays, reduce labor costs and provide for a safer production environment.

The conferees direct the Department of the Navy to provide funding for this project from the specified minor construction account.

TITLE III—AIR FORCE

The Senate bill provided $2,149,749,000 in authorization for military construction and military family housing for the Department of the Air Force. The House amendment provided $2,108,710,000 for such purposes. The conferees agree to a total of $2,143,729,000, which is $35,019,000 above the House figure and $6,020,000 below the Senate figure.

TITLE IV—DEFENSE AGENCIES

The Senate bill authorized $568,500,000 in new construction for Defense Agencies while the House amendment provided $516,403,000. The conferees agree to a total of $532,030,000, which is $15,627,000 above the House figure and $36,470,000 below the Senate figure. Among the items considered in conference and acted upon by the conferees were the following:

BROOKE ARMY MEDICAL CENTER

Sec. 104 of the Fiscal Year 1985 Military Construction Authorization Act (Pub. L. 98-407) directed the Secretary of the Army to design a replacement hospital of no less than 450 beds for the Brooke Army Medical Center (BAMC) located at Fort Sam Houston, Texas.

At the same time, Congress directed the Secretary of Defense to establish a Blue Ribbon Panel of Sizing of Department of Defense Medical Treatment Facilities to review, among other things, the appropriate sizing and utilization of military medical facilities. The Blue Ribbon Panel's final report in June, 1985, was too late for its findings regarding the BAMC replacement to be incorporated in the Congress' consideration of the Defense Department's Fiscal Year 1986 Military Construction request.

In the Conference Report on the Military Construction Authorization Act, 1986, the conferees stated, "Future requests for authorization for medical facilities will be carefully matched against the comments and recommendations of both the Blue Ribbon Panel and the Assistant Secretary of Defense for Health Affairs."

Taking into account the recommendations of the Blue Ribbon Panel, the Assistant Secretary of Defense for Health Affairs determined in July, 1986, that the BAMC replacement hospital should be designed as ". . . a 450 bed teaching hospital with initial construction of 200 beds which can be expanded, if required in the future, by 250 beds. Fifty beds of the initial construction will be devoted to the world's most modern Burn Center and Institute for Surgical Research. The hospital will include a state-of-the-art outpatient care center capable of providing nearly one million outpatient visits annually. The replacement hospital will be designed and sited to accommodate rapid expansion to 450 beds, if the military medical requirement makes that necessary in the future."

Based upon this determination, the Senate repealed Sec. 104 of P.L. 98-407. It further authorized $129 million for the construction of a replacement facility for the BAMC, authorizing $10 million for appropriation in Fiscal Year 1987. This action accelerated by two years the construction of this important facility and resulted in an estimated savings of $250 million over the project which had been under design.

The House, citing the progress which the Army had made in designing a 450 bed hospital on a 695 bed frame, a project estimated to cost $390 million, authorized $10 million to begin site preparation for this hospital. A $10 million project to provide unaccompanied officer housing at Goodfellow Air Force Base was deferred to finance this initiative.

The House recedes with amendment.

The conferees authorize the design of a 450 bed hospital with initial construction of a 200 bed facility. The 200 bed hospital shall be designed and sited for efficient expansion to its full 450 bed capacity if the increase is required in the future. The conferees increased the project's authorization to $135 million to accommodate this flexible design.

CONFORMING STORAGE FACILITIES

The budget request contained $21.4 million for the construction of conforming storage facilities at various worldwide locations. These facilities would be buildings for the storage of hazardous material and waste. The Administration also requested that the provisions of the Resource Conservation and Recovery Act (RCRA), which require the issuance of a permit prior to construction, be removed allowing the department to construct the facilities while the permit application is under consideration; however, the operation of the completed facility would not commence until the final permit was issued.

The House amendment would authorize a total of $3.263 million for 6 specified conforming storage facilities. The 6 authorized projects derived from a list provided to the committee of over 90 possible projects, were the only projects that at the time of submission were at the 35% design level and had a permit already requested. The House bill did not consider any changes to RCRA.

The Senate bill would authorize the Administration request of $21 million and provide a class authorization to construct conforming storage facilities as the required permits become available. The Senate bill also did not provide for any changes to RCRA.

The conferees agree to provide a total of $10 million for the construction of conforming storage facilities in fiscal year 1987. The facilities to be constructed are limited to those listed on a report provided to the committees of the House and Senate by the Comptroller, Defense Logistics Agency. Prior to construction of each project, the Secretary of Defense is to notify the Armed Services committees of the Senate and the House of Representatives of the justification, estimated costs, and the permit process for each project.

TITLE V—NATO

The Senate bill authorized $239,000,000 for the NATO Infrastructure program.

The House amendment provided authorization in the amount of $247,000,000.

The Senate recedes.

RESTRICTION ON NATO INFRASTRUCTURE EXPENDITURES

The House amendment contained a provision (sec. 2504) that would prohibit the Secretary of Defense from obligating any funds after fiscal year 1987 with respect to the NATO Infrastructure program until the Secretary submits to the Committees on Armed Services of the Senate and the House of Representatives the following:

(1) a comprehensive master plan for establishing adequate active defenses for air bases in Europe where U.S. aircraft now operate or plan to operate, and

(2) a report certified by the Secretary that sufficient funds have been budgeted by the Department of Defense in the fiscal year 1988 five-year defense plan to meet the objectives of the master plan.

The Senate bill contained no similar provision.

The Senate recedes.

TITLE VI—GUARD AND RESERVE

The Senate bill provided a lump sum authorization of $438,100,000 for the Guard and Reserve construction program. The House amendment contained authorization

of $451,200,000. The conferees agree to a total of $468,696,000, which is $17,496,000 above the House figure and $30,596,000 above the Senate figure. Among the items considered in conference and acted upon by the conferees were the following:

ALLOCATION OF FUNDING FOR NATIONAL GUARD AND RESERVE PROJECTS

The House amendment contained a provision directing the Secretary of Defense to program at least 10 percent of the total amount requested for military construction authorization (excluding the amount requested for military family housing) for a fiscal year for construction of facilities in support of the Guard and Reserve forces.

The Senate bill contained no similar provision.

The conferees agree to drop the legislative provision mandating that at least 10 percent of the military construction budget be dedicated to the Guard and Reserve components. However, the conferees strongly encourage the Department of Defense to request higher levels of funding in order to begin to eliminate the construction backlog which has resulted from years of failure on the part of the Department of Defense to provide an equitable distribution of funds between the active and reserve components.

DIVISION C—OTHER NATIONAL DEFENSE AUTHORIZATIONS

TITLE I—DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS

PART A—NATIONAL SECURITY PROGRAMS AUTHORIZATIONS

The Senate bill, Division C, Title I, would authorize appropriations in the total amount of $7,425.225 million. The House amendment (Division C, Title I, Part A) would authorize appropriations of $7,450.99 million. The conferees agreed to an authorization of $7,450.99 million.

The budget request, the authorizations contained in the Senate bill, the authorizations contained in the House amendment, and the conference agreement are detailed in the following table.

Fiscal Year 1987 Department of Energy National Security Programs
[Amounts in millions of dollars]

Program	FY 1987 Authorization Request	House Passed S. 2623	Senate Passed S. 2623	Difference (Senate Minus House)	Conference Agreement	Conference Change from Request

The reports by the respective Houses on the bills containing the National Defense Programs of the Department of Energy for fiscal year 1987 contained details on the budget request and policy guidance and requirements with regard to many aspects of the programs. Unless modifying language is included in this statement of managers, the report language, to include guidance, recommendations and requirements, included in both the report of the House of Representatives (H. Rept. 99-718) and of the Senate (S. Rept. 99-331) is concurred in by the conferees.

Operating expenses (section 3111)

The Senate bill would authorize $6,321.519 million for operating expenses. The House amendment would authorize $6,080.394 million for operating expenses. The conferees agreed to an authorization of $6,099.819 million for operating expenses.

Plasma separation process (PSP)

The Administration requested no funds for the Plasma Separation Process. The House amendment would authorize $17 million for the continued development and operation of the Plasma Separation Process during fiscal year 1987. The Senate bill contained no funding for PSP.

The conferees note that if funding were not provided for the continued operation of the PSP facility, substantial costs, estimated to range between $10 and $13 million, would be incurred to close out all PSP activity. The conferees also note the lack of identified requirements for the isotopes produced by the PSP.

The conferees agreed that development and operations associated with PSP should continue until the Secretary of Energy submits a report to the Committees on Armed Services of the Senate and House of Representatives that includes an analysis of future requirements for special isotopes, the means for meeting those requirements, and the Department's decision with respect to the continued operation or close out of PSP activities. In view of budgetary constraints, the conferees agreed to authorize $13 million either for continued development and operation or for close out of Plasma Separation Process activities.

Plant and capital equipment (sec. 3112)

The Senate bill would authorize $899.391 million for plant construction and $512.465 million for capital equipment. The House amendment would authorize $894.701 million for plant construction and $484.395 million for capital equipment. The conferees agreed to an authorization of $863.266 million for plant construction and $487.905 million for capital equipment.

Project 86-D-104, strategic defense facility, Sandia National Laboratory

The conferees agree to authorize $13 million for this project for fiscal year 1987 for a total project authorization of $17 million. The conferees reiterate the direction contained in the statement of managers last year that the total cost of the facility is to be shared equitably between the Department of Energy and the SDIO.

Authorization for Strategic Defense Initiative (sec. 3113)

The House amendment contained a provision (sec. 3013) that would provide that $279 million of funds authorized for operating expenses and plant and capital equipment could be used for the Strategic Defense Initiative.

The Senate bill contained a provision (sec. 3114(a)) that would provide that not more than $356 million shall be available for the Strategic Defense Initiative.

The conferees agreed to a provision that would provide that $317 million of funds authorized for operating expenses and plant and capital equipment could be used for the Strategic Defense Initiative.

Reprogramming (sec. 3121)

The House amendment contained a provision (sec. 3021) that would define and limit the authority of the Department of Energy to use funds appropriated pursuant to the various authorizations in the bill for programs in excess of certain stated amounts or for programs not previously considered by the Congress.

The Senate bill contained a similar provision (sec. 3121).

The Senate recedes.

Limits on general plant projects (sec. 3122)

The Senate bill contained a provision (sec. 3122) that would require a report to the appropriate committees of Congress if the Secretary of Energy finds that the estimated cost of a project will exceed $1.2 million.

The House amendment contained a similar provision (sec. 3022).

The House recedes.

Limits on construction projects (sec. 3123)

The House amendment contained a provision (sec. 3023) that would permit any construction project authorized by section 3012 and with a cost in excess of $5 million to be inititated and continued only so long as the estimated cost for the project does not exceed 125 percent of the higher of (1) the amount authorized for the project or (2) the most recent total estimated cost presented to the Congress as justification for such project. To exceed such limits, the Secretary of Energy must report in detail to the appropriate committees of Congress and the report must be before the appropriate committees for 30 legislative days unless before that time each such committee advises the Secretary that it has no objection to the proposed action.

The Senate bill contained a similar provision (sec. 3123).

The Senate recedes.

Fund transfer authority (sec. 3124)

The Senate bill contained a provision (sec. 3124) that would permit, subject to provisions of appropriations Acts, funds authorized to the appropriated by the bill to be transferred to other agencies of the government for performance of work for which the appropriation is made and would permit the merger of such funds with the appropriations of the agency to which they are transferred.

The House amendment contained a similar provision (sec. 3.024).

The House recedes.

Authority for construction design (sec. 3125)

The House amendment contained a provision (sec. 3025) that would permit the Secretary of Energy to use plant engineering and design funds authorized by the bill not to exceed $2 million for each project, to carry out construction design services for any construction project. Where the design cost for such planning and design project is estimated to exceed $300,000, the Secretary would be required to notify the appropriate committees of Congress at least 30 days before funds are obligated for design services.

The Senate bill contained no similar provision.

The Senate recedes.

Adjustments for pay increases (sec. 3128)

The House amendment contained a provision (sec. 3028) that would authorize such additional or supplemental appropriations as may be necessary to fund increases authorized by law for salary, pay, retirement, or other benefits for Federal employees.

The Senate bill contained no similar provision.

The Senate recedes.

Availability of funds (sec. 3129)

The House amendment contained a provision (sec. 3029) that would authorize, subject to a provision of an appropriation Act, amounts appropriated for "operating expenses" or for "plant and capital equipment" to remain available until expended.

The Senate bill contained no similar provision (sec. 3127).

The Senate recedes.

Protection of sensitive technical information (sec. 3131)

The House amendment contained a provision (sec. 3031) that would require the Secretary of Energy to consider national security, the possible release of sensitive technical information to unauthorized persons, the creation of organizational conflicts of interest, and possible adverse affects on the operation of Department of Energy military activities when deciding to assign to a contractor property rights in an invention or discovery.

The Senate bill contained no similar provision.

The conferees concluded that inventions and discoveries originating in the military activities of the Department of Energy must be carefully reviewed to ensure that assignment of property rights in such inventions and discoveries to contractors does not violate the public interest. At the same time the conferees believe that careful consideration of the matters as set out in the House amendment should not give rise to long delays in decisions by the Department of Energy regarding the assignment of property rights to contractors. The conferees agree that the Department of Energy review process should not be, nor should it be perceived to be, a disincentive to commercialization of government funded research where such commericalization meets the criteria set forth. Moreover, the conferees agree that a reasonable time for such decision should be no more than six months from the date of the request by the contractor for the assignment of such rights.

The conferees direct that the Secretary of Energy submit a report at the end of each quarter of fiscal year 1987 indicating the reasons for any decision not to assign property rights requested by the contractor and the reasons for any failure to make a decision regardng the assignment of property rights within six months.

The Senate recedes with technical amendments.

Restriction on use of funds to pay penalties under environmental laws (sec. 3132)

The Senate bill contained a provision (sec. 3131) that would prohibit the use of funds to pay a fine, forfeiture, penalty or settlement or to perform any work or services requested by another department or agency of the Federal, State or Local government for any failure by the Department of Energy to comply with an environmental requirement in its defense activities.

The House amendment contained a provision (sec. 3032) that would prohibit the use of fiscal year 1987 funds to pay a fine, for-

feiture, penalty or settlement for failure by the Department of Energy to comply with an environmental requirement in its defense activities if the Congress had denied funding for such compliance.

The conferees agreed to a provision that would prohibit use of funds to pay a fine, forfeiture, or penalty for failure by the Department of Energy to comply with an environmental requirement in its defense activities if the Congress had denied funding for such compliance.

The Senate recedes with an amendment.

Community Assistance Payments (sec. 3133)

The House amendment contained a provision (sec. 3034) that would amend section 1532 of the Department of Energy National Security and Military Applications of Nuclear Energy Authorization Act of 1986 (Public Law 99-145). The amendment would make clear that authority to make a final financial settlement with Anderson County and Roane County, Tennessee and the City of Oak Ridge, Tennessee, and to terminate all annual assistance payments made to those entities pursuant to section 71 of the Atomic Energy Community Act of 1955 does not affect any other right, function, or duty of the Secretary with respect to such Act. The amendment would further provide that the Secretary shall consider the purposes of the Atomic Energy Community Act of 1955 in continuing atomic energy defense functions of the Department of Energy.

The Senate bill contained no similar provision.

The Senate recedes.

Authority for Department of Energy contractor employees to carry firearms beyond boundaries of a DOE facility (sec. 3134)

The House amendment contained a provision (sec. 3035) that would provide authority for a contractor protective force officer to engage in hot pursuit of a suspect who may have stolen a nuclear weapon, nuclear explosive device, or special nuclear material and flees beyond the boundaries of the government facility. The section would also require the Secretary of Energy, with the approval of the Attorney General, to issue guidelines to implement the subsection.

The Senate bill contained no similar provision.

The Senate recedes.

Report on containment facilities (sec. 3135)

The Senate bill contained a provision (sec. 3133) that would require the Secretary of Energy to submit a report to the Committees on Armed Services of the Senate and the House of Representatives on the costs and effect on safety that would obtain from the construction of containment facilities for nuclear reactors of the Department of Energy as compared with the cost and effect on safety involved in the construction of a new production reactor.

The House amendment contained no similar provision.

The House recedes with a technical amendment.

Report of production reactor safety (sec. 3136)

The House amendment contained a provision (sec. 3033) that would require an independent assessment by the National Academy of Sciences of the safety of the "N" production reactor at Hanford, Washington.

The Senate bill contained no similar provision.

The Senate recedes.

Establishment of Nuclear Weapons Council (sec. 3137)

The Senate bill contained a provision (sec. 3132), titled "Implementation of the Recommendations of the President's Blue Ribbon Task Group on Nuclear Weapons Program Management", that would establish a Joint Nuclear Weapons Council with membership drawn from the Department of Defense and the Department of Energy. The Senate provision would also abolish the Military Liaison Committee.

The House amendment contained no similar provision.

The House recedes.

Extension of date for certain contract authority (sec. 3138)

The Senate bill contained a provision (sec. 3134) that would extend the authority, from June 30, 1986 to June 30, 1996 and subject to provisions in appropriations acts, for the Department of Energy to enter into contracts with the Los Alamos School District.

The House bill contained no similar provision.

The conferees agreed to include the Senate provision and to include an extension of authority, from June 30, 1987 to June 30, 1996, for the Department of Energy to enter into contracts with Los Alamos County. The contract authority provided by the conference agreement would be subject to provisions in appropriations acts.

The House recedes with an amendment.

Undistributed reductions

The Senate bill contained a provision (sec. 3113) that would limit total authorizations for appropriations for Department of Energy national security programs to $7,425.225 million and require that necessary reductions be made in individual authorizations so that the total is not exceeded.

The House amendment contained no similar provision.

The Senate recedes.

Balanced technology initiative

The Senate bill contained a provision (sec. 3114(b)) that would provide that $34 million of funds authorized to be appropriated for operating expenses be available for research on conventional munitions at DOE laboratories.

The House amendment contained no similar provision.

The Senate recedes.

Contractor liability for claims arising out of atomic weapons testing programs

The House bill contained a provision (sec. 3037) that would provide that suits brought by veterans in connection with injuries resulting from nuclear tests be brought against the United States and that the United States be limited to the defenses normally available to a contractor. The provision would also repeal section 1631 of the fiscal year 1985 Defense Authorization Act. The Senate bill contained no similar provisions.

The conferees are most anxious that veterans with legitimate claims against the government arising from nuclear testing receive swift and fair compensation. However, the conferees were not convinced that the approach contained in section 3037 was, on balance, the appropriate remedy in view of several factors. First, the conferees were advised that the House provision would jeopardize the structure of the Federal Tort Claims Act and could threaten the viability of the *Feres* doctrine, with adverse implications for our national security. Second, it has been suggested that administrative remedies may be more appropriate and provide the opportunity for fair compensation to all injured veterans. Such remedies are in the jurisdiction of the Veterans Affairs Committees and the conferees believe that legislation dealing with veterans matters should be dealt with by the committees of jurisdiction. Third, legal remedies are primarily matters within the jurisdiction of the Committees on the Judiciary, and the conferees believe that legislation dealing with legal remedies against the government should properly be dealt with by those committees. For these reasons, the conferees agreed that section 3037 would not be included in the conference agreement.

The conferees strongly endorse the prompt consideration of legislation relating to veterans claims arising out of nuclear testing by the Committee on Veterans Affairs and/or the Judiciary.

The House recedes.

TITLE II—NATIONAL DEFENSE STOCKPILE

Legislative Provisions

Legislative provisions adopted

Extension of prohibition on reductions in stockpile goals (sec. 3201)

The Senate bill contained a provision (sec. 1101) that would prohibit the President before April 1, 1987, from reducing stockpile goals for strategic and critical materials below those in effect on October 1, 1984.

The House amendment contained no similar provision.

The conferees agreed that the National Security Council study, which recommended a dramatic reduction in stockpile goals, is inadequate for stockpile and other mobilization planning. The conferees agreed to prohibit reductions in stockpile goals until October 1, 1987 to provide sufficient time for the administration to develop and present new information in support of stockpile goals and to provide sufficient time for Congress to hold hearings on the subject.

The House recedes with an amendment.

Designation of National Defense Stockpile Manager (sec. 3203)

The House amendment contained a provision (sec. 3103) that would transfer the management and operation of the stockpile to the Secretary of Defense.

The Senate bill contained no similar provisions.

The conferees expressed frustration concerning the fragmented management of the stockpile and the absence of a single Federal official who has responsibility for stockpile matters and who is available to testisfy before Congress about the entire spectrum of the stockpile program. However the Senate conferees were not convinced that the Secretary of Defense is the most appropriate official.

The conferees agreed to a provision that would require the President to designate, not later than February 15, 1987, a single Federal official appointed by the President, with the advice and consent of the Senate, to be responsible for the management and operation of the National Defense Stockpile, including the National Defense Stockpile Transaction Fund. The conferees included the requirement that the official be a presidential appointee so that the individual could be available to testify before the Congress.

The Senate recedes with an amendment.

Extension of uses of stockpile transaction fund and codification of revolving fund provisions (sec. 3203)

The Senate bill contained a provision (sec. 1104) that would expand the use of the National Defense Stockpile Transaction Fund to allow use for transportation, storage, upgrading and studies.

The House amendment contained a similar provision (sec. 3106).

The House recedes.

Authorized disposals from National Defense Stockpile (sec. 3204)

The Senate bill contained a provision (sec. 1102) that would authorize disposals notwithstanding Section 5(b)(2) of the Strategic and Critical Materials Stock Piling Act. The Senate bill would also authorize the disposal of quantities of 26 strategic and critical materials from the stockpile.

The House amendment had no similar provision.

The House recedes with an amendment that would authorize the disposal of quantities of 13 stockpile materials which are excess to the 1984 stockpile goals, as follows:

Antimony, 1,500 short tons; Diamonds, Industrial Stone, 1,125,000 carats; Iodine, 800,000 pounds; Mercury, 3,700 flasks; Mica, Muscovite Film, 3,000 pounds; Mica, Muscovite Splittings, 362,000 pounds; Silicon Carbide, 7,600 short tons; Silver (Coinage Program Only), 3,000,000 troy ounces; Tannin, Chestnut, 1,000 long tons; Tannin, Quebracho, 4,000 long tons; Thorium Nitrate, 10,000 pounds; Tin, 4,000 metric tons; Tungsten, 1,900,000 pounds of tungesten metal equivalent.

This authority provided is in addition to any other authority provided by law to dispose of materials from the National Defense Stockpile.

The amendment would further provide that disposal authority would be provided for fiscal year 1987, notwithstanding section 5(b)(2), to the extent that funds are obligated from the stockpile transaction fund during fiscal year 1987.

Conversion of chromium and manganese ore to high carbon ferrochromium and high carbon ferromanganese (sec. 3205)

The Senate bill contained a provision (sec. 1106) that would provide for the conversion of chromium and manganese ores currently in the stockpile to 374,000 short tons of high carbon ferrochromium and 472,000 short tons of high carbon ferromanganese over a period of seven years beginning in fiscal year 1987.

The House amendment contained no similar provision.

The House recedes.

Report on war emergency situations and mobilization requirements (sec. 3206)

The House amendment contained a provision (sec. 3104) directing the Secretary of Defense to submit an annual report detailing requirements (goals) for the national defense stockpile and national emergency planning assumptions used to determine such requirements.

The Senate bill contained no similar provision.

The conferees agreed to a provision that would require the Secretary of Defense to submit to Congress a report, by February 15, 1987, which would: describe war scenarios for total mobilization of the economy for a conventional global war of not less than three years; describe the length and intensity of each scenario; describe the military force structure to be mobilized under the scenarios; estimate the defense expenditures required for each scenario; and contain the Secretary's recommendation as to which scenario or scenarios are most appropriate for National Defense Stockpile planning.

The Senate recedes with an amendment.

Miscellaneous technical amendments (sec. 3207)

The House amendment contained a provision (sec. 3107) that would make miscellaneous technical amendments to the Strategic and Critical Materials Stock Piling Act.

The Senate bill contained no similar provision.

The Senate recedes.

LEGISLATIVE PROVISIONS NOT ADOPTED

Authorization of appropriations

The Senate bill contained a provision (sec. 1103) that would authorize the appropriation of $120 million for the acquisition of materials for the stockpile. The provision would also direct the Administrator of the General Services to acquire not less than 30,000 kilograms of germanium during fiscal year 1987.

The House amendment contained no similar provision.

The conferees strongly support the prompt acquisition of needed materials for the stockpile, including germanium. However, the conferees agreed that existing law provided adequate authority for the acquisition of germanium and that additional legislation was unnecessary.

The Senate recedes.

Definition

The Senate bill contained a provision (sec. 1105) that would define the term "National Defense Stockpile".

The House amendment contained no similar provision.

The conferees agreed that a definition was unnecessary in the context of other conference agreements.

The Senate recedes.

Stockpile management

The House amendment contained a provision (sec. 1305) that would provide that appropriations for the operation of the stockpile be made to the Department of Defense. The provision would also grant authority for interagency agreements and provide for reimbursement of services performed by other agencies.

The Senate bill contained no similar provision.

The House recedes.

TITLE III—CIVIL DEFENSE

The President's budget request contained $126.565 for civil defense for fiscal year 1987.

The Senate bill would authorize $111.565 million for fiscal year 1987 to carry out the provisions of the Federal Civil Defense Act of 1950. The House amendment would authorize $126.565 million for this purpose. The conferees agree to authorize $120.565 million.

The conferees are extremely disappointed that the review of future civil defense policy mandated by the fiscal year 1986 Department of Defense authorization Act was not submitted to the Congress in time for the congressional review of the fiscal year 1987 budget request. Moreover, a statement of the Administration, still has not been received. The conferees expect to receive a statement of Administration policy regarding civil defense before the fiscal year 1988 budget request is considered by the Congress.

DIVISION D—SCHOOL LUNCH AND CHILD NUTRITION PROGRAMS

1. AUTHORIZATION OF APPROPRIATIONS UNDER THE CHILD NUTRITION ACT OF 1966

(a) Special supplemental food program for women, infants, and children (WIC)

The Senate Bill, but not the House amendment, extends the authorization of appropriations for the Special Supplemental Food Program for Women, Infants, and Children (WIC program through fiscal year 1989 at a level of $1.57 billion for fiscal year 1986, such sums as may be necessary for fiscal years 1987 and 1988, and $1.782 billion for fiscal year 1989. [Sec. 4104.]

The House recedes.

(b) State administrative expenses (SAE)

The Senate Bill, but not the House amendment, extends the authorization of appropriations for the State Administrative Expenses (SAE) provision through fiscal year 1989. [Sec. 4103.]

The House recedes.

(c) Nutrition education and training (NET)

The Senate Bill, but not the House Amendment, extends the authorization of appropriations for the NET program (at $5 million annually) through fiscal year 1989. [Sec. 4105.]

The House recedes.

2. AUTHORIZATION OF APPROPRIATIONS UNDER THE NATIONAL SCHOOL LUNCH ACT

(a) Summer food service program

The Senate Bill, not the House amendment, extends the authorization of appropriations for the summer food service program through fiscal year 1989. [Sec. 4101.]

The House recedes.

(b) Commodity distribution program

The Senate Bill, but not the House amendment, extends authority for the commodity distribution program *through* fiscal year 1989. [Sec. 4102.]

The House recedes.

3. BASIS FOR COMMODITY ASSISTANCE

The Senate Bill, but not the House amendment, changes the dates specified in current law by which the Secretary is to make an estimate of the value of agricultural commodities to be delivered to schools and by which the Secretary must provide cash payments for any difference between the estimates of available commodities and the amount of commodity support mandate by law. Specifically, the Senate Bill requires that the Secretary make estimates for the amount of commodity support available by June 1, instead of May 15; and requires the Secretary to make cash payments for the difference between these estimates and the mandated commodity level by July 1, instead of June 15, of each school year. [Sec. 4201.]

The House recedes.

4. AUTOMATIC ELIGIBILITY FOR CERTAIN PROGRAMS

The Senate Bill, but not the House amendment, requires that a child who is a member of a household receiving food stamps, or who is a member of an AFDC assistance unit in a State where the income standard of eligibility does not exeeed 130 percent of poverty, be served a free lunch and breakfast without further application or eligibility determinations. [Sec. 4203.]

The House recedes.

Under this amendment, a parent or guardian is still required to complete an application, the local school authorities are still required to determine the applicant's eligibil-

ity, and the Secretary, States, and local school food authorities may continue to verify the data contained in the application. However, it is the conferee's intent that the application procedure under section 109(b)(2)(B) and the eligibility determination and verification procedures under section 109(b)(2)(C) be simplified by substantially reducing the number and types of inquiries made by the applicable agency.

More specifically, indication on the application of receipt of food stamps or AFDC (under the circumstances in the amendment) shall be sufficient to satisfy the eligibility determination requirement and proof of receipt of food stamps or AFDC shall be sufficient to satisfy the verification requirement.

5. LIMITATION ON MEAL CONTRACTING

The Senate Bill, but not the House amendemnt, prohibits a school or school food authority participating in the school lunch program from contracting with food service company to provide a la carte meal service unless such company offers free, reduced-price, and full price reimbursable meals to eligible children. [Sec. 4204.]

The House recedes.

6. ADMINISTRATION OF CHILD NUTRITION PROGRAMS BY CONTRACT OR DIRECT DISBURSEMENT

The Senate bill, but not the House amendment, revises the current requirement for the Secretary of Agriculture to administer directly child nutrition programs in certain schools, institutions, and service institutions by allowing the Secretary to meet this requirement by contracting with an organization to administer such programs. The direct administration of such programs by either the Secretary, or through a contract between the Secretary and an organization, is applicable to cases where such programs have been directly administered by the Secretary continuously since October 1, 1980, or where a State educational agency is prohibited by law from doing so. The Senate bill maintains current law authority for States to assume direct administration of programs. It also expands current law provisions regarding the appropriate withholding, disbursal and use of program and administrative funds in cases where the Secretary directly administers programs to include situations where the program is administered by a contracting organization. [Sec. 4207.]

The Senate bill further authorizes the Secretary of Agriculture to carry out pilot projects in three States where the Secretary is currently administering programs, to test the concept of contracting with private nonprofit and profit organizations to administer the child nutrition programs that are currently administered by the Secretary.

The House recedes.

The conferees intend that the Comptroller General monitor the making and implementation of contracts under the pilot projects and make a report to the Senate Committee on Agriculture, Nutrition, and Forestry, and the House Committee on Education and Labor concerning the pilot projects. The conferees express concern with the continued reluctance of some States to operate various child nutrition programs. The conferees believe that States should assume operation of these programs and urge States to do so.

(NOTE.—The Department of Agriculture has reported that 19 States do not directly administer one or more of the child nutrition programs, thus requiring the Secretary to operate such programs in those States. According to the Department, those States are: Alaska, California, Colorado, Delaware, Georgia, Hawaii, Kansas, Michigan, Minnesota, Missouri, Nebraska, New York, North Dakota, Oregon, South Carolina, Tennessee, Virginia, Washington, and Wyoming.)

7. CHANGE IN TUITION LIMITATION FOR PRIVATE SCHOOLS

The Senate bill, but not the House amendment, raises from $1,500 to $2,000 the maximum tuition that a private school may charge and be eligible to participate in federally-assisted school lunch and child nutrition programs—effective October 1, 1986. The Senate bill also indexes this limit to inflation by requiring an annual adjustment each July 1, beginning July 1, 1988, to reflect changes in the Consumer Price Index for All Urban Consumers for the most recent 12-month period for which data are available. [Sec. 4205.]

The House recedes.

8. DEPARTMENT OF DEFENSE OVERSEAS DEPENDENTS' SCHOOLS

The Senate Bill, but not the House amendment, deletes the authorization of appropriations for the higher Federal payment required for free and reduced-price meals served in Department of Defense Overseas Dependents' Schools when the cost of such meals is higher than the amount provided by the regular free and reduced-price meal reimbursement rates. The Senate Bill retains the authorization of appropriations for payment of the administrative costs of providing school lunches and breakfasts in such schools. [Sec. 4208.]

The House recedes.

9. RESTORATION OF CERTAIN KINDERGARTENS TO THE SPECIAL MILK PROGRAM

The Senate Bill, but not the House amendment, extends eligibility for the special milk program to kindergarten children in schools which are currently ineligible to participate in the program because the schools participate in the school lunch or breakfast program. [Sec. 4209.]

The House recedes.

NOTE.—The Senate Bill adopts an amendment to extend eligibility for the special milk program to kindergarten children who do not have access to either the school breakfast or school lunch program—effective October 1, 1986 [Sec. 4209.]

(The conferees intend that children attending partial day kindergartens (so-called "split sessions") and not having access to either the school breakfast or school lunch programs currently operating in schools they attend be permitted to participate in the special milk program. Full day kindergartens and other programs where children receive either breakfast or lunch would continue to be ineligible to participate in the special milk program.)

10. IMPROVEMENT OF BREAKFAST PROGRAM MEAL PATTERN

(a) Additional breakfast reimbursement

The Senate Bill, but not the House amendment, provides an additional 3 cents in cash reimbursement for each breakfast served in schools, child care centers, and family day care homes. Additionally, the Senate Bill provides that, subject to availability, the Secretary shall make available at least 3 cents per breakfast in commodities acquired by the Secretary or the Commodity Credit Corporation. These provisions are effective October 1, 1986. [Sec. 4210.]

The conferees emphasize that commodities to be made available under this provision are to include only those that the Secretary has acquired for price support and surplus removal reasons, and that are not necessary for other domestic and foreign support programs or activities. This commodity support provision does not require the Secretary to make purchases for the specific purposes of meeting the needs of breakfast programs.

The House recedes.

The conferees intend that both the cash and commodity assistance be used to supplement existing levels of Federal, State, and local assistance. The conferees expect the Secretary to ensure a maintenance of effort by State and local sources so that the additional Federal reimbursements are not used to displace existing levels of support.

The conferees further intend that eligible institutions would not be required to accept any or all of the full value of commodities. In order to minimize reporting and record-keeping burdens, the Department would not require a separate accounting of commodities ordered for use in breakfasts.

(b) Nutrition requirements for breakfasts

The Senate Bill, but not the House amendment, requires the Secretary of Agriculture to review and revise the nutritional requirements for breakfasts to improve their nutritional quality and to promulgate regulations implementing such revisions within 180 days after enactment of the bill. In reviewing the program requirements, the Secretary is to take into consideration the findings of the National Evaluation of School Nutrition Programs, the amount of additional cash and commodity support provided, and the need to provide increased flexibility in meal planning to local school food authorities. [Sec. 4210.]

The House recedes.

11. EXTENSION OF OFFER VERSUS SERVE PROVISION TO THE SCHOOL BREAKFAST PROGRAM

The Senate Bill, but not the House amendment, permits local school food authorities to allow students to refuse up to one item in each school breakfast. Any such refusal may not affect the charge to students, or the amount of Federal reimbursement for the breakfast. [Sec. 4211.]

The House recedes.

12. STATE ADMINISTRATIVE EXPENSE STAFFING STANDARDS

The Senate Bill, but not the House amendment, deletes the requirement that the Secretary of Agriculture develop State staffing standards for the administration of the school lunch, school breakfast, child care food, and special milk programs. [Sec. 4212.]

The House recedes.

13. CHILD CARE FOOD PROGRAM

The Senate Bill, but not the House amendment, specifies that States are not required to provide a hearing to a child care food program institution when State action is taken on the basis of a Federal audit determination. [Sec. 4401.]

The House recedes.

The Senate Bill permits a hearing at the Federal level in cases where the State does not provide such a hearing. [Sec. 4401.]

14. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC)

(a) Costs for nutrition services and administration

The Senate Bill, but not the House amendment, maintains the current law definition of the types of costs for which WIC administrative funds are to be used, but

changes the term "administrative costs" to "costs for nutrition services and administration" in this definition. [Sec. 4301.]

The Senate Bill, but not the House amendment, also deletes the costs of warehouse facilities from the list of items defining the types of costs for which WIC administrative funds are to be used. [Sec. 4301.]

The House recedes.

(b) State eligibility for WIC funds

The Senate Bill, but not the House amendment, makes a State ineligible to participate in the WIC program if State or local sales taxes are collected on food purchased under the WIC program.

The Senate Bill also makes the State sales tax provision applicable to a State beginning with the fiscal year commencing after the end of the first regular session of the State legislature after enactment of the bill. [Sec. 4302.]

The House recedes.

In order that States may have adequate time to take appropriate legislative action, the Conferees intend that this provision will become effective the first fiscal year beginning after the end of the first regular session of the State legislature following enactment. [Sec. 4302.]

(c) Participation report

The Senate Bill, but not the House amendment, requires the Secretary of Agriculture to report biennially to Congress on the income and nutritional risk characteristics of participants; migrant participation in the program; and such other matters relating to participation in the program as the Secretary deems appropriate. The Senate Bill also authorizes the Secretary to use WIC evaluation funds to pay for the costs of preparing this report. [Sec. 4303.]

The House recedes.

(d) Improving State agency administrative systems

The Senate Bill, but not the House amendment, adds the provision of technical assistance to improve State agency administrative systems to the types of activities the Secretary of Agriculture may conduct with WIC evaluation funds. [Sec. 4309.]

The House recedes.

(e) Plan of operation and administration

The Senate Bill, but not the House amendment, deletes from the current list of State plan requirements the following: (1) a description of how administrative funds are distributed and budgeted; (2) a description of methods for determining nutritional risk; (3) staffing patterns; (4) nutrition education goals; (5) plans for informing persons of eligibility; (6) a copy of the State procedure manual; (7) a list of all areas and special populations in need; and (8) plans to initiate or expand operations in areas most in need.

The Senate Bill, also adds new requirements that the State plan include a plan to provide program benefits to underserved areas if sufficient funds are available, to provide program benefits to those most in need, and to enroll eligible women in the early months of pregnancy.

The Senate Bill, also adds new requirements that a State plan describe how both the Aid to Families with Dependent Children (AFDC) and maternal and child health care programs are coordinated with WIC program operations. The Senate Bill also allows States to submit only those portions of their State plans which differ from previous years. [Sec. 4304.]

The House recedes.

(f) Public comment

The Senate Bill, but not the House amendment, deletes specific State requirements for public hearings on the State plan one month prior to submission to the Governor, and replaces this with a general requirement that State agencies establish procedures to assure that the public has an opportunity to comment on the development of the State plan. [Sec. 4305.]

The House recedes.

(g) Availability of program benefits

The Senate Bill, but not the House amendment, maintains the requirement for State agencies to publicize the WIC program and distribute information to agencies and offices that deal with potentially eligible persons on an annual basis. It also adds a requirement that State and local agencies distribute information in a manner designed to provide such information to potentially eligible persons most in need of benefit. [Sec. 4306.]

The House recedes.

The conferees, in providing for a multiyear reauthorization of the Special Supplemental Food Program for Women, Infants, and Children (WIC), reaffirm their commitment and support for this important health and intervention and nutrition program.

The Department of Agriculture has established through regulations nutritional risk criteria for participation in the WIC program. These regulations require that, when vacancies occur after a local agency has reached its maximum participation level, first priority be assigned to providing WIC benefits to pregnant women, breastfeeding women, and infants at nutritional risk as demonstrated by hematological or anthropometric measurements or other documented related medical conditions that demonstrate need for supplemental foods. These are the recipients for whom the WIC program is the most effective and who should be given greatest priority.

(h) Repayment of benefits by recipients

The Senate Bill, but not the House amendment, requires a State agency to recover the cash value of program benefits overissued to a family as a result of misrepresentation by a member of such family, unless the State agency determines, in accordance with standards developed by the Secretary of Agriculture, that the recovery of such benefits would not be cost effective. The Senate Bill also requires that a State agency recover from a person making an intentional misrepresentation the amount that the State agency determines is equal to the value of the overissued food benefits, unless the State agency determines that the recovery of the benefits would not be cost effective. [Sec. 4307.]

The House recedes.

The conferees intend that this provision impose no new requirement on the States, and that State agencies would be expected to provide a hearing for the recipient where necessary, and also to provide procedural protections, including proper notice and the opportunity for the recipient to be heard.

(i) Priority funds for WIC migrant programs

The Senate Bill, but not the House amendment, requires that not less than nine-tenths of 1 percent of the funds appropriated for the WIC program be first made available for services to eligible migrant populations and that migrant services be provided in a manner consistent with a State's priority system for participation. Additionally, the Senate Bill provides that to the extent possible, accountability for migrant services be conducted under regulations in effect on the date of enactment of the bill. [Sec. 4308.]

The House recedes.

(j) Paperwork reduction

The Senate Bill, but not the House amendment, requires the Secretary of Agriculture to keep to a minimum the documentation that States provide to be exempted from the requirement that not less than one-sixth of their WIC administrative funds be used for nutrition education activities. [Sec. 4310.]

The House recedes.

(k) Allocation standards

The Senate Bill, but not the House amendment, deletes the requirement that a State agency satisfy allocation guidelines established by the Secretary of Agriculture when distributing administrative funds to local agencies under allocation standards developed by the State agency in cooperation with local agencies. The Senate Bill also deletes the requirement that the State allocation standards be included in the required State plan of operation and administration. [Sec. 4311.]

The House recedes.

(l) Advance payments

The Senate Bill, but not the House amendment, allows instead of requires, State agencies to forward advance administrative funds to local agencies initiating WIC program operations. [Sec. 4312.]

The House recedes.

(m) Expenditure of funds for the special supplemental food program

The Senate Bill, but not the House amendment, allows a State to use up to 1 percent of the amount of funds allocated to the State for supplemental foods in a fiscal year to cover expenses incurred for supplemental foods in the preceding fiscal year, and specifies that this provision is not to apply to appropriations made before enactment of the bill. The Senate Bill further allows a State agency to keep up to 1 percent of the amount of the funds allocated to the agency in a fiscal year for use during the subsequent fiscal year, and specifies that use of such funds in a subsequent year may not affect the amount of funds allocated to the State agency for that year. [Sec. 4313.]

The House recedes.

The conferees do not intend that States overspend or underspend their allocations year after year. Rather, it is the intent of the provision that States should use the provision as a tool to enable the States to spend as close to 100 percent of their respective allocation as possible. Funds available for carryover to the next fiscal year are available for food and administrative expenses, while funds used to cover expenses for previous year costs are only applicable for food costs.

15. NUTRITION EDUCATION AND TRAINING PROGRAMS

The Senate Bill, but not the House amendment, lowers from $75,000 to $50,000 the minimum grant provided to States for the nutrition education and training programs. [Sec. 4402.]

The House recedes.

(NOTE.—The Senate Bill provision reflects language included in the fiscal year 1982 appropriations law (P.L. 97-370) that perma-

nently lowered the minimum grant amount a State could receive from $75,000 to $50,000. This change followed the enactment of the Omnibus Budget Reconciliation Act of 1981, P.L. 97-35, which reduced the authorization for annual NET grants from $15 million to $5 million, but did not lower the $75,000 minimum grant States could receive if their allocation did not provide that amount. State grant allocations are based on student enrollment. Had the fiscal year 1982 appropriations law not reduced the minimum grant amount, States with small student enrollments which were receiving the minimum $75,000 grants would have continued to receive that amount while other States with larger student enrollments would have had to bear the full loss of funding resulting from P.L. 97-35).

16. EXTENSION OF ALTERNATIVE MEANS OF ASSISTANCE

(a) Pilot projects

The Senate Bill, but not the House amendment, references section 1581 of Pubic Law 99-198, the Food Security Act of 1985, with respect to the ability of school districts that participated in the pilot project on cash or commodity letters of credit in lieu of commodities to continue to receive entitlement commodity support in this alternative form through the school year ending June 30, 1987. [Sec. 4403].

The House recedes.

(NOTE. Section 1581 also provides that such school districts can receive bonus commodities to the same extent as other school districts, but only in the form of commodities (no cash or letter of credit).)

(b) Compensation to pilot projects

The Senate Bill, but not the House amendment, requires the Secretary of Agriculture to provide cash compensation, subject to availability of funds, to school lunch pilot project school districts for losses they incurred as a result of a change in the methodology used to conduct the study on cash or commodity letters of credit in lieu of commodities during the school year ending June 30, 1983. The Comptroller General is to be consulted with respect to the accounting procedures used to determine such losses. The total authorization of appropriations for this provision is limited to $50,000. [Sec. 4403.]

The House recedes.

(NOTE.—The change in methodology was related to a change in the form of bonus commodity assistance offered to the schools participating in the pilot project during the 1982-83 school year.)

17. NATIONAL COMMODITY PROCESSING SYSTEM

(a) Extension

The Senate Bill, but not the House amendment, references section 1114(a)(2) of the Agriculture and Food Act of 1981, as amended by Public Law 99-198, with respect to processing agreements. (Sec. 4404.)

The House recedes.

(NOTE.—Public Law 99-198, the Food Security Act of 1985, contains the same provision except that it is effective through June 30, 1987.)

(b) Annual settlement of accounts

The Senate Bill, but not the House amendment, references section 1114(a)(2) of the Agriculture and Food Act of 1981, as amended by Public Law 99-198, with respect to annual settlement of accounts. [Sec. 4404.]

The House recedes.

(NOTE.—Public Law 99-198 contains the same provision except that it requires that private companies annually settle accounts in order to be eligible to enter into and continue agreements with the Secretary. Section 1114(a)(2) of the Agriculture and Food Act of 1981, as amended by Public Law 98-198, requires private companies participating in processing agreements to annually settle all accounts with the Secretary and appropriate State agencies regarding commodities processed under such agreements in order to enter into and continue agreements with the Secretary.)

18. INCLUSION OF WHOLE MILK AS A SCHOOL LUNCH BEVERAGE

The Senate Bill, but not the House amendment, requires that schools participating in the school lunch program offer whole milk as a beverage, along with such other forms of milk as the Secretary might require to meet the nutritional requirements of the program. [Sec. 4202.]

The House recedes.

19. USE OF SCHOOL LUNCH FACILITIES FOR ELDERLY PROGRAMS

The Senate Bill, but not the House amendment, contains provisions for local education agencies to use school lunch program facilities, equipment, and personnel to support a nonprofit nutrition program for the elderly. [Sec. 4206.]

The House recedes.

20. The Senate Bill, but not the House amendment, intends that the provisions of the bill take effect as follows:

Section No. and provision	Effective date
4101—Summer food service program for children.	Enactment.
4102—Commodity distribution program	Enactment.
4103—State administrative expenses	Enactment.
4104—Special supplemental food program for women, infants, & children.	Enactment.
4105—Nutrition education and training program	Enactment.
4201—Basis for commodity assistance	Enactment.
4202—Inclusion of whole milk as a school lunch beverage.	July 1, 1986.
4203—Automatic eligibility for certain programs	July 1, 1986.
4204—Limitation on meal contracting	July 1, 1986.
4205—Change in tuition limitation for private schools.	October 1, 1986.
4206—Use of school lunch facilities for elderly programs.	Enactment.
4207—Pilot projects for administration of child nutrition programs by contract or direct disbursement.	Enactment.
4208—Department of Defense overseas dependent's schools.	Enactment.
4209—Restoration of certain kindergartens to the special milk program.	October 1, 1986.
4210—Improvement of breakfast program meal pattern.	October 1, 1986.
4211—Extension of offer versus serve provision to the school breakfast program.	Enactment.
4212—Staffing standards	Enactment.
4301—Costs for nutrition services and administration.	Enactment.
4302—State eligibility for WIC funds	The first fiscal year beginning after the end of the first regular session of the State legislature following the date of enactment of this Act.
4303—Participation report	Enactment.
4304—Plan of operation and administration	Enactment.
4305—Public comment	Enactment.
4306—Availability of program benefits	Enactment.
4307—Repayment of certain benefits by recipients.	October 1, 1986.
4308—Priority funds for WIC migrant programs	October 1, 1986.
4309—Improving State agency administrative systems.	Enactment.
4310—Paperwork reduction	Enactment.
4311—Allocation standards	Enactment.
4312—Advance payments	October 1, 1986.
4313—Availability of funds (WIC)	Enactment.
4401—Hearings on Federal audit actions under the child care food program.	Enactment.
4402—Basis for nutrition education grants	Enactment.
4403—Extension of alternative means of assistance.	Enactment.
4404—National donated commodity processing programs.	Enactment.
4501—Obsolete provisions	Enactment.
4502—Obsolete references to Health, Education, and Welfare.	Enactment.
4503—Conforming amendments	Enactment.

The House recedes.

21. TECHNICAL AND CONFORMING AMENDMENTS

(a) The Senate Bill, but not the House amendment, repeals the misdesignated section 22 in the National School Lunch Act (Study of Menu Choice) as an obsolete provision. [Sec. 4501.]

The House recedes.

(b) The Senate Bill, but not the House amendment, strikes out "Health, Education, and Welfare" each place it appears in sections 4(a), 17(e)(2), 17(k)(L) and (2), and 19(d)(2) and (3) of the Child Nutrition Act of 1966, and inserts in lieu thereof "Health and Human Services". [Sec. 30(b).]. The Senate Bill also makes the same change to sections 17(b)(6) and 17(b)(13) of the Child Nutrition Act of 1966 and to section 17(a) of the National School Lunch Act. [Sec. 4502.].

(c) The Senate Bill, but not the House amendment, strikes out "Office of Education of the Department of Health, Education, and Welfare, and inserts in lieu thereof "Department of Education" in section 19(j)(3) of the Child Nutrition Act of 1966. [Sec. 4502.]

The House recedes.

(d) The Senate Bill, but not the House amendment, redesignates section 19(j) of the Child Nutrition Act of 1966 is proper alphabetical sequence as section 19(i). [Sec. 4503.]

The House recedes.

(e) The Senate Bill, but not the House amendment, defines the Secretary to mean the "Secretary of Agriculture". [Sec. 4503.]

The House recedes.

22. OBSOLETE PROVISIONS AND REFERENCES

(a) The Senate Bill, but not the House amendment, repeals sections 18 (Nutrition Program Staff Study) and 19 (Appropriations for the Trust Territory of the Pacific Islands) of the National School Lunch Act and deletes the reference to section 19 in section 3 of such Act. [Sec. 4501.]

The House recedes.

(b) The Senate Bill, but not the House amendment, redesignates sections 20, 12, and 22 of the National School Lunch Act as sections 18, 19, and 20, respectively, to conform to the Senate amendment's repeal of sections 18 and 19, and conforms references to section 20 in current law as section 19 accordingly. [Sec. 4501.]

The House recedes.

(c) The Senate Bill, but not the House amendment, deletes the provision and reference in section 20 of the National School Lunch Act relating to the authorization for the Secretary of Agriculture to conduct pilot projects during the 1979-80 school year to determine the feasibility, cost, and consequences of providing lunches free to all children. [Sec. 4501.]

The House recedes.

From the Committee on Armed Services for consideration of the entire Senate bill and House amendments (unless otherwise restricted):

LES ASPIN,
MELVIN PRICE,
CHARLES E. BENNETT,
SAMUAL S. STRATTON,
BILL NICHOLS,
DAN DANIEL,
G.V. MONTGOMERY,

PAT SCHROEDER,
BEVERLY BYRON,
NICK MAVROULES,
EARL HUTTO,
IKE SKELTON,
DAVE MCCURDY,
RICHARD RAY,
JOHN SPRATT,
WM. L. DICKINSON,
G. WILLIAM WHITEHURST,
FLOYD SPENCE,
MARJORIE S. HOLT,
ELWOOD HILLIS,
ROBERT E. BADHAM,
BOB STUMP,
JIM COURTER,
LARRY J. HOPKINS,
BOB DAVIS,

From the Permanent Select Committee on Intelligence, solely when differences regarding intelligence-related activities are under consideration:

LEE H. HAMILTON,
LOUIS STOKES,
DICK CHENEY,

From the Committee of Foreign Affairs, solely for the consideration of sections 205(f), 952, 1205-1209, 1214-1217, 1228, 1231, and 1233 of the Senate bill and section 1024 and 1041 of the House amendments:

DANTE B. FASCELL,
LEE H. HAMILTON,
GUS YATRON,
STEPHEN J. SOLARZ,
BENJAMIN A GILMAN,

Solely for the consideration of section 1032 of the House amendments and modifications committed to conference:

GUS SAVAGE,

Solely for the consideration of sections 109, 203, 205(a)(1), 1210, 1230, and 3114(a) of the Senate bill and sections 123, 128, 208, 215, 1061, 3013, and 3036 of the House amendments:

LES ASPIN,
MELVIN PRICE,
CHARLES E. BENNETT,
PAT SCHROEDER,
BEVERLY BYRON,
NICK MAVROULES,
DAVE MCCURDY,
JOHN SPRATT,
GEORGE E. BROWN, JR.,
RICHARD A GEPHARDT,
VIC FAZIO,

Mr. MILLER of California.
Mr. WYDEN in two instances.
Mr. FEIGHAN.
Mr. DINGELL.
Mr. FASCELL.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 2534. An act to authorize the acquisition and development of a mainland tour boat facility for the Fort Sumter National Monument, South Carolina, and for other purposes, to the Committee on Interior and Insular Affairs.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and joint resolutions of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 1593. An act to direct the Secretary of the Interior to release on behalf of the United States certain restrictions in a previous conveyance of land to the town of Jerome, AZ.

H.R. 2092. An act to amend the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979 to authorize appropriations for fiscal year 1987, and for other purposes.

H.R. 3005. An act to direct the Secretary of the Interior to convey certain lands, withdrawn by the Bureau of Reclamation for townsite purposes, to the Huntley Project Irrigation District, Ballantine, MT.

H.R. 3168. An act to require the Director of the Office of Management and Budget to prepare an annual report consolidating the available date on the geographic distribution of Federal funds, and for other purposes.

H.R. 4492. An act to permit the transfer of certain airport property to Algona, IA.

H.R. 4712. An act to provide for the restoration of the fishery resources in the Klamath River basin, and for other purposes.

H.R. 4759. An act to authorize appropriations for fiscal year 1987 for intelligence and intelligence related activities of the U.S. Government, the intelligence community staff, and the Central Intelligence Agency retirement and disability system, and for other purposes.

H.R. 5316. An act to amend title 28 of the United States Code to provide for the appointment of additional bankruptcy judges, to provide for the appointment of U.S. trustees to serve in bankruptcy cases in judicial districts throughout the United States, to make certain changes with respect to the role of U.S. trustees in such cases, and for other purposes.

H.J. Res: 735. Joint resolution to designate December 11, 1986, as "National SEEK and College Discovery Day".

H.J. Res: 751. Joint resolution making further continuing appropriations for fiscal year 1987, and for other purposes.

SENATE ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to enrolled bills and joint resolutions of the Senate of the following title:

S. 593. An act for the relief of the Merchants National Bank of Mobile, AL.

S. 1124. An act to amend title 49, United States Code, to reduce regulation of surface freight forwarders, and for other purposes.

S. 1917. An act to promote immunization and oral rehydration in developing countries, to promote democracy in Haiti, to protect tropical forests and biological diversity in developing countries, to authorize increased funding for the child survival fund and for international narcotics control assistance, and for other purposes.

S.J. Res: 395. Joint resolution to designate the period October 1, 1986, through September 30, 1987, as "National Institutes of Health Centennial Year".

BILLS AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on the following day present to the President, for his approval, bills and joint resolutions of the House of the following title:

On October 10, 1986

H.J. Res. 751. Joint resolution making further continuing appropriations for fiscal year 1987, and for other purposes.

H.J. Res. 517. Joint resolution providing for reappointment of David C. Acheson as a citizen regent of the Board of Regents of the Smithsonian Institution.

H.J. Res. 666. Joint resolution expressing the sense of Congress in support of a commemorative structure within the National Park System dedicated to the promotion of understanding, knowledge, opportunity and equality for all people.

H.J. Res. 678. Joint resolution to designate October 1986 as "Crack/Cocaine Awareness Month".

H.R. 1598. An act for the relief of Steven McKenna.

H.R. 2224. An act to amend the Immigration and Nationality Act to permit nonimmigrant alien crewmen on fishing vessels to stop temporarily at ports in Guam.

H.R. 3526. An act to provide for the settlement of certain claims respecting the San Carlos Apache Tribe of Arizona.

H.R. 4021. An act to extend and improve the Rehabilitation Act of 1973.

H.R. 4952. An act to amend title 18, United States Code, with respect to the interception of certain communications, other forms of surveillance, and for other purposes.

H.R. 5016. An act for the relief of Sueng Ho Jang and Sueng Il Jang.

ADJOURNMENT

Mr. WALKER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 35 minutes p.m.), the House adjourned until tomorrow, Wednesday, October 15, 1986, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4330. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting notification of the proposed issuance of an export license for the sale to Japan of two satellites and associated services, pursuant to 22 U.S.C. 2776(c); to the Committee on Foreign Affairs.

4331. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

4332. A letter from the Assistant Secretary, Legislative and Intergovernmental Affairs, Department of State, transmitting copies of travel advisories recently issued by the Department for Somalia and Bolivia which have security implications for Americans traveling or residing in those countries, pursuant to section 505, title V, Omnibus Diplomatic Security and Antiterrorism Act of 1986; to the Committee on Foreign Affairs.

4333. A letter from the Chairman, U.S. Consumer Product Safety Commission, transmitting a report of the Commission's activities during calendar year 1985 in administering the Government in the Sunshine Act, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

4334. A letter from the Adjutant General, Veterans of Foreign Wars of the United States, transmitting a report and financial audit, pursuant to Public Law 88-504, section 3 (36 U.S.C. 1103); to the Committee on the Judiciary.

4335. A letter from the Assistant Secretary of the Army (Civil Works), transmitting a report from the Chief of Engineers, Department of the Army, on Fox River and tributaries, Illinois and Wisconsin; to the Committee on Public Works and Transportation.

4336. A letter from the Acting Under Secretary for International Affairs and Commodity Programs, Department of Agriculture, transmitting the initial commodity and country allocation table showing current programing plans for food assistance for fiscal year 1987, pursuant to 7 U.S.C. 1736b(a); jointly, to the Committees on Agriculture and Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL: Committee on Conference. Conference report on H.R. 3113 (Rept. 99-991). Ordered to be printed.

Mr. DE LA GARZA: Committee on Agriculture. H.R. 5492. A bill to direct the Secretary of Agriculture to release a reversionary interest of the United States in certain land located in Putnam County, FL, and to direct the Secretary of the Interior to convey certain mineral interests of the United States in such land to the State of Florida; with an amendment (Rept. 99-992). Referred to the Committee of the Whole House on the State of the Union.

Mr. MOAKLEY: Committee on Rules. House Resolution 114. A bill to amend the Rules of the House of Representatives with respect to papers of the House (Rept. 99-993). Referred to the House Calendar.

Mr. PEPPER: Committee on Rules. Activities under rule XXXVI with respect to papers of the House (Rept. 99-994). Referred to the Committee of the Whole House on the State of the Union.

Mr. DE LA GARZA: Committee of Conference. Conference report on H.R. 4613 (Rept. 99-995). Ordered to be printed.

Mr. FROST: Committee on Rules. House Resolution 590. Resolution waiving certain points of order against the conference report on the bill (H.R. 4613) to reauthorize appropriations to carry out the Commodity Exchange Act, and to make technical improvements to that act, and against the consideration of such conference report (Rept. 99-996). Referred to the House Calendar.

Mr. HALL of Ohio: Committee on Rules. House Resolution 591. Resolution waiving certain points of order against the conference report on the bill (S. 2638) to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes, and against the consideration of such conference report (Rept. 99-997). Referred to the House Calendar.

Mr. BEILENSON: Committee on Rules. House Resolution 592. Resolution waiving certain points of order against the conference report on the bill (S. 1200) to amend the Immigration and Nationality Act to effectively control unauthorized immigration to the United States, and for other purposes, and against the consideration of such conference report (Rept. 99-998). Referred to the House Calendar.

Mr. DERRICK: Committee on Rules. House Resolution 593. Resolution waiving certain points of order against the conference report on the joint resolution (H.J. Res. 738) making continuing appropriations for the fiscal year 1987, and for other purposes, and against the consideration of such conference report (Rept. 99-999). Referred to the House Calendar.

Mr. RODINO: Committee of Conference. Conference report on S. 1200 (Rept. 99-1000). Ordered to be printed.

Mr. ASPIN: Committee of Conference. Conference report on S. 2638 (Rept. 99-1001). Ordered to be printed.

SUBSEQUENT ACTION ON A REPORTED BILL SEQUENTIALLY REFERRED

Under clause 5 of rule X the following action was taken by the Speaker:

H.R. 5540: Committee on the Judiciary discharged; committed to the Committee of the Whole House on the State of the Union and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BENNETT:

H.R. 5696. A bill to direct the President to support a professorship on constitutional democracy established at the Santo Tomas University in the Republic of the Philippines; and to provide for financial support for such professorship from contributions by veterans of World War II in the Pacific and veterans of the Korean and Vietnam wars; to the Committee on Foreign Affairs.

By Mr. DE LA GARZA:

H.R. 5697. A bill to consolidate and expand the statutory authority for the National Agricultural Library in the Department of Agriculture; to the Committee on Agriculture.

By Mr. DOWNEY of New York (for himself, Mr. BENNETT, Mr. CHANDLER, Mr. FRENZEL, Mr. HORTON, Mr. LOWRY of Washington, Mr. RANGEL, and Mr. SABO):

H.R. 5698. A bill to establish more uniform eligibility and benefit levels under the Aid to Families with Dependent Children Program and the Medicaid Program, to provide for greater Federal financial responsibility for such programs, to enhance the employment prospects of recipients of aid families with dependent children, to provide for a reduced Federal rule with respect to certain activities, to provide fiscal capacity grants to State and localities, and for other purposes; jointly to the Committees on Ways and Means, Energy and Commerce, and Government Operations.

By Mr. LOTT:

H.R. 5699. A bill to establish a Commission on Budget Process Review, require congressional consideration of the Commission's recommendations, and to sunset the budget process if no action is taken to extend or modify it; jointly, to the Committees on Government Operations and Rules.

By Mr. MONTGOMERY (for himself, Mr. HAMMERSCHMIDT, and Mr. Nichols):

H.R. 5700. A bill to exempt retired members of the Armed Forces called to active duty and assigned to full-time duty with the American Battle Monuments Commission from grade limitations of officers of the Armed Forces; jointly, to the Committees on Armed Services and Veterans' Affairs.

By Mr. SENSENBRENNER:

H.R. 5701. A bill to alleviate water damage along the shoreline of the Great Lakes caused by abnormally high water levels; jointly, to the Committees on Public Works and Transportation and Foreign Affairs.

By Mr. LOWERY of California:

H. Con. Res. 410. Concurrent resolution saluting the tuna man for his contributions to the city of San Diego, the Nation, and the world; to the Committee on Post Office and Civil Service.

By Mr. JONES of North Carolina:

H. Res. 589. Resolution to provide for the concurrence of the House to the amendment of the Senate to the bill (H.R. 4531) with amendments; considered under suspension of the rules and agreed to.

MEMORIALS

Under clause 4 of rule XXII,

482. The SPEAKER presented a memorial of the Congress of the Federated States of Micronesia, relative to the funding for the Community College of Micronesia in Pohnpei State; jointly, to the Committees on Appropriations and Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. Carper:

H.R. 5702. A bill for the relief of the Knights of Pythias Hall Company of Wilmington, DE; to the Committee on the Judiciary.

By Mr. Downey of New York:

H.R. 5703. A bill for the relief of Bela Karolyi; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 3521: Mr. STAGGERS and Mr. MOLLOHAN.

H.R. 4523: Mr. SWEENEY.

H.R. 4723: Mr. WEISS and Mr. KRAMER.

H.R. 4738: Mr. GEJDENSON.

H.R. 4762: Mrs. KENNELLY and Mr. FLORIO.

H.R. 4820: Mr. KOSTMAYER.

H.R. 4871: Mr. GEJDENSON.

H.R. 5091: Mr. MRAZEK, Mr. LAGOMARSINO, Mr. LIPINSKI, and Mr. CONYERS.

H.R. 5196: Mr. SHUMWAY and Mr. ECKART of Ohio.

H.R. 5499: Mr. PENNY and Mr. BREAUX.

H.R. 5530: Mr. FAZIO, Mr. TOWNS, Mr. SWIFT, Mr. ATKINS, Mr. TRAFICANT, and Mr. MORRISON of Connecticut.

H.R. 5531: Mrs. BOXER, Mr. VENTO, and Mr. CROCKETT.

H.R. 5553: Mr. DAUB, Mr. PURSELL, Mr. FEIGHAN, Ms. MIKULSKI, Mr. LIGHTFOOT, Mr. MARTINEZ, Mr. HAYES, and Mr. BOEHLERT.

H.R. 5587: Mr. SCHEUER and Mr. TOWNS.

H.R. 5599: Ms. OAKAR.

H.R. 5608: Mr. FRANK, Mr. CHANDLER, Mr. KILDEE, Mr. RIDGE, Mr. ATKINS, Mr. JEFFORDS, Mr. ACKERMAN, Mr. ECKART of Ohio, Mr. HORTON, and Mr. VOLKMER.

H.R. 5627: Mr. STRATTON, Mr. MRAZEK, Mr. MORRISON of Connecticut, and Mr. SCHEUER.

H.R. 5668: Mr. BOLAND, Mr. LEVIN of Michigan, and Mr. SEIBERLING.

H.J. Res. 244: Mr. SWINDALL.

H. Con. Res. 129: Mr. GRADISON, Mr. WALDON, and Mr. WEAVER.

H. Con. Res. 344: Mr. STENHOLM, Ms. KAPTUR, Mr. FAWELL, Mr. FAUNTROY, Mr.

LEACH of Iowa, Ms. SNOWE, Mr. MCKERNAN, and Mr. AKAKA.

H. Con. Res. 408: Mr. WALDON, Mr. MANTON, Mr. MATSUI, Mr. PEPPER, Mr. FAUNTROY, Mr. HOWARD, Mr. MRAZEK, Mr. NEAL, Mr. MINETA, Mr. SCHEUER, Mr. ACKERMAN, Mr. FISH, Mr. BOUCHER, Mrs. BURTON of California, Ms. KAPTUR, and Mr. DYMALLY.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

493. By the SPEAKER: Petition of the city council of Berea, OH, relative to the U.S. Bankruptcy Act; to the Committee on the Judiciary.

494. Also, petition of Mr. Peter J. Cojanis, Washington, DC, relative to the House remaining in session until the conclusion of the summit meetings; to the Committee on Rules.

EXTENSIONS OF REMARKS

CHRIS LAPP DAY IN MONAHANS

HON. RONALD D. COLEMAN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. COLEMAN of Texas. Mr. Speaker, I am honored to announce that today has been officially proclaimed as "Chris Lapp Day" in the west Texas community of Monahans, TX. Chris Lapp is the only Texan to be selected as 1 of 10 outstanding young astronauts from the United States to participate in the Young Astronaut Exchange Program with the Soviet Union, and I am proud to bring his accomplishments to the attention of my colleagues in the U.S. House of Representatives:

MONAHANS, TX PROCLAMATION

Whereas, Chris Lapp has been selected as one of ten outstanding young astronauts from the United States, and the only Texan to be selected to participate in the Young Astronaut Exchange Program with Russia, and

Whereas, The City of Monahans is justly proud of the recent recognition bestowed upon our fine young citizen for his outstanding achievements and wish to recognize these accomplishments.

Now, Therefore, I, Richard J. Hoyer, Mayor of the City of Monahans do hereby proclaim October 14, 1986 as Chris Lapp Day in Monahans, Texas.

[From the Monahans (TX) News, Oct. 9, 1986]

TUESDAY IS CHRIS LAPP DAY, AND DEPARTURE TIME FOR RUSSIA

(By Johnie Kemp)

Tuesday, Oct. 14 is Chris Lapp Day in Monahans, according to a proclamation signed by Mayor Richard Hoyer Monday, Oct. 6. But Chris will not be here to enjoy the honor. At 7 a.m. that Tuesday he will board an American Airlines flight headed for Washington, D.C. where he will undergo two days of "protocol briefing." Two days later the fifteen-year old sophomore at Monahans High School will leave the United States for a two-week stay in the Soviet Union.

Lapp is one of ten students, the only Texan, selected from approximately 250,000 Young Astronauts across the nation who applied for the Young Astronaut Exchange Program to the U.S.S.R. In May of 1986, chapter leaders of the Young Astronaut Program received letters requesting nominations of members for the exchange program. Nominees had to be in grades 7-9, ages 13-16.

Fran Pevey, leader of Young Astronauts chapter 2594 here, took the application to Chris who filled in his achievement test scores and wrote an essay telling why he wanted to go to the Soviet Union. These were sent, along with a nomination letter from Pevey, to the Young Astronauts' headquarters in Washington.

To the surprise and delight of everyone involved. He and his mother, Anna Lapp, made a trip to New York for an appearance on "Good Morning, America." Chris says he didn't say too much on the program—he was suffering from "stage fright."

He has since overcome his shyness and has a lot to say about his upcoming trip and the Young Astronauts' program. "People tell me what I have done is amazing," Chris relates. "But I'm just doing what I love to do. The Young Astronauts' program will cause our next generation to be more orientated toward high-technology careers. It will help them to be better educated as they grow."

What Chris loves is space. He sees it as a frontier to be utilized by humans both for developing technologies and for settlements. "As long as we don't pollute it," he says.

He mentions the need of a "garbage" shuttle to collect the debris already floating around in space and to eliminate future waste material.

He wants to be an aerospace engineer and "some kind of space pilot." He sees space in such a concept that "by the time I'm retired, the planet earth will be just like the town of Monahans in the Universe."

Right now, back on the planet earth and in Monahans, Chris' main worry about his trip to the Soviet Union is losing his luggage on the 17-hour flight.

He says they have been warned to expect "below zero temperatures" and to take warm clothing. He and the other nine Young Astronauts selected for the trip, will stay in hotels in Russia.

"We have been told not to be surprised if men dressed in black suits follow us around in black Mercedes," Chris said. The entourage of Americans, including Linda Long, trip coordinator and T. Wendell Butler, executive director of the program; and an astronaut, will be kept together as a group. 'We probably won't have a chance to talk to Soviet citizens," Chris says.

The young people have been warned what to say, what not to say. "I'm not sure how they (the Russians) will act until we get over there," Chris noted. "The Young Cosmonauts' group will be coming over here in December. They're told the same things about us."

He hopes to meet the Young Cosmonaut group at Johnson Space Center when they come to the United States. He feels the exchange program is an important part of international relationships. "If young kids can get along with each other, grown people can too," he pointed out.

Chris will be taking pictures on his Russian trip with cameras and film provided by the Kodak company.

He will be taking spending money given him by the Optimist Club, the Rotary Club, friends and his grandfather. The Rotary Club has also given him a Rotary Club International bannner to take with him on the trip.

Mayor Moyer is considering sending along a supply of Monahans' water tower lapel pins. The Chamber of Commerce is donating a supply of Monahans' America t-shirts for distribution in Russia; one of them designed to fit Soviet Premier Gorbachev.

No wonder Chris is worried about losing his luggage. Good luck, Chris Lapp, and have an enjoyable and educational trip in the Soviet Union.

By the way, Anna, you and Chris can pick up the t-shirts at Anthony's anytime between now and Tuesday.

FALLEN FIREFIGHTERS HONORED

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. KANJORSKI. Mr. Speaker, few of us ever risk our lives in the course of a day's work, yet our Nation's firefighters are called upon to do just this every day of their careers. I would like to take this opportunity to draw attention to those brave men and women who have died in service to their communities.

On Sunday, October 12, the fifth annual observance to honor the career and volunteer firefighters who died while in service was held at the National Fallen Firefighters Memorial in Emmitsburg, MD. Established on October 4, 1981, this memorial was formally dedicated to the memory of the Nation's firefighters who have died in the line of duty. Among those honored this year for their brave service were Pennsylvanians John C. Edwards of the Hunlock Creek Volunteer Fire Co. and Phillip R. Eicke of the Kingston Fire Department.

To give one's life in the effort to save the lives of others is the most precious gift any of us have to give, and no memorial can ever express adequate gratitude. To the families of those who lost their lives while performing their duty as firefighters, we who have benefited from their services can bestow honor upon their names and remember their deeds. This small tribute is the least we can do.

Mr. Speaker, we too often fail to recognize the everyday bravery our Nation's firefighters exhibit in their efforts to save lives from fires. It is an honor for me to bring to our attention the deeds of the fire companies which serve communities across our Nation.

FOR THE RELIEF OF BELA KAROLYI

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. DOWNEY of New York. Mr. Speaker, today I have introduced a private bill for the relief of Mr. Bela Karolyi, the distinguished gymnastics coach who, among many other accomplishments, was Mary Lou Retton's coach.

Mr. Karolyi defected to the United States from his native Romania in April 1981, with his

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

wife Marta. Their daughter Andrea followed them to the United States later that year. Mr. Karolyi and his wife initially took positions at the University of Oklahoma and then moved on to a private gymnastics club in Houston.

Bela Karolyi has coached a whole new generation of young gymnasts and is widely credited with contributing to the United States success at the Los Angeles Olympics.

I have introduced this bill, Mr. Speaker, in order to make it possible for Mr. Karolyi to become an American citizen in time to serve as the coach for the gymnastics team which will represent the United States at the 1988 Olympics in Seoul. Mr. Karolyi is, at the present time, a resident alien in the United States, a status he has enjoyed since October 1983. Under normal circumstances, he would be eligible for citizenship 1 month after the 1988 Olympics.

Mr. Karolyi is unsurpassed in his chosen field. He has contributed a great deal to the United States already—as a coach and a teacher, and as a businessman. Passage of this bill would allow him to contribute his extensive talents to the U.S. Olympic team.

H.R. —

A bill for the relief of Bela Karolyi

Be it enacted by the Senate and House of Representatives, of the United States of America in Congress assembled, That Bela Karolyi—

(1) shall be held and considered to have satisfied the requirements of section 316 of the Immigration and Nationality Act relating to required periods of residence and physical presence within the United States, and

(2) notwithstanding the provisions of section 310(d) of that Act, may be naturalized at any time after the date of enactment of this Act,

if he is otherwise eligible for naturalization under the Immigration and Nationality Act and files an application for naturalization under that Act within two years after the date of the enactment of this Act.

DRUG ABUSE

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. WYDEN. Mr. Speaker, we are all concerned about drug abuse and its effects on our children. We must teach our children about the dangers of drug abuse and how to say "no" to drugs. And, by encouraging youngsters to say no to drug use, we also encourage them to say "yes" to becoming good citizens. I would like to share the following essays, written by school children in my Oregon district. The essays are a response to the questions "What would you do if offered drugs" and "As a good citizen, how can you help your community."

DRUG ESSAY CONTEST

(By Rob Carmichael, Lake Grove Elementary School, Lake Oswego, OR)

What I would do if offered drugs: What would you do if offered drugs? Would you boldly say no? Reluctantly say yes? Or answer maybe later, with a fervent hope that you won't have to decide that again? Speak out and say no. I would. A friend that offers you drugs isn't really a friend at all.

(By Tiffany Core, Lake Grove Elementary School, Lake Oswego, OR)

As a good citizen, how I can help my community: In this community a lot of things are going on that I don't particularly like. People aren't very nice to each other. They are always putting people down, swearing, talking behind someone's back, or getting someone into drugs. All of this is very inconsiderate, and I think that I can help by being a good example.

(By Lincoln Grimes, McCarthy Middle School, Gresham, OR)

What I would do if offered drugs: If I were offered drugs, I would flatly refuse. I feel that misused drugs are extemely harmful. I feel so strongly that even if people constantly asked me, tried to bribe me, trick me, or threaten me, I would still refuse. Drugs can affect your mind and your body.

As a good citizen, how I can help my community: I think that I could help my community in many ways. Cleaning up my neighborhood would definitely help. Trying to help stop pollution in nearby rivers, streams, etc., would also help. Visiting a retirement home would help the community and doing yardwork for elderly people would help extremely.

(By Allison Jamieson, River Grove Elementary School, Lake Oswego, OR)

What I would do if offered drugs: If I were offered drugs, I would definitely say "no!" If the drug dealer kept bothering me I would walk away from them. After that happened, I would tell a responsible adult, like my mom, and have them go and tell the police. Drugs don't make anything better—just worse.

As a good citizen, how I can help my community: As a good citizen, I would take classes about drugs and spread the news to my friends. I care about my friends and I think drugs are a waste of time, money, and life. A big waste of life.

(By Leslie McKay, Concord Elementary School, Milwaukie, OR)

What I would do if offered drugs: I would say, "No!" I've got good friends, a loving family, and a great life. Drugs turn winners into losers. They kill brain cells that can't be replaced. Why waste all that money for so-called satisfaction when people could be helped who need food, medical care, and homes.

As a good citizen, how I can help my community: As a good citizen I can help by reporting any suspicious actions I see. I can make sure I'm not involved with people on drugs. I can participate and assist in anti-drug programs.

COTRAVELERS DESCRIBE FLORIO SOVIET TRIP

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. FLORIO. Mr. Speaker, my recent trip to the Soviet Union not only provided me with an excellent opportunity to explore issues of mutual concern between the two countries but also left a lasting impression on the six individuals who accompanied me on my trip. I was pleased to have the special insight offered by my six cotravelers: Michael Varbalow and Dr. Eugene Bass, the president and vice president of the Jewish Federation; Marcy Sanders, the president of the Federation's Women's Division; Morton Jacobs, a past president of the Jewish Community Relations Council, and his wife Claire, a professor of mathematics at Rutgers University, and Alan Respler, the executive director of the Jewish Community Relations Council.

Soon after our trip, the Jewish Community Voice published an article describing the trip and the information we were able to gain relating to the condition of Soviet Jewish refuseniks and the prospects for progress on this very important issue. I wanted to share with my colleagues this very insightful article:

[From the Jewish Community Voice, July 30, 1986]

COMMUNITY MEMBERS REAFFIRM ISRAELI, SOVIET JEWISH TIES—LEADERS, FLORIO VISIT JEWS OF HOPE

(By Harriet Kessler)

Six Jewish community leaders arrived in Leningrad on the evening of July 4, for a 10-day visit to Leningrad and Moscow. Congressman James Florio joined the group on July 7.

The Mission was sponsored by the Jewish Federation of Southen New Jersey to give its leaders the chance to meet with prominent Jewish refusenik leaders, hear their stories first-hand, and offer moral support; and to give the congressman personal insight, through meeting refusenik leaders, into the importance of linking human rights issues with U.S.-Soviet trade agreements.

Participants were attorney Michael Varbalow, Federation president; Dr. Eugene Bass, Federation vice president; Marcy Sanders, president of Federation's Women's Division; attorney Morton Jacobs, a past president of the Jewish Community Relations Council; Claire Jacobs, professor of Mathematics at Rutgers Unversity, Camden, and Alan Respler, executive director of the Jewish Community Relations Council.

They met with some 35 refusenik families, speaking with individuals ranging from the early teens well into the 60s.

A report on the group's reactions follows. Congessman Florio's story, in his own words, appears elsewhere on this page.

They were an informed and dedicated group. Why else go to Russia, particularly in the wake of Chernobyl.

Their dedication has increased immeasurably because of their visit. The Soviet experience confirmed all that each read prior to the trip; all that each heard from former refuseniks touring this country. But the experience proved more intense than any expected.

"Everything was more," said Claire Jacobs. "The refuseniks were sadder than I imagined, and more inspiring as individuals. Their plight was more desperate than I imagined. But they had a greater sense of purpose and far more hope than I anticipated."

A fashionably dressed and coiffed vibrant woman, in refusal for more than 10 years, made a special impression. "This woman fought to join her mother in Israel for nine years. Recently, her mother died. Despite her loss and grief, she displays a happy face and tremendous composure. Her determination to leave the Soviet Union and her hope are now survival tools," Jacobs said.

The warmth of her reception also exceeded Claire's expectations. She felt instant rapport during every visit, as if she was meeting family. "These are wonderful and deserving people. A 40-ish woman pulled me towards her to tell me not to minimize the importance of my visit. I almost cried," said Jacobs.

Only by seeing it, can you understand that being a refusenik means being a slave, according to Jacobs. "When the government dictates if you work and what work you can do, how much you can move about in your own country and where you can live, that is slavery. We cannot have slaves in the 20th Century. We who are free must get the message through to our government that getting the refuseniks out is imperative," she said.

ACTIVISTS FEEL FREE

There are 400,000 refuseniks; 400,000 Jews who have been denied permission to live in Israel. All are in trouble. "When you apply for an exit visa, you label yourself a traitor. A high official told that to my husband," said Anna Lifschitz, in refusal since 1981.

The irony here is that the vast majority of those 400,000 cannot know what it means to be Jewish, thus live in quite desperation, victimized by institutionalized anti-Semitism masquerading as anti-Zionism, according to Eugene Bass. The anti-Semitism that drove our parents and grandparents from Russia did not, as hoped, end with the Russian Revolution. But the pogroms were replaced with something more insidious—Russification. Individuals may choose to be Russians or Jews. No-one can be both. Those who choose to be Jews are in trouble.

The refusenik activists and leaders unlike most of the 400,000 who will not relinquish Jewish identity, feel liberated by declaring their intentions to live as Jews while in the Soviet Union and their determination to obtain their exit visas, according to Bass. "Being refuseniks, bucking the system to preserve Judaism has increased their strength," he said.

These activists and leaders are the Soviet Jews who study Hebrew, Jewish cutlure, history and a religion clandestinely and at great peril. Indeed, Anna Lifschitz' husband is a Prisoner of Conscience, imprisoned in the remotest area of Siberia. And Anna spends eight-months salary to make the two yearly visits to him permitted by the government. Recently, her son was drafted despite an illness that disqualifed him for military service. "Anna attributes her courage and strength to the freedom she feels in aserting her Jewish identity," Bass said.

The United States has a moral responsibility to aid all 400,000, for they all live as third-class citizens, according to Bass. His trip convinced him that the U.S. government has considerable bargaining power. He said that Soviet technology is so backward that the water in Leningrad is not safe to drink and 40 percent of the nation's tomato corp dies in the fields.

Ronald Reagan is truly supportive of Soviet Jewry, according to Bass. And if individual Jews, Jewish organization and other concerned citizens tell their elected officials that human rights is top priority, and lobby on behalf of Soviet Jewry, the U.S. government will find a way to pressure the Soviets until they move on the issue, Bass believes.

The synagogues in Leningrad and Moscow, both under government control, were sadder than Marcie Sanders imagined. "In Leningrad, even though the service felt Jewish and familiar, it was eerie. I knew that everyone was being watched, and the building was in bad shape physically. The Moscow synagogue seemed in better condition, and the service was more structured, more formal. But I saw only old people, and I wondered if anyone would be left in a few years," she said.

ENORMOUS COURAGE

The courage of the refusnik leaders impressed her as greater than she thought possible. She cited prominent refusenik Leonid Kelbert who trained as physicist, then changed careers and became an award-winning film director. "His career ended when he applied for his exit visa. Now, he works as a menial, lives in poverty, and is completely frustrated because he cannot express himself. But his primary concern is for the safety of his friend Vladamir Lefshitz, the Prisoner of Conscience," Sanders said.

American Jews must become more involved with the human rights issue, according to Sanders. She is convinced that the more American Jews do, the less Soviet Jews will suffer.

Alan Respler found the extent of Soviet "Catch Twenty-Two's," capriciousness and lies bordering on the incredible. "I saw for myself that the reunification of families, which the Soviet government promises, often does not happen," Respler said. Currently, there are some 20 divided spouses in the U.S.S.R. And although the majority of those who marry do eventually leave, Jewish emigration has all but come to a halt.

"Also, the Soviet posture that no one is detained for more than 10 years is not true. We visited men and women who have lived in refusal for more than 15 years," said Respler.

Citing the experience of 56-year-old refusenik Lev Blitshtein, Respler revealed the kinds of "state secrets" for which Jews were detained. Blithstein never held a classified job, but has been told that his access to state secrets will keep him in Russia. Formerly an engineer for a meat and poultry processing plant, he says that the only secret he knows is "how the Soviets make sausage without meat."

Lev now works in a small office as a laborer. He divorced his wife offically nine years ago so that she and their children could leave the Soviet Union. According to Respler, Lev is proof of all three Soviet lies: he is separated from his family, he is waiting for an exit visa after 12 years, and he is accused of knowing mythical state secrets.

FLORIO EFFECTIVE

Michael Varbalow summarized the group's conviction that Congressman Florio represented more hope to the refusnik community than anyone anticipated.

"We know that Jim would be interested, sensitive and supportive," Varbalow said. "After all, he has adopted a refusenik family, and works actively on their behalf."

The special impact came from Florio's travelling with a Federation group. "Seeing Jim as an integral part of the Jewish community, not just another politician dropping in to make speeches on an official junket, gave the refuseniks special hope. It was like we were travelling with our own 'righteous gentile'. That an elected official, someone with clout, with the ability to help them, had true commitment to the Jewish community impressed the refusenik leaders beyond words," Varbalow said.

He would like to see Federation sponsor a similar Soviet Mission with another area legislator in the near future. "And if other communities have sensitive, dedicated representatives, they'd do well to follow our lead," Varbalow said.

Although not surprised by the Soviet government's "paranoia," Varbalow was taken aback by the average Russian's disdain for Western society. "The Russian people have a tremendous thirst for Western material goods, but they don't want our ideologies," he said.

According to Varbalow, the average Russian is convinced that the average American citizen has traded off physical safety for consumer goods. Every street in America is viewed as crime-ridden.

"Refusenik leaders and activists are better informed, because they meet with people like us, and they read the U.S. publications that we bring them. Also, they meet with many embassy and consulate personnel," he said.

American officials in Leningrad and Moscow are supportive. Varbalow said that 30 refusenk leaders attended a party at the consulate in Leningrad on July 4th, and that Ambassador Hartman hosted a seder specifically for refusenik leaders on Passover the past two years.

"Refusenik leaders value social contact with Americans more than gifts. They also value books and periodicals. To them, Western ideas are treasures. They jumped at the copies of 'Scientific American' that Gene Bass brought in," Varbalow said.

He noted, too, that younger refusenik activists are increasingly interested in Jewishness. "Circumcision of male children is not customary in Moscow. But young refuseniks want their children circumcized," he pointed out. "Circumcision itself is not illegal. But there is only one authorized mohel in Moscow. A very old, 'official' Jew who names names, so it isn't very popular,' Varbalow said. American surgical kits are somehow being smuggled in for circumcisions. Whoever performs the circumcision is guilty of a crime.

Varbalow pointed out that the Soviet Jewish community is the third largest in the world, representing some 15-20% of the world Jewish population. "If nothing is done for Soviet Jewery, we will witness a Holocaust by assimilation," he said.

Refusenik Askaddi Leonov, described by his peers as one of the best brains among them, said that the Soviet Union will not give in to Jewish demands for emigration because it is concerned with loss of face and a chain reaction among other disgruntled groups.

Varbalow agrees. "Loss of face is the real issue. That is why if the U.S. tries to overt trade-off for human rights, the bargaining stops," he said.

"Still, through private, skillful diplomacy that bargaining is possible. And now, with Reagan in the White House we have a chance. We can set the stage so that Gorbachev makes the first move prior to his visit to the United States so that he is not embarassed by the mass demonstrations bound to take place upon his arrival.

Morton Jacobs, too, sees a potential second Holocaust, but takes hope in that today's Jews are in a position to do what Jews could not do some 40 years ago. Much of this hope comes from the refusenik leaders themselves.

"They are courageous people. They have taken on the Soviet state and are sticking their necks out with their families. It is not easy. Expressions of hatred permeate their lives. Seeing them in their hurts was unbelievably inspiring, and I gained at least as

much emotional strength from them as I gave them," he said.

Especially impressive to Jacobs were two physicists in their 40s who applied for exit visas, knowing that they would be stripped of their degrees and their jobs, some five years ago with emigration at its lowest.

"These are special people. They are willing to give up not only their livelihood but valued careers rather than be Russified. This is not just a Russian issue, not just a Jewish issue, it's a human issue, it's a struggle for every free man and woman to pursue because it represents a threat to all of us," he said.

The entire Southern New Jersey contingent will long remember the position of a Moscow couple, both well into their 60s and living in refusal for almost 20 years. "Remember, when the Soviets bargain they want to get a lot but give as little as possible," husband and wife concurred.

The group will remember, too, the words of a young woman: "The Soviets see us, the refuseniks, as hostages. They hate us but know that we are bargaining tools. So treat us like goods. Trade refuseniks for what you have to offer them. Make it a business deal and don't be easy."

Twenty-eight year old refusenik Yuri Blank put it most succinctly. "The Soviets would trade computers for Jews," he said.

"Thinking of Jews as chattle again makes one cringe," said Jacobs. "I remember when Eichmann negotiated the Jews of Hungary for trucks."

THE NEVE SHALOM MASSACRE IN ISTANBUL

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. GILMAN. Mr. Speaker, the world was shocked by the massacre on September 6 in the Neve Shalom Synagogue in Istanbul, Turkey. Aside from the Turkish Jewish community and the Turkish nation, no one was more shocked than the many Americans of the Jewish faith. We have become, over the years, interested in the history and culture of the Jewish community of Turkey.

Jews have lived in peace in Turkey from times of antiquity; their population was bolstered nearly 500 years ago when the Ottoman Sultan sent ships to rescue members of the Spanish Jewish community, which was expelled in 1492, and brought them to safety in his empire.

The American Jewish Congress has been in the forefront of contracts between the American and Turkish Jewish communities, and it was therefore appropriate that the president of the congress, Mr. Henry Seigman, attended the funeral of the victims of the massacre in Istanbul.

The moving remarks of Mr. Seigman, which were made at a meeting with leaders of the Jewish community of Turkey after the funeral, express the feelings of Americans—feelings of anger at the inhuman killings of worshipers, killings which give lie to the allegation that the violence of the Middle East is a violence borne out of nationalist frustration, aimed not at the Jewish people but at "Zionism." In the words of Mr. Seigman:

It is classic anti-Semitism, hatred of Jews fueled not only by nationalism run rampant but by primitive religious sensibilities, that led these terrorists to seek out a synagogue. * * * Similarly, it was anti-Semitism that led their compatriots before them to murder Jews in synagogues in Rome, in Paris, in Antwerp, and in Vienna.

Mr. Speaker, I feel that Mr. Seigman's remarks deserve the attention of my colleagues. Accordingly, I ask that they be reprinted in full at this point in the RECORD.

Only two months ago, the Chief Rabbi and the leaders of your community welcomed me and a delegation of the American Jewish Congress into your midst. It was an historic encounter between Turkish and American Jewries, the first of its kind, and we celebrated that encounter with the joy and warmth that marks a family reunion.

I am back in your midst only two months later, far sooner than I expected to be. Sadly, what brought me back is the grief that marks a family tragedy.

I am here to express to the families of the victims of a brutal slaughter, and to your entire community, the profound sympathy and the solidarity of American Jews. I do so not only on behalf of the American Jewish Congress but also on behalf of the Conference of Presidents of Major American Jewish Organizations.

It is difficult not to succumb to anger standing before these 21 coffins. How often have we heard from Arab countries, including those that are the hosts of the terrorist organizations that claim credit for last Saturday's slaughter in this synagogue, how often have we heard from them that their war is not with Jews or Judaism, but with Zionism and the State of Israel. Their war, they say, is not motivated by anti-Semitism but by frustrated nationalism.

The bodies that are before us give the lie to that claim. It is classic anti-Semitism, hatred of Jews fueled not only by nationalism run rampant but by primitive religious sensibilities, that led these terrorists to seek out a synagogue and to massacre innocent Jews at prayer. Similarly, it was anti-Semitism that led their compatriots before them to murder Jews in synagogues in Rome, in Paris, in Antwerp and in Vienna.

The blood that still stains the pews on which we sit and the ground on which we stand demands that we speak the truth to the Arab world. We say to them: Speak out, and act finally to stop this hatred and this madness in your midst; rid yourself of this deadly bigotry. For if you do not, if you continued to finance and to provide havens for these murderers, you will be judged by decent men and women everywhere—indeed, by history itself—to be murderers like them.

We will not succumb to anger or despair. Resolve in the midst of tragedy, confidence in a better future even as we mourn our dead, is a Jewish imperative. It is a sensibility captured so beautifully in the traditional Jewish belief that on the day the Temple in Jerusalem was destroyed the Messiah was born.

American Jews and Jews everywhere stand with you. We pray that the Almighty will comfort the bereaved.

MINNESOTA'S AWARD-WINNING PUBLIC PROJECTS

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. VENTO. Mr. Speaker, I would like to take this opportunity to commend two Minnesota good-government projects which received the prestigious Ford Foundation Innovations in State and Local Government Awards.

The Ford Foundation awards were established in 1985 to recognize exemplary new programs and policies that address important social and economic issues. Of 1,347 programs submitted by State, county, and local governments across the country, 10 were honored by the foundation. Two of the ten honored projects are in Minnesota; both are based in the city of St. Paul, which I represent.

The purpose of the Ford Foundation competition is to award projects that successfully aid State and local governments fulfill their expanding responsibilities in meeting public needs. The State of Minnesota provides a wonderful environment for innovative approaches to meet public needs and has taken a lead in this area as is demonstrated by the awards the State's projects received in the competition.

The recent contaction of the Federal domestic role has posed new challenges for State and local governments and I am proud that Minnesotans have responded with imaginative new programs.

One of the honored projects is the Block Nurse Program which helps elderly neighborhood residents remain in their own homes for as long as possible before moving to nursing homes. According to the General Accounting Office, from 20 percent to 40 percent of nursing home residents are not so disabled that they need to be in institutions. Many nursing home residents feel they have no alternative as Medicare only provides limited reimbursement for home health care. As a member of the Select Committee on Aging, I am well aware of the struggle to solve this dilemma at the Federal level. So far, Congress has been unable to successfully address this issue but two nurses from St. Paul have been extremely successful in meeting the needs of the elderly on a local level.

Two registered nurses, Ida Martinson and Marjorie Jamieson, organized the Block Nurse Program in the St. Anthony Park neighborhood of St. Paul. The program tries to avoid premature nursing home confinement by coordinating health and social services that make it possible for the elderly to stay at home. The nursing staff and volunteers provide personal care, companionship, and help with household chores. More than 80 elderly men and women have been served since the program's inception in 1982. Without the program, it is estimated that most of them would have had to enter a nursing home. The program costs about $350 a month per client, compared to about $1,000 per month for nursing home care.

The program has been so successful that there are not enough trained aides to meet the demand. The Ford Foundation has granted the city of St. Paul $80,000 to recruit new aides and provide training and continuing education courses for the program's current staff. The grant will also support an evaluation of the program's cost effectiveness and its potential for wide-scale replication. The fame of this program is spreading and I understand that inquiries have come from all over the country and as far away as Japan.

The second Minnesota project honored by the Ford Foundation is a unique partnership between the State government's mid-level managers and their counterparts in the private sector. Through the STEP [Strive Toward Excellence in Performance] Program, career government employees are encouraged to submit innovative proposals to improve productivity, enhance service, or reduce cost. Employees whose proposals are accepted receive training and assistance in finding the resources to complete the project. Good ideas are approved with a minimum of the redtape that often smothers creative ideas.

The Minnesota Department of Administration directs the program and it is overseen by a steering committee that includes members from business, labor, nonprofit organizations, and leaders of several State agencies. Minnesota has a number of successful private-public partnerships so it is not unusual that a program of this type would emerge in the State. What is unusual is the rate of success this program has achieved.

Three hundred innovations have been proposed, and of those, 40 have been developed into pilot projects. The innovations include an advertising program that increased sales of State park permits by more than 300 percent. As chairman of the House Subcommittee on National Parks and Recreation, I find that accomplishment of particular interest. Other innovations completed under the project include: A work and training program for welfare recipients, an improved system of cash management that has increased the State's interest earnings, and the opening of the State's low-cost telecommunications system to local governments. The $90,000 grant from the Ford Foundation will allow Minnesota to introduce STEP to county and local governments and to officials from other States.

I applaud the people of Minnesota for creating innovative projects to address public needs and I commend the Ford Foundation for stimulating the expansion of these innovations.

At this time, I would like to call my colleagues' attention to an editorial on the Minnesota projects which appeared in the Minneapolis Star and Tribune on September 27.

[From the Minneapolis Star and Tribune, Sept. 27, 1986]

DESERVED APPLAUSE FOR PUBLIC SERVICE

Minnesotans are probably more interested in the fuss over state park managers who hire their wives than in the national tribute paid two Minnesota good-government projects Thursday. The disparity is especially regrettable in this circumstance because Minnesotans should be proud of the awards.

In 1985, the Ford Foundation established the Innovations in State and Local Government Awards Program "to recognize exemplary new programs and policies that address important social and economic issues." The first awards were presented Thursday. Of 1,347 programs submitted by state, county and local governments for evaluation, 10 were honored. Two of the 10 were from Minnesota.

One was the Striving for Excellence in Performance (STEP) program directed by the state Department of Administration. As befits Minnesota, STEP is a public-private partnership. The program is overseen by a steering committee that includes members from business, labor, the nonprofit sector and state government. STEP invites career state employees to propose innovations that promise to improve productivity, enhance service or reduce cost. From more than 300 proposals, 40 have been selected. Employees who submit accepted proposals receive training and help in finding the resources their project needs and in cutting the red tape that often smothers new ideas. Some projects also are assigned private-sector partners who provide special expertise.

The second Minnesota winner is the Block Nurse Program in the St. Anthony Park neighborhood of St. Paul. The brainchild of two St. Anthony Park nurses, the project seeks to help elderly neighborhood residents remain in their own homes for as long as possible. The nursing and volunteer staffs help the elderly with personal and health-care needs, provide companionship and help with chores. In four years, the program has helped more than 80 elderly neighborhood residents. Each month that one elderly person is able to remain at home saves more than $1,000 in nursing-home fees.

Along with its award, STEP will receive $90,000 to help prepare manuals and conferences to introduce the STEP process to county and local governments. St. Paul will receive $80,000 to recruit new aides for the St. Anthony Park program and to provide education and training for the current staff.

The 10 award winners, in the Ford Foundation's words, capture "a spirit of innovation, displaying the qualities of leadership, creativity and dedication that exist in many places within state and local governments." Well said. We salute Minnesota's deserving award winners and all unhearalded state and local-government employees who seek with equal dedication to serve the public good.

NEW NATIONAL COUNCIL TO ADDRESS WARTIME INDUSTRIAL BASE PROBLEMS

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. BENNETT. Mr. Speaker, a significant problem facing the reliability of our defense industrial base to meet the production demands associated with a major military conflict is the ever-increasing dependence on other countries for critical raw materials and component parts. In peacetime it makes good economic sense to depend on foreign sources which can produce products more cheaply than U.S. producers. However, should the Nation become embroiled in another major conflict, this policy of relying on foreign materials and components could prove disastrous. Why? Because the United States could not depend on foreign sources during wartime for materials and components necessary to meet the vast quantities of military equipment that would be needed to sustain our fighting forces.

As every sound military historian will tell you, victory in World War II was not only due to superior firepower and military leadership, but also because of unsurpassed defense production by U.S. industry and labor. We were able to produce warplanes, ships, tanks, and other weapons for ourselves and our Allies faster than the enemy could destroy them. The Axis Powers could not.

We must face the fact that the United States would be hard-pressed to duplicate the defense production record which led to our victory in World War II. This is true despite the billions of dollars we are pouring into efforts to strenghten our military defenses.

In any event, I don't believe we can feel comfortable about having to depend on foreign production facilities located nearer to the Soviet Union than our own, and therefore, more subject to Soviet interdiction.

As chairman of the Subcommittee on Seapower and Strategic and Critical Materials, I am concerned that under current circumstances, we are becoming increasingly dependent upon foreign sources for the very parts and components which are absolutely essential to the sophisticated weapons systems now used by our Armed Forces.

That's why I am pleased that a new national nonprofit, nonpartisan organization has been formed to focus greater public attention on the complex problems of our defense industrial base. That organization is the National Council to Preserve the U.S. Defense Industrial Base, with headquarters in Washington, DC. The Council was recently organized by a group of former governmental officials, retired military officers, business and labor executives, and other citizens concerned about the erosion of our defense industrial base. The purpose of the Council is to direct public attention to the need to strengthen the U.S. industrial capability, particularly as it relates to our national security requirements.

Mr. Speaker, I want to wish success to the new National Council to Preserve the U.S. Defense Industrial Base in its efforts to implement an effective public awareness campaign to help educate the public, and inform the news media and policymakers about the need to strengthen the U.S. defense industrial base to respond quickly to a military crisis.

IN TRIBUTE TO THE PORT OF STOCKTON—NATIONAL PORT WEEK

HON. RICHARD H. LEHMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. LEHMAN of California. Mr. Speaker, during the first week in October, virtually every American port city celebrates the importance of our Nation's ports. In special tribute to the Port of Stockton, located in my California district, I have joined in cosponsoring House Joint Resolution 714. This resolution authorizes President Reagan to officially recognize,

during the first week of October, the importance of our Nation's ports.

The coastal, Great Lakes, and inland river ports are expressways through which goods worth billions of dollars pass each year. Since most goods in international trade are transported by ship and pass through ports, they are the single most important aspects of international trade and ocean transportation. Additionally, the commitment of our ports to building and maintaining modern and efficient shoreside facilities is an important contribution to the movement of international cargo. Our modern and efficient system of ports helps U.S. farmers and manufacturers to compete in the international marketplace.

For 55 years, the inland port in Stockton, CA, has been an important facilitator of trade and ocean transportation between American markets and many nations abroad. The Port of Stockton's deepwater facilities and operations link truck, flight, and rail systems with ocean carriers, shippers, and receivers on regional, national, and international levels.

Originally, the port district was created and developed to provide waterborne transportation for the abundance of products harvested from the fertile soil of the San Joaquin Valley. Through the years, the very existence of the port has had a profound effect upon the local economy and industry, with nearly 1 million tons of agricultural and related products currently moving across its docks each year for shipment to or from California and elsewhere aboard the world's bulk fleet.

Agriculture still plays an important and integral part of the port's presentday operations; however, the Port of Stockton's influence now extends far beyond that historical origin. Under the stewardship of Port Director Alexander Krygsman, the operation of Stockton's seaport has expanded to encompass the administration of vast capital resources and the operation and maintenance of a comprehensive physical plant capable of handling a wide variety of cargoes ranging from molasses and fertilizer to jet fuel and other petroleum products, clay, coal, sulfur, cement, cartons, finished steel, steel scrap, paper products, bagged grain, and more.

The Port of Stockton generates over 1,000 jobs directly, with an annual payroll of approximately $15 million. Another 3,000 to 4,000 jobs are generated indirectly for a total payroll impact of over $50 million.

The capricious nature of supply and demand, inherent to international trade, requires a flexible approach to business, both technologically and philosophically. In response to the constantly changing needs of shippers who must respond quickly to the whims of world commerce and a fluctuating economy, the Port of Stockton has innovatively designed, constructed, and installed multipurpose equipment which provides highly productive, cost-effective services to port customers.

This week, I join many of my colleagues in the House of Representatives to pay tribute to all of the ports of our Nation, especially to the Port of Stockton. In declaring the first week of October as National Port Week, it is my hope that the citizens of our Nation will grow more aware of the vital link that the port system plays in our Nation's economy.

TRIBUTE TO HON. JOHN F. SEIBERLING

SPEECH OF

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 8, 1986

Mr. RODINO. Mr. Speaker, I rise to join my colleagues in tribute to a dear friend and one of the finest Members of this great body who will retire at the end of this session—the Honorable JOHN F. SEIBERLING of the 14th District of Ohio.

JOHN SEIBERLING was born into a world of privilege. He is the grandson of the founder of the Goodyear Tire & Rubber Co. But despite his great wealth and prominent ties, he has never forgotten those in our society who are not so blessed. If JOHN'S work in Congress could be summarized in one word, it would be compassion. He has consistently championed the needs of the least protected members of our society—the poor, the elderly, the handicapped, minorities, children. For this work, JOHN will be remembered by the thousands of Americans, in his district and throughout the Nation, whose lives he touched. They will remember him as a man of rare decency.

JOHN was first elected to the House of Representatives in 1970. During his 16-year career in the House, he has successfully led efforts to win millions of dollars in Federal funds for businesses, housing, health care, and the arts in the 14th District.

An ardent conservationist, JOHN authored the American Conservation Corps Act to establish a program for hiring America's youth to work to preserve public lands. To give you an idea of JOHN'S commitment to preserving the beauty of the Nation's parks and wilderness areas, consider that a computer printout of wilderness protection bills he has managed is at least 9 feet long!

JOHN was one of the first Members of this body to condemn the insanity of the Vietnam war, and he has continued to be a staunch advocate for peace.

Since 1971, JOHN has been one of the most dedicated members of the House Judiciary Committee, which I chair. His sensitivity and judgment were indispensable during one of our Nation's darkest hours—the impeachment proceedings against President Richard Nixon.

The Judiciary Committee has also benefited from JOHN'S antitrust expertise. Before his election to Congress, JOHN was a successful antitrust lawyer for over 20 years. He has fought to ensure that the Nation's laws governing the merger of big businesses reflect a sensitivity to consumers, employees, and the communities in which firms operate. JOHN has played a key role in the passage of every antitrust law during the last 16 years. The most important antitrust initiative of this era, the Hart-Scott-Rodino Act of 1976, bears the imprint of JOHN SEIBERLING'S counsel and leadership.

He also was a key member of the National Commission for Review of Antitrust Laws and Procedures during the late 1970's, which spawned five crucial antitrust reform measures that passed the House and became law in 1980. More recently, he has helped to shape the National Cooperative Research Act of 1984, the Municipal Antitrust Act of 1984, and the House Vertical Restraints Resolution of 1985.

Throughout this period, JOHN SEIBERLING has steadfastly resisted the cries of special interests for exemptions from antitrust laws. He is, in short, a man with a vision for free enterprise at its noblest and best.

Although I join my colleagues in expressing sadness at the news of JOHN'S retirement, I wish him well in the coming years. His unique compassion, wisdom and commitment will be missed by those of us in the House and in the Judiciary Committee, but his legacy will live on for many years as all Americans continue to benefit from his legislative skill.

LUZERNE COUNTY FOLK FESTIVAL

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. KANJORSKI. Mr. Speaker, I am pleased to rise today to draw to your attention the annual Luzerne County Folk Festival which takes place this week in Kingston, PA. Sponsored by the Cultural Heritage Council of Northeastern Pennsylvania, the folk festival began as a part of the national Bicentennial activities and has endured as a popular celebration of the rich culture of Luzerne County.

This year is an especially memorable one for Luzerne County. As the Nation joins in the celebration of the centennial of the Statue of Liberty, Luzerne County marks its own 200th anniversary. The folk festival commemorates both of these occasions in a special tribute to the significant contribution immigrants have provided to our unique American culture. In honor of the Statue of Liberty, a special display will feature prints, drawings, and news clippings outlining the progress of its restoration, which was engineered by GSGS&B, a Clarks Summit architectural firm.

As the melting pot of the world, America has always been distinguished by its rich cultural diversity. Old World traditions endure in Luzerne County, where Americans with roots from all corners of the Earth have met and shared their own cultural heritage. The Luzerne County Folk Festival is a celebration of this heritage, and here one can enjoy ethnic food specialties, traditional folk dances, and crafts created with skills passed along for generations.

Mr. Speaker, I am pleased to join my neighbors in celebrating our rich cultural heritage with the 11th Annual Luzerne County Folk Festival.

JOHN BUGLER SELECTED AS ENGINEER OF THE YEAR

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. DOWNEY of New York. Mr. Speaker, it is with great pride that I rise today in recognition of Mr. John W. Bugler's outstanding record of achievement that has earned him selection by the Federal Highway Administration as Engineer of the Year.

Maintaining our Nation's highways requires innovative and technical expertise. We all recognize the need for improved roads, yet become frustrated when only one lane is left open on a superhighway during rush hour. Mr. Bugler, with remarkable enthusiasm and creativity, has committed himself to addressing the problems that plague our infrastructure. His innovations range from specially designed concrete mixers and hydraulic drills to a concrete mix that dries in 3 hours, thereby eliminating delays on road repairs without compromising quality. In addition, Mr. Bugler has unselfishly devoted his time and personal resources to a variety of civic activities, demonstrating his concern for the community.

This award, richly deserved, not only recognizes the significant contributions John Bugler has made in safeguarding travelers from the disruptive jolt of the unavoidable pothole, but more importantly, recognizes his unceasing devotion to his profession and his fellow citizen. To John Bugler, I say, keep up the good work!

ELIE WIESEL'S NOBEL PEACE PRIZE

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. GILMAN. Mr. Speaker, I was delighted to learn this morning that the Nobel Committee had awarded its Peace Prize to the distinguished and learned author, professor, and human rights activist, Elie Wiesel. This worldwide recognition is most deserving, and, may I add, long overdue. For over four decades Elie Wiesel has shouldered the enormous burden of bearing witness to the Holocaust which brutally took the lives of over 6 million innocent Jewish men, women, and children during Hitler's reign of terror in Europe. He has chronicled his thoughts in many volumes, and as a young survivor, his compelling and moving accounts have provided the world with a particular perspective that is rarely available.

Currently, Professor Wiesel serves with distinction as the chairman of the Holocaust Memorial Council, which is presently overseeing the creation and construction of the Holocaust Memorial Museum. Yet, Elie Wiesel has not limited his activism solely to remembrance of the holocaust. He has worked to increase awareness of the plight of Soviet Jews, Ethiopian Jewry, and the Miskito Indians in Nicaragua. His humanity knows no bounds, as his message is indeed universal. Those of us who know him are privileged indeed. Elie Wiesel is a very rare and special man.

In Jewish lore lies the belief that there exist on this Earth 36 "righteous individuals" on whose goodness the world survives. We can only speculate as to who these 36 men and women really are, but I do believe that Elie Wiesel is one of these. His message bespeaks our need to solemnly address the many human rights issues of our time, so that future generations can live in peace and harmony.

By awarding the Nobel Peace Prize to Elie Wiesel, the Nobel Committee has acknowledged what many of us knew long ago: Elie Wiesel is a man of peace and humanity, and a shining example in an all too often dark world.

A STATE OF FEAR IN CHILE

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. MILLER of California. Mr. Speaker, for 10 years the world has watched the brutal regime of Gen. Augusto Pinochet Ugarte torture and murder its own citizens.

The tragic toll that this rein of terror has taken on the entire country is dramatic and serious.

This month's Psychology Today outlines what it means to live in a state of fear.

The article by Amado Padilla and Lillian Comas-Diaz follows:

A STATE OF FEAR

(By Amado Padilla and Lillian Comas-Diaz)

Brutal dictatorships crush minds as well as bodies, as the people of Chile would tell you if they were free to speak.

Torture is a brutal fact of life in many countries throughout the world. According to the latest figures from Amnesty International, more than one-third of the world's nations use some form of torture. Chile is one of them.

Last year we traveled to Santiago, Chile, as part of a human-rights fact-finding mission sponsored by the American Psychological and American Psychiatric Associations, in cooperation with the American Committee for Human Rights. We wanted to find out what psychological effects torture and other forms of repression were having on the Chilean people. The government, struggling to maintain a facade of democracy, allowed us to probe this sensitive subject. We met with members of international human-rights groups, Chilean psychologists and physicians, relatives of people who have disappeared, local activist organizations, and the torture victims themselves.

There is no doubt about the widespread and vicious use of torture that exists today under General Augusto Pinochet Ugarte, who has been Chile's president since the army overthrew the government of Salvador Allende Gossens in 1973. Torture has been documented by Amnesty International, the Americas Watch Committee, the United Nations and various church groups working in Chile. We interviewed many people who had been kidnapped and detained by the police, the military or security agents of the Central Nacional de Informaciones (National Information Center), commonly called CNI. Most of these people reported they were tortured.

The torture methods used in Chile are, unfortunately, common in many other countries. Both men and women are beaten, submerged in water or suffocated and given electric shocks to their gums, nipples, genitals and anus. Victims are threatened with attack by police dogs and intimidated by mock executions. Often they are bound in extremely painful positions. Women are frequently sexually abused by their captors.

Psychological torture has increased in recent years, probably because it doesn't leave the dead bodies and physical scars that have caused problems for the Pinochet government with human-rights groups. Victims are deprived of sleep and placed in solitary confinment. Their clothing and personal privileges are taken away from them. Their senses are disoriented by the continuous wearing of a blindfold and overloaded by the constant, loud playing of a radio. They are given false information about confessions of close friends and family members; often they are forced to listen to these loved ones scream in pain as they too are tortured or sexually abused.

Another psychological tactic has been added in recent years: Victims are taunted with detailed information about the daily work habits and whereabouts of family and friends. This demonstration of the long reach of the secret police, along with the other tactics, heightens the victims' sense of helplessness and despair and makes them vulnerable to the torturer's demand for information or a confession.

Often it is impossible for family members to obtain information about the whereabouts of someone detained by the police or CNI, or to find out why someone was taken away or how their health is. People are held in secret as long as 20 days before the security police acknowledge their detention, and not only are family members concerned about their relative's safety, but they are fearful for their own. They worry that the police or CNI will return during the night, a common practice, and take someone else.

Multiply these experiences by the number of Chileans who have encountered the security forces, and one can begin to get an idea of the climate of fear that exists in Chile today. By mid 1975, just two years into the Pinochet regime, 1 in every 125 adult Chileans had been detained for more than one day. The Chilean Commission on Human Rights, an independent human-rights group supported by the Catholic church, reported 2 political killings, 4 kidnappings, 114 arrests, 24 complaints of torture and 22 complaints of cruel or degrading treatment during January of this year, by no means an unusual month. There is 1 Chilean in political exile today for every 55 still in the country, the highest proportion of exiles in the world.

The government sows seeds of distrust and uncertainty among the people by complete control of information. There are no opposition newspapers or television or radio programming; the press only covers what the government wants the people to know, only the way the government wants people to know it. The government also censors any books, magazines or mail entering the country.

Chileans are constantly reminded of the government's strength, even if they have not felt it directly. In downtown Santiago, for instance, heavily armed police with trained dogs and riot vans are very evident wherever people might gather, such as parks or public squares. Soldiers in combat dress, armed with automatic weapons, are

seen every day in subway and bus stations, on major routes in and out of Santiago and in trucks on after-dark patrols around the city. This massive show of force inhibits any kind of spontaneous protest or demonstration against the government.

In addition to this open display of power, the Pinochet regime has an elaborate system of secret and not-so-secret surveillance. No one is sure how big the secret police force really is, or how many informers it has, but most Chileans do not trust anyone beyond their families and intimate friends.

Informants sabotage any activity that might generate some communal feeling. If a grass-roots organization is formed to protest the lack of medical care in a community, a well-placed informant can provide the government with the details needed to defuse a planned demonstration. Informants can also mislead the community with false information about the group—usually that it is a communist front—and turn people against it.

Leaders of these organizations are often arrested, imprisoned or exiled. Members are terrorized with random arrests, beatings and forced entry into organization offices. We met Angelina (a pseudonym) shortly after she had been stopped just a few blocks from her house, forced into a car by several unknown men, blindfolded and taken to a house of torture. She was beaten on her back, burned on her face with a lit cigarette and questioned about her father, who had died in exile several years before. As a final insult, her glasses were broken and she was robbed of money belonging to the school where she worked.

When we met her, Angelina was terrified that she would be stopped again. She was also afraid of reporting the attack to anyone at the school, because she felt the government-appointed school authorities would undermine her story and she would lose her job. She told us that anyone who makes a complaint or even talks about these things is branded a communist or a terrorist and then fired.

Everyone in Chile is a victim, not just those whose scars and losses are easy to see. "The dictatorship . . . is present day after day, year after year, saturating everything," writes Patricia Politzer in *Fear in Chile (Miedo en Chile)*, a candid book published last year in Santiago with the help of the Catholic church. "Its victims are not only those who suffer directly from its cruelty and censorship, but also those who are indifferent and includes those who support and justify it, because they are surrounded by a system that determines what we can and cannot do, what we think, what we believe, what we dream and what we are silent about."

Not only is the government repressive, but the economic situation is so bad that many Chileans are living almost entirely on tea and bread. *Ollas comunes* (soup kitchens) can be found in some communities, through the efforts of local activist groups and the Catholic church. But the very act of feeding the less fortunate is viewed as subversive by the government, and these groups are harassed and attacked.

In this situation, many people find that the best thing to do is not to complain or seek answers. "De eso no se habla" (we don't talk about that) was a common response when we asked people about human-rights abuses. Nearly everyone appears to deny what is going on around them, and many explain the government's actions with a "just world" theory: Those who suffer abuse must have brought it on themselves, and it will not happen to anyone who avoids trouble.

Some relief from this passivity is offered by black humor, common in Chile today. "Why do most murders occur after dark?" asks a popular joke. "Because the police are busy directing traffic during the day." By such means the tragic tension of Chilean life is relieved for an instant.

Chile is home to an entire generation that has known nothing but the brutality and repression of the current government. We were frequently told that "children have no future." Parents worry about the impressions their children form of armed guards in public places, of bombings and stories of terrorism and violence. Many children suffer from extreme forms of anxiety, depression, sleep disturbances and aggression. Child psychologists told us that learning disabilities and other school-related problems are also on the increase.

Children echoed their parents' fears and mistrust and told us that saying little was sometimes best. A 15-year-old girl told us that her teacher claimed democracy simply did not exist anywhere, so the repression in Chile was not unusual. The girl, who grew up in West Germany, hotly disputed this outrageous statement, but she was the only student to do so. The rest of the class remained silent.

Young women told us that they could not see bringing children into a world that holds so little promise. Stories of torture and sexual abuse by the security forces were widespread among these women. "Who could think of bringing another generation into the world?" we were asked.

In a healthy environment, both young and old have dreams and hopes for the future. In Chile we heard more about people's nightmares and fears than about their fantasies and hopes for their children. Instead, people told us of the growing problems among the young, such as drug abuse, prostitution, a high rate of school dropouts and other forms of delinquency. Hopes for the future center on emigrating and starting again in Australia, the United States or Sweden.

There is social protest in Chile, within limits. The government seems to understand that a certain amount of protest is necessary to avoid a mass uprising. It allows some moderate demonstrations to occur but only under controlled conditions. In recent years the government has also permitted professional associations such as the Chilean Psychological Association to hold a number of meetings about human rights and the treatment of torture victims.

Social action and protest give people a sense to purpose and a feeling of control, and it is an outlet for anger and frustration. But social action carries risks. The police and military commonly step in with beatings, arrests and torture. Sharing these risks gives protesters a certain camaraderie that helps them cope. One woman, aged 69, explained that, "Since 1973 I have lost my husband, sons, sister, brother-in-law and nephew to this regime. I have no family. I only have the other members of this organization of families of the disappeared. Each person here is a member of my family. Together we demand to know what has become of our loved ones."

The women protest by dancing the cueca, a traditional public dance normally performed by a man and a woman. But these women dance alone, stepping and circling around the absent partner, in a cueca sola. By doing something to protect repression, even a small act, they are drawn together in a supportive group that helps them cope with their losses and with official intimidation.

We need to learn much more about how a society copes with a repressive and dictatorial government. We had the opportunity to speak to many psychologists in Chile who were counseling torture victims and their families. Their work is demanding and risky and generally carried out under difficult conditions. One treatment approach they have taken is to help the victims reconstruct the details of their torture, to help them to understand that it was not their fault, and that the blame lies solely with the Chilean government.

More than anything else, we need to bring these violations of human rights to the attention of the broadest possible audience, wherever and whenever these violations occur. We cannot allow these practices to continue, either in Chile or anywhere else. We cannot say, "De eso no se habla." These are real people and real pain. It is time this torture is brought to a real end.

NAACP FREEDOM FUND DINNER

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. RODINO. Mr. Speaker, it will be my great honor to be a guest at the 72d Annual NAACP Freedom Fund Dinner in Newark on October 24. The dinner will take place at the Quality Inn and will feature the Honorable Sharpe James, mayor of Newark, as guest speaker.

This dinner will be a special occasion for me and for the many Newark residents who care deeply about justice and equality. It will be a time to reflect on the gains we have made—the landmark Civil Rights Acts, the Voting Rights Act and extension, designation of Martin Luther King, Jr.'s birthday as a national holiday, passage of sanctions against the South African Government. It will be a time to recall the difficult struggles—marches, arrests, sit-ins—necessary to bring about these gains. We will celebrate the warm friendships forged in those difficult days and recommit ourselves to meeting the challenges that lie ahead—challenges posed by those in the Reagan administration who seek to turn back the clock on civil rights and return to the constitutional "dark ages."

Mr. Speaker, I salute civil rights champions like Ezella Johnson and Sally Carroll, chairpersons of the Freedom Fund Dinner; Keith Jones, president, Newark NAACP; John Woods, first vice president; Delores Carter, second vice president, Daisy Stokes, secretary; Denise McCoy, assistant secretary; Mamie Hale, treasurer—all of the Newark branch of the NAACP.

Mr. Speaker, it is a great privilege and pleasure to take this opportunity to pay tribute to the NAACP, of which I am proudly a lifetime member, and to its many activists, in Newark, and throughout our great land.

Thanks to their hard work and devotion to justice and equality, this Nation will remain a

place where all of its citizens are free to pursue and realize their dreams.

CH2M HILL RECEIVES THIRD AWARD FOR HELPING SMALL BUSINESS

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. WYDEN. Mr. Speaker, it is with pride that I call attention to a special award received by some of my constitutents. For the third year in a row, the Oregon-based employee-owned consulting engineering firm of CH2M Hill has been awarded the Environmental Protection Agency Administrator's Award for "Outstanding Prime Contractor achievement."

Created by former Administrator William Ruckelshaus, this award is given annually to the company that most successfully employs small, woman-, and minority-owned businesses in its work for EPA. CH2M Hill's third consecutive award recognizes its commitment to working with all manner and sizes of businesses to solve our nation's problems.

CH2M Hill, the Nation's fifth largest consulting engineering company, has contracted with EPA for several years as its program manager for zone II of the Superfund Rem-Fit hazardous waste cleanup program in 29 States and territories comprising EPA regions V through X. Because of its technical qualifications and proven track record, the company recently was awarded a 5-year Rem-IV contract for program management of additional engineering investigations, studies, and design work under Superfund.

As the Superfund program expands under the reauthorization that we recently enacted, EPA will rely heavily on contractors to take on the enormous job of cleaning up our Nation's leaking waste sites. CH2M Hill's team approach—combining its own talents with those of a variety of specialized subcontractors of all sizes—should serve as a model for contractor efforts.

I hope that my colleagues will join with me in extending congratulations to CH2M Hill and its owner-employees for their achievements.

FLORIO DENOUNCES BARRINGTON PLANT CLOSING

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. FLORIO. Mr. Speaker, I rise to voice my shock and dismay at the decision announced last week by Owens-Corning Fiberglas Corp. to stop production at its Barrington, NJ, plant.

This decision will result in the wholesale layoff of most of the 800 employees working at the plant and thus is a serious blow to the economy of Barrington and my congressional district. If initial accounts are accurate, and this profitable operation is being closed to reduce Owens-Corning's debt incurred while successfully fighting a hostile takeover, the human impact is all the more tragic.

Over the past several years, our economy has witnessed a plethora of hostile takeover attempts by arbitragers, corporate raiders, and investment bankers whose major goal is to make millions of dollars during a short period of time. According to one account, the company which tried to acquire Owens-Corning earned profits of $30 million as a result of the attempted takeover even though the effort failed!

While hostile takeovers can result in a few individuals earning millions of dollars, they also can result in the loss of jobs for thousands of hard-working, dedicated employees of the company many of whom will have great difficulty in finding other work.

I have requested a meeting with officials of Owens-Corning to urge them to reconsider their decision to close the plant. In addition, I intend to find out what efforts were made to find a buyer who would continue the plant's operations, what termination benefits and assistance Owens-Corning plans to give the employees who are being laid off, and whether Owens-Corning plans to seek a reassessment of taxes owed to Barrington Borough as a result of the shutdown.

I hope very much that the decision to close the plant can be reversed. If not, and this massive loss of jobs will occur, I stand ready to assist the workers and their families in any way I can.

I would like to share with my colleagues a copy of the newspaper article appearing in the Courier-Post of October 11 announcing and describing the plant closing. The article follows:

OWENS-CORNING TO SHUT PLANT—800 WILL LOSE JOBS AT BARRINGTON FACILITY

(By James A. Walsh)

Owens-Corning Fiberglas Corp. yesterday said it will stop production at its Barrington plant, ending most of the 800 jobs there.

The local plant, although profitable, is a casualty of Owens-Corning's recent fight against a hostile takeover bid, the company said.

Owens-Corning, in resisting a takeover attempt by California-based Wickes Cos. Inc. last month, took on a debt of $2.6 billion. The Barrington plant will close as part of an extensive effort to reduce that debt, the company said.

The 30-year-old plant, which makes fiberglass insulation, will release about 500 workers by year-end, Owens-Corning said.

"All remaining manufacturing operations will be discontinued by mid-1987 and the equipment mothballed," the company said.

An unknown number of workers will remain at a warehouse on the site, said Thomas Jadlos, the plant's personnel directory. Owens-Corning has not yet decided on the future of the 20-acre complex, he said.

Owens-Corning has announced no plans for change at another South Jersey facility, an insulation plant with 160 workers in Berlin Borough.

Yesterday's announcement stunned many workers at the Barrington plant.

"We're all walking around in a sort of trance," said one 30-year employee, speaking anonymously. "This was a shock. It hurts quite a bit, especially after all those years of loyalty to the company."

In its statement, Owens-Corning expressed regret at the plant shutdown. Were it not for the takeover battle and resulting debt, Jadlos said, "We would be continuing to manufacture products here."

Wickes, a retailing conglomerate, had sought to buy Owens-Corning's outstanding common stock for $2.1 billion, or $74 per share. Owens-Corning rejected the hostile bid as inadequate.

Owens-Corning then outbid Wickes, offering its shareholders $82 in cash and a $35 debenture for each common share. In turn, stockholders, who are to vote on the offer next month, would receive new shares in a recapitalized Owens-Corning.

However, to meet the cost of its offer, Owens-Corning has had to restructure its business. In a cost-cutting effort, it is dropping or selling operations considered non-essential or incapable of producing short-term cash.

"The Barrington plant * * * does not fit in with the focus on high-efficiency manufacturing of core business products," the company said.

Owens-Corning did not say why the Barrington plant was not offered for sale.

The planned shutdown will have only a limited impact on Barrington, said Robert Sullivan, the borough's mayor.

"The major impact it will have is on the local people who work there," he said. "I feel bad for them. But Owens-Corning will continue to pay their taxes here."

H.R. 4783, THE ANTIKICKBACK ENFORCEMENT ACT OF 1986

HON. JOHN BRYANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. BRYANT. Mr. Speaker, the changes made in H.R. 4783 since it was reported by the Government Operations Committee, incorporated into the bill as passed by the House on October 7, are not discussed in the committee report or elsewhere. As the sponsor of the bill, who took part in negotiations with the House Government Operations and Judiciary Committees and the Senate Governmental Affairs Committee which led to those changes, I am including an explanation of the changes here.

In section 2, the definitions section, the word "acknowledging" in the definition of kickback has been replaced with the word "rewarding," which more accurately describes the motive for providing an after-the-fact kickback in exchange for favorable treatment.

In section 3, specifying the prohibited conduct, the word "pay" has been changed to "provide." This conforms the wording of the prohibitions to the definition of kickback and makes clear that the prohibitions apply to kickbacks whether or not they involve payment of money.

Subsection 3(b), which established a conclusive presumption that the amount of any kickback paid or accepted in connection with a prime contract or subcontract was included in the price of the contract and ultimately borne by the United States, has been deleted. This conclusive presumption was used under the Antikickback Act of 1946, and under the bill in its earlier versions, as a mechanism to establish liability in the prime contractor for

violations committed by subcontractors without the prime contractor's knowledge and to clarify that the theory of recovery was remedial in nature. Because conclusive presumptions have been criticized in recent years by legal commentators as an inept way of reaching a desired substantive standard, the bill was redrafted in order to establish the same scope of liability without using the conclusive presumption.

Section 4, establishing criminal penalties, has been changed in two respects. First, "willfully" has been changed to "knowingly and willfully," the standard of consciousness for criminal liability which applies to conduct whether engaged in by corporations or individuals. Second, the fines for both corporations and individuals have been changed to conform with the uniform fine statute in title 18 of the United States Code, which applies whenever a different fine structure is not otherwise specified by statute. Because a reference to the number of the specific section of title 18 is not needed for clarity, and because the number of the section of the code establishing the uniform standard, currently 18 U.S.C. 3571, will be changed in the near future, no reference to the section number is included.

Section 5, establishing civil penalties, has been rewritten in conjunction with the elimination of the conclusive presumption in section 3. Section 5(a)(1) establishes the civil penalties for knowing violations of the act, which are unchanged from those in section 5(a)(2)(A) of the version reported by the Government Operations Committee. Section 5(a)(2) imposes liability on the prime contractor or higher tier subcontractor for violations of the act by a lower tier subcontractor; proof of a knowing violation on the part of the contractor or higher tier subcontractor is not required, and liability is limited to the amount of the kickback proved to have been actually paid, accepted, or charged by the lower tier subcontractor. Section 5(a)(2) as rewritten is intended to achieve largely the same result as section 5(a)(2)(B) of the earlier version of the bill would have in these circumstances, but without using the mechanism of a conclusive presumption.

In section 5(b), providing for a statute of limitations for civil actions under the act, "became aware or should reasonably have become aware" has been changed to "knew or should reasonably have known," to conform to the language used in 28 U.S.C. 2416.

Section 6, providing for administrative offsets, has been substantially revised in form. Some of the changes are made in conjunction with the elimination of the conclusive presumption, which interacted with the earlier section 6. Section 6(a) allows a Government contracting officer to offset the amount of a kickback paid, accepted, or charged against moneys owed the prime contractor under the contract to which the kickback relates, even if the kickback occurred in the lower tier subcontract without the prime contractor's knowledge. Section 6(b) allows the contracting officer to direct the prime contractor to withhold from a subcontractor the amount of a kickback which has been or may be offset against the prime contractor. Section 6(b) allows the Government to reach beyond the prime contractor in cases in which a subcontractor has committed the violation, and also allows a prime contractor who has not been involved in committing the violation to recover from its subcontractor. Section 6(c) makes clear that administrative offsets and contracting officer directives and orders under the act are subject to the Contract Disputes Act of 1978, 41 U.S.C. 601, et seq. Under the Contract Disputes Act, a prime contractor or subcontractor from whom moneys owned under a government contract are withheld may appeal the decision to withhold such moneys to the Court of Claims for de novo review. Although the Contract Disputes Act also provides for appeal to an agency board of contract appeals, with further appeal to the U.S. Court of Appeals for the Federal circuit, cases have held that an agency board of contract appeals is an inappropriate forum in which to decide questions of fraud. For example, Comada Corp. (1983, AS BCA) 832 CCH BCA, paragraph 16681. Therefore, appeal of administrative offsets and contracting officer directives and orders under this section must be to the Court of Claims.

In section 7(c)(1)(A), the word "potential" was changed to "possible" in order to make clear that the reference was to kickbacks that may have occurred rather than to kickbacks which may occur in the future.

THE JUNIOR OLYMPICS PROGRAM

HON. DAN LUNGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. LUNGREN. Mr. Speaker, I would like to congratulate Sears, Roebuck & Co. on its 10th anniversary as sole national sponsor of the AAU/USA Junior Olympic Program. There are over 2 million young people from ages 8 to the teen years who participate in Junior Olympics each year. In addition, there are approximately 200,000 other people who volunteer their services to help train and support these athletes. This makes Junior Olympics the largest amateur sports program in the United States.

The Junior Olympics Program was inaugurated in 1948 by the Amateur Athletic Union through permission of the U.S. Olympic Committee. It was the Nation's first blue ribbon grassroots development effort designed to interest the Nation's youth in Olympic sports and to give them an opportunity to compete against young people of their own age on the local level.

Now in its 38th year, the Junior Olympic Program constantly seeks to further develop out Nation's youth sports programs by offering competition to young athletes annually. All competitions are geared in accordance with the Olympic motto: "In the Olympics, it is not the winning but the taking part that counts."

The AAU/USA Junior Olympics Program has long been noted as the premiere discovery program for future U.S. Olympic athletes. Eighty-three members—18 percent—of the 470-member 1976 United States Olympic team at Montreal were former Junior Olympians. Yet, that 18 percent won an amazing 74 percent of America's gold and silver medals.

The 1984 Olympic games in Los Angeles once again brought honor and credence to the AAU/USA Junior Olympic Program. Former Junior Olympians made up a modest 11 percent of the 529 member U.S. Olympic team. They won, however, 29 percent of the individual gold medals and 22 percent of the individual silver medals.

Each year, the AAU/USA Junior Olympics conducts activities in 21 sports. Competition begins at the local level and winners then progress to State, regional, and national championships. Hundreds of thousands of medals, ribbons, and certificates of participation are awarded to AAU/USA Junior Olympic athletes. All are provided without cost by Sears, Roebuck & Co.

But the Sears sponsorship involves more than ribbons and medals. It includes administratives costs of conducting what is probably the world's largest sports program. A Junior Olympic handbook and rule book for each individual Junior Olympic sport are distributed yearly to thousands of volunteers across the United States. Display materials are given to meet directors. T-shirts, pathes, and bags are given to all athletes at national championships. Promotional and public relations materials are sent to meet directors. There is no charge for any of the support materials.

Sears also sponsors national television telecasts of Special Olympics which greatly contribute to their exposure. Additionally, a national radio sports network provides coverage for regional and national AAU/USA Junior Olympic championships. It too is sponsored by Sears.

We wish to honor those athletes who recently competed in the games this last August as well as Sears for its continuing efforts on their behalf. It is an example to the rest of the world how athletics and the free exterprise system can combine to form a partnership of excellence.

ALMA COLLEGE CELEBRATES 100TH ANNIVERSARY

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. SCHUETTE. Mr. Speaker, I want to today recognize the 100th anniversary of Alma College in Alma, MI, which was founded by action of the Presbyterian Synod of Michigan at Westminster Presbyterian Church in Grand Rapids on October 14, 1886.

Through its 100-year history, Alma College has joined the heritage of Judeo-Christian traditions with the continually relevant aims of liberal arts learning, doing so in accordance with its founding motto: "To the glory of God and the dignity of all people." Alma also is committed to creating in each student an intellectual curiosity about the wholeness of knowledge and a concern for value judgments which are critical to wise decisionmaking; helping each student to achieve their potential and to maintain a lifestyle based on integrity, self-respect, and purpose; and focusing on re-

lationships which promote the development of human potentiality while undergirding the values of individuals and the welfare of society.

The mission of the college is the liberation of people from ignorance, prejudice, and parochialism; the preservation and perpetuation of knowledge, skills, and values appropriate for free men and women; and the preparation of students for useful vocations in changing society. The curricular and extracurricular programs to achieve these goals are centered on the liberal arts and are designed to prepare graduates for entry into the traditional professional fields—law, medicine, teaching, and church vocations—as well as the "new professions" of management, business, government, and science and high technology fields.

The desire for a Presbyterian College in Michigan was as old as the synod of Michigan. At its first session in 1834, it was resolved, "that arrangements ought to be made immediately, in the territory, to secure a thorough literary and evangelical educational program."

In Detroit in 1885, a committee of nine was organized to see if any means could be realized for the establishment of an institution of higher learning in the State.

Persons who were instrumental in the founding of the college were: August F. Bruske, who proposed the resolution at the 1885 synod meeting in Detroit that a committee be appointed "to see if any means could be realized for the establishment of such an institution." Later he was to serve Alma College as its second president. J. Ambrose Wight, chairman of the committee appointed by the synod at Detroit in 1885; Alexander Folsom, a lumberman and member of Dr. Wight's church in Bay City who responded to a sermon given by Reverend Wight offering $50,000 to begin an endowment fund so that the college could be established. Ammi W. Wright, an Alma lumberman and businessman who offered a campus and two buildings to the synod if they would locate the proposed college in Alma. His continuing generosity helped to sustain the college during its early years. Theodore Nelson, who served as Alma College's first professor of English.

The following have provided leadership as presidents of the college: George F. Hunting, 1887–91; August F. Bruske, 1891–1912; Thomas C. Blaisdell, 1912–15; Harry M. Crooks, 1915–37; John W. Dunning, 1938–42, the only alumnus to serve as president; Roy W. Hamilton, 1943–46; Dale D. Welch, 1946–51; John S. Harker, 1951–56; Robert D. Swanson, 1956–80; and since 1980; Oscar E. Remick.

The original campus consisted of approximately 30 acres and two buildings, one recitation hall and a dormitory for women. Today Alma's campus of 80 acres has 20 major buildings, as well as a nearby 170-acre site used as an outdoor laboratory for work in biology and ecology.

Alma College has earned recognition as an outstanding liberal arts college. Please join me in congratulating this fine institution on the occasion of its 100th anniversary.

NEW GI BILL A TOP PRIORITY

HON. G.V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. MONTGOMERY. Mr. Speaker, the continuation of the new GI bill on a permanent basis beyond its June 30, 1988, expiration is one of the Army's top priorities. In addition to serving as a potent and effective incentive for recruiting a high quality Active and Reserve Force, this successful education program is benefiting the Nation as a whole.

Over 90 percent of Army recruits today are high school graduates. This impressive figure compares extremely favorably with the recruitment in 1980 of 54 percent graduates. As predicted by many studies, increased recruitment of high school graduates has significantly reduced the attrition rate, saving the Army about 13,000 personnel annually. Significant improvement has also been shown in recruit scores on the Armed Forces qualification test [AFQT]. In 1980, only 26 percent of those recruited scored in the upper half of this test. Today, 62 percent are scoring in the upper bracket. Without question, the availability of the new GI bill has contributed to this improved recruiting success.

Since the implementation of the new GI bill on July 1, 1985, the ability of the Army to attract high quality graduates has improved. The average monthly percentage of high quality graduate contracts written increased to 57.9 percent during the first 12 months of the new program compared to 50.8 percent for the final 12 months under VEAP.

The Army National Guard and Army Reserve have also benefited from the availability of the new GI bill. During the first 6 months of the educational assistance program for the reserve components, chapter 106 of title 10, high quality recruits in the Army Reserve increased by more than 30 percent as compared with the same period the year before.

An impressive 80 percent of new soldiers are presently participating in the new GI bill—double the rate under VEAP. Because the new program is such an attractive enlistment incentive, it is far more effective in attracting the high quality individuals the Army needs. Given the extremely competitive recruiting market, the result of an improving economy and declining youth population, the new GI bill is absolutely essential if the Army is to continue to recruit America's quality young men and women.

The Army's commitment to the new GI bill reflects this service's commitment to America's youth and has helped advance the Army to the highest level of public acceptance in recent years. Additionally, the Army recognizes the benefits to the Nation that will derive from this Educational Assistance Program. Those young people who further their education under the new GI bill will return $3 to $6 in increased local, State and Federal taxes paid for every $1 in GI bill benefits expended.

The new GI bill is proving to be a winner—for the soldier, the Army and the Nation. Without question, the loss of the program will have a negative effect on the personnel readiness of the Army.

KULPMONT VFW CELEBRATES 40TH ANNIVERSARY

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. KANJORSKI. Mr. Speaker, I am pleased to rise today in recognition of the 40th anniversary of the Wanzie-Miriello Post No. 8354 of the Veterans of Foreign Wars. Located in Kulpmont, PA, the Wanzie-Miriello Post was established after World War II by service-minded veterans and will be celebrating its anniversary at a banquet on October 25.

Kulpmont area veterans of World War I and World War II realized the need for a local chapter of the VFW and began to recruit members in September 1946. On October 10, approximately 30 members received their national charter. They named the post after two Kulpmont soldiers who lost their lives in service to their country; Cpl. Daniel Wanzie, who was killed in World War I, and S1c. Bernard J. Mlriello, a Navy serviceman killed during World War II.

Once the chapter received its charter, more than 145 veterans joined the organization and began to put together the community service activities which have become a hallmark for VFW chapters across the Nation. The group bought the building which formerly housed the Kulpmont Water Co. and has used the building as its headquarters ever since, allowing other local civic organizations to use its meeting rooms. The Wanzie-Miriello Post has given food baskets to less fortunate families at Christmas, provided wheelchairs and crutches to the needy, and has performed a number of services to remember their fallen fellow soldiers.

I have visited the Wanzie-Miriello Post in Kulpmont on a number of occasions and was impressed by the acute awareness the members have of national as well as local issues which affect veterans. Members have long served to share their knowledge with their neighbors in Kulpmont. The strength of any national organization depends upon the strength of each individual chapter, and the well-respected Veterans of Foreign Wars is fortunate to count among its member chapters the Wanzie-Miriello Post.

Mr. Speaker, those patriotic Americans who have risked their lives to defend our Nation continue to serve their country and their communities through organizations such as the VFW. I am pleased to share with my colleagues in the House of Representatives my congratulations to the Wanzie-Miriello Post of the Veterans of Foreign Wars on the occasion of their 40th anniversary.

REPRESENTATIVE BOB EDGAR HONORED BY GREEK-AMERICAN COMMUNITY

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. FLORIO. Mr. Speaker, it is with great pleasure that I bring to the attention of my colleagues an event hosted by the Greek-American community of the Delaware Valley area in honor of my colleague, Congressman BOB EDGAR, who is seeking to represent the State of Pennsylvania in the U.S. Senate.

The event, which was hosted by the president of the Federation of Hellenic American Societies of Philadelphia and the Hellenic Flame, Dr. Nick Tsirakoglou, was geared toward emphasizing the many steps BOB EDGAR has taken to address the concerns of the Greek-American community. I wanted to share with my colleagues the following article and express my support for BOB EDGAR's continued efforts to call attention to the continuing conflict on Cyprus and to strengthen relations between Greece and the United States. The article follows:

HELLENIC LEADERS HAIL EDGAR AS "FRIEND OF GREEK ISSUES"

(By Mary Anne Janco)

Calling Bob Edgar a "friend of Greek issues," members of the Greek community showed their support for the senatorial candidate at a fundraiser in Havertown Sunday night.

"Edgar has been supportive of Greek causes in Washington," said John Kamb, of Upper Darby, president of Apollo Tours. "As members of the Greek community, we feel we should support him in his effort to get elected as U.S. senator."

Edgar, the Democratic Congressman from the Seventh District, is running against incumbent Republican Sen. Arlen Specter.

"As many of you know parts of Greece are suffering greatly," Edgar said, referring to a recent earthquake in Kalamata and problems in Cyprus.

"Some of the relations between the United States and Greece have been strained," Edgar said. "We need to build stronger relationships. We need a Senator who will stand up and speak out on tough issues."

Guests at the fundraiser asked Edgar to oppose military aid to the government of Turkey and to continue to support human rights in Cyprus.

Paul Kotrotsios, of Havertown, general manager of the Greek Radio Network of America, said the Greek community is also asking for the withdrawal of all Turkish military forces from Cyprus. Cyprus was invaded by the Turkish Army in 1974, he said.

"We're asking for human rights in Cyprus," said Panos Lambrias, president of the Cyprus Brotherhood of Delaware Valley. "In Cyprus, 230,000 people are refugees in their own country."

Military aid has to be cut until there's a fair solution, Kotrotsios said.

The fundraiser, which was attended by approximately 40 people, was hosted by Dr. Nick Tsirakoglou and his wife, Depina. Tsirakoglou is president of the Federation of Hellenic American Societies of Philadelphia and the Hellenic Flame.

THE ICELAND SUMMIT

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. SHUMWAY. Mr. Speaker, I am very pleased that the President stood firm at the Iceland summit, demonstrating commendable tenacity as well as reason and fairness. He has made it clear that he is a strong negotiator who will not be taken in by the transparent tactics utilized by the Soviets, who seemed to believe victory would be theirs by leaving the strategic defense initiative until the end of the summit agenda. Hopefully, Mr. Reagan's steadfast refusal to sacrifice the SDI Program will draw needed attention to its many benefits here at home. Contrary to the contentions of detractors, SDI is a reasonable, "do-able," nonnuclear defense, able to protect us from the unpredictable threats of nuclear madmen throughout the world. My hope now is that the President will not find it necessary to "negotiate" further here at home, and that the American people will realize he has their best interests, strong national security, and the ultimate goal of realistic and verifiable arms reduction foremost in his mind.

IN HONOR OF JOEY AND MILLIE BAKER

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. LEVINE of California. Mr. Speaker, the Ketubah B'nai B'rith has presented its Distinguished Service Award to Joey and Millie Baker, two loving human beings who, in their service to others, further better relationships among people.

As the Ketubah award states:

Joey was selected in 1942 as "The Ideal AZA Boy" when he was honored at the International Convention of AZA (Aleph Zadik Aleph of B'nai B'rith) with the Sam Beber Award, named after the founder of AZA. A native Californian, Joey began his lifetime of service in Pasadena AZA, and held the high office of District Aleph Godol (President). He continues to support the B'nai B'rith youth program and has served as its District Advisory Board Chairperson. In addition to his leadership in B'nai B'rith, Joey, known as 'The Broker of Venice,' has been President of the Venice Reality Board, President of the Venice Chamber of Commerce, and was honored by the Santa Monica Chapter of the National Conference of Christians and Jews. He is a Rotarian, a member of the Masonic Order, and with Millie, active in the Del Rey Yacht Club and members of Sinai Temple.

Millie, born in Memphis Tennessee, came to Santa Monica in her teen years, and became a member of the Santa Monica BBG (B'nai B'rith Girls) where she met Joey through their active involvement in the B'nai B'rith Young Adult Organization. Both served as presidents in the higher ranks of the organization at the regional, district and national levels. Their marriage has been blessed with three children and a grandchild. The Baker home has been open to family and friends, and various charitable dinner functions. Millie is a member of the Rotary-Anne, serves on the advisory board of the Daniel Freeman Marina Hospital, the TGI of Northridge Rehabilitation Hospital, ADL's Women's Committee and is Vice President of the Del Rey Yacht Club Women's Auxiliary.

TRIBUTE TO ED MURPHY

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. SKELTON. Mr. Speaker, recently, I learned of the death of a friend and colleague from my days as a practicing attorney in Missouri.

Ed Murphy was a truly outstanding jurist and a trusted friend. The esteem in which he was held is exemplified in the record of the circuit court in the session following his death. Judge William J. Roberts offered the following tribute:

This court is informed that attorney Edward J. Murphy died on August 18, 1986. Mr. Murphy established his law practice in Butler in 1955.

He was a past president of the Missouri Trial Lawyers Association and a member of the American Trial Lawyers Association.

Mr. Murphy was a tenacious advocate for his clients, and a recognized champion of the rights and causes of the injured and oppressed. In those capacities he will not easily be replaced, if ever.

He freely and willingly gave of himself to aid and encourage the betterment of the members of his profession, both young and old. Though sometimes controversial, his wise counsel was often sought by the bar, bench, legislators and private citizens. He will be sadly missed by all.

He loved his profession. When at his best, Ed exemplified the highest qualities of a trial lawyer. As a young practitioner I often thought I'd never met a lawyer until I met Ed Murphy. The same thought holds true today.

The court pauses this day to honor this man and his memory.

It is ordered that these proceedings be spread upon the record of the court.

It is an honor to pay tribute to this outstanding representative of the legal profession before my colleagues in the U.S. House of Representatives.

TRIBUTE TO CONGRESSMEN JOHN McCAIN AND ELDON RUDD

HON. MATTHEW G. MARTINEZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 8, 1986

Mr. MARTINEZ. Mr. Speaker, I rise today to honor two friends and colleagues, JOHN MCCAIN and ELDON RUDD, who will be leaving the House of Representatives at the end of this year. As a Representative from a neighboring State, California, I know that the Arizona delegation, the California delegation, and the rest of the House deeply appreciate their

service, and will miss both JOHN and ELDON when we begin the 100th Congress next year.

There can be no doubt that both JOHN and ELDON have been in the forefront in the fight to ensure that this country's criminal statutes serve as effective deterrents to crime. ELDON, as a former FBI agent, has introduced legislation to impose the death penalty for those who are seriously involved in illicit drug dealing. This certainly has helped to provide impetus for this year's drug bill and the increase in penalties for illegal drug dealers. Without ELDON'S work and leadership on this issue, the drug bill would certainly not be where it is today. JOHN, on the other hand, has worked to impose severe penalties for those convicted of child kidnaping offenses. Certainly, this crime is extremely serious, and must be punished severely. I also wish to thank JOHN for his support of improved English proficiency in this country.

I know that the Congress will miss both JOHN and ELDON and their dedication to their work. I wish both of them good luck in future endeavors.

TRIBUTE TO JOHN SEIBERLING

HON. RICK BOUCHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 8, 1986

Mr. BOUCHER. Mr. Speaker, I rise to honor Representative JOHN SEIBERLING, who is retiring from the Congress after 16 years of service. I have had the privilege of working with JOHN through his chairmanship of the Public Lands Subcommittee as well as his membership on the Judiciary Committee.

I will always be grateful to JOHN for his hard work and strong support in obtaining the passage of my Virginia Wilderness Act in 1984. The effort to set aside these pristine lands had been ongoing for a number of years, and JOHN'S assistance was invaluable in finally achieving this wilderness designation. In addition to the Virginia Wilderness Act, JOHN successfully guided 19 other wilderness bills to enactment during the 98th Congress.

I will also remember JOHN for his willingness to address the complex and vital issue of the high rail rates charged by railroads that enjoy a monopoly over transportation lines. JOHN introduced the Railroad Antimonopoly Act to address this concern for shippers of bulk products, and I enjoyed working with him to advance the bill through our mutual membership on the Judiciary Committee. The Railroad Antimonopoly Act made impressive progress this year, and those of us committed to injecting competition into the rail industry to reduce high railroad rates will miss JOHN'S able leadership in the 100th Congress.

I wish JOHN well in his deserved retirement, and I thank him for his years of service to the Congress and the American people.

RADIO WNWK-FM

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. SCHEUER. Mr. Speaker, I would like to bring to the attention of my colleagues a unique, not-for-profit radio station that broadcasts to my district and to the Metropolitan New York/New Jersey/Connecticut area. WNWK-FM is a multilingual, multiethnic station that programs in 41 languages, 24 hours a day, 7 days a week. The station has approximately 4 million listeners, many of whom find WNWK's community service orientation to be their only source of information, instruction, job opportunities, and news concerning their ethnic community and homeland.

Since 1983, WNWK has been operated by Global Broadcasting, Inc., under an interim license. Since that time, the station has operated within the guidelines, expectations, and operating procedures of the FCC.

WNWK and Global Broadcasting have donated 100 percent of the station's profits to charitable causes throughout the 3 years of its operations. This has amounted to more than $200,000 each year. Included in these charitable causes are groups like the Fresh Air Fund, Newark Youth, Community College scholarships, the Boy Scouts, and drug rehabilitation centers.

In 1985, WNWK was awarded the Associated Press "Outstanding Community Service Award" for its region. On September 22, 1986, the Associated Press announced that WNWK, for the second year in a row, had won this prestigious award.

As the interim licensee, Global is prohibited by the FCC from competing for the permanent license. My interest and concern is for the station and for the continuation of a community service, multilingual, multiethnic broadcast service that will serve "the public interest" as the FCC is charged to do.

I hope the FCC will study and review the adequacy and availability of multilingual and multiethnic broadcast service to the Metropolitan New York area. The FCC should properly seek participation in the study from the appropriate committees of Congress and from individuals with considerable experience in the programming and broadcasting of multilingual, multiethnic programming and community service.

BUDGET PROCESS SUNSET REVIEW ACT

HON. TRENT LOTT

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. LOTT. Mr. Speaker, today I am introducing the "Budget Process Sunset Review Act of 1986." The bill would establish a bipartisan commission to study the impact of the budget process on the two branches, and recommend whether the process should be continued, modified or terminated. The bill would further require Congress to consider and act on the Commission's recommendations, and, unless Congress enacts legislation to continue or modify the budget process, it would expire on March 15, 1988.

Mr. Speaker, I think I've been as strong a supporter of the budget process over the years as anyone around here. I voted for it in 1974, and I've vigorously upheld its provisions through the years as a member of the leadership and the Rules Committee. But, like many of my colleagues, I've begun to wonder just how effective it has been and how much it may be distorting and disrupting the regular authorization and appropriations processes. I've formed no final opinions on those questions, but I do think they are legitimate enough to warrant a full-scale review of the budget process by a distinguished Commission comprised of Members of Congress, the public, the executive branch, and the Comptroller General. The Commission would report back to us by next September 30. Our committees would than have until the end of the year to report legislation either continuing the budget process in its present or modified form, or recommend its termination.

If Congress does not enact legislation specifically extending or modifying the budget process by March 15, 1988, the acts would expire. The bill would apply to both the Congressional Budget and Impoundment Control Act of 1974, and the Balanced Budget and Emergency Deficit Control Act of 1985, the so-called Gramm-Rudman-Hollings Act.

Mr. Speaker, I appreciate that there are those who will argue that this should be strictly an internal review by the House and Senate since we are dealing primarily with the congressional budget process. But I would disagree for two reasons. First, the 1974, Budget Act provides for not only a congressional budget process, but the Presidential impoundment and deferral authority as well. And the 1985 Balanced Budget and Emergency Deficit Control Act not only amends the Congressional Budget Act, but requires the President to submit budgets which conform with the maximum deficit amount each year, and to issue the Executive order sequestering funds if we don't meet that deficit target through the regular budget process. So, it is important that executive branch officers and employees be represented on this review Commission.

Second, we must never lose sight of the fact that the way we budget in both branches ultimately affects the people and the allocation of their tax dollars for public purposes. The budget process is much bigger than the internal mechanics of the Congress and the executive branch. It is the determining force in how the people's money will be spent. As such, there should be public representatives on this Commission.

Mr. Speaker, I am not suggesting that we should delegate to the Commission the ultimate power to decide the future of the congressional and executive budget processes. I have not provided in my bill for an up-or-down vote on the final recommendations of the Commission. Instead, I have simply required that the appropriate committees consider those recommendations and report to their respective Houses their own recommendation

as to whether the budget process should be continued, modified or terminated.

The action-forcing mechanism in all this, of course, is the sunset date which will fall some 5½ months after the Commission report is submitted. If legislation is not enacted by that March 15, 1988, date, then the two Budget Acts covered would expire.

I know there will be those who will argue that this is an invitation to inaction by those in Congress who, for a variety of reasons, oppose one aspect or another of the current budget laws. But, I do not agree that either House will let these acts expire without taking a vote on the alternatives. The very fact of a report by a distinguished commission should provide sufficient impetus for us to consider and vote on its recommendations or any options that might be proposed by our committees. I do not think the American people would forgive us for killing the budget process by inaction.

On the other hand, if we do not put in place a sunset date as an action forcing mechanism, I fear we will continue to putter along with the present system without taking the time or trouble to seriously consider the work of the Commission. I want this Commission's report to be something more than a dust-collector on a shelf, for a change. The sunset review process provided in my bill is the best way to ensure that result, in my opinion.

Mr. Speaker, I urge my colleagues on both sides of the aisle to join me in this sincere attempt to examine in-depth the current operation of our budget process and determine whether or how it should be continued. I think it's obvious to everyone that things are terribly out of kilter in Congress, and that the overpowering presence of the budget process is a major factor in that equation. I am hopeful this budget process sunset review proposal will point the way out of this morass.

At this point in the RECORD, Mr. Speaker, I include a brief summary of my bill. The summary follows:

H.R. 5699

BRIEF SUMMARY OF PROPOSED BUDGET PROCESS SUNSET REVIEW ACT

[Introduced by Representative Lott, Oct. 14, 1986]

Title: The "Budget Process Sunset Review Act of 1986".

Purpose: To establish a Commission on Budget Process Review, require congressional consideration of the Commission's recommendations, and to sunset the budget process if no action is taken to extend or modify it by March 15, 1988.

Establishment of Commission: There is established, not later than 60-days after enactment, a Commission on Budget Process Review. The Commission would cease to exist on Dec. 31, 1987.

Purpose of Commission: The purpose of the Commission is to study and review the operation and effectiveness of the Congressional Budget and Impoundment Control Act of 1974, and the Balanced Budget and Emergency Deficit Control Act of 1985, and their impact on congressional and executive operations with a view to determining whether such Acts should be continued, modified, or terminated.

Membership: The Commission shall be composed of 19 members including six each appointed by the President, President pro tempore of the Senate and Speaker of the House. Two public members shall be appointed by each, and not more than four executive branch officers or employees, four Senators, four Representatives. Not more than three members for each category of six shall be of the same political party. In addition, the Comptroller General shall serve as a member. A chairman and vice chairman shall be elected by the members.

Miscellaneous: Provisions are made for staff, per diem for non-Federal members ($150), travel, hearings, and consultants. To the maximum extent possible, the Commission would draw on existing executive and congressional staff having budgetary expertise.

Report. The Commission shall submit its final report to Congress not later than Sept. 30, 1987.

Congressional Review & Action: The report shall be referred to the appropriate committees of the House and Senate which shall conduct hearings and report their recommendations to their respective Houses no later than Dec. 31. 1987.

Sunset: Following such committee reports, unless legislation is enacted by March 15, 1988, specifically continuing or modifying the budget acts referred to above, such acts shall cease to be effective on that date.

CONGRATULATIONS TO NOBEL LAUREATE ELIE WIESEL

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. FEIGHAN. Mr. Speaker, I rise to extend a word of thanks to the Nobel Committee for its selection of this year's winner of the Nobel Peace Prize, as well as a word of congratulations to the winner, Boston University Prof. Elie Wiesel.

Elie Wiesel's selection for the Nobel Peace Prize is a heartening recognition of his profound vision, dedication, courage, integrity, and remarkable ability to communicate the horrors of the Nazi Holocaust to the world community. The Nobel Committee's citation for the award clearly expresses why Elie Wiesel has earned this extraordinary honor:

Elie Wiesel has emerged as one of the most important spiritual leaders and guides in an age when violence, repression and racism continue to characterize the world. Wiesel is a messenger to mankind; his message is one of peace, atonement and human dignity. His belief that the forces fighting evil in the world can be victorious is a hard won idea.

That idea is one that is shared by all who care about the cause of human freedom and dignity, a cause for which Elie Wiesel has devoted so much of his life and his work.

As a child, he was deported from the small town of Sighet in present day Romania, and sent to the concentration camps at Auschwitz and Buchenwald. At Auschwitz, his mother and his younger sister died; at Buchenwald, his father. Wiesel was separated from two older sisters, and did not learn that they had survived until the war has been won and the concentration camp survivors were liberated.

In the years since that liberation, Elie Wiesel has devoted his life to ensuring that the millions who lost their lives in the holocaust are not forgotten, that they have not died in vain. In over a score of books and essays, he has reminded us of the horrors of which man is capable, and of the responsibility that we all bear to head the Scriptural call and "undo the heavy burden and let the oppressed go free."

His selection today as a Nobel Peace laureate places him in the company of such previous winners as Andrei Sakharov, Mother Teresa, Lech Walesa, and Archbishop Desmond Tutu. Like them, Elie Wiesel possesses those rare gifts of strength, courage, and grace that enable him to "speak truth to power." He has been a conscience and a catalyst, a man of honesty and of compassion.

I know every Member of the House joins me in extending our heartfelt words of congratulations to Elie Wiesel on his selection for this great honor. The Nobel Committee reflects honor upon itself for having made such a magnanimous and fitting selection.

PUBLIC SUPPORT FOR SUPERFUND

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. DINGELL. Mr. Speaker, Congress has spoken on the vital issue of reauthorizing a strong Superfund bill by overwhelming passage of the Superfund conference report by both the House and Senate. It is a strong bill. It is a reasonable compromise. It is legislation vitally needed by our Nation, and particularly needed by States like Michigan which has 66 toxic dumpsites on EPA's national priority list.

This places the ball in the President's court. He can make a wise decision and sign the bill. On the other hand, he can make a very foolish and ill-advised decision and veto the legislation. Should the President take the foolish and ill-advised course of action, the Congress will certainly override his veto. The question now is one of timing.

I believe the vast majority of American citizens want a Superfund program, and will not stand for one man to stand in its way. Editorials published in newspapers throughout the entire country reflect this public attitude. For this reason, I urge my colleagues to read the following editorial entitled, "Superfund: Congress Steps Up To An Environmental Problem," which was published in the October 9 edition of the Detroit Free Press.

SUPERFUND: CONGRESS STEPS UP TO AN ENVIRONMENTAL PROBLEM

Congress clearly decided it had enough with the backing and filling over Superfund—one of the more useful and effective federal environmental programs—and both the Senate and the House have now voted overwhelmingly to fund the program at $8.5 billion for fiscal 1987. The money will come from taxes on industries whose pollutants made Superfund necessary in the first place.

President Reagan has threatened to veto the bill. Mr. Reagan takes a dim view of the revenue side of the measure because he opposes the imposition of any new taxes.

Well, hurrah for the Senate. By a vote of 88 to 8—a crushing majority—it sent Mr. Reagan a message the (1) the government has a health-and-welfare responsibility to the citizenry to spur the cleanup of toxic wastes by holding industries responsible for their own messes, and (2) it is not possible for the government to do its work without adequate revenue, which means taxes.

Environmentalists had almost despaired, thinking that perhaps Congress would let Superfund die. Some of the more zealous got a kick out of industry-bashing, which contributed to the crisis over Superfund's retention. But once apprised of the facts of the matter, the Republican-majority Senate did the right thing. Now, so has the House. Mr. Reagan ought to put down his "Manual of Absolutely Doctrinaire Economic Thought" long enough to see what many of his partisans in the Senate have seen about the necessity of Superfund.

In any event, a presidential veto of the appropriation would almost surely be overridden, and how, on the heels of the override of his South African sanctions, can that help the president's broader political cause?

TRIBUTE TO DOMINIC DI FRANCESCO

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. GEKAS. Mr. Speaker, the Pennsylvania American Legion could not have made a better choice when it elected Dominic DiFrancesco to serve as its 1986–87 State commander. In fact, Dominic is so well thought of and respected in Legion circles that he was elected to the coveted post without opposition. That, in my opinion, is quite an honor and a high achievement.

Having personally known Dominic DiFrancesco for many years, I find it especially satisfying to pay tribute today to a man who has dedicated his entire lifetime to serving his country and community. Dominic, or Donnie Di as his friends call him, was elected American Legion State commander on July 12, 1986. Prior to his election, he served successfully at every level of leadership in the Legion and continues his active involvement in his hometown post 594, Middletown.

Highlights of his American Legion service include 19th district commander and State vice commander from the central section as well as positions on various national committees and commissions. Dominic, who was a Navy communication technician during the Korean war, is currently employed as a planning and resource specialist at the New Cumberland Army Depot.

Dominic has chosen as his theme for the year, "Success is a journey and not a destination." This theme is most appropriate in that it accurately reflects a man who has never rested on his laurels but has always strived to go one better.

Mr. Speaker, I wish to extend my congratulations to Dominic DiFrancesco with the backing of the entire Congress for his many jobs well done.

KILDEE HONORS REV. JOSEPH R. ROBB OF MICHIGAN

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. KILDEE. Mr. Speaker, I rise today to pay tribute to the long and distinguished career of Rev. Joseph R. Robb. Reverend Robb will be celebrating the 40th anniversary of his ordainment on October 26, 1986, at the Knights of Columbus Hall in Davison, MI.

Reverend Robb went to Fowlerville High School from where he graduated in 1937. He then chose to attend Sacred Heart Seminary. He graduated in 1943 and 3 years later on October 26, 1945, at the Diocese of Lansing, Reverend Robb was ordained into priesthood. He started his vocation in Flint that same year at St. Michael's as an associate pastor. Over the following 10 years Reverend Robb took on three more positions as associate pastor, first at St. Mary's in Jackson, then at St. Mary's in Kalamazoo, and finally at St. Mary's in Three Oaks. From 1957 to 1962, he served as pastor at St. Mary's in Swartz Creek and then from 1962 to 1968 as pastor at St. Mary's in Paw Paw. Then in 1968 he came back to Flint to preside at the Holy Rosary Church, where he serves as pastor yet today. Currently, Reverend Robb is also the chaplain at the Bishop Joseph H. Albers Knights of Columbus Council No. 4090 in Davison.

Mr. Speaker, during his 40 years of service, Reverend Robb has succeeded in far surpassing his expected duties as pastor. Our communities and the congregations that he has led have greatly benefited by the dedicated and unselfish services of Reverend Robb. It is indeed an honor and a privilege to pay tribute to this highly regarded man on his 40th anniversary of ordainment.

NEW JERSEY AGENT ORANGE COMMISSION WORK YIELDS NEW TEST FOR DIOXIN EXPOSURE

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. FLORIO. Mr. Speaker, I have several times in the past drawn the attention of my colleagues to the work of the New Jersey Agent Orange Commission. The commission has been at the forefront of scientific research relating to tracing the levels of dioxin still present in Vietnam veterans who were exposed to agent orange during the Vietnam war.

As my colleagues will learn from the following article there has been substantial progress made in the means of discovering the exact levels of dioxin still in Vietnam veterans.

I commend the article to my colleague's attention.

The article follows:

[From the New York Times, Oct. 14, 1986]

HIGHLY SENSITIVE TEST CAN DETECT DIOXIN YEARS AFTER EXPOSURE

(By Erik Eckholm)

Using tools of breathtaking sensitivity, scientists have learned that they can discern traces of dioxin that have persisted in a person for years, even decades after exposure. The advance should help resolve the painfully inclusive debate over the dangers of the notorious chemical.

The proof that exposure leaves lasting remnants is a breakthrough, scientist say, because efforts to study the long-term health effects of dioxin and related chemicals have been subverted by uncertainty about who was really contaminated and who was not.

The steadily improving technology indicates only the presence of the chemicals, and says nothing about their impact on health. But with a method finally available for knowing who to compare with whom, "it will be possible to study health effects for more precisely than in the past," said Dr. Peter C. Kahn of Rutgers University. Dr. Kahn, a biochemist, was co-leader of a study of dioxin levels in Vietnam veterans conducted for the New Jersey Agent Orange Commission.

With techniques that can identify mere parts per quadrillion of chemicals in human fat—a quadrillion is a 1 followed by 15 zeros—scientists have discovered that dioxin persists in the body far longer than previously assumed. Recent studies of victims of industrial accidents, vietnam veterans who handled dioxintainted herbicides and residents of a contaminated area of Missouri have all found telltale traces of high past exposure.

In test animals, dioxin is one of the most poisonous substances known; minute amounts are deadly, and extended exposure to lower levels causes cancer and birth defects. In humans, high doses of the chemical are known to cause skin eruptions and liver and neurological ailments. Lower, repeated exposures have caused damage to the immune system, but efforts to show an ironclad link to subsequent cancers or other illness are mirped in controversy.

The main object of study so far has been the form of dioxin believed to be most dangerous, 2,3,7,8-TCDD. This chemical as well as dozens of other dioxins and more than 300 related chlorine-containing chemicals known as furans and PCB's resist breakdown and accumulate in the food chain.

In the coming years, as the detection method is standardized and its meaning is better understood, it could help identify those who actually have dangerous amounts of dioxin and need special medical attention. Equally crucial, it may also bring peace of mind to many veterans and others who find that, contrary to their fears, they were not seriously contaminated. Test results will probably also be introduced as evidence in lawsuits involving charges of dioxin damage. But scientists caution that not enough is known about the meaning of the technology to justify widespread screening.

For now, among other benefits, the technique appears likely to break the seven-year logjam that has blocked a Federal epidemiological study of whether some Vietnam veterans were harmed by dioxin. The chemical was a contaminant of Agent Orange, an herbicide sprayed during the Vietnam War. Despite veterans' pleas to answers, Federal scientists have so far been reluctant to undertake the study, which was mandated by

Congress in 1979. Officials have argued that the military records of herbicide spraying and troop movements are insufficient to identify those exposed with the precision necessary for a scientifically valid comparison of health. Until recently, senior Federal officials resisted the assertion of outside scientists that analysis of fat tissue could clarify the matter.

But just last month, at a conference in Japan on dioxins and related compounds, scientists from the Federal Centers for Disease Control announced that residents from an area of Missouri exposed to contaminated soils did indeed have markedly higher dioxin levels in fats from blood and body tissue than a control group. And last month, the C.D.C., which is managing several major health studies of Vietnam veterans, drew up plans to study fats in the blood of 450 veterans to validate the accuracy of estimates of Agent Orange exposure drawn from military records. This could eliminate the chief scientific objection to the proposed large-scale epidemiological comparison of veterans exposed to Agent Orange and those who were not.

The planned study of blood fats, which must first be approved by the Congressional Office of Technology Assessment, will take about six months, according to Dr. Vernon Houk, director of the Center for Environmental Health at the CDC. If results show that exposures can be reliably estimated from records, then the larger health survey will finally get under way, he said.

Exposure estimates used in the Air Force's continuing "Ranch Hand" study of men involved in spraying herbicides will also be tested against the detection method, Dr. Houk said. He said that it would not be feasible to apply the detection procedure itself, which costs $1,000 a sample, on the large scale required for the broader health surveys.

The Federal agency also plans to study people suffering five uncommon types of cancer that dioxin is suspected of causing, to see if victims have had unusual dioxin exposures.

At last month's conference in Japan, Dr. Kahn presented the results of the New Jersey study, which found that ten veterans who handled Agent Orange in the late 1960's had an average of 48 parts per trillion of dioxin in their fats, ten times the level in a control group of veterans. According to Wayne Wilson, executive director of the New Jersey Agent Orange Commission, the study was undertaken because of frustration with what he called the "footdragging of the Federal Government" on the matter. In the coming months the health status of the exposed and control groups will be compared, although in this study the number of subjects is too small to yield conclusive evidence of dioxin's dangers.

In the detection method, chemical residues in fat are analyzed with gas chromatography and mass spectrometry. Elements of fat likely to contain the target chemicals are separated from the rest, vaporized and their molecules given an electric charge. As they pass through magnetic fields, the charged molecules land at different points on a detector according to their weights, producing a pattern on a graph for analysis. The technology is advancing to ever more exquisite levels of sensitivity, but it is reliable only with extraordinary quality-control measures that have been mastered by a handful of laboratories so far, scientists said.

SWEDISH DETECTIVE WORK

Use of this method for detecting exposure to dioxin and related compounds was pioneered by Dr. Christoffer Rappe of the University of Umea in Sweden, who in the late 1970's began studying tissue from factory workers and later worked with Japanese scientists studying victims of a 1968 incident in which cooking oil was contaminated with PCB's and furans.

Over the last few years several American scientists began using the technique on veterans, industrial accident victims and others. Dr. Arnold Schecter of the State University of New York at Binghamton, for example, showed that the general population of industrialized countries was contaminated with a "background level" of dioxins and furans, apparently because the chemicals appear in many pollutants including industrial and incinerator emissions and exhausts from cars burning leaded gasoline, and have also been present in widely used herbicides.

Dr. Schecter and colleagues have also studied dioxin in the tissues of people in Vietnam and most recently showed that workers doused with dioxin in a West German factory in 1953 still carried an average of 25 times more of the chemical than their countrymen.

While outside scientists have welcomed the change of heart by the Federal Government regarding the utility of the detection method, the C.D.C.'s plans have not escaped controversy. Everyone agrees that obtaining blood samples is less intrusive and simpler than obtaining fat tissue. But Dr. Schecter said that many scientists think it is premature to rely on blood samples alone, as the C.D.C. plans to do. He has argued that fat tissue samples, with which scientists have far more experience, were still necessary for confidence in results. But Dr. Houk asserted that blood specimens could produce equally reliable results.

DISPUTE OVER TECHNOLOGY

Like nearly everything about dioxin, the relevance of the new technology to the controversial court settlement between Vietnam veterans and the makers of Agent Orange is also disputed. The judge who devised the settlement, which is now under appeal, concluded that it was impossible to prove who was damaged by Agent Orange, and that a fund should be shared among any veterans and their families suffering ills possibly related to the chemical.

Some who already opposed the settlement, such as Mr. Wilson of the New Jersey commission, himself a veteran, and Dr. Schecter, said that rather than ignoring the question of who actually suffered health damages, as they say the settlement does, they want to pursue answers. And studies using the detection method should make this possible. But others observe that the settlement involves legal as much as medical issues, that it will be impossible to prove that an ill person was not damaged by Agent Orange and that it will be years more before any medical answers are likely.

Even with the new technology, scientists say, major questions about dioxin's dangers will remain unanswered. Current trace levels of the chemical do not, for example, necessarily tell how great the initial exposure was, because scientists do not know how much the gradual process of chemical breakdown varies among individuals.

One European scientist recently astonished his colleagues by swallowing some dioxin to follow its passage through his body. But no one expects to see many more volunteers for this.

Many scientists said that for the time being there was no point in individuals, outside of formal studies, having their fat analyzed for dioxin contamination. Dr. Houk said he feared that "fly-by-night labs" would produce "meaningless results."

Even at the best laboratories, "we can get a number, but how do you interpret it clinically?" asked Dr. Kahn. "Why should a physician get a number if he doesn't know what treatment to give?" But maybe, he said, things will be different four or five years from now.

IGLWU OPPOSES HOMEWORK DECISION

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. FRANK. Mr. Speaker, the people who oppose the recent decision by this administration to undo the restrictions on industrial work being done at home are not motivated by opposition to the desire of people to earn a living, but rather by concern that those working at home have historically been exploited by employers.

People working at home are far less likely than those working in shops or factories to be given the benefit of protections embodied in a variety of laws. The point is well illustrated by a recent article in the AFL–CIO Federationist, written by Jay Mazur, president of the International Ladies Garment Workers Union. ILGWU was a pioneer in protecting vulnerable workers from exploitation, and it continues to be one of the staunchest defenders of workers rights in American society. I ask that Mr. Mazur's article be printed so that people can understand exactly what motivates ILGWU in its principled and thoughtful opposition to the homework decision.

HOMEWORK

The Reagan Administration has decided to legalize industrial homework in the industries in which the Labor Dept. banned it almost half century ago. The Administration would have us believe that restrictions on homework are a relic of the past, when in fact the conditions these regulations were intended to prevent have returned with a vengeance. The sweatshop has risen again on our cities reviving the scenes of crowded factories and sewing in tenements, child labor and starvation wages which were the shape of this country at the turn of the century. To legalize homework under these conditions is a return to the industrial Dark Ages.

50-YEAR "EXPERIMENT"

When the Administration of the Wage & Hour Division of the Labor Dept. moved in 1942 to outlaw homework in seven industries—jewelry, gloves and mittens, knitted outerwear, women's apparel, buttons and buckles, handkerchiefs and embroidery—he had good reasons to do so. He knew that the Fair Labor Standards Act, which prescribes minimum wages, maximum hours and other labor standards, could not be enforced unless homework was abolished in these industries. He knew it from his own experience; he knew it from the experience of

state governments over more than a half century.

Sweatshops and homework have always gone hand in hand. In a factory, no matter how exploitative, workers still have some recourse. They may join together in collective action, they may look for the union organizer, they may call in the government inspector. But send the work home—to a worker who has had to pay for her own machine and her own electricity—and it is impossible for workers to join together in their own defense and it is impossible for the government to inspect for minimum wage, child labor, or health and safety violations.

The Dept. of Labor itself in 1967 (The Growth of Labor Law in the United States) said it very clearly:

"While there were distinct advantages to the employer who used homeworkers, all other persons involved suffered.

"Industrial homework means:

"To the homeworker—long hours and low pay.

"To the children of the homeworker—child labor, with its attendant evils.

"To the fair-minded employer—unfair competition, because he has to compete with the employer who pays lower wages and who passes on part of his overhead cost.

"To the factory worker—a constant threat to standards of hours, wages, safety and other established working conditions.

"To the consumer—the risk that many products he uses have not been subject to the protective sanitary regulations of the factory."

The problem is an old one. The first attempt to regulate industrial homework was in 1871 by the state of Massachusetts.

For nearly half a century before 1942, state after state and then the federal government tried to "regulate" industrial homework while licensing it and they failed. The long experiment in the laboratory of reality proved that unless industrial homework was banned, it could not be controlled.

It became abundantly clear that industrial homework was a way, the simplest way, to break laws intended to protect workers, children, other producers and consumers. When the state passed a law regulating child labor in factories—where inspection is relatively easy—the number of children in homework rose. When a law was passed regulating the hours of work for women in factories, workers were given bundles of piece goods to sew at home.

In the early New Deal days, the federal government moved to license and regulate industrial homework—just as the states had tried to do.

The United States Children's Bureau concluded of the New Deal experiments under the National Industrial Recovery Administration: "Great gains were made where the codes prohibited the giving out of homework. But in the industries in which homework was still permitted, even though limited by certain regulations, the ancient evils continued to exist and to constitute a menace to the higher labor standards that had been achieved for factory workers."

GOVERNMENT FAILED

The inability of government agencies to enforce minimum labor standards as long as homework was permitted finally compelled the Dept. of Labor to ban industrial homework in seven industries in 1942.

The testimony is there. But even in the absence of the long historical record, simple common sense tells why it is impossible to "regulate" homework once it is licensed.

The Fair Labor Standards Act calls for a minimum wage, based on earnings per hour. Unless there is a government inspector in every home where industrial work is carried on, how is it possible to know how many hours were worked? There are no time clocks, and if there were, who would supervise them? The law forbids child labor under a certain age. How many eyes would Uncle Sam need to peer into all those homes to see when a child is watching TV or handling pins or doing both?

The law calls for employer and employee payments to government programs such as unemployment insurance, social security, workers' compensation. How would Washington ever know how many cousins, sisters, aunts or neighbors are paid to lend a hand with the work—without any contributions to government funds? The law also requires that a certain percentage of the pay will be deducted for income taxes. But payment to homeworkers is notoriously a cash operation, a vigorous part of the underground economy, with under-reporting or non-reporting of income.

DECADES OF FAIRNESS

From 1942 until Ronald Reagan was elected President, the ban on industrial homework was unchallenged. Like the minimum wage and the ban on child labor, they were part of the industrial decency which the New Deal has brought to this country.

Even the arch-conservative ideologues of the Reagan Administration would not dare to repeal the minimum wage or the ban on child labor or the basic protections of worker safety which the labor movement has gained over so many decades. Yet, by legalizing homework in these industries—industries chosen because they were historically most prone to exploitation and sweatshop conditions—the Reagan Administration effectively proposes to repeal these basic labor standards for our most vulnerable workers.

Moreover, by the late '70s, the sweatshop had reappeared in an industry which had barely changed in structure and technology in 50 years. A combination of factors including a large influx of immigrants, many of them undocumented, growing competition from low-wage imports and cuts in labor standards enforcement due to government budget cutting contributed to the rise of the sweatshop. Labor Departments across the country were finding illegal industrial homework, for wages commonly as low as $1 to $1.50 an hour. Clearly, there could not not have been a less auspicious time to repeal the ban on industrial homework.

The Reagan Administration, allied with right-wing and anti-labor forces throughout the country began the attack on industrial homework early in Ronald Reagan's first term—on May 5, 1981, when they first proposed legalizing all industrial homework.

From the start, the Administration portrayed their assault on our basic rights and protections as a defense of individual liberty. Their efforts, they claimed, were in defense of the freedom to work of a group of Vermont women who made knitted ski caps in their homes. These workers were a far cry from the typical homeworker—they were rural, middle-class women who worked in pleasant and spacious homes. Yet even in this ideal setting, frequent violations of the minimum wage were found by the Labor Dept.

The International Laides' Garment Workers' Union, joined by other unions, legitimate apparel employers, community organizations, the Depts. of Labor of various states and five previous U.S. Secretaries of Labor, fought the Administration's attempt to legalize homework. Finally, after protracted legal battles, the Dept. of Labor went ahead in 1984 with a much more limited proposal—lifting the ban on homework in the knitted outerwear industry only and creating a system or registration. This was a return to the failed efforts by many government agencies in the decades before 1942 to "regulate" industrial homework.

FAILED REGULATION

The Dept. of Loabor's efforts to regulate industrial homework in this one industry—one that is relatively small and not typical of other apparel industries—have been no more successful than earlier attempts. This failure is hardly surprising, since there is little evidence that the Dept. of Labor under Reagan even made a good-faith effort to enforce the new regulation.

Few employers in the knitted outerwear industry have registered with the Department of Labor, and in most of these cases the employer has been found in violation of the Fair Labor Standards Act. Record-keeping, the key to any effort to regulate homework, has been deficient in nearly all cases. Little effort has been made to crack down on homework operations which fail to register. The government investigates homework primarily on a complaint-only basis, despite the clear evidence that homeworkers—out of fear and desperation—rarely complain.

In the face of all this—in the face of almost a century of hands-on proof that licensed homework cannot be regulated, in the face of a rising tide of industrial homework to violate the industrial code and the tax law, in the face of the most recent experience in the knitted outerwear industry—the Dept. of Labor now proposes to lift the ban in the remaining six sectors covered since 1942.

This new effort to "get government off the backs of people" will effectively end federal labor standards in the industries where sweatshops have flourished on the backs of those workers who most need protection. Some are recent immigrants, often undocumented, with limited knowledge of English or awareness of their rights, but others are American citizens, who are poor and desperate for work.

In reporting on the findings of John Horn, New Jersey's Labor & Industry Commissioner, the Atlantic City Press in 1981 noted the particular vulnerability of immigrant workers: "In illegal operations, the homeworkers are poorly paid and the working conditions are not checked. Many employers pay the foreign homeworkers in cash, not only evading state and federal income tax, but also cheating the workers out of ligitimate social security and unemployment comnpensation benefits."

Frank Mercurio, Regional Administrator, Employment Standards Administration of the U.S. Dept. of Labor, at a 1981 hearing held by the New York State Dept. of Labor, added: "Homeworking is a perfect vehicle for utilizing and taking advantage of undocumented workers."

Yet precisely at this moment when the most unscrupulous employers are turning to homework, the Labor Department decides to make homework legal. Why?

The answer lies not in policy or in fact, but in ideology. This Adminstration has felt compelled to pursue its ideological convictions regardless of the real suffering inflicted—on the growing numbers of the poor, the unemployed, the homeless, the exploit-

ed. They believe that the body of social protection built up over decades is merely a restraint on personal freedom, and that sooner or later, everyone will flourish if only we release the free market to do its magic.

We will continue to resist this Administration's ideological fantasies, because we in the ILGWU know that to license homework is to license industrial hell. We cannot stand by while the Administration turns back the clock to the industrial Dark Ages.

STATEMENT BY DANTE FASCELL ON THE SAN SALVADOR EARTHQUAKE

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. FASCELL. Mr. Speaker, on October 10, 1986, an earthquake measuring 7.5 on the Richter scale hit the city of San Salvador, El Salvador. The effect was devastating—an estimated 900 dead, 150,000 homeless and $600 million of damage.

It was with great sorrow and sympathy that we here in the United States learned of this disaster. The Salvadoran people have spent the past decade struggling courageously against war, terrorism, and other man-made disasters. It is most unfortunate that they find the tremendous progress which they have made over the past several years so badly damaged by this natural disaster.

In response to this tragedy, the United States has shipped supplies of relief assistance—tents, blankets, water bladders, folding litters. It has also dispatched rescue and disaster technicians—a 5 member assessment team, a 15 member medical unit, a 4-dog and handler team, and a 5 member rescue team from Dade County. To date, the U.S. Government has provided approximately $1.5 million in assistance, and it has transported $1.5 million in donated medical supplies. Over the coming days and weeks we will be providing additional assistance. At the present time, existing authority and funds under the Foreign Assistance Act are adequate in order for the United States to provide whatever emergency and relief assistance may be needed.

President Duarte has said the earthquake has caused more damage than that caused by 7 years of guerrilla war. It will be several months before a full assessment of the damage can be evaluated and reconstruction plans drafted. When those assessments and plans are completed, I, for one, will stand ready to do what I can to help the Salvadorans in the massive rehabilitation and reconstruction job that lies ahead.

The Salvadoran people have demonstrated great fortitude in the travails they have confronted and begun to overcome during the past decade, and they deserve our help and prayers.
